1.0 EXECUTIVE SUMMARY

An Environmental Site Assessment - Phase I was prepared for the subject property located at 645-681 N Robertson Blvd & 648-668 N La Peer Drive West Hollywood, CA 90069. The scope of work for the Phase I meets ASTM E 1527-13 *Standard Practice for Environmental Site Assessments*. The purpose of the Phase I report is to provide information regarding the potential for hazardous material impacts to the soil and groundwater beneath the subject property. Such threats or material threats are identified in this report as recognized environmental conditions (REC). The presence of Historical Recognized Environmental Conditions (HRECs) and Controlled Recognized Environmental Conditions (CRECs) was also evaluated. The extent of this evaluation in conjunction with owner/client supplied data is intended to satisfy the requirements of all appropriate inquiry into the previous ownership and uses of the property. The scope of the work included a site reconnaissance, research of land use records and other sources for preliminary indications of hazardous material use, storage, or disposal at the property and/or on contiguous parcels. Redevelopment of the property is proposed.

The subject property consists of six rectangular shaped parcels of land that encompass approximately 1.95 acres. The property is currently developed with four structures and two asphalt-paved parking areas. Three of the structures (645-657 Robertson Blvd) are two-story commercial/retail spaces that are occupied by a furniture sales warehouse, hair salon, clothing store, and storage/office spaces. Historical site utilization research indicates that the subject property was initially developed with residential structures in the 1920s. The residential structures were mostly replaced in the 1940s with approximately four commercial buildings and the factory/warehouse structure. Additional major renovations around 1980 and 2004 resulted in the current structural configuration of the property (645-657 Robertson). The factory/warehouse structure (652 N La Peer) was constructed around 1929-1936 and has had a number of renovations in the years since.

No evidence of current or historical use, storage, generation and/or disposal of hazardous substances was observed onsite. The subject property is not identified on the standard government databases researched in this report. Several industrial waste files are maintained at the Los Angeles County Department of Public Works Environmental Programs Division for the subject property related to grease traps at current and former restaurants located on the property. No underground tank permits were contained in the files reviewed.

The nearest listed contaminated site to the subject property is the former Ever-Rite Equipment / current Rolls Royce servicing facility located approximately 300 feet to the west. The site had a documented release of gasoline and received case closure in 2002. Based on the direction of groundwater flow and the distance from the subject property, it is not considered likely that the soil and/or groundwater beneath the subject property have been impacted from this offsite release.

BA Environmental prepared a *Letter Report: Limited Phase II Subsurface Investigation, 653-655 North Robertson Blvd West Hollywood, California* dated December 8, 2003. The report pertains to a portion of the subject property that had former on-site spray booths and a hazardous materials storage room. BA obtained soil samples from six boring locations to a maximum depth of five feet. The samples were

analyzed for VOCs per EPA Method 8260B. No detectable concentrations of VOCs were found in any of the samples obtained and analyzed by BA. BA recommended that no further investigation or assessment was necessary at the property.

A minor data failure was encountered in the preparation of this report. Review of recorded Land Title Records including environmental liens was not included. These records should be obtained and reviewed by the user.

The subject property was historically developed with a machine shop in 1969. An auto repair shop was present contiguous to the subject property for approximately 30 years (1969-2000). There was also a dry cleaning facility adjacent to the subject property from 1990-2013. The presence of a historical clothes cleaners upgradient from the subject property provides the potential for releases of dry cleaning solvent (PCE/carbon tetrachloride), which could impact soil, soil gas and groundwater beneath the subject site. Impacts associated with PCE could potentially give rise to a vapor encroachment condition into future onsite structures. **The historical offsite clothes cleaners and contiguous auto repair facility are considered recognized environmental conditions (RECs) in connection with the subject property. Sampling of soil/soil gas is recommended. This assessment has revealed no evidence of historical recognized conditions (HRECs) or controlled recognized conditions (C-RECs) in connection with the subject property**

A pre-demolition asbestos/lead survey by a certified asbestos consultant is recommended for the subject property buildings prior to any demolition activities.

2.0 INTRODUCTION

The following report presents the findings of the Environmental Site Assessment - Phase I prepared for the subject property located at 645-681 (odds) N Robertson Blvd & 648-668 (evens) N La Peer Drive West Hollywood, California 90069. The scope of the Phase I study meets ASTM E 1527-13 *Standard Practice for Environmental Site Assessments* and included research of available land use records and other sources for preliminary indications of hazardous material use, storage or disposal at the property. The findings of this study are intended to provide information to the client regarding potential hazardous material impacts to the soil and groundwater beneath the site.

The scope of the investigation was conducted in general accordance with ASTM Standard Practice for Environmental Site Assessments – Phase I, Environmental Site Assessment Process ASTM E 1527-13. The steps outlined in this process are intended to permit a user (client) to satisfy one of the requirements to qualify for the innocent land owner, contiguous property owner, or bona fide purchaser limitations on CERCLA liability. Specifically, this report along with certain obligations of the client, constitutes All Appropriate Inquiry (AAI) into the previous ownership and uses of the property consistent with the standard of care as practiced in this area by environmental professionals. A main component of the assessment is to identify recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions, as they may affect the subject property. As defined by ASTM E 1527-13, a recognized environmental condition (REC) means “*the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.*” A controlled recognized environmental condition (C-REC) is defined as “*a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).*” An historical recognized environmental condition (HREC) is defined as “*a past release of any hazardous substances*

or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

An important component of complying with the ASTM E 1527-13 Standard is information to be obtained or in the possession of the client and/or seller of the property. Such information includes obtaining and review of a recent title report, any specialized information regarding the site or surrounding area which may give rise to identification of a recognized environmental condition, and/or reasons given by the seller should the purchase price be significantly lower than what would be reasonably expected for a property of similar size and value. Often a real estate appraiser is commissioned to evaluate the purchase or sale price of a property. Such an appraisal is outside the scope of this Phase I Assessment report.

The independent conclusions represent California Environmental’s (CE) professional judgment based on the conditions that existed and the information and data available during the course of study. Factual information regarding operations, conditions, and test data provided by the client, the owner or their representatives have been assumed to be correct and complete. This report includes **GENERAL FINDINGS** and **CONCLUSIONS AND RECOMMENDATIONS**, which together with the remainder of this report are subject to the **NOTICE** at the end of the report. **This report was prepared for the sole use and reliance by the client as identified on the title page of this report. Use of this report by other entities is expressly forbidden unless permission is granted by the client and CE.**

The scope of work included:

- A walkover of the site.
- Review of client/owner supplied information including a previous Phase II report.
- Review of building and grading permits on file with the City of West Hollywood Department of Building and Safety.

- Review of underground storage tank files and industrial waste records maintained by the Los Angeles County Department of Public Works Environmental Programs Division.
- Review of historical USGS topographic maps and historical aerial photographs maintained by EDR Company.
- Research of historical Sanborn Fire Insurance Maps maintained by EDR Company.
- Contact with the California Environmental Protection Agency, Department of Toxic Substances Control to review their files.
- Contact with the California Environmental Protection Agency, Regional Water Quality Control Board to review their files.
- Contact with the Los Angeles County Health Department to review their files.
- Contact with the South Coast Air Quality Management District to review their files.
- Review of the DOMS Online Mapping Program, Oil Field Maps, and oil well records maintained by the State of California Division of Oil, Gas, and Geothermal Resources.
- Review of the City of Los Angeles - City Wide Methane Ordinance Map (A-20960).
- Review of Los Angeles County Landfill Maps.
- Review of the following lists and maps of suspect or known contaminated sites; a complete listing of these sources is contained within **APPENDIX IV**.
 - California Regional Water Quality Control Board, (RWQCB) - *Computer Case Listing of Reported Underground Tank Leaks*, covering Los Angeles County.
 - California Department of Health Services - *Hazardous Waste and Substance Sites - Cortese List and Contaminated Wells List*, which includes the *Bond Expenditure Plan* (BEP) sites.
 - California Environmental Protection Agency, Facility and Manifest Data, HAZNET.
 - Historical California Environmental Protection Agency, Department of Toxic Substances Control - *CalSites List*.
 - California Department of Health Services, *Hazardous Waste Information System* (HWIS) and Tanner Report.

- California Integrated Waste Management Board, *Solid Waste Information System* - (SWIS) List.
- State Water Resources Control Board, *Toxic Pits Clean-up Act* (Toxic Pits).
- State Water Resources Control Board, *Hazardous Substance Storage Container Database* (UST, LUST, SLIC, and WDS).
- U.S. Environmental Protection Agency - *National Priorities List* (NPL).
- U.S. Environmental Protection Agency - *Comprehensive Environmental Response, Compensation, and Liability Information System* (CERCLIS).
- U.S. Environmental Protection Agency, *Toxic Release Inventory System* (TRIS).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information, System Treatment, Storage and Disposal Facilities*, (RCRA-TSDF).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information System, Large Quantity Generators*, (RCRA-LQG).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information System, Small Quantity Generators*, (RCRA-SQG).
- U.S. Environmental Protection Agency - *Superfund Amendment and Reauthorization Act, Title III*, (SARA Title III).
- U.S. Environmental Protection Agency, *Emergency Response Notification System* (ERNS).
- U.S. Environmental Protection Agency, *Facility Index System* (FINDS).
- U.S. Environmental Protection Agency, *Civil Enforcement Docket* (DOCKET).
- A review of government records databases of suspect or known contaminated sites and historical city directories research was performed by EDR Company. The results of the search are summarized in this report. The EDR reports are enclosed in **APPENDICES II** and **IV**.
- Review of previous environmental report prepared by BA Environmental dated December 8, 2003.
- Preparation of this report.

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located between N Robertson Blvd and N La Peer Dr, south of Santa Monica Blvd, in the City of West Hollywood, California, see **FIGURE 1 - VICINITY MAP**. The current street addresses for the property are 645, 647, 653, 655, 657, 661, 665, and 681 N Robertson Blvd and 650, 652, and 668 N La Peer Dr. According to the Los Angeles County Tax Assessor's office, the Assessor's Parcel Numbers (APNs) for the subject property are 4336-009-003, -004, -005, -006, -007 & 4336-010-005.

3.2 SITE RECONNAISSANCE

The site conditions were observed during a reconnaissance conducted by Mr. Samuel T. Buckley of California Environmental and Mr. Darren Embry on June 3, 2014. California Environmental completed an Environmental Field Reconnaissance Checklist during the site reconnaissance. An Environmental Field Interview/User Questionnaire was provided to Mr. Darren Embry. The Field/User Questionnaire was not returned. The Environmental Field Reconnaissance Checklist is included in **APPENDIX I**. The features described below are shown on the enclosed **FIGURE 2 - PLOT PLAN**. Photographs of the subject property are attached in the **ILLUSTRATIONS** section of this report.

3.2.1 Description of Property/Proposed Project

The subject property consists of six contiguous rectangular shaped parcels of land that encompass approximately 1.95 acres. The property is currently developed with four structures and two asphalt-paved parking areas. Three of the structures (645-657 Robertson Blvd) are two-story commercial/retail spaces that are occupied by a furniture sales warehouse, hair salon, clothing store, and storage/office spaces. These structures were built in the early 1940s with major renovations in 1980 and 2003-2004. The fourth structure (652 N La Peer) is a large multi-story warehouse (former manufacturing) structure that has been converted to a nightclub on the upper floors with a gym on the ground floor. This structure was built between 1929 and 1936 with alterations/renovations in the years since. Access to the property

is via N La Peer Dr to the west and Robertson Blvd to the east. It is proposed to redevelop the site with a multi-story mixed use (hotel/retail/restaurant) structure with four levels of subterranean parking.

3.2.2 Adjacent Properties

The subject property is bound to the north by commercial/retail properties (restaurants, hair salon, car sales) with Santa Monica Blvd beyond; to the east by Robertson Blvd with commercial/retail properties (restaurants, salons, clothing stores) beyond; to the south by commercial properties (lumber company, office spaces, clothing stores); and to the west by N La Peer Dr with commercial/retail properties (upholstery shop, etc).

3.2.3 Topography and Drainage

The subject property has a gradual slope towards the south. The topographic elevation of the subject property ranges from approximately 200-220 feet amsl. Drainage from the site is by sheetflow towards the adjacent city streets. Floor sink drains were observed in the kitchen area of the Factory nightclub (652 N La Peer). No other evidence of surface drains, catch basins, sumps or standing water was observed on the subject property at the time of the site reconnaissance.

3.2.4 Past Uses of the Property

No evidence of the past use, treatment, storage, disposal or generation of hazardous substances was observed on the subject property at the time of the site reconnaissance.

3.2.5 Use of Hazardous Substances

No evidence of significant hazardous substance use was observed on the subject property at the time of the site reconnaissance.

3.2.6 Storage Tanks

No evidence of existing aboveground or underground storage tanks, clarifiers, sumps, or grease interceptors was observed on the subject property at the time of the site reconnaissance.

3.2.7 Containers of Hazardous or Unidentified Substances

No evidence of containers of hazardous or unidentified substances was observed on the subject property at the time of the site reconnaissance.

3.2.8 Solid Waste Disposal

Several trash bins were observed. No evidence of spills and/or staining was observed on the pavement beneath the bin. No other evidence of onsite disposal or landfill of solid waste material was observed on the subject property at the time of the site reconnaissance.

3.2.9 Poly-Chlorinated Biphenyl's (PCBs)

Evidence of PCB containing transformers was not observed on the subject property at the time of the site reconnaissance. Fluorescent light fixtures were observed in several of the subject buildings. Fluorescent light fixtures manufactured prior to 1977 (and fluorescent light fixtures without a date of manufacture) may have ballasts capacitors that contain PCBs, which is recognized by the EPA as a suspect carcinogen. Used fluorescent lamp tubes are considered to be hazardous mercury-bearing waste requiring proper disposal in accordance with local, state, and federal requirements. The onsite ballasts were not inspected during the site reconnaissance.

Due to the date of construction of the subject buildings, it is considered likely that the onsite ballasts contain PCB concentrations greater than the federal action limit of 50 parts per million (ppm). It is recommended that the fluorescent light fixtures be inspected for PCB content labels prior to disposal.

3.2.10 Heating/Cooling Equipment

Natural gas and electricity are the presumed fuel sources for heating and cooling equipment.

3.2.11 Asbestos Containing Building Materials (ACM)

Sampling of suspect asbestos containing material (ACM) was not included in the scope of work for this study. Suspect ACM was observed in the form of floor tiles, linoleum, ceiling tiles, joint compound, and wallboard. Due to the age of construction of the subject buildings it is recommended that an asbestos survey be conducted by a certified asbestos consultant prior to renovation or demolition of the subject building(s).

3.2.12 Wastewater Disposal Systems

A wastewater treatment system (grease trap) is located in the restaurant area of the 652 N La Peer nightclub facilities. No other evidence of wastewater treatment or disposal systems was observed on the subject property during the site reconnaissance.

3.2.13 Radon

Radon hazard assessment was not included in the scope of this study. However, the EDR research report indicates the levels of radon at 28 sites located within the 90069 zip code in Los Angeles County were below four picoCurie per Liter (pCi/L), the Federal Action level.

3.2.14 Lead

Sampling of suspect lead in paint was not included in the scope of work for this project. Lead content in paint was significantly reduced in 1977. Due to the date of construction of the subject buildings, it is possible that lead based paint was utilized onsite. The paint coating of the structures were in good condition at the time of the site reconnaissance.

3.2.15 Wells

No evidence of dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells or other wells was observed on the subject property at the time of the site reconnaissance.

3.2.16 Odor

No evidence of strong, pungent or noxious odors was noted on the subject property at the time of the site reconnaissance.

3.2.17 Stressed Vegetation

No evidence of stressed vegetation was observed on the subject property at the time of the site reconnaissance.

3.2.18 Staining or Residue

No evidence of staining or residue was observed on the subject property at the time of the site reconnaissance.

3.2.19 Pits, Ponds, or Lagoons

No evidence of pits, ponds, and/or lagoons was observed on the subject property at the time of the site reconnaissance.

3.2.20 Potable Water Supply

Water is supplied to the subject property by Beverly Hills Water.

3.2.21 Sewage Disposal System

The subject property is connected to the public sewage disposal system.

3.2.22 Other Conditions of Concern

No other conditions of environmental concern regarding potential sources for soil and groundwater contamination were observed on the subject property at the time of the site reconnaissance.

3.3 SITE DRIVE-BY

A drive-by of the area within one-quarter mile of the property was conducted to help identify nearby sites that possibly use, store or generate hazardous materials. The area surrounding the subject property consists of predominantly commercial and retail properties. No service stations are located on the properties adjacent to the subject property. A list of selected environmental risk sites identified within a one-quarter mile radius of the subject property is included in the **STANDARD ENVIRONMENTAL RECORDS SOURCES** section of this report.

4.0 PREVIOUS WORK

California Environmental obtained and reviewed a *Letter Report: Limited Phase II Subsurface Investigation, 653-655 North Robertson Blvd West Hollywood, California* prepared by BA Environmental (BA) and dated December 8, 2003. The report pertains to a portion of the subject property that had former on-site spray booths and a hazardous materials storage room. BA obtained soil samples from six boring locations to a maximum depth of five feet. The samples were analyzed for VOCs per EPA Method 8260B. No detectable concentrations of VOCs were found in any of the samples obtained and analyzed by BA. BA recommended that no further investigation or assessment was necessary at the property. A copy of the report can be found in **APPENDIX V**.

No other previous environmental reports were provided for the subject property.

5.0 GEOLOGY AND HYDROGEOLOGY

The subject site is located at the north margin of the Peninsular Ranges Geomorphic Province near the south margin of the Santa Monica Mountains, within the Los Angeles Coastal Plain. Older and recent alluvial deposits derived from the mountains to the north underlie the site. The Santa Monica Fault is located approximately 3000 ft to the north. The property is within the western portion of the Hollywood Groundwater Basin within the transition to the Santa Monica Groundwater Basin to the west. A geotechnical engineering investigation conducted by Geotechnologies, Inc. in October 2014 indicated groundwater was encountered at depths between 22 and 28 feet below ground surface. Seepage was encountered at depths of 10-20 ft. The regional direction of groundwater flow is expected to be towards the south-southwest.

6.0 SITE UTILIZATION HISTORY

6.1 HISTORICAL CITY DIRECTORIES

EDR Company was contacted to research historical city directories for the subject property and adjacent sites. The city directories were reviewed at approximately five year intervals spanning from 1920-2004. A summary of city directories reviewed for the subject property is included in **TABLE I**. The EDR City Directory is attached in **APPENDIX II**.

6.2 BUILDING AND GRADING PERMIT RESEARCH

The City of West Hollywood Department of Building and Safety was visited for the purpose of researching building permits and Certificates of Occupancies for the property. The permit records are maintained by address. Below is a summary of the permits reviewed for the subject property.

650 La Peer Drive

One permit application (plan check period expired) was reviewed for the interior remodel of “Workout Warehouse.”

652 La Peer Drive

Several special event permits for temporary electrical/structures were found. Roof renovation permits from 2007 and 2002 were also found. Interior renovation permits from 1999 and 1987/88 were found. The earliest record of the property in the file was a miscellaneous permit from 1983.

645 Robertson Blvd

No permits contained in the file.

653-55 Robertson Blvd

The earliest record found was an approval to occupy the premises and a permit for the installation of a “paint room per fire department requirements” from 1983. A structural revision permit from 2004 for additional foundation work and the conversion of a furniture factory to a showroom with mezzanine was also found. Several other minor tenant improvement, fire sprinkler installation, and sign permits were contained in the file.

657 Robertson Blvd

Two permits from 2012 for tenant improvements were found. The oldest record in the file was a 1991 permit for the installation of a water heater.

661-665 Robertson Blvd

The oldest permit found was a 1981 sign permit that identified Koontz Hardware as the owner. Several renovations including the removal of a wall (restaurant) 1989, a new detached office and storage room in 1999 and tenant improvements to an existing restaurant in 2000 and 2008 were found. Additionally, a number of special event permits for temporary tent structures were contained in the file.

6.3 UNDERGROUND STORAGE TANK PERMIT RESEARCH

The Los Angeles County Department of Public Works Environmental Programs Division were contacted by our personnel to research their files for underground storage tank (UST) permits and industrial waste records for the subject property. Files reviewed for the subject property included a number of Industrial Waster permits related to grease traps at current and former restaurants located on

the property. No underground tank permits were contained in the files reviewed. The inquiry and response letters and copies of files reviewed are attached in **APPENDIX III**.

6.4 STATE REGULATORY AGENCY FILE REVIEW

Inquiry letters were sent to the State of California Department of Toxic Substances Control (DTSC) and the California Regional Water Quality Control Board – Los Angeles Region (RWQCB). Response letters indicate that no files are maintained for the subject property. The agency inquiry and response letters are included in **APPENDIX III**.

CalEPA DTSC and RWQCB online databases were also reviewed. The DTSC Envirostor lists Federal Superfund, State Response, Voluntary Clean-ups, School Clean-ups and Investigations, Military Evaluations and Geotracker LUFT/SLIC databases. The subject property is not listed on the databases researched for this report. There are seven listed facilities identified within a 2,000-foot radius of the subject property. A more in-depth look at nearby impacted sites can be found in the **STANDARD ENVIRONMENTAL RECORDS** section of this report.

6.5 LACHD AND SCAQMD FILE REVIEW

An inquiry letter was sent to the Los Angeles County Health Department (LACHD) for any information they may have regarding soil, water or air contamination at the subject property. The SCAQMD online FIND database was researched for any active and/or inactive records related to the subject property. A review of the SCAQMD Facility Information Detail (FIND) database indicates that no records are maintained for the subject property addresses. A response letter from LACHD indicates that there are no records maintained for the subject property address(es). The agency inquiry and response letters and are included in **APPENDIX III**.

6.6 HISTORICAL AERIAL PHOTOGRAPH RESEARCH

Historical aerial photographs were reviewed as part of this study. The photographs are part of the aerial photograph collections maintained by the EDR Company. Thirteen photographs were reviewed for the

subject property. The photographs are summarized below in **TABLE II**. The aerial photographs are attached in **APPENDIX II** of this report.

TABLE II
Historical Aerial Photographs

Date	Flight No.	Description
1928	Fairchild	Subject property is developed with multiple (>3) residential and commercial structures. Property is bound to the north by additional residential/commercial structures; to the south by residential properties; to the east by what is now Robertson Blvd; and to the west by La Peer Drive.
1938	EDR	Subject property and surrounding area appear largely similar to the previous photo.
1948	EDR	Subject property is developed with approximately 3 residential structures and a parking lot at the northern end of the property, and multiple commercial/industrial structures towards the middle and southern portion. The commercial structure located towards the center of the property spans almost the entire width of the property. Property is bound to the north by commercial properties/structures; and to the south by undeveloped property to the east and residential property to the west.
1952	EDR	Subject property and surrounding area appear largely similar to the previous photo.
1964	EDR	Subject property and surrounding area appear largely similar to the previous photo.
1972	EDR	Subject property is developed is developed with two parking lots, one at the northern most part and the other bordering La Peer Dr, and multiple (3-4) commercial structures. Property is bound to the north and south by additional commercial structures.
1981	AMI	Subject property and surrounding area appear largely similar to the previous photo.
1989	USGS	Subject property and surrounding area appear largely similar to the previous photo.
1994	EDR	Subject property and surrounding area appear largely similar to the previous photo.
2005	EDR	Subject property is developed with 2 large parking lots (same locations) and approximately 3 commercial structures towards the center and southern part of the property. Property is bound to the north and south by additional commercial structures/properties and to the east and west by the respective streets.
2009	EDR	Subject property and surrounding area appear largely similar to the previous photo.
2010	EDR	Subject property and surrounding area appear largely similar to the previous photo.
2012	EDR	Subject property and surrounding area appear largely similar to the previous photo.

6.7 HISTORICAL FIRE INSURANCE MAPS

The EDR Company was contacted to review historical fire insurance maps for the subject property. Maps covering the subject property for three time periods (1929-1969) were found. The map descriptions are summarized below in **TABLE III**. Copies of the fire insurance maps are attached in **APPENDIX II** of this report.

TABLE III
Historical Fire Insurance Maps

Date	Description
1929	Subject property is developed with approximately 19 residential structures and automobile garages. North of the property lies a branch of the Pacific Electric railroad. Property is bound to the north and south by residential properties and to the east and west by streets.
1950	Subject property is developed with approximately 3 residential structures as well as multiple commercial/industrially utilized structures that include a plumbing shop, wood working shop, office buildings, a cosmetics warehouse, a plastic manufacturing plant, an ice cream plant and a machine shop. Adjacent to the northern most part of the property lies a sheet metal workshop to the west and a furniture refinishing shop to the north. To the north of the furniture refinishing shop on the corner of Santa Monica Blvd and Robertson Blvd there is a gasoline/oil service station.
1969	Subject property is developed with two parking lots, one located on the northern most portion of the property and the other on the west side of the property bound by La Peer Dr. Property is developed with multiple commercial/industrial structures that includes 2 wood working shops, about 5 office buildings, a furniture manufacturer located in the center of the property spanning almost the entire width of the property, a furniture factory, and a machine shop located at the southern most portion of the property. Property is bound to the north by several commercial structures that include a warehouse, a furniture upholstering shop and an auto sales and service shop with a metals/paint spray booth depicted on the map. To the south/southwest, there is a contiguous auto repair facility on La Peer Drive.

6.8 HISTORICAL TOPOGRAPHIC MAP RESEARCH

Historical USGS topographic maps were provided by EDR Company and from online database sources. Maps covering the subject property for twelve time periods were found. The map descriptions are summarized below in **TABLE IV**. The topographic maps are attached in **APPENDIX II** of this report.

TABLE IV
Historical Topographic Maps

Date	Quadrangle	Description
1896	Santa Monica	Subject property located in an area of little to no development. Property is located south of Coldwater and Laurel Canyon. Directly to the north and northwest (almost adjacent) lies the Pasadena and Pacific Railroad.
1900	Los Angeles	Subject property is undeveloped and exists close to or as wetlands located just south of the Pasadena and Pacific Railroad. Property located in an area of little to no development.

1901	Southern CA Sheet 1	Subject property and adjacent areas appear largely similar to the previous map.
1902	Santa Monica	Subject property and adjacent areas appear largely similar to the previous map.
1920	Santa Monica	Subject property located in an area of increased development. Located directly north and east of the property (almost adjacent) are two tracks of the Pacific Electric Railroad. The Salt Lake Oil Fields are depicted on the map <2 miles southeast of the property.

TABLE IV
Historical Topographic Maps-continued

1926	Hollywood	Subject property and surrounding area experiencing an increase in urban development. Property is developed with structure(s) and lies just south of Santa Monica Blvd.
1950	Beverly Hills	Subject property located in an area of urban development Property is bound to the east by Robertson Blvd.
1966	Beverly Hills	Subject property located in an area of urban development
1972	Beverly Hills	Subject property located in an area of urban development. Santa Monica Blvd, located directly north of the property, has been expanded.
1981	Beverly Hills	Subject property located in an area of urban development. An old railroad grade is depicted on the map as running parallel to Santa Monica Blvd located directly north of the property.
1994	Beverly Hills	Subject property and adjacent areas appear largely similar to the previous map.
1995	Beverly Hills	Subject property and adjacent areas appear largely similar to the previous map.

7.0 NEARBY CONTAMINATED SITES

7.1 LANDFILLS

The Major Waste System maps for Los Angeles County, the Solid Waste Information Systems (SWIS), and the Waste Management Unit Database (WMUD) were reviewed to identify landfills and transfer stations located near the property. Map no. 114-157 and the EDR database report indicate that there are no landfills or transfer stations located within a 2,000-foot radius of the subject property. No active hazardous waste landfills are located within Los Angeles County.

7.2 OIL FIELD MAPS/METHANE HAZARD ZONES

Oil field maps published by the State of California Division of Oil, Gas and Geothermal Resources (DOGGR) and online mapping systems (DOGGR Well Finder) were researched to determine if oil production occurred on or near the subject property. DOGGR Well Finder indicates the subject property is located approximately 1,000 feet southwest of the abandoned Sherman oil field. The Salt Lake oil

field is located approximately 1,500 feet to the southeast of the subject property. The San Vicente oil field is located approximately 2,000 feet to the south of the subject property. There are approximately eight abandoned/inactive coreholes and dry wells within a 2,000 foot radius of the subject property. All of these wells are over 1,000 feet from the subject property. The site is not located with a recognized Methane Hazard Zone.

7.3 STANDARD ENVIRONMENTAL RECORD SOURCES

In addition to the above records, agency database lists were reviewed for known or suspected contaminated sites and for sites which store, generate or use hazardous materials near the subject property. The subject property is not identified on the standard environmental government sources researched in this report. Twenty-nine environmental sites, listed on the RCRA-SQG, ENVIROSTOR, LUST, UST, SWRCY, CA FID UST, HIST UST, SWEEPS UST, HIST CORTESE, DRYCLEANERS, EDR US Hist Cleaners and EDR US Hist Auto Station databases, are located within a one-quarter mile radius of the subject property. The nearest listed impacted site to the subject property is located approximately 300 feet to the west. The former Ever-Rite Equipment/Rolls Royce servicing facility had a documented release of gasoline. The site received case closure in 2002. Based on the direction of groundwater flow and the distance from the subject property, it is considered unlikely that the soil and/or groundwater beneath the subject property have been impacted from this offsite release. Selected environmental risk sites found to exist within a 750 foot radius of the property are listed in **TABLE V**. The EDR Radius Map with GeoCheck is attached in **APPENDIX IV**.

TABLE V
Standard Environmental Record Sources

Name	Address	Distance from S.P.	Source(s)
Pride Cleaners	687 N Robertson Blvd.	Adjacent (N)	RCRA-SQG, FINDS, HAZNET, EDR US Hist. Cleaners

Marklee Cleaners	804-6 Hilldale Ave.	620 ft. NE	RCRA-SQG, HAZNET
Los Angeles Sheriff Station West Hollywood	720 N San Vincente	700 ft. NE	Hist. CORTESE, CA FID UST, SWEEPS UST, LUST, UST, LOS ANGELES Co. HMS

Note: A search of public information databases may omit some nearby contaminated sites due to missing or inaccurate information in the public record.

7.4 POTENTIAL VAPOR ENCROACHMENT CONDITION (p-VEC)

The State of California has adopted Indoor Air Quality Guidelines (CHHSL's) issued by CALEPA in 2005. Potential sources for indoor air contamination include degassing of solvents and other compounds from contaminated soil and contaminated groundwater. The former presence of an historical dry cleaning facility on a contiguous parcel presents the potential for a release of chlorinated solvent (PCE) into the soil and/or groundwater that suggests the potential impact of vapor encroachment into current/future onsite structures.

8.0 GENERAL FINDINGS

During the research phase of this study, the following information was obtained:

- Historical topographic map research indicates the subject property was developed by 1926.
- The elevation of the subject property ranges from approximately 200-220 feet above mean sea level.
- Topographic contour lines in the vicinity of the subject and adjacent properties indicate a gradual slope toward the south/southeast.
- Sanborn Fire Insurance Map research indicates the subject property was developed with approximately 19 residential structures in 1929. In 1950 the property remained developed with some residential structures but was primarily developed with commercial/light industrial structures including a cosmetics warehouse, an ice cream plant, and a machine shop. In 1969 the property was developed with the existing parking lots as well as several of the existing commercial buildings and several others that have since been removed.
- Historical aerial photograph research indicates that the subject property was developed in 1928.
- Building permit records indicate the subject property has been historically developed with primarily commercial structures. The oldest building permit record found in the files reviewed dates back to 1981.

- Historical city directories indicate that the subject property addresses have been utilized by a variety of commercial/retail/manufacturing tenants since the 1940s-50s. Prior to that time they were residentially occupied.
- Several industrial waste files are maintained at the Los Angeles County Department of Public Works Environmental Programs Division for the subject property related to grease traps at current and former restaurants located on the property. No underground tank permits were contained in the files reviewed.
- No records are maintained at DTSC for the subject property.
- No records are maintained at RWQCB for the subject property.
- No records are maintained at SCAQMD for the subject property.
- No records are maintained at LACHD for the subject property.
- No landfills or transfer stations are located within a 2,000-foot radius of the subject property.
- DOGGR Well Finder indicates the subject property is located approximately 1,000 feet southwest of the abandoned Sherman oil field. The Salt Lake oil field is located approximately 1,500 feet to the southeast of the subject property. The San Vicente oil field is located approximately 2,000 feet to the south of the subject property. There are approximately eight abandoned/inactive coreholes and dry wells within a 2,000 foot radius of the subject property. All of these wells are over 1,000 feet from the subject property.
- The subject property is not located within a recognized methane hazard zone.
- The subject property is not identified on the environmental government sources researched in this report.
- The nearest listed contaminated site to the subject property is the former Ever-Rite Equipment / Rolls Royce servicing facility located approximately 300 feet to the west. The site had a documented release of gasoline and received case closure in 2002. Based on the direction of groundwater flow and the distance from the subject property, it is not considered likely that the soil and/or groundwater beneath the subject property have been impacted from this offsite release.
- The depth to groundwater beneath the subject property is between 22 and 28 feet bgs.
- A potential vapor encroachment condition (p-VEC) was found associated with the subject property.

- The regional direction of groundwater flow is towards the southeast.
- California Environmental obtained and reviewed a *Letter Report: Limited Phase II Subsurface Investigation, 653-655 North Robertson Blvd West Hollywood, California* prepared by BA Environmental (BA) and dated December 8, 2003. The report pertains to a portion of the subject property that had former on-site spray booths and a hazardous materials storage room. BA obtained soil samples from six boring locations to a maximum depth of five feet. The samples were analyzed for VOCs per EPA Method 8260B. No detectable concentrations of VOCs were found in any of the samples obtained and analyzed by BA. BA recommended that no further investigation or assessment was necessary at the property.

During the site reconnaissance, the following observations were made:

- The subject property consists of six rectangular shaped parcels of land that encompass approximately 1.95 acres.
- The property is currently developed with four multi-story commercial structures and two asphalt-paved parking areas.
- The subject property has a gradual slope toward the south. Drainage from the site is by sheetflow towards the adjacent city streets.
- Sink drains were observed in the kitchen area of the Factory nightclub (652 N La Peer Dr). No other evidence of surface drains, catch basins, sumps or standing water was observed on the subject property.
- No evidence of the past use, treatment, storage, disposal or generation of hazardous substances was observed on the subject property.
- No evidence of hazardous substance use was observed on the subject property.
- No evidence of existing aboveground or underground storage tanks, clarifiers, sumps, or grease interceptors was observed on the subject property.
- No evidence of containers of hazardous or unidentified substances was observed on the subject property.
- Several trash bins were observed. No other evidence of onsite disposal or landfill of solid waste material was observed on the subject property.

- No evidence of PCB containing transformers or equipment was observed on the subject property.
- Natural gas and/or electricity are the presumed fuel source for the heating and cooling equipment.
- No evidence of wastewater treatment or disposal systems was observed on the subject property. A grease trap is located associated with the kitchens at 652 N La Peer and 665 N Robertson Blvd (nightclub).
- No evidence of dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells or other wells was observed on the subject property.
- No evidence of strong, pungent or noxious odors was noted on the subject property.
- No evidence of stressed vegetation was observed on the subject property.
- No evidence of staining or residue was observed on the subject property.
- No evidence of pits, ponds, and/or lagoons was observed on the subject property.
- The subject property is connected to the public sewage disposal system.
- No other conditions of environmental concern regarding potential sources for soil and groundwater contamination were observed on the subject property.
- The area surrounding the subject property consists of commercial/retail properties.

9.0 CONCLUSIONS AND RECOMMENDATIONS

Historical site utilization research indicates that the subject property was initially developed with residential structures in the 1920s. The residential structures were mostly replaced in the 1940s with approximately four commercial buildings and the factory/warehouse structure. Additional major renovations around 1980 and 2004 resulted in the current structural configuration of the property (645-657 Robertson). The factory/warehouse structure (652 N La Peer) was constructed around 1929-1936 and has had a number of renovations in the years since.

No evidence of current or historical use, storage, disposal or generation of hazardous substances was observed onsite. The subject property is not identified on the standard government databases researched in this report. Several industrial waste files are maintained at the Los Angeles County Department of Public Works Environmental Programs Division for the subject property related to grease traps at current and former restaurants located on the property. No underground tank permits were contained in the files reviewed.

The nearest listed contaminated site to the subject property is the former Ever-Rite Equipment / current Rolls Royce servicing facility located approximately 300 feet to the west. The site had a documented release of gasoline and received case closure in 2002. Based on the direction of groundwater flow and the distance from the subject property, it is considered unlikely that the soil and/or groundwater beneath the subject property have been impacted from this offsite release.

BA Environmental prepared a *Letter Report: Limited Phase II Subsurface Investigation, 653-655 North Robertson Blvd West Hollywood, California* dated December 8, 2003. The report pertains to a portion of the subject property that had former on-site spray booths and a hazardous materials storage room. BA obtained soil samples from six boring locations to a maximum depth of five feet. The samples were analyzed for VOCs per EPA Method 8260B. No detectable concentrations of VOCs were found in any of the samples obtained and analyzed by BA. BA recommended that no further investigation or assessment was necessary at the property.

The subject property was historically developed with a machine shop in 1969. An auto repair shop was present contiguous to the subject property for approximately 30 years (1969-2000). There was also a dry cleaning facility adjacent to the subject property from 1990-2013. The presence of the historical clothes cleaner on a contiguous property provides the potential for releases of dry cleaning solvent (PCE/carbon tetrachloride), which could impact soil, soil gas and groundwater beneath the subject site. Impacts associated with PCE could potentially give rise to a vapor encroachment condition into future onsite structures.

A minor data failure was encountered in the preparation of this report. The Owner/User Questionnaire was not returned. Review of recorded Land Title Records including environmental liens was not included in this report. These records should be obtained and reviewed by the user. California Environmental has prepared an Environmental Site Assessment - Phase I in conformance with the scope and limitations of ASTM 1527-13 for the property located at 645-681 N Robertson Blvd & 648-668 N La Peer Drive West Hollywood, California 90069. **This assessment has revealed evidence of recognized environmental conditions in connection with the subject property. It is recommended to evaluate these conditions through subsurface soil and soil gas sampling. No evidence of historical recognized conditions (HRECs) or controlled recognized conditions (C-RECs) were identified in connection with the subject property.**

This report is subject to the following **NOTICE**:

10.0 NOTICE

All properties are subject to some element of environmental risk and the risk cannot be eliminated. Industrial and commercial properties developed prior to modern environmental laws are especially risk prone to environmental hazards which include, but are not limited to, wastes which may be toxic, ignitable, corrosive or reactive. The potential for these environmental hazards to impact the use of the property can be reduced by the identification and mitigation of the hazards prior to development or redevelopment of the property. Due to the difficulty in locating underground wastes, in some cases it is not always possible to ascertain that hazardous wastes are present on the property prior to development.

A Phase I environmental site assessment does not utilize subsurface exploration to check for the presence of hazardous wastes on the property. The experience of the assessor, along with the research of available reports, aerial photographs and land use records are used to evaluate the potential for hazardous wastes to occur on the site. Based on the information gained from the historical research, subsurface exploration may be recommended to check for the presence of hazardous wastes. Preexisting environmental problems such as the presence of hazardous wastes in the soil or groundwater, can be concealed by grading activities and site improvements. If such wastes are present these wastes cannot be observed.

The undersigned, Charles I. Buckley declares that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312 and I have the specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20.

This report was prepared with the skill and competence as commonly used by environmental professionals in this area. No warranty, expressed or implied, of any kind is made or intended in connection with this report, or by the fact you are being furnished this report, or by any other oral or written statement.

Should you have any questions or desire any additional information, please contact the undersigned.

Respectfully Submitted,

Charles I. Buckley

- State of California, Certified Engineering Geologist No. 1250

PROFESSIONAL EXPERIENCE:

Jan 88-Present CALIFORNIA ENVIRONMENTAL
 CEO - Principal Hydrogeologist

Founded California Environmental in January of 1988. Clients include Fortune 500 Corporations, County Government, Municipal Agencies, Financial Institutions, Land Developers, and Consultants. Principal Investigator for groundwater supply and groundwater contamination investigations. Project leader for groundwater remediation at a State of California Superfund Sites. Principal hydrogeologist for design and implementation of a groundwater monitoring network for an existing Sanitary Landfill. Lead investigator to delineate structure of a California Groundwater Basin; Pioneered use of a cost effective soil/gas vapor technique used to track groundwater plumes. Conducted over 2000 Phase I Environmental Investigations in California. These investigations included the use and interpretation of historic topographic maps, Sanborn Insurance Maps, aerial photography, and other historic data sources. Successfully completed remedial clean-up on 500+ sites in southern California; including impacts associated with fuels, PCBs, metals, asbestos and chlorinated solvents. Expert consultant for environmental impairment of soil and groundwater: Expert for the Port of Los Angeles, L.A. County Counsel, L.A. City Recreation and Parks and private attorneys.

PROFESSIONAL EXPERIENCE (cont.):

Mar 84-Dec 87 KOVACS-BYER AND ASSOCIATES
 Manager Environmental Services Group

Spearheaded the development into the groundwater and environmental segments of consulting market. Ascended from project geologist status to manager of Environmental Services Group. Responsible for all aspects of project management including; organization and staffing, developing technical requirements needed to complete projects, client and agency liaison.

Provided technical leadership for groundwater testing including design and analysis of aquifer pump tests. Lead Geotechnical Investigator for remedial repair of complex landslide terrains. Prepared Seismic Analysis for critical facilities. Recommended specialized drainage systems for abatement of groundwater problems. Project Consultant for award winning projects on which severe geotechnical problems were overcome.

Mar 80-Mar 84 GEOTECHNICAL SERVICES GROUP; BUREAU OF ENGINEERING;
CITY OF LOS ANGELES
Assistant Engineering Geologist

Performed geologic mapping in hillside areas of the City of Los Angeles. Reviewed Geotechnical Reports submitted to the City of Los Angeles for private development. Directed landslide investigations. Prepared Expert Opinion documents regarding groundwater and geologic issues for the City Engineer and City Attorney. Conducted field monitoring of known landslides within the City of Los Angeles.

Aug 79-Mar 80 UNITED STATES GEOLOGICAL SURVEY
Field Assistant

Assisted in geological mapping for a uranium resource development project sponsored by the Department of Energy and the United States Geological Survey.

CONTINUING EDUCATION:

- ◆ “Advanced Data Analysis Techniques for Evaluating and Quantifying Natural Attenuation for Remediation of Contaminated Sites”, NGWA Short Course, March 2007.
- ◆ “Technical Guidance for Indoor Air Vapor Intrusion”, Severn Trent Laboratory, San Pedro, CA, 1/2005.
- ◆ “Low Cost Remediation Techniques”, AGSE, San Francisco, CA 2002.
- ◆ “Remediation of MtBE”, AGSE, Anaheim, CA 2002.
- ◆ "Assessment and Management of MtBE Impacted Sites", San Francisco, January 1999.
- ◆ "Workshop on MtBE Water Issues", Los Angeles, June 1997.
- ◆ "Management Action Programs Seminar", Newport Beach, November 1996.
- ◆ "ACWA - Groundwater Workshop", Monterey, June 1995.
- ◆ "SeSoil Modeling Workshop" GSC, San Francisco, CA, October 1994

CONTINUING EDUCATION (cont.):

- ◆ "Groundwater Monitoring and Remediation", Short Course AEG, October 1992
- ◆ "Microbial Processes in Biodegradation", AGSE, Albuquerque NM, February, 1991
- ◆ "Introduction to Groundwater Geochemistry", National Water Well Association, San Francisco, CA 1988
- ◆ "Fate and Transport of Contaminants in the Subsurface", United States Environmental Protection Agency, San Francisco, CA, December, 1987.
- ◆ "How to Monitor and Sample the Vadose Zone "National Water Well Association, San Diego, CA, 1988.
- ◆ "Treatment Technology for Contaminated Groundwater" UCLA Fall, 1986.
- ◆ "Groundwater Contamination Detection, Monitoring and Cleanup", UCLA, April, 1986.
- ◆ "Introduction to Groundwater Modeling", National Water Well Association, Fullerton, CA 1985.

ORAL PRESENTATIONS AND SEMINARS:

- ◆ "Overview of Environmental Regulations, State and Federal Laws" Guest Lecturer, University of Southern California, 1991.
- ◆ "Environmental Risks and Underground Tank Leaks, Commercial Property Inspection" California Real Estate Inspectors Association, Santa Monica, CA., May, 1988.
- ◆ "Modified Technique for Soil/Gas Surveys to Detect Groundwater Contamination". Association of Engineering Geologists, Southern California Section meeting. December, 1987.
- ◆ "Historic Aerial Photographic Evidence of Landslide Development, Potrero Canyon, CA." Association of Engineering Geologists Annual Meeting, San Francisco, CA., October, 1986.
- ◆ "Environmental Issues and Careers", Guest Lecturer, USC Department of Geology, Spring 1992.

PROFESSIONAL PAPERS:

- ◆ "Geology, Landslides and Slope Stabilization. Potrero Canyon Park, Pacific Palisades, CA." Association of Engineering Geologists Guidebook, June 20, 1987.
- ◆ "Red Rose Landslide Stabilization, 3358-3400 Red Rose Drive, CA. with Hollingsworth, R.A.; Association of Engineering Geologists Guidebook. June 20, 1987.
- ◆ "Residential Development and Landsliding, Castellammare Mesa area, Los Angeles, CA." Association of Engineering Geologists Guidebook. June 2, 1984.

APPENDIX I

Environmental Field Reconnaissance Checklist and Field Interview and User Questionnaires

**ENVIRONMENTAL FIELD
RECONNAISSANCE CHECKLIST (PART A)**

Completed By: Samuel T. Buckley Title: Project Manager
 Property Address: 645-681 Robertson & 646-668 N La Peer Date: June 3, 2014

USES OF THE PROPERTY	
1. Name of present occupants of the property (include business names and addresses or unit numbers):	Robertson Blvd: 653 – Anichini (vacant retail) / DSI Entertainment Solutions 647 – Raphael (salon) 655/657 – Circa/Phyllis Morris; Louboutin (retail/furniture) 661/665 – Robertson Nightclub N La Peer Dr: 650 – Fitness Factory (gym)
2. Describe the present use(s) of the property:	Retail/salon/gym/nightclub
3. Describe the present of adjacent properties:	Commercial/retail
4. Is the property used for an industrial use?	No
5. Is any adjoining property used for an industrial use?	No
6. Is the property used as a gasoline station, auto repair facility, commercial printing facility, dry cleaners, photo developing laboratory, or junkyard? If so, identify which and give the name of the business(es):	No
7. Is the property used as a landfill or a waste treatment, storage, processing, recycling, or disposal facility?	No
8. Is any adjoining property used as a gasoline station, auto repair facility, commercial printing facility, dry cleaners, photo developing laboratory, or junkyard? If so, identify which and give the name of the business(es):	No
9. Is any adjoining property used as a landfill or a waste treatment, storage, processing, recycling, or disposal facility?	No
10. Is the property used for agricultural purposes?	No
PROPERTY CONDITIONS	
11. Are there or have there been any damaged or discarded industrial or automotive batteries on the property?	None observed
12. Are there currently any solvents, paints, fuels, pesticides, herbicides, or other chemicals, in individual containers larger than 5 gallons or totaling more than 50 gallons, used on or stored at the property?	No
13. Are there currently any industrial drums (typically 55 gallons) or sacks of chemicals located on the property?	No

14. Is there any visible evidence fill dirt has been brought onto the property from a contaminated site?	No
15. Is there any visible evidence fill dirt has been brought onto the property from an unknown site?	No
16. Are there any waste treatment or waste disposal ponds, pits or lagoons on the property?	No
17. Is there any stained soil, or soil emitting unusual odors, on the property?	No
18. Are there any flooring, drains, or walls in the facility that are stained by substances other than water or have emitted unusual odors?	No
19. Is there heating and cooling equipment onsite?	Yes
20. What is the fuel source for any onsite heating and cooling equipment?	Natural gas / electricity presumed
21. Is there any visible evidence of storage tanks (underground or aboveground) at the property?	No
22. Are there currently or have there been any vent pipes, fill pipes, fill ports, or surface covers indicating possible fill ports on the property or adjacent to any building located on the property?	No
23. Is there visible evidence of geotechnical and/or environmental subsurface assessments such as patched borings or groundwater monitoring well covers?	No
24. Are there any oil wells, drilling sumps, mud pits, or oil pipelines on or adjacent to the property?	No
25. Are there any pipelines on, beneath, or adjacent to the property, other than water, sewer, and natural gas utilities serving the property?	No
26. Is the property known to be located in a methane hazard area due to oil fields, natural seepage, or landfill gas?	No
27. Does the property or any facility at the property produce wastewater other than domestic sewage and storm water runoff?	Restaurant wastewater @ nightclub kitchen. Grease trap reportedly present, not observed
28. Are there any waste water treatment systems (clarifiers, oil/water separators, grease traps, filtration systems, etc.) at the property?	Grease trap
29. How is waste water from the property disposed of? Sanitary sewer. Septic system. Surface water. Pond, pit, sump, or well. Other (describe).	Sanitary sewer
30. Does the property or any facility at the property produce solid waste other than domestic trash and greenwaste?	No
31. How is solid waste from the property disposed of? Municipal or private trash service. Recycling. Onsite dumping or burial. Other (describe).	Trash service
32. How is solid waste stored at the property?	Bins

33. Does the property or any facility at the property generate hazardous or special waste in the course of normal operation? Examples include spent solvents, photo processing waste, waste oil, used filters, etc. Provide copies of generator notification or waste manifests.	No
34. If hazardous or special wastes are generated at the property, how are they stored?	n/a
35. Are pesticides or herbicides stored, mixed, or disposed of on the property?	No
36. Are there any transformers, capacitors, or hydraulic equipment on the property that are known or suspected of containing PCBs?	No
37. Are there any building materials on the property known or suspected to contain asbestos? Please describe:	Yes – suspect ACM roofing materials, wall board, floor tiles, piping insulation
ENVIRONMENTAL COMPLIANCE	
38. Does the property or any occupant of or facility on the property have any licenses, permits, registrations, or notifications for tanks, pipelines, industrial waste, wastewater treatment, wastewater discharge, stormwater discharge, waste disposal, waste storage or treatment, air emissions, chemical use, or chemical storage?	Yes—industrial wastewater permit for restaurant/nightclub
39. Is there visible evidence of any spills, leaks, or other releases or threatened releases of any hazardous substances or petroleum products from the property to soil, groundwater, or surface water?	No
40. Is there visible evidence of any release or threatened release of any hazardous substances or petroleum products from another location to soil, groundwater, or surface water at the property?	No
41. Is there visible evidence of the current or past existence of environmental violations on the property or in any facility located on the property?	No
42. Does the property discharge waste water, other than storm water runoff, into a storm drain or onto adjacent properties or streets?	No
43. Does the property discharge waste water, other than storm water, into a sanitary sewer system?	No
44. Is there visible evidence that hazardous substances, petroleum products, unidentified waste materials, tires, batteries, or any other waste materials have been dumped, buried, or burned on the property?	No

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by California Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

VARIOUS SITES
PR30604149

Dear Mr. Buckley:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced below.

- [REDACTED]
- 645-681 (odds only) N. Robertson Boulevard, West Hollywood, CA 90069
- 648-668 (even only) N. La Peer Drive, West Hollywood, CA 90069
- [REDACTED]

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

Mr. Charles Buckley

Attention: Custodian of Records

Dear Sir/Madam:

I am writing to request information on Site Inspection Files, Emergency Response file, the Doing Business As (DBA) file, Site Mitigation File Log (active or inactive), and site mitigation files, Hazardous Materials Business Plans/Inventory, Hazardous Waste Generator License, California Accidental Release Prevention (CalARP) Program Information, as well as, spills and site remediation information, and any other file that would help locate information regarding soil or water contamination at or nearby the following address.

**645-681 (odds) N Robertson Blvd & 648-668 (evens) N La Peer Drive
West Hollywood, CA 90069**

Please call our office regarding the availability of such files at your earliest convenience. If no file is found, please provide a written statement to stbuckley@earthlink.net or via fax-818-991-1544.

Your timeliness in this matter is appreciated.

Thank you for your assistance,

Charles Buckley

RE: 648 - 668 N. LA PEER DR. (EVENS), W. HOLLYWOOD, CA 90069

I, the undersigned, being the Custodian or the Keeper of Records, certify that a thorough search for the records you requested was carried out under my direction and control.

This search revealed no records.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or under another classification. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

If you have any questions regarding your request, please contact our office at (323) 890-7806.

Sincerely,

A handwritten signature in black ink, appearing to read "Yvonne Curtis".

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/05/2014 has revealed that there are

EXECUTIVE SUMMARY

5 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 05/19/2014 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

CA BOND EXP. PLAN: Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

A review of the CA BOND EXP. PLAN list, as provided by EDR, and dated 01/01/1989 has revealed that there is 1 CA BOND EXP. PLAN site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WEST HOLLYWOOD/SUNLIN, INC./SA	8787 SANTA MONICA BOULE	NE 1/4 - 1/2 (0.264 mi.)	Q90	85

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 9 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 28 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:
Responsible Party: RWQCB REFERRAL SITE
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc:

Actual:
213 ft.

This site is being remediated by the RPs with oversight by the RWQCB. Consequently, there are no plans to spend Bond funds for this site at this time.

Site Description: Sunlin, Inc., operates the Santa Palm Car Wash. The facility sold unleaded gasoline which was stored in underground tanks.

Hazardous Waste Desc: Beginning in March, 1985, complaints of strong gasoline odors were received from residents in the vicinity. Unleaded gasoline has been identified on the surface of the ground water beneath the car wash and downgradient. Gasoline contains benzene, ethyl benzene, xylene, and toluene.

Threat To Public Health & Env: A plume of gasoline contamination exists in an elongated 900 foot northwest-southeast direction. The contamination is found in the soil and ground water. Ongoing air monitoring now shows no elevated hydrocarbons in residences. Three ground water treatment systems are currently online and were designed to further reduce contaminant levels in the ground water.

Site Activity Status: The Regional Water Quality Control Board is the lead agency for ongoing ground water remedial activities to recover free product and contaminated ground water. In June, 1985, the Department made a determination of imminent or substantial endangerment and a RAO ordered the potentially responsible parties (PRPs) to initiate immediate interim remedial measures. The PRPs have three ground water treatment systems online. The dates for the systems' initiation

Case Worker: TA
Local Agency: Not reported
RB Case Number: 1208
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: This Site is 4,400-square foot of rectangular parcel chronicled as residential and commercial property since 1923. The formerly Wetherly Cleaners occupied a portion of this multi-tenant building from 1996 to 2006. Currently the Site is unoccupied and the building is under renovation. According to the information provided, five environmental site investigations were conducted beginning in 2003. The

EPA ID Number

FORMER WETHERLY CLEANERS (Continued)

S104583869

investigations included installation of 24 soil borings and three groundwater monitoring wells at the Site. The analytical results confirmed that both soil and groundwater beneath the Site are impacted with Volatile Organic Compounds (VOCs) including tetrachloroethylene (PCE), trichloroethylene (TCE), dichloroethylene (DCE) and others. The findings are consistent with the documented use of PCE at the former dry cleaner. The data show PCE concentrations as high as 942 micrograms per kilogram (a%g/Kg) in soil and up to 1,940 micrograms per liter (a%g/L) in groundwater. Limited soil remediation consisting of excavation and off-site disposal of impacted soil was also conducted at the Site. The maximum depth of the soil excavation was 7.5 feet below ground surface (bgs). The maximum amount of impacted soil was removed without jeopardizing the structural integrity of the building. The soil confirmation data was obtained from bottom and walls of excavation. In addition, a soil gas survey conducted at the Site found mostly a low or no flow condition. The three groundwater monitoring wells were destroyed during the remedial excavation. Based on the post excavation soil matrix and soil gas confirmation data, the Site Mitigation Unit of the County of Los Angeles Fire Department issued a no further action letter for the soil portion of the Site and referred the Site to the Regional Board for further investigation of the groundwater. The Site is located in the Hollywood Basin of the Coastal Plain of Los Angeles. Based on the soil boring log, the soil beneath the Site consists of primarily lean clay up to 18 feet underlain by sand to the maximum depth of investigation of 36 feet bgs. Groundwater was encountered at 19 feet bgs but static water level was measured at 10 feet bgs suggesting that groundwater beneath the Site is under confining conditions. The groundwater flow is to the northeast.

Potential Media Affected:

Aquifer used for drinking water supply, Soil, Soil Vapor

Potential Contaminants of Concern:

Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE)

Site History:

The site property consists of one single-story, multi-tenant commercial building and one two-story, multi-use building, located at 8715-8727 Santa Monica Boulevard, in the City of West Hollywood. The property is occupied by several commercial businesses. The subject dry-cleaners were located on the first floor of the two-story building. Since 1983, the site had been occupied by several dry-cleaning businesses. A Phase I Environmental Site Assessment conducted by WEECO in April 1999 reported that the dry-cleaners had been cited for improper chemical handling. Subsequent site investigations revealed the impact of underlying soil and groundwater. The soil impact soil was successfully remediated via a soil vapor extraction system (SVE) from June 2002 to December 2002. Regional Board granted a No-further-action status in October 2003 for the soil. Groundwater monitoring continues to monitor the minor remaining PCE concentrations in one of the groundwater monitoring wells. A final remedy is being evaluated.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/08/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 04/11/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/08/2014

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014
Number of Days to Update: 27

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 03/10/2014
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/23/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/10/2013	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 09/23/2013
Date Data Arrived at EDR: 09/24/2013

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
LOS ANGELES, CA

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
BEVERLY HILLS

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

A2	1/2 - 1 Mile SW	ESE
A3	1/2 - 1 Mile SW	ESE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types: fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types: stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

File No.: 103141

Mr. Nathan Goller
8772 Beverly Boulevard
West Hollywood, California 90048

REFERENCE: 653-655 NORTH ROBERTSON BOULEVARD
WEST HOLLYWOOD, CALIFORNIA

SUBJECT: LETTER REPORT
LIMITED PHASE II SUBSURFACE INVESTIGATION

Dear Mr. Goller:

BA Environmental is pleased to submit the results of the soil sampling conducted at the above-referenced site. The purpose of this engagement was to assess soil conditions in the areas of former on-site spray booths and a hazardous materials storage room, which were identified in a previous Environmental Transaction Screen conducted by BA Environmental (File #103141) in October of 2003.

On November 21, 2003, BA Environmental conducted a Limited Phase II Subsurface Investigation at the subject site. This limited subsurface investigation consisted of advancing six shallow soil borings, using a hand auger. The borings were advanced in the areas of the former on-site spray booths and hazardous materials storage room. Each boring was advanced to a maximum depth of five feet below ground surface (bgs). Soil samples were collected from each boring at one, three and five feet bgs. Soil samples were collected in two-inch outer diameter brass sleeves inside of a core sampler. The sampler was advanced using a slide hammer. Following retrieval of the sampler, the bottom three-inch-long tube was removed from the sampler, and its ends were covered with Teflon sheets and capped with polyethylene end caps. The sample tube was labeled with the sample number, collection date and project number, placed in a cooler chilled to approximately 4° C (40° F), and retained for laboratory analyses. The locations of the soil borings are provided in the attached Figure 1.

Sediment beneath the site consisted of fine gravelly sand, silty fine to medium sand and fine to medium sand to a depth of at least five feet bgs. No groundwater was encountered in any of the borings. All of the borings exhibited no unusual visual or olfactory evidence of contamination.

Selected soil samples were submitted to Enviro-Chem Laboratories of Pomona, California, a State of California Department of Health Services (DHS)-certified laboratory. All of the three foot deep soil samples were analyzed for Volatile Organic Compounds (VOCs), using Environmental Protection Agency (EPA) Method No. 8260B.

653-655 North Robertson Boulevard
West Los Angeles, California
December 8, 2003
Page 2

The one and five foot soil samples were placed on "hold" pending the results of the initial soil sample analyses. All of the soil samples analyzed were reported not to contain detectable concentrations of VOCs. The laboratory report is included as an attachment.

Based on the results of this investigation, BA Environmental recommends no further investigations at this time.

If you have any questions or require additional information, please contact the undersigned at (818) 500-1898.

Sincerely,
BA ENVIRONMENTAL

1.0 INTRODUCTION

The following report represents the findings of the soil gas and soil assessment conducted at the subject property located at 645-681 (odds) N Robertson Blvd & 648-668 (evens) N La Peer Drive West Hollywood, CA 90069. California Environmental (CE) prepared a Phase I Assessment report for the property dated August 2014. The subject property was historically developed with a machine shop in 1969. An auto repair shop was contiguous to the subject property for approximately 30 years (1969-2000). There was also a dry cleaning facility adjacent to the subject property from 1990-2013. The presence of a historical cleaner contiguous to the subject property provides the potential for releases of dry cleaning solvent (PCE/carbon tetrachloride), which could impact soil, soil gas and groundwater beneath the subject site. Impacts associated with solvents could potentially give rise to a vapor encroachment condition into future onsite structures. CE recommended assessment work be implemented to evaluate for these concerns.

The objective of this sampling was to assess for releases associated with the cleaner, auto repair and machine shop by sampling shallow soil gas and soil. The findings of this sampling event are contained in the following report.

This report includes **CONCLUSIONS AND RECOMMENDATIONS** which are subject to the **NOTICE** at the end of this document. The scope of work included:

- Notification of Underground Service Alert to mark utility locations.
- Conduct a limited geophysical survey by Southwest Geophysics to clear underground utilities.
- Excavation and soil sampling from one boring to a total depth of 15 feet below grade.
- Placement of six soil gas probes (10 soil gas samples) at depths of 5 and 15 feet below grade.
- Analysis of soil gas and soil samples in state certified laboratories.
- Preparation of this report.

1.1 SITE DESCRIPTION

The subject property is located between N Robertson Blvd and N La Peer Dr, south of Santa Monica Blvd, in the City of West Hollywood, California, see **FIGURE 1 - VICINITY MAP**. The subject property consists of six contiguous rectangular shaped parcels of land that encompass approximately 1.95 acres. The property is currently developed with four structures and two asphalt-paved parking areas. Three of the structures (645-657 Robertson Blvd) are two-story commercial/retail spaces that are occupied by a furniture sales warehouse, hair salon, clothing store, and storage/office spaces. These structures were built in the early 1940s with major renovations in 1980 and 2003-2004. The fourth structure (652 N La Peer) is a large multi-story warehouse (former manufacturing) structure that has been converted to a nightclub on the upper floors with a gym on the ground floor. This structure was built between 1929 and 1936 with alterations/renovations in the years since. Access to the property is via N La Peer Dr to the west and Robertson Blvd to the east; see **FIGURE 2 – SITE PLAN**.

2.0 PREVIOUS WORK

California Environmental (CE) prepared a Phase I Assessment report for the property dated August 2014. The subject property was historically developed with a machine shop in 1969. An auto repair shop was contiguous to the subject property for approximately 30 years (1969-2000). There was also a dry cleaning facility adjacent to the subject property from 1990-2013. CE recommended subsurface assessment work to evaluate these concerns.

California Environmental obtained and reviewed a *Letter Report: Limited Phase II Subsurface Investigation, 653-655 North Robertson Blvd West Hollywood, California* prepared by BA Environmental (BA) and dated December 8, 2003. The report pertains to a portion of the subject property that had former on-site spray booths and a hazardous materials storage room. BA obtained soil samples from six boring locations to a maximum depth of five feet. The samples were analyzed for VOCs per EPA Method 8260B. No detectable concentrations of VOCs were found in any of the samples obtained and analyzed by BA. BA recommended that no further investigation or assessment was necessary at the property.

3.0 HYDROGEOLOGY

The subject site is located at the north margin of the Peninsular Ranges Geomorphic Province near the south margin of the Santa Monica Mountains, within the Los Angeles Coastal Plain. Older and recent alluvial deposits derived from the mountains to the north underlie the site. The Santa Monica Fault is located approximately 3000 ft to the north. The property is within the western portion of the Hollywood Groundwater Basin within the transition to the Santa Monica Groundwater Basin to the west. A geotechnical engineering investigation conducted by Geotechnologies, Inc. in October 2014 indicated groundwater was encountered at depths between 22 and 28 feet below ground surface. Seepage was encountered at depths of 10-20 ft. The regional direction of groundwater flow is expected to be towards the south-southwest.

The site stratigraphy was identified during logging of the soil boring excavated beneath the property by CE. The boring extended to a total depth of 15 feet beneath the ground surface. The sediment encountered beneath the site consists of a mixture of clay to sandy clays. Groundwater was not encountered during drilling of the boring. The log of the CE boring is attached as **PLATE 1**.

4.0 SUBSURFACE ASSESSMENT

4.1 SOIL GAS SAMPLING

Soil gas sampling was implemented onsite on October 29, 2014. H & P Mobile Geochemistry conducted soil gas probe placement and sampling under the direction of California Environmental. A truck mounted hydraulic direct push rig was used for the placement of the soil gas probes. The boring in the sidewalk adjacent to the former machine shop (CE6) was placed using a hand drill. Four multi-depth sample probes and two 5 ft. depth sample probes were placed in locations in proximity to the former upgradient dry cleaning facility, to the contiguous auto repair facility, and to the former machine shop, as well as in background locations. Vapor probe samples were obtained and analyzed for volatile organic compounds pursuant to DTSC/RWQCB guidelines (CalEPA/DTSC/RWQCB Soil Gas

Advisory, 2012) in a state certified mobile laboratory. The placement and sampling of each probe was conducted in accordance with the sampling methodologies identified in the CalEPA/DTSC/RWQCB Advisory.

The soil gas probes consisted of a sampling tip attached to inert nylon tubing. Each segment of tubing was pre-measured to ensure the correct depth. The sample point was set within a one foot sand sensing zone at the desired depth. Dry granular bentonite was placed above and/or below the sand sensing zone and hydrated in order to seal the sand sensing zone. The probe was completed to the surface with the hydrated bentonite and capped with gas-tight 2-way valve preventing degassing of the vapor point and interference from the surface.

The soil gas probes were allowed to equilibrate for two hours prior to the collection of the soil gas sample. A default purge volume (3 PV) was utilized throughout the soil gas survey. One, 1-difluoroethane was utilized as the leak check compound. Vapor probe locations were sampled using the H & P Mobile Geochemistry SOP which includes protocols for surface seals, purge volume tests, tracer compounds, sample flow rate, duplicate samples, and analytical instrument calibration. Soil gas samples were collected and analyzed in an onsite state-certified mobile laboratory operated by H&P Mobile Geochemistry.

Laboratory analysis of ten soil gas found detectable concentrations of xylenes in CE1-5 ft, CE3-5 ft & -15 ft, CE4-15 ft, and CE5-15 ft (0.57 ug/l – 5.0 ug/l). PCE was detected in CE5-5 ft & -15 ft (0.54 ug/l – 0.55 ug/l). Ethylbenzene was detected in CE5-15 ft (0.89 ug/l). Benzene was also detected in CE5-15 ft (0.11 ug/l). All other VOCs in the samples obtained were below the method detection limits. The concentrations of VOCs detected are all below the California Human Health Screen Levels (CHHSLs) for the proposed commercial development. A CalEPA-DTSC modified Johnson and Ettinger (J&E) model was used to assess the risk to human health from indoor air quality from the low concentration of PCE found in soil gas. The calculation showed the incremental risk level for vapor intrusion to indoor air to be less than the allowable of 10^{-6} for both commercial and residential properties. Therefore, future indoor air mitigation is not required.

The laboratory tests on soil gas samples are summarized in **TABLE I, APPENDIX I**. The laboratory report and chain of custody documentation are attached in **APPENDIX II**. The locations of the soil gas probes are depicted on the enclosed **FIGURE 3 – ASSESSMENT PLAN**.

4.2 SOIL SAMPLING

Soil samples were obtained from one boring excavated on the property during October 29, 2014. Boring CES3 was excavated to a total depth of 15 feet bgs with discrete soil samples taken at 2, 5, 10, and 15 feet bgs. Soil sampling was performed using an 18 inch long by 1.5 inch wide split spoon sampler containing an 18 inch long acetate liner. Individual soil samples were extracted, capped with Teflon sheeting, plastic caps, labeled and transported immediately for analysis to an offsite state certified laboratory operated by American Analytics.

Select soil samples were analyzed for VOCs pursuant to EPA preservation method 8260B/5035 and for total petroleum hydrocarbons (TPH) per EPA method 8015M. All VOCs in the samples analyzed were below the method detection limits. Detectable concentrations of TPH (22 mg/kg) in the heavy fuel oil range were found in one of the three soil samples analyzed. The laboratory test data on soil samples are summarized in **TABLE II, APPENDIX I**. The locations of the CE borings are shown on **FIGURE 3 – ASSESSMENT PLAN**. The logs of the borings are attached as **PLATE 1**.

5.0 CONCLUSIONS AND RECOMMENDATIONS

CE implemented a screening soil and soil gas assessment at the subject property. The soil and soil gas assessment work did not identify evidence of significant releases of VOCs in the subsurface. Laboratory analysis of soil gas found detectable concentrations of xylenes in CE1-5 ft, CE3-5 ft & -15 ft, CE4-15 ft, and CE5-15 ft (0.57 ug/l – 5.0 ug/l). PCE was detected in CE5-5 ft & -15 ft (0.54 ug/l – 0.55 ug/l). Ethylbenzene was detected in CE5-15 ft (0.89 ug/l). Benzene was also detected in CE5-15 ft (0.11 ug/l). All other VOCs in the samples obtained were below the method detection limits. Concentrations of detected VOCs in soil gas are all below their respective CHHSLs for commercial development. A CalEPA-DTSC modified Johnson and Ettinger (J&E) model was used to assess the risk to human health

from indoor air quality from the low concentration of PCE found in soil gas. The calculation showed the incremental risk level for vapor intrusion to indoor air to be less than the allowable of 10^{-6} for both commercial and residential properties. Therefore, future indoor air mitigation is not required.

Three soil samples were obtained and analyzed for VOCs and TPH. All VOCs in the samples analyzed were below the method detection limits. Detectable concentrations of TPH (22 mg/kg) in the heavy fuel oil range were found in one of the three soil samples analyzed. Concentrations of TPH in soil are likely related to small surface spills of motor vehicle oil. Further assessment is not recommended.

6.0 NOTICE

All properties are subject to some element of environmental risk and the risk cannot be eliminated. Industrial and commercial properties developed prior to modern environmental laws are especially risk prone to environmental hazards which include, but are not limited to, wastes which may be toxic, ignitable, corrosive or reactive. The potential for these environmental hazards to impact the use of the property can be reduced by the identification and mitigation of the hazards prior to development or redevelopment of the property. Due to the difficulty in locating underground wastes, in some cases it is not always possible to ascertain that hazardous wastes are present on the property prior to development.

The subsurface conditions described herein have been ascertained from excavations on the site as indicated, and should in no way be construed to reflect variations which may occur between or beyond these excavations. The chemical laboratory testing described herein was performed by a state certified testing laboratory. The state certified testing laboratory assumes responsibility for the testing procedures used in their analysis.

This report was prepared with the skill and competence as commonly used by environmental professionals in this area. No warranty, expressed or implied, of any kind is made or intended in connection with this report, or by the fact you are being furnished this report, or by any other oral or written statement.

Should you have any questions or desire any additional information, please contact the undersigned.

Respectfully submitted,

Professional Geologist No. 4035
Certified Engineering Geologist No. 1250
Certified Hydrogeologist No. 55

Agoura Hills, CA 91301

H&P Project: CE102914-SB1
Client Project: 3337 / 645 Robertson Blvd

Dear Mr. Charlie Buckley:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 29-Oct-14 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody

Unless otherwise noted, all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis Villarreal
Laboratory Director

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory (Certification # L11-175) in accordance with the DoD-ELAP program. H&P is approved by the State of Arizona under Certification Numbers AZM758 and AZ0779. H&P is approved as an Environmental Laboratory in conformance with the Environmental Laboratory Accreditation Program (CA) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste for the following methods:

Certificate# 2741, 2743, 2579, 2754 & 2740 approved for EPA 8260 and LUFT GC/MS
Certificate# 2742, 2745, & 2741 approved for LUFT
Certificate# 2745 & 2742 approved for EPA 418.1

H&P Mobile Geochemistry, Inc. is approved as an Environmental Laboratory in conformance with the National Environmental Accreditation Conference Standards for the category Environmental Analysis Air and Emissions for the following analytes and methods:

Hexachlorobutadiene by EPA TO-15 & TO-14A	1,3-Dichlorobenzene by EPA TO-15 & TO-14A
1,2,4-Trichlorobenzene by EPA TO-15 & TO-14A	Trichlorofluoromethane by EPA TO-14A
1,2-Dichlorobenzene by EPA TO-15 & TO-14A	Naphthalene by H&P SOP TO-15/GC-MS
Dichlorotetrafluoroethane by EPA TO-14A	1,2-Dibromoethane (EDB) by EPA TO-15 & TO-14A
1,4-Dichlorobenzene by EPA TO-15 & TO-14A	1,2-Dibromo-3-chloropropane by EPA TO-15
Benzene by EPA TO-15 & TO-14A	1,3-Butadiene by EPA TO-15
Chlorobenzene by EPA TO-15 & TO-14A	1,1,2-Trichlorotrifluoroethane by EPA TO-14A
Ethyl benzene by EPA TO-15 & TO-14A	Carbon disulfide by EPA TO-15
Styrene by EPA TO-15 & TO-14A	1,4-Dioxane by EPA TO-15
Toluene by EPA TO-15 & TO-14A	
Total Xylenes by EPA TO-15	
1,1,1-Trichloroethane by EPA TO-15 & TO-14A	
1,1,2,2-Tetrachloroethane by EPA TO-15 & TO-14A	
1,1,2-Trichloroethane by EPA TO-15 & TO-14A	
1,1-Dichloroethane by EPA TO-15 & TO-14A	
1,1-Dichloroethene by EPA TO-15 & TO-14A	
1,2-Dichloroethane by EPA TO-15 & TO-14A	
1,2-Dichloropropane by EPA TO-15 & TO-14A	
Benzyl Chloride by EPA TO-15 & TO-14A	
Bromoform by EPA TO-15	
Bromomethane by EPA TO-15 & TO-14A	
Carbon tetrachloride by EPA TO-15 & TO-14A	
Chloroethane by EPA TO-15 & TO-14A	
Chloroform by EPA TO-15 & TO-14A	
Chloromethane by EPA TO-15 & TO-14A	
cis-1,2-Dichloroethene by EPA TO-15 & TO-14A	
cis-1,3-Dichloropropene by EPA TO-15 & TO-14A	
Methylene chloride by EPA TO -15 & TO-14A	
Tetrachloroethane by EPA TO-15 & TO-14A	
trans-1,2-Dichloroethene by EPA TO-15	
trans-1,3-Dichloropropene by EPA TO-15 & TO-14A	
Trichloroethene by EPA TO-15 & TO-14A	
Vinyl chloride by EPA TO -15	
2-Butanone by EPA TO-15	
4-Methyl-2-Pentanone by EPA TO-15	
Hexane by EPA TO-15	
Methyl tert-butyl ether by EPA TO-15	
Vinyl acetate by EPA TO-15	

This certification applies to samples analyzed in summa canisters.

Re : Robertson Lane
A243697 / 4J29004

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 10/29/14 11:15 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

A handwritten signature in black ink that reads 'Eydie Schwartz' in a cursive script.

Eydie Schwartz
Project Manager

LABORATORY ANALYSIS RESULTS

Client: Cal Environmental
Project No: NA
Project Name: Robertson Lane

AA Project No: A243697
Date Received: 10/29/14
Date Reported: 11/07/14

Special Notes

[1] = **AA-C1** : The percent recovery for this analyte exceeds acceptance criteria.

[2] = **AA-C2** : The RPD value exceeds acceptance criteria.
