Re: CITADEL Project No. 0529.1002.0
Phase I Environmental Site Assessment Update Report
8920 West Sunset Boulevard
West Hollywood, California 90069

Dear Mr. Vella:

Enclosed please find Citadel Environmental Services, Inc.'s Phase I Environmental Site Assessment Report for the above-referenced locations.

The Phase I Environmental Site Assessment Report was conducted for 8920 Sunset VE LLC, in accordance with Citadel's Proposal 0529.1002.P, dated May 24, 2016, and a mutually agreed upon scope of work.

If after your review you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely,
CITADEL ENVIRONMENTAL SERVICES, INC.

Mark
Drollinger

Citadel Environmental Services, Inc. (Citadel) was contracted by 8920 Sunset VE LLC (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) Update of the property located at 8920 West Sunset Boulevard, in the City of West Hollywood, Los Angeles County, California; hereinafter referred to as the "Site."

According to the County of Los Angeles's On-Line Parcel Search, the Site is comprised of one parcel that is currently assigned as Assessor's Parcel Number (APN) 4340-001-024. The Site encompasses approximately 20,241 square feet (SF) of land.

The Site is comprised of one two-story commercial office building of approximately 17,791 SF with two and a half levels of underground parking; a covered carport for surface parking areas; and associated landscaping. The office building is located in the north portion of the Site and the covered carport is located along the south boundary of the Site. Vehicle access to the surface parking lot is at the west boundary of the Site along Hilldale Avenue; access to the underground parking levels is in the surface parking area.

The entire first floor of the building is occupied by Hustler Hollywood. The second floor of the building is occupied by three tenants: Liddy Health Works, Lone Group and Plus Development.

Equipment at the Site includes a hydraulic elevator, HVAC systems, and a hot water heater. In general, the Site appeared to be well maintained and the building/ground conditions observed were good.

A review of historical records showed that the Site was developed with single-family residential structures in the middle and south portion of the Site in 1910. A gas station appeared to have been developed in the north portion of the Site by 1938 and was removed by 1969. By 1981, the residential properties at the Site were removed and a small structure was developed at the northwest corner of the Site. According to a historical search of city directories, the small structure may have been occupied by Power Burger, a fast food restaurant. The current building began development in 1987 was occupied by European Select Motor Cars in 1991, Island Pictures/Records from 1991 to 2000, Hustler Hollywood since 2000, and Universal Music in 2006.

The Site as Boston Market Restaurant was listed on the Los Angeles County Hazardous Materials System database. The database includes listings of industrial waste and UST sites. According to the Environmental Data Resources (EDR) database, the facility status was listed as closed. No further information was provided. According to a historical search of city directories, Boston Market Restaurant may not have occupied the Site. However, it may be possible that Boston Market Restaurant was related to Power Burger and may have been on this list due to disposal of kitchen grease. This is not a concern for the Site.

Historical releases of petroleum products from a leaking underground storage tank (LUST) occurred at the adjoining property east of the Site. This property was identified as Arco Station #5122 located at 8906 Sunset Boulevard. According to information made available by the Regional Water Quality Control Boards (RWQCB) on-line Geotracker database, the case began on April 15, 1985 due to the request of the RWQCB – Los Angeles to determine the possible source of hydrocarbon impacted groundwater observed near the intersection of Santa Monica Boulevard and Huntley Drive located approximately 3,000 feet southeast of the property. Groundwater monitoring wells were installed at the property on August 2, 1985 and soil samples collected for analysis detected total petroleum hydrocarbons gasoline (TPHg) at a maximum concentration of 105 milligrams per kilogram (mg/kg). Free-phase hydrocarbon was observed in the groundwater monitoring wells. According to GeoTracker, Arcadis U.S., Inc., on behalf of Arco, requested a low-threat closure for the property on February 25, 2013. Closure from further environmental assessment was granted to the property owner on July 7, 2015. This facility lies cross gradient from the Site, it is not likely to have adversely affected the Site.

There are two sites within 0.25-mile and upgradient of the Site that are listed on the Historical Cleaners database. According to EDR, the closest site on this database is located at 8962 Sunset Boulevard which was occupied by Marie Peterson in 1942. According to EDR, the property is

approximately 107 feet west-northwest of the Site. The type of cleaners is listed as hand laundry. According to city directories, this property was occupied by a beauty supply store by 1975. Another dry cleaning property is located at 8966 Sunset Boulevard and was occupied by Pedersen and Christine Grimlund from 1929 to 1937. According to EDR, the property is approximately 126 feet west-northwest of the Site and the type of cleaners is also listed as hand laundry. Due to the listed type of laundry, these properties are not likely to have adversely affected the Site.

There are five sites within 0.25-mile of the Site that are listed on the Historical Auto Stations database. According to EDR, the closest site on this database, approximately 48 feet northwest of the Site, is located at 8929 Sunset Boulevard which was occupied by Redline Motor Group from 2006 to 2012. According to the city directories reviewed, the property was occupied by European Select Motor Cars in 1991 and Beverly Sunset Motors, Inc. in 2000. Based on the relatively recent occupancy of the property and that no UST was reported, this property is not expected to adversely affect the Site.

Another nearby property on the database is located at 8923 Sunset Boulevard and was occupied by Ramplin in 1929 and Hunt in 1933. According to EDR, the property is approximately 66 feet north of the Site and was listed as a gas service station and auto repair. According to the city directories, the property may have been occupied as a residential property in 1924 and 1937. Due to the relatively short amount of time occupied as a gas service station or auto repair shop (possibly between 1924 and 1937), this property is not likely to have adversely affected the Site.

Additional properties listed on the Historical Auto Stations database are greater than 80 feet and cross gradient from the Site. No known releases of petroleum hydrocarbons have occurred at these properties. These properties are not expected to have adversely affected the Site.

RECOGNIZED ENVIRONMENTAL CONDITIONS

According to American Society for Testing and Materials (ASTM) Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An historical recognized environmental condition, or HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

A gas station formerly occupied the Site from 1938 to 1969. No information regarding the removal of the gasoline station was available for review. No documentation regarding the presence or removal of the USTs was found in the database searches conducted by Citadel. Due to the construction of the current subterranean parking levels at the Site, any suspect fuel releases to the soil from the gas station may have been removed during the excavation process. However, Citadel understands that redevelopment of the Site may include constructing a subterranean parking structure deeper than that currently on-Site. In light of this, and that no information regarding the former gasoline station was available for review, Citadel recommends that a Soil Management Plan be completed prior to any soil disturbance. Implementation of the Soil Management Plan will include a third party consultant soil monitor to ensure worker safety during soil disturbance activities.

Due to the shallow groundwater in the Site vicinity, the former presence of a gasoline station on the Site and recent groundwater mitigation and monitoring at other properties in the Site vicinity, Citadel recommends that any dewatering during development be tested prior to release.

NON-ASTM SCOPE CONSIDERATIONS

Environmentally regulated materials such as asbestos-containing building materials (ACBMs), lead based paint (LBP) and polychlorinated biphenyls (PCBs) in electrical equipment were banned from use in commercial construction in 1989, 1978 and 1979, respectively. The ban on ACBMs was vacated in 1991 allowing some building materials to continue to contain asbestos. Some of these products still in use includes vinyl floor tile and roofing materials. No testing of these materials was performed as part of this Phase I update. The current Site building was constructed in 1988. The use and presence of LBP and PCB's is unlikely given the bans in effect for these materials.

Since the temporary ban of ACBMs was put into effect in 1989, Citadel recommends that the Client perform a survey for ACBMs *prior* to any renovation or demolition of the current buildings. Such surveys should be performed to identify ACBMs to ensure proper handling and disposal and to allow for measures to protect both worker and building occupant safety during routine building maintenance, renovation or demolition.

The Site is not located within the Methane or Methane Buffer Zones recognized by the LADBS.

According to the California Radon Database for Los Angeles County, the local zip code 90069 is classified as a Federal EPA Radon Zone Category 2. Site specific radon levels can only be accomplished by indoor radon testing.

No evidence was observed at the Site for mold or past or current water intrusion concerns.

A potable well was not observed on-Site and the Site does not lie within a known or potential flood zone or wetlands.

1.0 INTRODUCTION

Citadel Environmental Services, Inc. (Citadel) was contracted by 8920 Sunset VE LLC (Client) to perform a Phase I ESA Update of the property located at 8920 West Sunset Boulevard, in the City of West Hollywood, Los Angeles County, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA Update.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, is 8920 Sunset VE LLC.

Citadel understands that this Phase I ESA Update is being requested in conjunction with due diligence activities by 8920 Sunset VE LLC. Citadel recognizes that this report is to be used exclusively by 8920 Sunset VE LLC, and its successors, lenders, and assigns. It is a report upon which 8920 Sunset VE LLC and its successors, lenders, and assigns, can rely.

1.3 SCOPE OF SERVICES

This Phase I ESA Update was conducted in accordance with the ASTM Standard of Practice E1527-13 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- △ Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.
- △ Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.
- △ Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.
- △ Reviewed results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

- Δ Consulted with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.
- Δ Updated the Phase I report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The rectangular-shaped Site is located approximately 4.5 miles west of the United State Route 101, commonly referred to as the Hollywood Freeway. The Site is bounded by Sunset Boulevard to the north; a retail/commercial structure, gas station, and multi-family residential structure to the east; multi-family residential structure to the south; and Hilddale Avenue to the west. The general Site vicinity is occupied by commercial buildings, retail stores, and multi-family residences.

According to the U.S. Geological Survey (USGS) Beverly Hills Quadrangle (7.5 Minute Series), dated 1999, the Site is at an elevation of approximately 374 feet above mean sea level (AMSL) and appears to slope to the south-southeast. The Site is located at approximate coordinates of 34° 5' 25.80" North Latitude and 118° 23' 11.04" West Longitude.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to the County of Los Angeles's On-Line Parcel Search, the Site is comprised of one parcel that is currently assigned as Assessor's Parcel Number (APN) 4340-001-024. The Site encompasses approximately 20,241 square feet (SF) of land.

The Site is comprised of one two-story commercial office building of approximately 17,791 SF with two and a half levels of underground parking; a covered carport for surface parking areas; and associated landscaping. The office building is located in the north portion of the Site and the covered carport is located along the south boundary of the Site. Vehicle access to the surface parking lot is at the west boundary of the Site along Hilddale Avenue; access to the underground parking levels is in the surface parking area.

The entire first floor of the building is occupied by Hustler Hollywood. The second floor of the building is occupied by three tenants: Liddy Health Works, Lone Group, and Plus Development.

Equipment at the Site includes a hydraulic elevator, HVAC systems, and a hot water heater. In general, the Site appeared to be well maintained and the building/ground conditions observed were good.

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity are included as Appendix B.

2.3 ADJACENT PROPERTIES

The properties north of the Site include Exotic Auto Rental, a nail salon, and restaurants. Properties east of the Site include Spray La Vie (tanning salon), Sunset Oil Gas Station, and a multi-family residential structure. A multi-family residential structure is located south of the Site. The property west of the Site is undeveloped.

2.4 UTILITIES

Electrical service is supplied to the Site by Southern California Edison. Gas service is supplied by Southern California Gas Company. General rubbish (non-hazardous) is removed from the Site on a regular basis by contracted waste disposal services.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

Regional topography in the area of the Site appears to slope to the south-southeast. Surface drainage is generally to the south and east.

3.2 GEOLOGIC CONDITIONS AND SOILS

The Site is located south of the Santa Monica Mountains and the Hollywood Fault. The Site is identified on the Geologic Map of Beverly Hills Quadrangle as being Pleistocene aged older surficial sediments (Qae). These sediments are described on the map as consisting of alluvial fan sediments of granitic sand derived from the Santa Monica Mountains (Dibblee and Ehrenspeck, 1991).

According to the *"Soil Survey of the Los Angeles Area, California"* issued in 1903 by the United States Department of Agriculture, Soil Conservation Service, the soil at the Site is classified as Maricopa sandy loam.

3.3 GROUNDWATER/HYDROGEOLOGICAL CONDITIONS

The Site is located in the Coastal Plain of Los Angeles Groundwater Basin, Hollywood Subbasin (No. 4-11.02) determined by Department of Water (DWR, 2004). The is bounded by Santa Monica Mountains and the Hollywood Fault to the north, the Elysian Hills to the east, the Inglewood fault zone to the west, and the La Brea High to the south. Surface drainage flows southward to join Ballona Creek, then westward to the Pacific Ocean. Groundwater is replenished by percolation of precipitation and stream flow from the higher areas to the north.

Citadel reviewed the Geotracker database of sites that have had releases of fuels, solvents, or other material into the soil and groundwater to obtain information regarding depth to first ground water in the Site vicinity. This database is maintained by the California Regional Water Quality Control Board. Information was obtained from this database for Arco Station located at 8906 Sunset Boulevard, adjacent to the Site. At that facility, depth to groundwater ranged from approximately 17 to 30 feet below ground surface.

3.4 WETLANDS AND FLOOD ZONE

Citadel reviewed information for the presence of wetlands and flood zone areas at the Site and within ½-mile from the Site. Information from the National Wetlands Inventory (NWI) database provided by the United States Fish and Wildlife Service, and Flood Insurance Rate Map (FIRM), published by the Federal Emergency Management Agency (FEMA) were provided by Environmental Data Resources (EDR).

Based on information obtained by EDR and reviewed by Citadel:

- Wetland areas are not indicated at the Site and adjacent properties. According to the NWI database, a freshwater forested/shrub wetland of 2.5 acres is located approximately 1.5 miles west-northwest of the Site. The Classification Code for the wetland provided by the NWI is PFOCh, which describes the wetland as a Palustrine System, and Forested Class. The wetland is seasonally flooded and diked/impounded—created or modified by man-made barrier or dam which obstructs the inflow or outflow of water. The freshwater forested/shrub wetland is surrounded by a freshwater emergent wetland of approximately 4.32 acres. The Classification Code for the wetland provided by the NWI is PEM/SSAh, which describes the wetland as a Paulstrine System with both Emergent Class and Scrub-Shrub Class. The wetland is temporary flooded and diked/impounded.
- The Site is not located within the 100-year or 500-year flood zone, per FEMA Flood Insurance Rate Map No. 06037C. The Site is located approximately 0.35 mile northwest of a 100-year flood zone.

4.0 SITE RECONNAISSANCE

Citadel representative Ms. Whitney Barlow conducted the Site reconnaissance on May 24, 2016. The Site reconnaissance consisted of an inspection of the public building interior, exterior Site areas, and the roof. At the time of the Site reconnaissance, the following tenants occupied the building:

First Floor

- Hustler Hollywood

Second Floor

- Suite 200A: Lone Group
- Suite 200B: Liddy Health Works
- Suite 200C: Plus Development

A perimeter survey of the surrounding properties was also performed at that time. Mr. Mark Drollinger of Citadel served as the Project Manager and reviewed this Phase I ESA Update. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 ON-SITE STORAGE TANKS

No current above ground or underground storage of hazardous materials were identified during the Site reconnaissance.

4.2 IDENTIFIED HAZARDOUS MATERIALS

Citadel inspected the Site for current chemical and hazardous waste storage and handling practices. Limited quantities of hazardous materials are used on the Site for janitorial and building maintenance purposes. Citadel noted the storage of janitorial chemicals and typical household cleaners in the building janitorial rooms.

- Routine janitorial and maintenance supplies are present in containers sized for commercial use. These materials, which include bleach, cleaners, and disinfectants, are stored in the janitorial closet on the second floor. Storage of paints was observed in the janitorial closet.
- One hydraulic passenger elevator was identified at the building. The elevator is serviced by Amtech Elevator Services monthly. The elevator room is located on Level P1 and the motors appeared to be in good condition; no staining or leaking was observed.

4.3 ASBESTOS CONTAINING MATERIALS

Based on the 1988 construction date for the Site building, asbestos-containing building materials (ACBMs) may have been used in the construction of the Site building. A survey for ACBMs was not requested or conducted as part of this Phase I ESA Update.

4.4 LEAD PAINTS

Based on the 1988 construction date for the Site building, it is not likely that lead-based paints are present within the building. A survey for lead containing materials was not requested or conducted as part of this Phase I ESA Update.

4.5 POLYCHLORINATED BIPHENYLS

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1979, the U.S. EPA banned the manufacture and sale of polychlorinated biphenyl (PCB)-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1984, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 16 feet (40 Code of Federal Regulations 761.30: "Fire Rule").

No transformers were visually observed at the Site. One pole-mounted transformer was observed at the adjacent property west of the Site.

Citadel recommends the following measure be taken during routine building maintenance. Upon inspection during replacement and routine maintenance, if ballast labels do not include the statement "No PCBs", the ballast(s) should be disposed of as PCB-containing waste. In addition, electrical panels and related equipment should be inspected prior to disposal to evaluate the construction date and whether the equipment may contain PCB-impregnated paper.

4.6 RADIOACTIVE MAN-MADE MATERIALS

Many public and private office buildings in the United States have self-luminescent tritium exit signs that contain radioactive materials. While these do not constitute a recognized environmental

condition, the exit signs must be properly identified to ensure proper handling and disposal practices. Citadel recommends that the client be aware of whether such exit signs are present within the Site building and institute a management plan to ensure proper handling and disposal whenever such signs are damaged or replaced.

4.7 PITS, PONDS, AND LAGOONS

No pits, ponds, or lagoons were visually observed during the Site reconnaissance or reported to be historically present at the Site.

4.8 SEPTIC TANKS AND CESSPOOLS

No septic tanks or cesspools were visually observed during the Site reconnaissance or reported to have been historically present on the Site.

4.9 WELLS, CISTERNS AND SUMPS

No wells or cisterns were visually observed during the Site reconnaissance or reported to be historically present on the Site. A sump was observed in the lowest level of the parking structure. The sump appeared to be in working order. No surficial staining was observed around or in the sump.

4.10 WASTEWATER INTERCEPTORS / GREASE INTERCEPTORS

No wastewater or grease interceptors were observed during the Site reconnaissance.

4.11 DRINKING WATER

The Site is supplied with municipal drinking water by the Beverly Hills Water.

4.12 RADON

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Los Angeles County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L of air. In a survey, 28 tests were tested within the 90069 zip code for the presence of radon. Of these, no test was found to contain radon in excess of 4 pCi/L.

Site-specific radon values were not available and were not a part of this Phase I ESA Update.

4.13 METHANE

In March, 2004, Ordinance Number 175790 was adopted into the Los Angeles Municipal Code (Section 91.106.4.1 and Division 71, Chapter IX) to establish city wide methane mitigation

requirements, and included updated construction standards to control methane intrusion into buildings. This ordinance established defined geographic areas as Methane Zones and Methane Buffer Zones, which relate to specific assessment and mitigation requirements per area, and set forth a standard of assessment and mitigation in the planning stages of all new construction in these areas. The Los Angeles Department of Building and Safety (LADBS) has provided a Methane Standard Plan which provides excellent guide lines to follow in the development of the site specific plan. The site will fall in a range of Level I thru Level V. As the Methane Levels increase, so do the requirements needed to mitigate the dangers of methane intrusion. There is a direct relationship between project zoning, test results and the final design. Once the Methane Level is determined, the methane requirements can be implemented into the building design, under the permit and approval of LABDS and LAFD.

The Site is not located within the Methane or Methane Buffer Zones recognized by the LADBS.

5.0 SITE HISTORY

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by EDR. In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Thirteen aerial photographs dating from 1928 to 2012 were reviewed. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

1928 Aerial Photograph

Sunset Boulevard and Hilddale Avenue appear to be developed. The Site appears to be developed with single-family residential structures along Hilddale Avenue. Properties in the vicinity appear to be developed with single-family residential structures.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1938 Aerial Photograph

The Site appears unchanged with the exception of an additional structure developed at the Site along Sunset Boulevard. A gas station and a small structure appear developed at a property east of the Site. Larger structures, possibly stores, appear developed north of the Site. A large structure appears developed west of the Site along Sunset Boulevard. The remaining properties in the vicinity appear unchanged.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1948, 1952, and 1964 Aerial Photographs

A multi-family residential structure appears developed south of the gas station. The remaining portions of the Site appear unchanged. According to the Sanborn Map of 1950, a gas station was developed at the north portion of the Site. The properties in the vicinity appear unchanged with the exception of the development of a multi-family residential structure southwest of the Site by 1964.

No pits, sumps or above ground tanks were observed at the Site in these aerial photographs.

1972 Aerial Photograph

The gas station appears to have been removed. The remaining portions of the Site and properties in the vicinity appear unchanged.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1981 Aerial Photograph

The 1981 aerial photograph is unclear; however, it appears that the residential properties at the Site may have possibly been removed and a small structure appears developed at the northwest corner of the Site. The properties in the vicinity appear unchanged.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1989 Aerial Photograph

The current building and carport appear have been developed at the Site by 1989. The Site appears in its current configuration. The properties in the vicinity appear unchanged.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1994 Aerial Photograph

By 1994, the structures at the property west of the Site appear to have been removed. The Site appears unchanged. The adjoining properties appear in their current configuration.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

Copies of the Aerial Photographs can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

EDR provides a listing of building permits for the Site and adjoining properties, if available. Citadel reviewed building permits with the City of West Hollywood, Department of Community Development, Building and Safety Division. Building permits reviewed indicate the building began development in 1987. Certificate of occupancy for the building in 1989 was reviewed.

No information regarding the former gasoline station was revealed in the permit files reviewed by Citadel.

A copy of the EDR Building Permit report and select copies of permits provided by the City of West Hollywood are included as Appendix D.

5.3 HISTORICAL SANBORN FIRE INSURANCE MAPS

Citadel requested that EDR review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Maps for 1910, 1926, 1950, 1955, 1960, 1961, 1962, 1966, 1969, and 1970 were provided.

1910 Sanborn Map

Hilldale Avenue is present as Whipple Avenue and Sunset Boulevard is present as Santa Monica Avenue on this map. The Site is depicted with three single-family residential structures in the south portion of the Site. Properties east and south of the Site are shown with single-family residential structures. Properties west of the Site are shown with undeveloped parcels with the exception of one single-family residential structure. Properties north of the Site are not depicted on this map.

Addresses associated with the Site on this map include 48-53 Whipple Avenue and 3-5 Santa Monica Avenue.

1926 Sanborn Map

Whipple Avenue is now present as Hilldale Avenue and Santa Monica Avenue is now present as Sunset Boulevard on this map. The Site and properties east and south of the Site are unchanged. Properties west of the Site are shown with undeveloped parcels with the exception of one single-family residential structure. A property west of the Site along Sunset Boulevard is depicted with a hand laundry and a small building located at the corner of Sunset Boulevard and Hilldale Avenue. A single-family residential structure is shown south of the hand laundry. Properties north of the Site are not depicted on this map.

Addresses associated with the Site on this map include 420, 422, 424, 428, 1018, 1020, 1024, 1030, and 1036 Hilldale Avenue.

1950 Sanborn Map

A gas station is depicted at the Site. Three of the four single-family residential structures at the Site are unchanged; the other residential structure is now depicted as a two-story multi-family residential structure. An additional single-family residential structure with a garage is shown along the east boundary of the Site. A gas station is depicted east of the Site along Sunset Boulevard. Stores are shown west and north of the Site along Sunset Boulevard. The remaining properties in the vicinity are shown as single-family residential structures.

Addresses associated with the Site on this map include 8920 Sunset Boulevard, 1018, 1020, 1024, 1026, 1028, 1030, 1034, and 1036 Hilldale Avenue.

1955, 1960, 1961, 1962, and 1966 Sanborn Maps

The Site is not present on these maps. Properties north of the Site are shown as occupied by stores and restaurants.

1969 Sanborn Map

The single-family residential structures at the Site are unchanged. The multi-family residential structure is now shown as occupied by offices on the west portion of the building and homes on the east portion of the building. The gas station in the north portion of the Site is no longer depicted at the Site. Properties east of the Site are shown as occupied by a store, gas station, and multi-family residential structures. Properties west of the Site are depicted with stores and surface parking lot. Properties north of the Site are depicted with stores and restaurants. Properties south of the Site are depicted with single-family residential structures.

Addresses associated with the Site on this map include 8920 Sunset Boulevard; and 1018, 1020, 1024, 1026, 1028, 1030, 1032, 1034, and 1036 Hilddale Avenue.

1970 Sanborn Map

The Site is not present on this map. Properties north of the Site are not clearly depicted.

A copy of the EDR Sanborn Insurance Map Report is included as Appendix E.

5.4 HISTORICAL CITY DIRECTORIES

City directories were researched by EDR in order to identify previous Site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. EDR researched city directory listings from 1920 through 2012 (non-inclusive) and provided their search results to Citadel for review.

Properties at the Site along Hilddale Avenue were generally occupied by single-family residential structures 1924 to 1980. The properties listed for 8920 Sunset Boulevard include:

- Union Oil Service Station in 1951
- Power Burger from 1980 to 1985
- European Select Motor Cars in 1991
- Island Pictures/Records from 1991 to 2000
- Hustler Hollywood from 2000 to 2006
- Universal Music in 2006

Citadel's review of the historical city directory listings indicates the presence of facilities that have the potential to negatively impact subsurface conditions beneath the Site.

A copy of the EDR City Directories report is included as Appendix F.

5.5 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

No previously prepared environmental reports were provided for Citadel's review.

5.6 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with

a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide.

EDR provided topographic maps dating from 1896 through 1995 (non-inclusive) for review.

1896 (Santa Monica), 1900 (Los Angeles), 1901 (Southern California Sheet 1), 1902 (Santa Monica) Topographic Maps

Sunset Boulevard appears present on these maps. The Site appears devoid of structures. Several structures appear developed in the vicinity of the Site.

1920 (Santa Monica) and 1926 (Hollywood) Topographic Maps

Hilldale Avenue appears to be present on these maps. The Site and vicinity appear to be developed with residential structures.

1950 (Beverly Hills), 1966 (Beverly Hills), 1972 (Beverly Hills), 1981 (Beverly Hills), 1994 (Beverly Hills), and 1995 (Beverly Hills) Topographic Maps

Structures are not shown on these maps with the exception of churches, government facilities, and schools.

Copies of the historical topographic maps provided by EDR are included as Appendix G.

5.7 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Division of Oil, Gas & Geothermal Resources (DOGGR) Online Mapping System (DOMS) shows that there are seven oil wells approximately 0.5 mile southeast of the Site. The oil wells are identified by APIs 03716556, 03716759 through 03716761, 03721199, 03721202, and 03721237. According to DOMS, the well operator for the seven oil wells is listed as Chevron U.S.A. Inc., and the status for the wells is closed and plugged.

5.8 SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT – FIND DATABASE

Citadel reviewed information available on-line through the South Coast Air Quality Management District's Facility Information Detail (FIND) database. The Site was not listed in the database.

5.9 INTERVIEWS

No interviews were held with the Client as part of this Phase I ESA Update.

5.10 ENVIRONMENTAL LIEN

No Chain of Title or environmental lien reports were provided to Citadel as part of this Phase I ESA Update.

5.11 VAPOR ENCROACHMENT CONCERNS

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a VEC, which is the presence or likely presence of chemicals of concern vapors in the subsurface of the TP caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default AOC defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with COCs exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located cross-gradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated plume that might be associated with the nearby known or suspected COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by EDR regarding nearby sites to evaluate for potential on-Site vapor encroachment concerns from off-site sources. Historical releases of petroleum

products from a LUST occurred at the adjoining property east of the Site. This property was identified as Arco Station #5122 located at 8906 Sunset Boulevard. According to information made available by the Regional Water Quality Control Boards (RWQCB) on-line Geotracker database, the case began on April 15, 1985 due to the request of the RWQCB – Los Angeles to determine the possible source of hydrocarbon impacted groundwater observed near the intersection of Santa Monica Boulevard and Huntley Drive located approximately 3,000 feet southeast of the property. Groundwater monitoring wells were installed at the property on August 2, 1985 and soil samples collected for analysis detected total petroleum hydrocarbons gasoline (TPHg) at a maximum concentration of 105 milligrams per kilogram (mg/kg). Free-phase hydrocarbon was observed in a groundwater monitoring well. According to GeoTracker, Arcadis U.S., Inc., on behalf of Arco, requested a low-threat closure for the property on February 25, 2013. Closure from further environmental assessment was granted to the property owner on July 7, 2015. This facility lies cross gradient from the Site, it is not likely to have adversely affected the Site.

There are two sites within 0.25-mile and upgradient of the Site that are listed on the Historical Cleaners database. According to EDR, the closest site on this database is located at 8962 Sunset Boulevard which was occupied by Marie Peterson in 1942. According to EDR, the property is approximately 107 feet west-northwest of the Site. The type of cleaners is listed as hand laundry. According to city directories, this property was occupied by a beauty supply store by 1975. Another dry cleaning property is located at 8966 Sunset Boulevard and was occupied by Pedersen and Christine Grimlund from 1929 to 1937. According to EDR, the property is approximately 126 feet west-northwest of the Site and the type of cleaners is also listed as hand laundry. Due to the listed type of laundry, these properties are not likely to have adversely affected the Site.

There are five sites within 0.25-mile of the Site that are listed on the Historical Auto Stations database. According to EDR, the closest site on this database, approximately 48 feet northwest of the Site, is located at 8929 Sunset Boulevard which was occupied by Redline Motor Group from 2006 to 2012. According to the city directories reviewed, the property was occupied by European Select Motor Cars in 1991 and Beverly Sunset Motors, Inc. in 2000. Based on the relatively recent occupancy of the property and that no UST was reported, this property is not expected to adversely affect the Site.

Another nearby property on the database is located at 8923 Sunset Boulevard and was occupied by Ramplin in 1929 and Hunt in 1933. According to EDR, the property is approximately 66 feet north of the Site and was listed as a gas service station and auto repair. According to the city directories, the property may have been occupied as a residential property in 1924 and 1937. Due to the relatively short amount of time occupied as a gas service station or auto repair shop (possibly between 1924 and 1937), this property is not likely to have adversely affected the Site.

Additional properties listed on the Historical Auto Stations database are greater than 80 feet and cross gradient from the Site. No known releases of petroleum hydrocarbons have occurred at these properties. These properties are not expected to have adversely affected the Site.

A copy of the vapor encroachment report provided by EDR is included as Appendix H.

5.12 SUMMARY OF SITE HISTORY

A review of historical records showed that the Site was developed with single-family residential structures in the middle and south portion of the Site in 1910. A gas station appeared to have been developed in the north portion of the Site by 1938 and removed by 1969. No information

regarding the removal of the gasoline station was available for review. No documentation regarding the presence or removal of the USTs was found in the database searches conducted by Citadel.

By 1981, the residential properties at the Site were removed and a small structure was developed at the northwest corner of the Site. According to a historical search of city directories, the small structure may have been occupied by Power Burger, a fast food restaurant. The current building began development in 1987 was occupied by European Select Motor Cars in 1991, Island Pictures/Records from 1991 to 2000, Hustler Hollywood since 2000, and Universal Music in 2006.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the Phase I ESA, Citadel utilized EDR of Milford Connecticut, as an information source for regulatory agency database records.

The following summary of the database information is divided into two columns. The first column lists sites as identified and located by EDR within the specified distance of the Site. The second column lists orphan sites, which could not be located by EDR due to incomplete and/or inaccurate address information included in the USEPA/state databases, which Citadel identified as potentially lying within the search distance.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	No. of Plottable Sites	Orphan
National Priorities List	1 mile	0	0
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	0	0
Delisted National Priorities List	1 mile	0	0
CERCLIS Sites	1/2 mile	0	0
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	1/2 mile	0	0
RCRA Non-Corrective Action TSD Facilities	1/2 mile	0	0
State/Tribal Voluntary Cleanup Sites	1/2 mile	0	0
State/Tribal Leaking Registered Storage Tank Sites	1/2 mile	18	0
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	3	0
Historic CORTESE List	1/2 mile	12	0

Database	Radius	No. of Plottable Sites	Orphan
State/Tribal Solid Waste Landfill Sites/Facilities	1/2 mile	0	0
Federal/State/Tribal Engineering Controls Registries	1/2 mile	0	0
Federal/State/Tribal Institutional Controls Registries	1/2 mile	0	0
RCRA Large Quantity Generators	1/4 mile	1	0
RCRA Small Quantity Generators	1/4 mile	3	0
RCRA Non Generators	1/4 mile	0	0
State/Tribal Registered Storage Tank Sites	1/4 mile	1	0
HIST UST	1/4 mile	2	0
CA FID UST	1/4 mile	1	0
SWEEPS UST	1/4 mile	5	0
Facility Index System (FINDS)	Site	0	0
HAZNET	Site	0	0

A listing of facilities at the Site and adjoining properties of the Site is included in the following table. A brief discussion of select facilities and their database listings are included following the table. The full report provided by EDR and reviewed by Citadel can be found in Appendix I.

EDR Listing of Site and Adjoining Properties ¹			
Facility Name	Facility Address	Distance From Site	Database Reference
Boston Market Restaurant	8920 West Sunset Boulevard	Target Property	LOS ANGELES CO. HMS
Ramplin J H	8923 South Sunset Boulevard	66 feet – North	EDR US Hist Auto
N/A	8906 West Sunset Boulevard	79 feet – East-Northeast	EDR US Hist Auto
Arco Products #05122	8906 West Sunset Boulevard	79 feet – East-Northeast	LUST, UST, LOS ANGELES CO. HMS, CA FID UST, SWEEPS UST, HIST CORTESE
Hassan A Soltani	8906 West Sunset Boulevard	79 feet – East-Northeast	HIST UST
Hobart Motor Service	8900 South Sunset Boulevard	177 feet – East-Northeast	EDR US Hist Auto Stat

The Site appeared on the following reviewed environmental databases: LOS ANGELES CO. HMS.

The Site as Boston Market Restaurant was listed on the Los Angeles County Hazardous Materials System database. The database includes listings of industrial waste and UST sites. According to

¹ Distance and direction from Site assigned by EDR. Actual distance and direction from the Site boundary may vary.

EDR, the facility status was listed as closed. No further information was provided. According to a historical search of city directories, Boston Market Restaurant may not have occupied the Site. However, it may be possible that Boston Market Restaurant was related to Power Burger and may have been on this list due to disposal of kitchen grease. This is not a concern for the Site.

Maps showing the location of these facilities and additional information are provided in the EDR Radius Map Report in Appendix I.

6.2 GEOTRACKER DATABASE

The GeoTracker Database is a State Board's Internet-accessible database system used by the State Board, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. According to Geotracker, the closest Site listed as a LUST is located at 8906 Sunset Boulevard, approximately 140 feet east of the Site. This Site was discussed in Section 5.11 Vapor Encroachment Concerns.

7.0 DATA GAPS

The following data gaps have been identified during the course of this investigation:

- Additional governmental agencies, such as the City of Los Angeles Fire Department, that are not included in the EDR Radius Map report may maintain information regarding environmental conditions at the Site and nearby facilities.
- The client did not provide Citadel chain-of-title information or a search for environmental liens.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation.

8.0 FINDINGS

Citadel Environmental Services, Inc. (Citadel) was contracted by 8920 Sunset VE LLC (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) Update of the property located at 8920 West Sunset Boulevard, in the City of West Hollywood, Los Angeles County, California; hereinafter referred to as the "Site."

According to the County of Los Angeles's On-Line Parcel Search, the Site is comprised of one parcel that is currently assigned as Assessor's Parcel Number (APN) 4340-001-024. The Site encompasses approximately 20,241 SF of land.

The Site is comprised of one two-story commercial office building of approximately 17,791 SF with two and a half levels of underground parking; a covered carport for surface parking areas; and associated landscaping. The office building is located in the north portion of the Site and the covered carport is located along the south boundary of the Site. Vehicle access to the surface parking lot is at the west boundary of the Site along Hilldale Avenue; access to the underground parking levels is in the surface parking area.

The entire first floor of the building is occupied by Hustler Hollywood. The second floor of the building is occupied by three tenants: Liddy Health Works, Lone Group and Plus Development.

Equipment at the Site includes a hydraulic elevator, HVAC systems, and a hot water heater. In general, the Site appeared to be well maintained and the building/ground conditions observed were good.

A review of historical records showed that the Site was developed with single-family residential structures in the middle and south portion of the Site in 1910. A gas station appeared to have been developed in the north portion of the Site by 1938 and was removed by 1969. No information regarding the removal of the gasoline station was available for review. No documentation regarding the presence or removal of the USTs was found in the database searches conducted by Citadel.

By 1981, the residential properties at the Site were removed and a small structure was developed at the northwest corner of the Site. According to a historical search of city directories, the small structure may have been occupied by Power Burger, a fast food restaurant. The current building began development in 1987 was occupied by European Select Motor Cars in 1991, Island Pictures/Records from 1991 to 2000, Hustler Hollywood since 2000, and Universal Music in 2006.

The Site as Boston Market Restaurant was listed on the Los Angeles County Hazardous Materials System database. The database includes listings of industrial waste and UST sites. According to EDR, the facility status was listed as closed. No further information was provided. According to a historical search of city directories, Boston Market Restaurant may not have occupied the Site. However, it may be possible that Boston Market Restaurant was related to Power Burger and may have been on this list due to disposal of kitchen grease. This is not a concern for the Site.

Historical releases of petroleum products from a LUST occurred at the adjoining property east of the Site. This property was identified as Arco Station #5122 located at 8906 Sunset Boulevard. According to information made available by the Regional Water Quality Control Boards (RWQCB) on-line Geotracker database, the case began on April 15, 1985 due to the request of the RWQCB – Los Angeles to determine the possible source of hydrocarbon impacted groundwater observed near the intersection of Santa Monica Boulevard and Huntley Drive located approximately 3,000 feet southeast of the property. Groundwater monitoring wells were installed at the property on August 2, 1985 and soil samples collected for analysis detected total petroleum hydrocarbons gasoline (TPHg) at a maximum concentration of 105 milligrams per kilogram (mg/kg). Free-phase hydrocarbon was observed in one of the wells. According to GeoTracker, Arcadis U.S., Inc., on behalf of Arco, requested a low-threat closure for the property on February 25, 2013. Closure from further environmental assessment was granted to the property owner on July 7, 2015. This facility lies cross gradient from the Site, it is not likely to have adversely affected the Site.

There are two sites within 0.25-mile and upgradient of the Site that are listed on the Historical Cleaners database. According to EDR, the closest site on this database is located at 8962 Sunset Boulevard which was occupied by Marie Peterson in 1942. According to EDR, the property is approximately 107 feet west-northwest of the Site. The type of cleaners is listed as hand laundry. According to city directories, this property was occupied by a beauty supply store by 1975. Another dry cleaning property is located at 8966 Sunset Boulevard and was occupied by Pedersen and Christine Grimlund from 1929 to 1937. According to EDR, the property is approximately 126 feet west-northwest of the Site and the type of cleaners is also listed as hand laundry. Due to the listed type of laundry, these properties are not likely to have adversely affected the Site.

There are five sites within 0.25-mile of the Site that are listed on the Historical Auto Stations database. According to EDR, the closest site on this database, approximately 48 feet northwest of the Site, is located at 8929 Sunset Boulevard which was occupied by Redline Motor Group from 2006 to 2012. According to the city directories, the property was occupied by European Select Motor Cars in 1991 and Beverly Sunset Motors, Inc. in 2000. Based on the relatively recent occupancy of the property and that no UST was reported, this property is not expected to adversely affect the Site.

Another nearby property on the database is located at 8923 Sunset Boulevard and was occupied by Ramplin in 1929 and Hunt in 1933. According to EDR, the property is approximately 66 feet north of the Site and was listed as a gas service station and auto repair. According to the city directories, the property may have been occupied as a residential property in 1924 and 1937. Due to the relatively short amount of time occupied as a gas service station or auto repair shop (possibly between 1924 and 1937), this property is not likely to have adversely affected the Site.

Additional properties listed on the Historical Auto Stations database are greater than 80 feet and cross gradient from the Site. No known releases of petroleum hydrocarbons have occurred at these properties. These properties are not expected to have adversely affected the Site.

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-13, REC fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A CREC is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

A HREC is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a VEC, which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out

the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

A gas station formerly occupied the Site from 1938 to 1969. No information regarding the removal of the gasoline station was available for review. No documentation regarding the presence or removal of the USTs was found in the database searches conducted by Citadel. Due to the construction of the current subterranean parking levels at the Site, any suspect fuel releases to the soil from the gas station may have been removed during the excavation process. However, Citadel understands that redevelopment of the Site may include constructing a subterranean parking structure deeper than that currently on-Site. In light of this, and that no information regarding the former gasoline station was available for review, Citadel recommends that a Soil Management Plan be completed prior to any soil disturbance. Implementation of the Soil Management Plan will include a third party consultant soil monitor to ensure worker safety during soil disturbance activities.

Due to the shallow groundwater in the Site vicinity, the former presence of a gasoline station on the Site and recent groundwater mitigation and monitoring at other properties in the Site vicinity, Citadel recommends that any dewatering during development be tested prior to release.

The current Site building was constructed in 1988, prior to the EPA ban for using asbestos-containing building materials (ACBMs) came into effect. No testing is known to have been performed to evaluate for the presence of ACBMs.

Since the temporary ban of ACBMs was put into effect in 1989, Citadel recommends that the Client perform a survey for ACBMs *prior* to any renovation or demolition of the current buildings. Such surveys should be performed to identify ACBMs to ensure proper handling and disposal and to allow for measures to protect both worker and building occupant safety during routine building maintenance, renovation or demolition.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel Environmental Services, Inc. will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession, but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

12.0 PROFESSIONAL CERTIFICATION

Citadel has completed this Phase I ESA Update for the property located at 8920 West Sunset Boulevard, in the City of West Hollywood, Los Angeles County, California. The Phase I ESA Update was performed at the Client's request in accordance with the ASTM Standard of Practice E1527-2013 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA Update are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA Update report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (November 1, 2013). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this Phase I ESA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-05 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records – The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

*Each category may include several separate databases, each having a different search distance. For each category, the table reports the maximum search distance applied. See the section 'Record Sources and Currency' for information on individual databases.

EXECUTIVE SUMMARY

TARGET PROPERTY INFORMATION

ADDRESS

8920 SUNSET BOULEVARD
8920 SUNSET BOULEVARD
WEST HOLLYWOOD, CA 90069

COORDINATES

Latitude (North): 34.0905 - 34° 5' 25.79956"
Longitude (West): 118.3864 - 118° 23' 11.033936"
Elevation: 374 ft. above sea level

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records.

Site

BOSTON MARKET RESTAURANT
8920 W SUNSET BLVD
WEST HOLLYWOOD, CA

Database(s)

LOS ANGELES CO. HMS

EXECUTIVE SUMMARY

PHYSICAL SETTING INFORMATION

Flood Zone: YES

NWI Wetlands: YES

AQUIFLOW®

Search Radius: 0.333 Mile.

No Aquiflow sites reported.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

EXECUTIVE SUMMARY

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types: fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types: stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

EXECUTIVE SUMMARY

SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

Telephone: 202-564-6023

Last EDR Contact :07/03/2013

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Last EDR Contact :09/13/2013

Source: EPA
Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HISTORICAL USE RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WEST HOLLYWOOD ELEME	970 N HAMMOND ST	SW 0 - 1/8 (0.071 mi.)	C18	46

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/01/2016 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:
Responsible Party: RWQCB REFERRAL SITE
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc:

Actual:
213 ft.

This site is being remediated by the RPs with oversight by the RWQCB. Consequently, there are no plans to spend Bond funds for this site at this time.

Site Description: Sunlin, Inc., operates the Santa Palm Car Wash. The facility sold unleaded gasoline which was stored in underground tanks.

Hazardous Waste Desc: Beginning in March, 1985, complaints of strong gasoline odors were received from residents in the vicinity. Unleaded gasoline has been identified on the surface of the ground water beneath the car wash and downgradient. Gasoline contains benzene, ethyl benzene, xylene, and toluene.

Threat To Public Health & Env: A plume of gasoline contamination exists in an elongated 900 foot northwest-southeast direction. The contamination is found in the soil and ground water. Ongoing air monitoring now shows no elevated hydrocarbons in residences. Three ground water treatment systems are currently online and were designed to further reduce contaminant levels in the ground water.

Site Activity Status: The Regional Water Quality Control Board is the lead agency for ongoing ground water remedial activities to recover free product and contaminated ground water. In June, 1985, the Department made a determination of imminent or substantial endangerment and a RAO ordered the potentially responsible parties (PRPs) to initiate immediate interim remedial measures. The PRPs have three ground water treatment systems online. The dates for the systems' initiation are: June 19, 1985, January 27, 1986, and August 25, 1986. A fourth system should be online November, 1988.

Case Type:	Cleanup Program Site
Case Worker:	JL
Local Agency:	Not reported
RB Case Number:	0926
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE)
Site History:	The site property consists of one single-story, multi-tenant commercial building and one two-story, multi-use building, located at 8715-8727 Santa Monica Boulevard, in the City of West Hollywood. The property is occupied by several commercial businesses. The subject dry-cleaners were located on the first floor of the two-story building. Since 1983, the site had been occupied by several dry-cleaning businesses. A Phase I Environmental Site Assessment conducted by WEECO in April 1999 reported that the dry-cleaners had been cited for improper chemical handling. Subsequent site investigations revealed the impact of underlying soil and groundwater. The soil impact soil was successfully remediated via a soil vapor extraction system (SVE) from June 2002 to December 2002. Regional Board granted a No-further-action status in October 2003 for

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 39970.7

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 2608

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.
Amount (Lbs): 60

Amount (Lbs): 1300

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 115

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 115

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1450

Facility Has Received Notices of Violations:

Regulation violated: Not reported

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/06/2016	Telephone: 703-603-8704
Date Made Active in Reports: 05/20/2016	Last EDR Contact: 04/08/2016
Number of Days to Update: 135	Next Scheduled EDR Contact: 07/18/2016
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 08/01/2016
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 03/30/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/11/2016

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 05/16/2016
Number of Days to Update: 13	Next Scheduled EDR Contact: 08/29/2016
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 02/29/2016
Number of Days to Update: 53	Next Scheduled EDR Contact: 06/13/2016
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
LOS ANGELES, CA

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
BEVERLY HILLS

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types: fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types: stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
