The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EBI Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

**Subject: Phase I Environmental Site Assessment, 8850 Sunset Blvd
8850 Sunset Boulevard, West Hollywood, California
EBI Project # 1118003187**

To Whom It May Concern:

Attached please find EBI's *Phase I Environmental Site Assessment*, (the *Report*) for the above-mentioned asset (the Subject Property). During the property survey and research, EBI's property surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the property and its history. The *Report* was completed according to the terms and conditions authorized by you, the Client. This *Report* has been completed in general conformance with ASTM E 1527-13 and Ladder Capital Finance LLC's Scope of Work.

This report has been prepared to assist in the determination of whether to make a loan or loans evidenced by a note or notes (the "Notes") secured by the property referred to in the report or by a pledge of the equity interests in the borrower. With no prior approval, this report may be relied upon by (i) Ladder Capital Finance LLC, its employees, agents, servicers, legal counsel, co-lenders, loan syndication participants, successors and/or assigns and affiliates, (ii) the trustee of a trust created in connection with a securitization which includes any of the Notes or an interest therein, (iii) any purchaser or assignee of the Notes or an interest therein in determining whether to acquire the Notes or an interest therein, (iv) any rating agency involved in rating securities which represent a beneficial ownership interest in a trust fund that consists of mortgage loans or mezzanine loans including any of the Notes or an interest therein, (v) any investors purchasing securities issued by a trust or otherwise purchasing a loan with an ownership interest, either directly or indirectly, in the Notes, and (vi) any bank, financial institution or other company or firm providing any financing for which the Notes, or any interest therein, are the collateral for such financing, and their respective successors and/or assigns. This report may be used in connection with the offering materials for sale of the Notes, or an interest in the Notes, and in presentations to any rating agency, investors or lenders and [name of consultant] agrees to cooperate in answering questions by any of the above parties in connection with a securitization, sale or other transaction involving the Notes, or any portion thereof, and/or such securities.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein. EBI Consulting is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the *Report* or on the closing of any business transaction.

EBI Consulting declares that, to the best of our professional knowledge and belief, EBI meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and EBI has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. EBI Consulting has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you for the opportunity to prepare this *Report*, and assist you with this project. Please call us if you have any questions or if EBI Consulting may be of further assistance.

Respectfully Submitted,
EBI CONSULTING

EXECUTIVE SUMMARY

At the request of Ladder Capital Finance LLC, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 8850 Sunset Boulevard in West Hollywood, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes eight contiguous parcels totaling 0.913± acre. The three parcels on the north side are improved with four commercial buildings, two with billboards on top, along West Sunset Boulevard. The buildings were initially constructed in 1921 – 1937, with limited additions through 1958, according to Los Angeles County Assessor data. The buildings were constructed slightly into the sloping site with basements. The western building includes a full walk-out basement used as retail space. Although the building heights are similar, some of the building spaces include split levels or improved mezzanine areas. Parking areas associated with these buildings are located on the south side of their respective parcels. The other five parcels are paved parking lots operated independently of the commercial buildings. The parking lot area is generally split in half with a short retaining wall to accommodate the southern down-sloping topography with upper and lower parking lots. There is an additional retaining wall along the southern boundary. Landscaping is limited to a few sidewalk trees on the north side and minimal planter beds on the south side of the buildings.

At the time of EBI's site visit, the Subject Property was occupied by nine commercial tenants that included stores, restaurants, offices and a night club. There were no industrial or manufacturing activities.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

- (1) Based on the planned redevelopment of the Subject Property and known low level impacts to the Subject Property from the off-site gas station release, EBI recommends that a Soil/Groundwater Management Plan (SGWMP) be developed and implemented during the proposed construction activities. The purpose of the SGWMP is to suggest procedures for the proper handling and disposal of potentially impacted soil/groundwater disturbed during on-site activities where future soil excavation and/or groundwater dewatering may occur.

Additionally, EBI recommends that the Regional Water Quality Control Board (RWQCB) be contacted prior to demolition activities in order to have the monitoring wells associated with the off-site gas station LUST incidents properly abandoned.

I.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 8850 Sunset Boulevard in West Hollywood, California.

I.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

I.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, radon, mold, Chinese drywall, and wetlands.

I.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of Ladder Capital Finance LLC, in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by Ladder Capital Finance LLC (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit *Ladder Capital Finance LLC* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute “all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice” as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with authorities having jurisdiction over the Subject Property. *Ladder Capital*

Finance LLC agrees that EBI has no obligation to independently verify the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

I.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to assist Ladder Capital Finance LLC in its underwriting of a proposed mortgage loan on the Subject Property. This report can be relied upon by only the parties stated in the transmittal letter at the front of this report. In the event that EBI provides a purchaser written permission to use this report, EBI's liability to such purchaser is limited to the cost of the report. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and EBI's contract and report extends to Ladder Capital Finance LLC only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

I.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Los Angeles County Assessor's Office, the Subject Property is owned by 5th Gear, LLC. The Subject Property is located at 8850 - 8878 W. Sunset Boulevard in West Hollywood, Los Angeles County, California. The Subject Property includes eight contiguous, rectangular-shaped parcels, totaling approximately 0.913 acre, identified as the following Assessor Parcel Numbers (APNs):

- APN 4339-017-001, addressed as 8850 W. Sunset Boulevard
- APN 4339-017-002, addressed as 8866 W. Sunset Boulevard
- APN 4339-017-003, addressed as 8874 W. Sunset Boulevard
- APN 4339-017-004, parking lot, no assigned address
- APN 4339-017-005, parking lot, no assigned address
- APN 4339-017-006, addressed as 1029 Larrabee Street, parking lot
- APN 4339-017-007, parking lot, no assigned address
- APN 4339-017-008, parking lot, no assigned address

The Subject Property is located on the south side of West Sunset Boulevard and is enclosed by San Vicente Boulevard on the west and Larrabee Street on the east. Figure 1 - Location Map depicts the location of the Subject Property on a street map of West Hollywood, California. Figure 2 - Locus Map depicts the location of the Subject Property on the Beverly Hills, California United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property includes eight contiguous parcels totaling 0.913± acre. The three parcels on the north side are improved with four commercial buildings, two with billboards on top, along West Sunset Boulevard. The buildings were initially constructed in 1921 – 1937, with limited additions through 1958, according to Los Angeles County Assessor data. The buildings were constructed slightly into the sloping site with basements. The western building includes a full walk-out basement used as retail space. Although the building heights are similar, some of the building spaces include split levels or improved mezzanine areas. Parking areas associated with these buildings are located on the south side of their respective parcels. The other five parcels are paved parking lots operated independently of the commercial buildings. The parking lot area is generally split in half with a short retaining wall to accommodate the southern down-sloping topography with upper and lower parking lots. There is an additional retaining wall along the southern boundary. Landscaping is limited to a few sidewalk trees on the north side and minimal planter beds on the south side of the buildings. The four buildings and land areas including the following:

8866-8872 W. Sunset Boulevard	1+	Yes	3,092	1935 – 1958	0.073
8874-8878 W. Sunset Boulevard	1	Yes	3,347	1937 - 1950	0.063
Parking Lots	NA	NA	NA	NA	0.598

* Data provided by the Los Angeles County Assessor indicate initial construction of 1921 – 1937 with later additions/modifications

The Subject Property is planned to be redeveloped into a mixed-use hotel with two sub-slab parking garage levels, hotel suites, residential condominiums, retail stores, and a restaurant.

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of EBI's site visit, the Subject Property was occupied by nine commercial tenants that included stores, restaurants, offices and a night club. There were no industrial or manufacturing activities. The current tenant summary is presented in the following table.

CURRENT OCCUPANTS AND OPERATIONS			
Occupant	Location	Operations	Notable Hazardous Substances / Petroleum Products Identified
Terner's Liquor and Deli	8850	Store	None
Viper Room	8852	Club	None
Sun Bee Market	8860	Store	None
Barcode Barbershop	8860A	Barbershop	None
Ta-ke Sushi	8866	Restaurant	None
Amarone	8868	Restaurant	None
Waterfall Bridge Capital	8870	Offices	None
Glenn Lerner	8872	Offices	None
Aahs	8878	Store	None

Please refer to Section 5.2 for further discussion regarding hazardous substances and petroleum products at the Subject Property.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	Provider/Source
Potable Water Supply	City of Beverly Hills
Sewage Disposal System	City of Los Angeles
Electrical Service	Southern California Edison Company
Natural Gas Service	Southern California Gas Company
Oil Service	Not applicable
Heating/Cooling Systems	Primarily rooftop HVAC units with some through-window and exterior wall-mounted units, natural gas and electric
Emergency Power	Not applicable

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by residential and retail / commercial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by West Sunset Boulevard followed by commercial buildings (offices, restaurants and stores) at 8833 – 8901 W. Sunset Boulevard.
South	The Subject Property is bound to the south by The London Hotel at 1020 N. San Vicente Boulevard.
East	The Subject Property is bound to the east by North Larrabee Street followed by Chase

ADJOINING PROPERTIES	
	Bank at 8830 W. Sunset Boulevard and a multi-family building at 1014 – 1018 N. Larrabee Street.
West	The Subject Property is bound to the west by North San Vicente Boulevard followed by a gas station at 8906 W. Sunset Boulevard and by houses at 1019 – 1023 N. San Vicente Boulevard.

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties, except for monitoring wells at the adjoining gas stations at 8873 W. Sunset and 8906 W. Sunset (and at the Subject Property) that are associated with LUST activity these two adjacent sites. This is discussed further in Section 4.1.2.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by Ladder Capital Finance LLC with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. Relevant documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by Ladder Capital Finance LLC. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

Ladder Capital Finance LLC provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

Ladder Capital Finance LLC provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Ladder Capital Finance LLC provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Ladder Capital Finance LLC provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Ladder Capital Finance LLC provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

Ladder Capital Finance LLC retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded “orphan” properties within the same zip code. The database report is presented in Appendix E.

The database report identified one “orphan” site. Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate this site via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan site within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listings Within Search Distance
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal CERCLIS Sites	0.5 mile	No	0
Federal CERCLIS NFRAP Sites	0.5 mile	No	0
Federal RCRA CORRACTS Sites	1.0 mile	No	0
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	No	1
Federal Engineering / Institutional Control Sites	0.5 mile	No	0
Federal ERNS Sites	Property	No	NA
CA Annual Workplan Sites (AWP)	1.0 mile	No	0
CA High-Priority Confirmed Release Sites (RESPONSE)	1.0 mile	No	0
CA Hazardous Waste Sites (ENVIROSTOR)	1.0 mile	No	3
CA Cal-Sites/HIST Cal-Sites	1.0 mile	No	0
CA Proposition 65 Notification Records (Notify 65)	1.0 mile	No	1
CA Toxic Pits Cleanup Act Sites (Toxic Pits)	1.0 mile	No	0
CA Bond Expenditure Plan	1.0 mile	No	1
CA Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)	0.5 mile	No	14
CA Spill, Leaks, Investigations, and Cleanup (SLIC)	0.5 mile	No	2
CA Voluntary Cleanup Program (VCP) Properties	0.5 mile	No	0
CA Leaking Underground and Aboveground Storage	0.5 mile	No	16

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listings Within Search Distance
Tanks (LUST/LAST)			
CA Storage Tank Databases (AST, UST, FID UST, HIST UST, SWEEPS UST)	Property & Adjoining	No	2
CA Solid Waste Information System (SWIS and SWF/LF)	0.5 mile	No	0
CA Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)	0.5 mile	No	0

CA Brownfields	0.5 mile	No	0
Tribal Environmental Databases	1.0 mile	No	0
Other Non-ASTM Databases	Property	No	NA

4.1.1 Federal Agency Database Records

National Priority List (NPL)

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)

SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS database.

SEMS – ARCHIVE

SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not

considered sufficient to warrant Federal Superfund action or NPL consideration. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS-ARCHIVE database.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)
RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. The Subject Property was not identified on the RCRA Generator database. However, one adjoining property was identified on the RCRA Generator database. Information regarding the listed site is presented in the following table:

RCRA GENERATORS			
Site	Distance / Direction / Gradient*	EPA ID No.	Regulatory Status
Shell Service Station 8873 Sunset Blvd West Hollywood, CA	Adjacent/ (across street) North / Upgradient	CAD981405939	Small Quantity Generator. No violations reported.

* Presumed hydrogeologic gradient based upon regional topography

Based on the absence of reported violations, no further action regarding this listing is warranted. This property is further discussed in the LUST database section (Section 4.1.2).

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants

remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

4.1.2 State and Tribal Agency Database Records

Annual Workplan Sites (AWP)

The California Department of Toxic Substance Control (DTSC) Annual Workplan Sites (AWP) identifies known hazardous substance release sites targeted for cleanup. The data source is the California Environmental Protection Agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the AWP database.

California High-Priority Confirmed Release Sites (RESPONSE)

The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in the remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RESPONSE database.

California Hazardous Waste Sites (ENVIROSTOR)

The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Subject Property was not identified on the ENVIROSTOR database. However, three sites located within 1.0 mile of the Subject Property were identified on the ENVIROSTOR database and none represent an environmental concern to the Subject Property based on their downgradient locations and distance of at least 0.3 mile from the Subject Property.

Cal-Sites/HIST Cal-Sites

Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control (DTSC). This database is no longer updated by the state agency. It has been replaced by ENVIROSTOR. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Cal-Sites/HIST Cal-Sites databases.

Proposition 65 Notification Records (Notify 65)

Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. The Notify 65 database includes listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency. The Subject Property is not identified on the Notify 65 database. However, one site located within 1.0 mile of the Subject Property is identified on the Notify 65

database. The listed site is located approximately 0.448 mile from the Subject Property in a presumed crossgradient to downgradient location. Based upon the distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified facility represent an environmental concern to the Subject Property.

Toxic Pits Cleanup Act Sites (Toxic Pits)

The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. The Subject Property was not identified on the Toxic Pits database.

California Bond Expenditure Plan

The California Bond Expenditure Plan was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds. The Subject Property was not identified on the California Bond Expenditure Plan. However, one site within 1 mile of the Subject Property was identified on the California Bond Expenditure Plan and does not represent an environmental concern to the Subject Property based on its downgradient location and distance of 0.322 mile from the Subject Property.

Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)

The Hazardous Waste and Substance Site List (also known as the Cortese/HIST Cortese databases) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California DTSC is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese/HIST Cortese databases. The Subject Property was not identified on the Cortese/HIST Cortese databases. However, 14 sites located within 0.5 mile of the Subject Property were identified on the Cortese/HIST Cortese databases. These sites are also listed in the LUST database and are further discussed under that heading.

Spill, Leaks, Investigations, and Cleanup (SLIC)

The Subject Property was not identified on the SLIC List. However, two listings for the same site within 0.5 mile of the Subject Property were identified on the SLIC List. This site does not represent an environmental concern to the Subject Property based on its downgradient location and distance of 0.304 mile from the Subject Property.

Voluntary Cleanup Program (VCP) Properties

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the VCP database.

Leaking Underground and Aboveground Storage Tank Sites (LUST/LAST)

The California Water Resources Control Board along with their Regional Offices maintain databases of reported Leaking Underground Storage Tank sites. The Subject Property was not identified on the LUST List. However, 16 sites (reduced from a total of 21 listings due to duplicate sites) located within 0.5 mile of the Subject Property were identified on the LUST databases. Fourteen (14) of the 16 LUST sites are not likely to represent an environmental concern to the Subject Property based on their

location of at least 0.1 mile from the Subject Property and their case closed status and/or crossgradient or downgradient location. The remaining sites are discussed in the following table.

LUST			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Shell Service Station 8873 W. Sunset Blvd West Hollywood, CA	Adjacent/ (across street) North-Northwest/ Crossgradient to Upgradient	T0603704683	Release of gasoline to aquifer reported 1985. Open – Verification Monitoring as of 08/17/2015.
ARCO #5122 Station 8906 W. Sunset Blvd Los Angeles, CA	Adjacent/ (across street) West / Crossgradient to Upgradient	T0603701226	Release of gasoline to aquifer reported 1985. Case closed 07/07/2015.

*Presumed direction of groundwater flow

A Shell Service Station (8873 W. Sunset Boulevard) was historically located on the north adjoining property and is identified on the HIST Auto Station, UST, LUST, Cortese, and RCRA-SQG databases. A 2015 Case Closure Denial letter from the RWQCB was reviewed. According to this letter, the site historically operated eight USTs containing fuel and waste oil that were removed in 1962 and 1988. In 2007, one additional waste oil tank was removed. Several investigations conducted 1985 – 2013 identified total petroleum hydrocarbons as gasoline (TPHg) up to 6,500 parts per million (ppm), TPH as diesel (TPHd) up to 1,200 ppm, total recoverable petroleum hydrocarbons (TRPH) up to 4,100 ppm, and benzene up to 105 ppm in soil. In 1988 and 1989, approximately 277 tons of impacted soil were excavated during station demolition and an additional 1,845 tons of soil were excavated in 2004 to an approximate depth of 35 feet bgs. Fifteen groundwater monitoring wells have been installed on and off site (including five wells on the Subject Property that were installed in 1994). Free product up to 2.88 feet was observed in several wells through 1985. Free product was last observed in 2002, and through remedial action 1,616.7 gallons of free product were removed. From 1994 to 2002, groundwater extraction remediation removed approximately 2.4 million gallons of groundwater. In 2010, ten wells were removed to allow for site redevelopment. Groundwater data reported in 2015 notably identified TPHg up to 11,000 parts per billion (ppb) and benzene up to 2,500 ppb. In 2013, a soil vapor investigation was performed near the eastern adjacent residential properties to this site and the results concluded that elevated vapor risks were not identified according to the Vapor Intrusion to Indoor Air Criteria for Low Threat Closure Program (LTCP) of the Underground Storage Tank Cleanup Fund. However, the site was denied closure because all conditions to meet LTCP criteria were not satisfied as the residual groundwater contamination remained a concern. Additional groundwater monitoring was necessary to confirm the groundwater contamination levels exhibited a stable and/or declining trend. Various wells are currently sampled on a quarterly, semi-annual and annual basis. In March 2017, it was documented that the prior three semi-annual groundwater monitoring events in the well of concern (MW-11), located immediately east of the former gas station, had not demonstrated a stable or declining trend for benzene and it was proposed and approved that two rounds of groundwater extraction by means of a vacuum truck be performed. In May 2017, the first round was completed and removed approximately 300 gallons of groundwater from MW-11. Review of a June 2017 groundwater contour map showed 19,000 ppb benzene remained in well MW-11, along with TPHg up to 91,000 ppb. TPHg, TPHd, benzene and other related fuel contaminants, except for DIPE (diisopropyl ether, an oxygenate gasoline additive identified up to 14 ppb in two on-site wells in June 2017), were reported as non-detect in the five wells on the Subject Property and in three wells in the sidewalk located on the south side of the former Shell Station. The residual contaminants were located on the general east side and due east

of the former gas station and not south-southeast toward the Subject Property. Review of historical groundwater monitoring results show maximum TPHg and benzene results up to 300 ppb and 4 ppb, respectively, identified in on-site wells since 1994 and have been non-detect for these contaminants since 2010. The groundwater monitoring data indicates that no significant impact to the Subject Property from the Shell Station has been identified. Based on the open case status of this LUST incident and the low level contaminants in the groundwater on the Subject Property, this is considered a *recognized environmental condition* (REC) until such time as regulatory closure is granted to the case. However, based on the low contaminant levels identified in the groundwater monitoring wells on the Subject Property in 2017, the impacts to the Subject Property from this off-site release are not currently considered a current vapor intrusion concern to the Subject Property. Additionally, the Subject Property does not use groundwater for drinking water purpose and the Responsible Party for this release has been identified.

An ARCO gas station (8900-8906 W. Sunset Boulevard) is currently located on the west adjoining property and is identified on the HIST Auto Station, UST, LUST, and Cortese databases. According to a 2014 UST Low Risk Case Review Form, four gasoline USTs and one waste oil UST were removed and replaced in 1988 by three 12,000-gallon gasoline USTs that remain active. Notable maximum contaminant levels identified in soil included TPHg up to 4,000 ppm and benzene up to 61.9 ppm from 1985 to 1999. Maximum groundwater contaminants notably included TPHg as free product with benzene up to 14,000 ppb, methyl tertiary butyl ether (MTBE) up to 500,000 ppb and tertiary butyl alcohol (TBA) at from 1986 to 2002. The most recent soil results reported TPHg at 700 ppm and benzene at 0.72 ppm in 2004; and groundwater results reported TPHg at 6,200 ppb, benzene at 145 ppb, MTBE at 354 ppb and TBA at 50,600 ppb in 2014. Free product was encountered at the site and was deemed fully removed as of August 2009. Other remedial action included soil remediation that removed a total of 1,894 pounds of product from 2002 to 2009 and free product bailing and pilot testing that resulted in the removal of 360 gallons of free product and 2,410 gallons of groundwater. Based on the declining to stable groundwater contamination levels, this site was issued regulatory closure through the Low Threat UST Closure Policy on July 7, 2015. It was noted that TBA levels remained elevated but were restricted to two on-site wells located near the center and south side of the ARCO site. Continued use of the site as a gas station negated vapor intrusion considerations. ARCO installed one well on the Subject Property, E-12, and sampling results were reported on the Geotracker website for this well from 2003 to 2011. Maximum groundwater contaminants in E-12 were reported as TPHg at 150 ppb in 2004, xylenes up to 1 ppb in 2006, and TBA up to 7.9 in 2004. All contaminants were reported as non-detect in groundwater in 2011. As historically elevated TBA and other contaminants do not appear to have been identified on the east side of the ARCO Station toward the Subject Property and only low levels of TBA were identified in the well on the Subject Property, it does not appear that the ARCO Station site had significantly impacted the Subject Property as of 2014. Based on the information reviewed and the regulatory closure of this case, this is considered an *historical recognized environmental condition* (HREC).

California UST Databases (AST, UST, FID UST, HIST UST, SWEEPS UST)

The California Environmental Protection Agency, the California Water Resources Control Board and other entities previously maintained or currently maintain various lists recording permitted aboveground and underground storage tank (AST/UST) sites in California. The Subject Property was not identified on the AST/UST databases. However, the following adjacent sites were identified on the AST/UST databases:

UST			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status

UST			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Shell Oil/Service Station 8873 Sunset Blvd West Hollywood, CA	Adjacent/ (across street) North-Northwest/ Upgradient	5560	Six USTs reported on the SWEEPS database (no size/contents/dates provided) last active in 1989. Reported REMOVED on the Los Angeles County List.
ARCO #5122 Station/ Sunset Oil/ Hassan A Soltani 8906 W. Sunset Blvd Los Angeles, CA	Adjacent/ (across street) West / Crossgradient to Upgradient	000264CC 26791 2091 8001	Three USTs reported on the HIST UST List under ID 000264CC: 6,000-gallon gasoline UST installed 1971; 4,000-gallon gasoline UST installed 1967; and 550-gallon waste oil UST, installed date unknown. Five USTs reported on the HIST UST List under ID 00026791: two 6,000-gallon gasoline USTs installed 1971; two 4,000-gallon gasoline USTs installed 1967; and a 550-gallon waste oil UST, installed date unknown. Eight USTs reported active on the SWEEPS UST List (no data provided) in 1989 under ID 2091. Five USTs reported active on the SWEEPS UST List active in 1994 under ID 8001: four 10,000-gallon gasoline USTs and a 5,000-gallon gasoline UST. On FID and Los Angeles County UST lists – no data.

*Presumed direction of groundwater flow

Both UST sites were identified on the LUST List and were previously discussed.

Solid Waste Information System (SWIS and SWF/LF)

The Solid Waste Information System (SWIS and SWF/LF) facility database contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For each facility, the database contains information about location, owner, operator, facility type, regulatory and operational status, authorized waste types, local enforcement agency and inspection and enforcement records. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SWIS and SWF/LF databases.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)

The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board (SWRCB) and the Regional Water Quality Control Boards (RWQCBs) for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the WMUDS/SWAT database.

California Hazardous Material Incident Report System (CHMIRS)

The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the California Office of Emergency Services. The Subject Property was not identified on the CHMIRS database.

Hazardous Waste Information System (HAZNET)

The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. The Subject Property was not identified on the HAZNET database.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Engineering Control or Institutional Control Registries.

State and Tribal Brownfield Sites

Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Brownfield Sites databases.

Tribal Environmental Databases

The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acre of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acre. No tribal administered lands were identified within 1.0 mile of the Subject Property.

Other Relevant Database Listings

A large number of EDR Historic Auto Station and Dry Cleaner sites were identified on the adjoining properties in the regulatory database reported. Releases associated with these historic uses were previously discussed in the various databases above. If not discussed previously, based upon the off-site locations, absence of reported releases, and/or redevelopment of these properties with the current improvements, it is considered unlikely that conditions associated with the listed sites represents an environmental concern to the Subject Property.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

City of West Hollywood Building & Safety Department

EBI reviewed available files regarding the Subject Property at the City of West Hollywood Building & Safety Department for information regarding past uses of the Subject Property. Building permits for

general tenant improvements were additionally on file for the Subject Property. The review of Building Department records did not identify past uses of the Subject Property that would constitute a recognized environmental condition.

Los Angeles County Department of Public Works Environmental Programs Division

EBI reviewed available database files regarding the Subject Property at the Los Angeles County Department of Public Works Environmental Programs Division. This review indicated no records regarding USTs, ASTs, and industrial waste permits. However, five of the tenants including the two restaurants and club have sewer permits for their grease traps.

Los Angeles County Assessor Office

The following parcel information was identified on file at the Los Angeles County Assessor's Office for the Subject Property:

- APN 4339-017-001, addressed as 8850 W. Sunset Boulevard - Commercial/Industrial property type, 7,115 square foot building area on a 7,817 square foot parcel, year built 1921 / 1930.
- APN 4339-017-002, addressed as 8866 W. Sunset Boulevard - Commercial/Industrial property type, 3,092 square foot building area on a 3,195 square foot parcel, year built 1935 / 1958.
- APN 4339-017-003, addressed as 8874 W. Sunset Boulevard - Commercial/Industrial property type, 3,347 square foot building area on a 2,750 square foot parcel, year built 1937 / 1950.
- APN 4339-017-004, no assigned address - Commercial/Industrial property type, 4,200 square foot building area on a 2,640 square foot parcel, year built 1960 / 1960 [note: there is no building on this parcel].
- APN 4339-017-005, no assigned address - Commercial/Industrial property type, 3,000 square foot building area on a 3,000 square foot parcel, year built 1950 / 1950 [note: there is no building on this parcel].
- APN 4339-017-006, addressed as 1029 W. Larrabee Street - Commercial/Industrial property type, 7,225 square foot building area on a 7,225 square foot parcel, year built not provided [note: there is no building on this parcel].
- APN 4339-017-007, no assigned address - Commercial/Industrial property type, 7,225 square foot building area on a 7,225 square foot parcel, year built not provided [note: there is no building on this parcel].
- APN 4339-017-008, no assigned address - Commercial/Industrial property type, 5,800 square foot building area on a 5,970 square foot parcel, year built 1965 / 1965 [note: there is no building on this parcel].

County of Los Angeles Fire Department – Health Hazardous Materials Department (CUPA)

EBI submitted a written request to CUPA for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property. According to a written response, no related records were identified on file.

Los Angeles County Public Health Investigation Administration

EBI submitted a written request to Los Angeles County Public Health Investigation Administration for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI had not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 340 - 360 feet above mean sea level (msl). The topography of the Subject Property slopes down to the southeast. The vicinity exhibits an overall downslope to the southeast (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Beverly Hills, California USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California Region (1995). The Subject Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments.

According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) website (<http://websoilsurvey.nrcs.usda.gov/app/>), the dominant soil composition in the vicinity of the Subject Property is classified as Urban land-Palmview-Tujunga, gravelly complex, 2 to 9 percent slopes (map 1003). The Tujunga gravelly soil consists of deep, somewhat excessively-drained soils consisting of loamy loam, gravelly loamy sand, and gravelly sand. The soil extends to a depth of 79 inches. Tujunga soils are nonsaline and have low available water capacity. The depth to bedrock is typically greater than 80 inches. The Palmview soil consists of deep, well-drained soils consisting of sandy loam. The soil extends to a depth of 79 inches. Palmview soils are nonsaline to very slightly saline and have moderate available water capacity. The depth to bedrock is typically greater than 80 inches.

4.2.3 Hydrogeology and Hydrology

No surface water bodies were identified within the immediately vicinity of the Subject Property. The nearest significant water body is Ballona Creek located approximately four miles to the southeast.

According to a 2014 UST Low Risk Case Review Form completed for the western adjacent ARCO Station at 8906 W. Sunset Boulevard and the 2017 Groundwater Monitoring Report for the northern adjacent former Shell Station at 8873 W. Sunset Boulevard, the direction of groundwater flow was reported to the east, south and southeast. As part of Leaking UST investigations conducted for these two gas station sites, six groundwater monitoring wells were installed and remain on the Subject Property as further discussed in Section 5.6. First depth to groundwater in the wells on the Subject Property were reported at approximately 16 to 28 feet below ground surface (bgs) in the years 1994 to

2017. Based on this data and the southeasterly vicinity downslope, the presumed predominant direction of groundwater flow in the vicinity is to the southeast.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	Historical Uses		Source(s)
	Subject Property	Surrounding Area	
Prior to 1910	Undeveloped	Sunset Boulevard and a few structures present (use not known)	Fire Insurance Maps Topographic Maps City Directories
At least 1910 - 1921	Partially residentially developed	Partially residential developed	Fire Insurance Maps Topographic Maps City Directories
1921 - 1977	Residential and commercial (stores, night club and restaurants)	Residential and commercial with two gas stations	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records
1977 to Present	Commercial (stores, night club, offices and restaurants) and parking lots	Residential and commercial with a current gas station and former gas station (1938 – 1980s).	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records Other Historical Records

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review, except for the following:

- An ARCO Station has operated on the western adjacent property since at least the 1940s and a Shell Station formerly operated on the northern adjacent property from at least 1938 into the 1980s. Both properties were identified on the LUST List and were previously discussed in Section 4.1.2. Additionally, multiple former dry cleaners and other auto stations were historically identified on the surrounding properties. These were previously discussed in Section 4.1.2.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. The previous Phase I Environmental Site Assessment (ESA) dated December 20, 2017, as referenced in Section 4.3.8 of this report, included review of historical aerial photographs. It should be noted that the scale of the available aerial photographs precludes the distinct identification of structures and/or land uses on or in the vicinity of the Subject Property. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected aerial photographs are presented in Appendix F.

AERIAL PHOTOGRAPH SUMMARY		
Year	Issues Noted	Observations
1928	No	Subject Property: The Subject Property appeared to be developed with two or more houses. The northeast corner was dark and features were not discernable in this aerial.

AERIAL PHOTOGRAPH SUMMARY		
Year	Issues Noted	Observations
		Surrounding Area: The current streets were present, and the surrounding properties were undeveloped, residential or commercial.
1938	Yes	Subject Property: The current commercial buildings were present on the north side. What appeared to be residences were present on the southeast and southwest sides.
		Surrounding Area: Additional commercial development was present including a gas station to the north.
1948 1952 1964 1970 1977	Yes	Subject Property: Conditions on the Subject Property appeared similar to the 1938 aerial.
		Surrounding Area: Additional commercial development was present including a gas station to the west.
1964	No	Subject Property: Conditions on the Subject Property appeared similar to the previous aerials except that the residence on the west side was no longer present and the west-southwest side was a paved parking lot.
		Surrounding Area: Similar to the previous aerials.
1977 1979 1981	No	Subject Property: Conditions on the Subject Property appeared similar to the previous aerial except that the residence on the east side was no longer present and the site conditions inclusive of the four commercial buildings on the northern third and paved parking lots on the southern two-thirds was present.
		Surrounding Area: Similar to the previous aerials.
1989 1994 2002 2005	No	Subject Property: Conditions on the Subject Property appeared similar to their current conditions.
		Surrounding Properties: Similar to the previous aerials except the gas station to the north was no longer present and some newer commercial buildings had replaced previous buildings.
2009 2012	No	Subject Property: Conditions on the Subject Property appeared similar to the previous aerials.
		Surrounding Properties: Similar to the previous aerials except a commercial building had been constructed in the location of the former gas station to the north.

4.3.2 Fire Insurance Maps

The previous Phase I Environmental Site Assessment (ESA) dated December 20, 2017, as referenced in Section 4.3.8 of this report, included review of historical fire insurance maps. Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the fire insurance maps are presented in Appendix F.

FIRE INSURANCE MAP SUMMARY		
Year	Issues Noted	Observations
1910	No	Subject Property: Partially residentially developed.
		Surrounding Properties: The current streets were present. Land use to the north was not shown. Land to the east, south and west was partially residentially developed.
1926	No	Subject Property: A commercial building(s) with stores and a bottling works facility were present on the northeast side. Residences remained on the central and southwest sides. The northwestern and southeastern areas were shown undeveloped.
		Surrounding Properties: Land use to the north was not shown. Stores to the east and homes to the south and west were present.
1950	Yes	Subject Property: Commercial buildings with stores and restaurants were present on the north side. Two residences remained on the central-east and southwest sides.

FIRE INSURANCE MAP SUMMARY		
Year	Issues Noted	Observations
		Surrounding Properties: Gas stations were present to the north and west beyond the streets. Stores and restaurants were also present to the north and east with residential developed to the general south.
1969	Yes	Subject Property: Commercial buildings with stores and restaurants were present on the north side. Two parking lots were shown on the west-southwest side and no development or land use was depicted on the east-southeast side.
		Surrounding Properties: Similar to the previous map.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

The previous Phase I Environmental Site Assessment (ESA) dated December 20, 2017, as referenced in Section 4.3.8 of this report, included review of historical topographic maps. Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected topographic maps are presented in Appendix F.

TOPOGRAPHIC MAP SUMMARY		
Year	Issues Noted	Observations
1896 1900	No	Subject Property: No structures or features are depicted on the Subject Property. Surrounding Properties: A street was present to the north. A few non-descript, small buildings were in the vicinity including a structure possibly adjacent to the east.
1920	No	Subject Property: Non-descript structures were shown along the northern and western boundaries. Surrounding Properties: The current streets were present with non-descript general development shown to occupy at least half of the vicinity properties.
1924 1926	No	Subject Property: A larger structure on the northeast corner, small structure on the central-east side, and three small structures on the west side were shown. Surrounding Properties: The current streets were present with non-descript general development shown to occupy at least half of the vicinity properties.
1966 1972 1981 1991 1995	No	Subject Property: Included in a shaded area to indicate dense urban development without benefit of showing specific structures or land uses. Surrounding Properties: Included in a shaded area to indicate dense urban development without benefit of showing specific structures or land uses. The current vicinity streets are present.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. The previous Phase I Environmental Site Assessment (ESA) dated December 20, 2017, as referenced in Section 4.3.8 of this report, included

review of historical street directories. Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

STREET DIRECTORY SUMMARY		
Year	Issues Noted	Observations
1920-1923	No	Subject Property: No listings provided.
		Surrounding Properties: No listings provided.
1924-1945	No	Subject Property: No listings provided.
		Surrounding Properties: Limited commercial and residential in the vicinity.
1951-2014	No	Subject Property: Commercial occupants (night club, stores, salons, restaurants) at 8850, 8852, 8860, 8866, 8868, 8870, 8872, 8874, 8876 and/or 8878 W. Sunset Boulevard. Residential occupants at 1029 N. Larrabee (1951 – 1965). No tenants of potential environmental concern noted.
		Surrounding Properties: Residential and commercial notably including gas stations to the west at 8900 W. Sunset (1951 - 1991) and to the north at 8873 W. Sunset (1971 – 1985).

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A “chain of title” is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

The property card for the Subject Property was obtained at the Los Angeles County Assessor’s Office. The property card identifies the current owner as 5th Gear LLC, which acquired the Subject Property in 2017. Assessor’s Office records indicate that the existing buildings were constructed in 1921 through 1950. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was provided with the following previous environmental report performed for the Subject Property:

Phase I Environmental Site Assessment, 8850 – 8878 W. Sunset Boulevard, West Hollywood, California, prepared by EBI Consulting (EBI) of Burlington, Massachusetts, dated December 20, 2017

The EBI Report was completed in general conformance with ASTM Standard E 1527-13. The scope of the EBI Report investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records,

review of the physical characteristics and history of the Subject Property, and a visual survey for the presence of asbestos-containing materials (ACM) and lead-based paint (LBP). The following information was presented in the EBI Report:

- At the time of the EBI Report, the Subject Property was improved with four retail buildings: The 8850 – 8856 and 8860 W. Sunset Boulevard buildings was constructed from 1921 – 1930, 1935 to 1958 for 8866 – 8872 W. Sunset Boulevard, and 1937 to 1950 for 8874 to 8878 W. Sunset Boulevard building. The subject buildings cumulatively contain approximately 13,554 square feet and are situated on an approximately 0.913-acre parcels.
- At the time of assessment, the existing structures were occupied by nine commercial tenants. The 8850 – 8860 West Sunset Boulevard building was occupied by Turner's :Liquor and Deli, a retail store; Viper Room, a club; Sun Bee Market, a retail store; Barcode Barbershop, a barber shop. The 8866 – 8872 West Sunset Boulevard building was occupied by Take-Sushi, a restaurant; Amaarone, a restaurant; Waterfall Bridge Capital, an office; Glen Lerner, an office. The 8878 W. Sunset Boulevard building was occupied by a Aahs, a retail store. No industrial or manufacturing operations were observed at the Subject Property at the time of assessment.
- Based upon review of historical resources dating back to 1910 (aerial photographs, fire insurance maps, USGS topographical maps, and city directories), EBI reported that the Subject Property undeveloped land prior to 1910 and partial residential development from 1910 to 1921 prior to construction of the existing improvements in 1921.
- EBI did not identify evidence of existing or former underground storage tanks (USTs) or aboveground storage tanks (ASTs) at the Subject Property.
- EBI did not identify electrical transformers at the Subject Property.
- EBI reported that hazardous substances and/or petroleum products identified at the Subject Property was limited to commonly available janitorial and cleaning supplies located in the janitorial closets. Areas of chemical storage were reported to be well maintained and free of spills, staining, or other indications of a release.

- EBI reported that a Shell Service Station (8873 W. Sunset Boulevard) was historically located on the north adjoining property and is identified on the HIST Auto Station, UST, LUST, Cortese, and RCRA-SQG databases. A 2015 Case Closure Denial letter from the RWQCB was reviewed. According to this letter, the site historically operated eight USTs containing fuel and waste oil that were removed in 1962 and 1988. In 2007, one additional waste oil tank was removed. Several investigations conducted 1985 – 2013 identified total petroleum hydrocarbons as gasoline (TPHg) up to 6,500 parts per million (ppm), TPH as diesel (TPHd) up to 1,200 ppm, total recoverable petroleum hydrocarbons (TRPH) up to 4,100 ppm, and benzene up to 105 ppm in soil. In 1988 and 1989, approximately 277 tons of impacted soil was excavated during station demolition and an additional 1,845 tons of soil were excavated in 2004 to an approximate depth of 35 feet bgs. Fifteen groundwater monitoring wells have been installed on and off site (including five wells on the Subject Property that were installed in 1994). Free product up to 2.88 feet was observed in several wells through 1985. Free product was last observed in 2002 and through remedial action, 1,616.7 gallons of free product was removed. From 1994 to 2002, groundwater extraction remediation removed approximately 2.4 million gallons of groundwater. In 2010, ten wells were removed to allow for site redevelopment. Groundwater data reported in 2015 notably identified TPHg up to 11,000 parts per billion (ppb) and benzene up to 2,500 ppb. In 2013, a soil vapor investigation was performed near the eastern adjacent residential properties to this site and the results concluded that elevated vapor risks were not identified according to the Vapor Intrusion to Indoor Air Criteria for Low Threat Closure Program (LTCP) of the Underground Storage Tank Cleanup Fund. However, the site was denied closure because all conditions to meet LTCP criteria were not satisfied as the residual groundwater contamination remained a concern. Additional groundwater monitoring was necessary to confirm the groundwater contamination levels exhibited a stable and/or declining trend. Various wells are currently sampled on a quarterly, semi-annual and annual basis. In March 2017, it was documented that the prior three semi-annual groundwater monitoring events in the well of concern (MW-11), located immediately east of the former gas station, had not demonstrated a stable or declining trend for benzene and it was proposed and approved that two rounds of groundwater extraction by means of a vacuum truck be performed. In May 2017, the first round was completed and removed approximately 300-gallons of groundwater from MW-11. Review of a June 2017 groundwater contour map showed 19,000 ppb benzene remained in well MW-11, along with TPHg up to 91,000 ppb. TPHg, TPHd, benzene and other related fuel contaminants, except for DIPE (diisopropyl ether, an oxygenate gasoline additive, identified up to 14 ppb in two on-site wells in June 2017), were reported as non-detect in the five wells on the Subject Property and in three wells in the sidewalk located on the south side of the former Shell Station. The residual contaminants were located on the general east side and due east of the former gas station and not south-southeast toward the Subject Property. Review of historical groundwater monitoring results show maximum TPHg and benzene results up to 300 ppb and 4 ppb, respectively, identified in on-site wells since 1994 and have been non-detect for these contaminants since 2010. The groundwater monitoring data indicates significant impact to the Subject Property from the Shell Station has not been identified. Based on the open case status of this LUST incident and the low level contaminants in the groundwater on the Subject Property, this is considered a *recognized environmental condition* (REC) until such time as regulatory closure is granted to the case. However, based on the low contaminant levels identified in the groundwater monitoring wells on the Subject Property in 2017, the impacts to the Subject Property from this off-site release are not currently considered a current vapor migration concern to the Subject Property. Additionally, the Subject Property does not use groundwater for drinking water purpose and the Responsible Party for this release has been identified.

- EBI reported that an ARCO gas station (8900-8906 W. Sunset Boulevard) is currently located on the west adjoining property and is identified on the HIST Auto Station, UST, LUST, and Cortese databases. According to a 2014 UST Low Risk Case Review Form, four gasoline USTs and one waste oil UST were removed and replaced in 1988 by three 12,000-gallon gasoline USTs that remain active. Notable maximum contaminant levels identified in soil included TPHg up to 4,000 ppm and benzene up to 61.9 ppm from 1985 to 1999. Maximum groundwater contaminants notably included TPHg as free product with benzene up to 14,000 ppb, methyl tertiary butyl ether (MTBE) up to 500,000 ppb and tertiary butyl alcohol (TBA) at from 1986 to 2002. The most recent soil results reported TPHg at 700 ppm and benzene at 0.72 ppm in 2004; and groundwater results reported TPHg at 6,200 ppb, benzene at 145 ppb, MTBE at 354 ppb and TBA at 50,600 ppb in 2014. Free product was encountered at the site and was deemed fully removed as of August 2009. Other remedial action included soil remediation that removed a total of 1,894 pounds of product from 2002 to 2009 and free product bailing and pilot testing that resulted in the removal of 360 gallons of free product and 2,410 gallons of groundwater. Based on the declining to stable groundwater contamination levels, this site was issued regulatory closure through the Low Threat UST Closure Policy on July 7, 2015. It was noted that TBA levels remained elevated but were restricted to two on-site wells located near the center and south side of the ARCO site. Continued use of the site as a gas station negated vapor intrusion considerations. ARCO installed one well on the Subject Property, E-12, and sampling results were reported on the Geotracker website for this well from 2003 to 2011. Maximum groundwater contaminants in E-12 were reported as TPHg at 150 ppb in 2004, xylenes up to 1 ppb in 2006, and TBA up to 7.9 in 2004. All contaminants were reported as non-detect in groundwater in 2011. As historically elevated TBA and other contaminants do not appear to have been identified on the east side of the ARCO Station toward the Subject Property and only low levels of TBA were identified in the well on the Subject Property, it does not appear that the ARCO Station site had significantly impacted the Subject Property as of 2014. Based on the information reviewed and the regulatory closure of this case, this is considered a *historic recognized environmental condition* (HREC).

EBI reviewed a previous report entitled Phase I Environmental Site Assessment, 8850 – 8878 Sunset Boulevard, West Hollywood, California, UES Consulting Services, Inc. (UES), June 21, 2017. The UES 2016 report was completed in conformance with ASTM 1527-13. The scope of the investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records and a review of the physical characteristics and history of the Subject Property. Relevant information is summarized as follows:

- At the time of the assessment, the Subject Property was developed and occupied similar to its current conditions. Five groundwater monitoring wells were identified on the Subject Property that were associated with the adjacent current gas station to the west and former gas station to the north.
- Based on a review of historical sources, the Subject Property was initially residential by 1910 with initial commercial development in 1921. UES's review of prior land use did not identify environmental concerns.
- The immediately surrounding properties consisted of commercial and residential properties. A former Shell Station to the north and current Arco/Sunset Oil Station were identified on the LUST List and the report concluded neither presented a recognized environmental condition to the Subject Property. No other off-site properties likely to represent an environmental concern to the Subject Property were identified through review of historical sources and regulatory databases.

UES concluded that no current or historical recognized environmental conditions were identified during the course of their assessment and presented no recommendations for further action. However, UES recommended the Subject Property owner continue to cooperate with the RWQCB including access to the monitoring wells on the Subject Property until the LUST site [Shell] receives closure.

- Based upon review of the environmental database report, EBI identified no on-site facilities that were considered likely to have impacted the Subject Property. However, one former and one current gas stations have impacted the groundwater of the Subject Property.
- EBI conducted a limited visual survey for the presence of asbestos-containing materials (ACM). The following suspect materials were identified: plaster walls and ceilings, sheetrock/joint compound composite material, and acoustical ceiling tile, vinyl flooring, floor mastic, various construction mastics and caulking, and roofing materials. These materials were reported to be undamaged and in good/fair/poor condition at the time of assessment.
- EBI conducted a limited visual survey for the presence of lead-based paint. Painted surfaces at the Subject Property were generally observed to be in good condition. However, based on the date of construction, it is likely that lead-based paint (LBP) is present

Based upon the findings of the Phase I Environmental Site Assessment, EBI identified the following recognized environmental conditions (RECs) associated with the Subject Property and offered the following recommendation(s):

- A Shell Service Station (8873 W. Sunset Boulevard) was historically located on the north adjoining property and is identified on the HIST Auto Station, UST, LUST, Cortese, and RCRA-SQG databases. A 2015 Case Closure Denial letter from the RWQCB was reviewed. According to this letter, the site historically operated eight USTs containing fuel and waste oil that were removed in 1962 and 1988. In 2007, one additional waste oil tank was removed. Several investigations conducted 1985 – 2013 identified total petroleum hydrocarbons as gasoline (TPHg) up to 6,500 parts per million (ppm), TPH as diesel (TPHd) up to 1,200 ppm, total recoverable petroleum hydrocarbons (TRPH) up to 4,100 ppm, and benzene up to 105 ppm in soil. In 1988 and 1989, approximately 277 tons of impacted soil was excavated during station demolition and an additional 1,845 tons of soil were excavated in 2004 to an approximate depth of 35 feet bgs. Fifteen groundwater monitoring wells have been installed on and off site (including five wells on the Subject Property that were installed in 1994). Free product up to 2.88 feet was observed in several wells through 1985. Free product was last observed in 2002 and through remedial action, 1,616.7 gallons of free product was removed. From 1994 to 2002, groundwater extraction remediation removed approximately 2.4 million gallons of groundwater. In 2010, ten wells were removed to allow for site redevelopment. Groundwater data reported in 2015 notably identified TPHg up to 11,000 parts per billion (ppb) and benzene up to 2,500 ppb. In 2013, a soil vapor investigation was performed near the eastern adjacent residential properties to this site and the results concluded that elevated vapor risks were not identified according to the Vapor Intrusion to Indoor Air Criteria for Low Threat Closure Program (LTCP) of the Underground Storage Tank Cleanup Fund. However, the site was denied closure because all conditions to meet LTCP criteria were not satisfied as the residual groundwater contamination remained a concern. Additional groundwater monitoring was necessary to confirm the groundwater contamination levels exhibited a stable and/or declining trend. Various wells are currently sampled on a quarterly, semi-annual and annual basis. In March 2017, it was documented that the prior three semi-annual groundwater monitoring events in the well of concern (MW-11), located immediately east of the former gas station, had not demonstrated a stable or declining trend for benzene and it was proposed and approved that two rounds of

groundwater extraction by means of a vacuum truck be performed. In May 2017, the first round was completed and removed approximately 300-gallons of groundwater from MW-11. Review of a June 2017 groundwater contour map showed 19,000 ppb benzene remained in well MW-11, along with TPHg up to 91,000 ppb. TPHg, TPHd, benzene and other related fuel contaminants, except for DIPE (diisopropyl ether, an oxygenate gasoline additive, identified up to 14 ppb in two on-site wells in June 2017), were reported as non-detect in the five wells on the Subject Property and in three wells in the sidewalk located on the south side of the former Shell Station. The residual contaminants were located on the general east side and due east of the former gas station and not south-southeast toward the Subject Property. Review of historical groundwater monitoring results show maximum TPHg and benzene results up to 300 ppb and 4 ppb, respectively, identified in on-site wells since 1994 and have been non-detect for these contaminants since 2010. The groundwater monitoring data indicates significant impact to the Subject Property from the Shell Station has not been identified. Based on the open case status of this LUST incident and the low level contaminants in the groundwater on the Subject Property, this is considered a *recognized environmental condition* (REC) until such time as regulatory closure is granted to the case. However, based on the low contaminant levels identified in the groundwater monitoring wells on the Subject Property in 2017, the impacts to the Subject Property from this off-site release are not currently considered a current vapor migration concern to the Subject Property. Additionally, the Subject Property does not use groundwater for drinking water purpose and the Responsible Party for this release has been identified.

Additionally, the following *historic recognized environmental condition* (HREC), condition of environmental interest, and *considerations outside the scope of ASTM Practice E 1527-13* were identified:

- An ARCO gas station (8900-8906 W. Sunset Boulevard) is currently located on the west adjoining property and is identified on the HIST Auto Station, UST, LUST, and Cortese databases. According to a 2014 UST Low Risk Case Review Form, four gasoline USTs and one waste oil UST were removed and replaced in 1988 by three 12,000-gallon gasoline USTs that remain active. Notable maximum contaminant levels identified in soil included TPHg up to 4,000 ppm and benzene up to 61.9 ppm from 1985 to 1999. Maximum groundwater contaminants notably included TPHg as free product with benzene up to 14,000 ppb, methyl tertiary butyl ether (MTBE) up to 500,000 ppb and tertiary butyl alcohol (TBA) at from 1986 to 2002. The most recent soil results reported TPHg at 700 ppm and benzene at 0.72 ppm in 2004; and groundwater results reported TPHg at 6,200 ppb, benzene at 145 ppb, MTBE at 354 ppb and TBA at 50,600 ppb in 2014. Free product was encountered at the site and was deemed fully removed as of August 2009. Other remedial action included soil remediation that removed a total of 1,894 pounds of product from 2002 to 2009 and free product bailing and pilot testing that resulted in the removal of 360 gallons of free product and 2,410 gallons of groundwater. Based on the declining to stable groundwater contamination levels, this site was issued regulatory closure through the Low Threat UST Closure Policy on July 7, 2015. It was noted that TBA levels remained elevated but were restricted to two on-site wells located near the center and south side of the ARCO site. Continued use of the site as a gas station negated vapor intrusion considerations. ARCO installed one well on the Subject Property, E-12, and sampling results were reported on the Geotracker website for this well from 2003 to 2011. Maximum groundwater contaminants in E-12 were reported as TPHg at 150 ppb in 2004, xylenes up to 1 ppb in 2006, and TBA up to 7.9 in 2004. All contaminants were reported as non-detect in groundwater in 2011. As historically elevated TBA and other contaminants do not appear to have been identified on the east side of the ARCO Station toward the Subject Property and only low levels of TBA were identified in the well on the Subject Property, it does not appear that the ARCO Station site had significantly impacted the Subject Property as of 2014. Based on the information reviewed and the regulatory closure of this case, this is considered an *historical recognized environmental condition* (HREC).

- EBI observed six groundwater monitoring wells on the southern parking lot portion of the Subject Property. According to the California Regional Water Quality Control Board (RWQCB) online GeoTracker program (<https://geotracker.waterboards.ca.gov>), five of the wells correlate with monitoring wells (identified as MW-14, 15, 16, 17, and 18) installed as part of the north adjoining active Shell Station LUST site (LUST # T0603704683) and the remaining monitoring well (identified as E-12) correlates to a monitoring well installed as part of the west adjoining closed ARCO LUST site (T0603701226).
- EBI a limited visual screening survey for the presence of asbestos-containing material (ACM) at the Subject Property. EBI identified friable suspect ACM in the form of plaster walls and ceilings, sheetrock/joint compound composite material, and acoustical ceiling tile and non-friable suspect ACM in the form of vinyl flooring, floor mastic, various construction mastics and caulking, and roofing materials. At the time of EBI's site visit, the suspect ACMs were generally observed to be in good condition. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

Painted surfaces at the Subject Property were generally observed to be in good condition. However, based on the date of construction, it is likely that lead-based paint (LBP) is present. LBP is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

- Painted surfaces at the Subject Property were generally observed to be in good condition. However, based on the date of construction, it is likely that lead-based paint (LBP) is present. LBP is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

Relevant information from the previous report is discussed in the appropriate sections of this report, and portions of the previous report are presented in Appendix H.

4.3.9 Other Historical Records and Interviews

Ms. Kimberly Quijada, Property Manager, was interviewed to obtain information regarding the history of the Subject Property. According to Ms. Quijada, she has been familiar with the Subject Property for approximately five months. Ms. Quijada stated that she was unaware of the construction date and prior use or occupants of the Subject Property.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Renato Nalupa, EBI Field Assessor, on June 4, 2018. Mr. Nalupa was accompanied by and interviewed Ms. Kimberly Quijada, the Subject Property Manager.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was cloudy and approximately 75° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. During the survey, representative common areas, apartments units, mechanical spaces, and/or equipment and building components were observed, and approximately 10% of the units were surveyed. There were no other significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	Approximate Quantity / Container / Material	Location	Storage Condition
Cleaning Compounds and Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Janitorial Closets and storage rooms	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL

Classification	Type of Waste / Generation Process	Type of Storage / Location	Disposal Method / Contractor
Non-regulated Solid Waste	Municipal Solid Waste and Mixed Recyclables/ Routine Operations	Dumpsters behind the buildings	Athens Services
Non-regulated Liquid Waste	Sanitary Sewage	NA (Municipal Sanitary Sewer)	City of West Hollywood
	Waste Cooking Grease / Ta-Ke-Sushi and Amarone - Restaurant Operations	Floor-mounted Grease Trap (Service Kitchen) One 55-gallon drum adjacent to the restaurant's back door	Tallow rendering company services the grease traps and transports used cooking oil for off-site disposal
Regulated Solid or Liquid Waste	None identified	NA	NA
Biomedical Waste	None identified	NA	NA

Note that the food grease drum used by one or both of the restaurants had a label indicating it contained "T-Maz 60 K", a sorbitan monostearate (non-hazardous surfactant). EBI did not identify evidence of haphazard dumping or improper management of wastes or chemicals on the Subject Property.

5.4 UNDERGROUND STORAGE TANKS (USTs) & ABOVEGROUND STORAGE TANKS (ASTs)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs or ASTs located at the Subject Property.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of USTs or ASTs formerly having been located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBs)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

Based upon the absence of transformers, no potential PCB-containing equipment was identified at the Subject Property.

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	Identified
Interior Drains, Trenches, or Sumps	Yes
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	Yes
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	Yes
Petroleum or Natural Gas Pipelines/Easements	No

Floor drains were observed in each of the in the service kitchen of the restaurants. The floor drains reportedly discharge to the municipal sewer system. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the floor drains.

The ground surface outside the building slopes moderately to the southeast. One storm drain was observed on the southeast exterior of unit 8878. The storm drain is associated with the municipal stormwater sewerage system, operated by the City of West Hollywood.

EBI observed five groundwater monitoring wells on the southern parking lot portion of the Subject Property. According to the California Regional Water Quality Control Board (RWQCB) online GeoTracker program (<https://geotracker.waterboards.ca.gov>), five of the wells correlate with monitoring wells (identified as MW-14, 15, 16, 17, and 18) installed as part of the north adjoining active Shell Station LUST site (LUST # T0603704683). The monitoring well, located along Clark Street and identified as EW-12) correlates to a monitoring well installed as part of the west adjoining closed ARCO LUST site (T0603701226).

6.0 INTERVIEWS

The site contact or Key Site Manager was contacted to be interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has been completed and returned to our offices. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The Pre-Survey Questionnaire and any accompanying documentation are presented in Appendix C.

KEY SITE MANAGER INTERVIEW			
Contact / Affiliation	Date of Communication	Years Associated with Subject Property	Telephone No.
Ms. Kimberly Quijada Property Manager Proactive Management	06/04/2018	5 months	(909) 212-7669

The following additional persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property.

ADDITIONAL INTERVIEWS			
Contact / Affiliation	Date of Communication	Years Associated with Subject Property	Telephone No.
Ms. Michele Harris Clerk City of West Hollywood Building & Safety Department	06/04/2018	NA	Office visit
Ms. Celeste Barana Clerk City of West Hollywood City Clerk's Office	06/04/2018	NA	Office visit
Ms. Brittney (last name not provided) Clerk Los Angeles County Assessor's Office	06/05/2007	NA	(562) 256-1701

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

EBI conducted a limited screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of 1' x 1', 2' x 2', and 2'x4' acoustical ceiling tile and non-friable suspect ACM in the form of wallboard/joint compound, plaster, stucco, vinyl floor tile and associated mastic, various construction mastics and roofing materials. These materials were observed to be undamaged and in good condition at the time of assessment, with the exception of floor tile in unit 8852, Viper room and stucco at rear exterior of unit 8878, Aahs Store. EBI collected four representative bulk samples of suspect ACM at the Subject Property. Please note that the scope of work for this survey was limited to the sampling of friable materials or damaged non-friable materials in accessible areas and that destructive sampling of undamaged non-friable materials was not conducted. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Suspect ACM samples were submitted to Environmental Hazards Laboratory located in Richmond, Virginia for laboratory analysis by polarized light microscopy (PLM). The following table presents the sample location, asbestos content, friability, general condition, and estimated quantity of bulk samples of suspect ACM collected at the Subject Property:

ASBESTOS SAMPLING RESULTS						
Sample No.	Material	Location	Asbestos Content	Friability	Condition	Estimated Quantity
1A	2' x 4' ceiling tile	Unit 8860, Sales area	ND	Friable	Good	800 SF
2A	Wall plaster	Unit 8860, Storage room	ND	Non-Friable	Fair	200 SF
3A	Floor tile	Unit 8852, Dance floor	ND	Non-Friable	Fair	600 LF
4A	Stucco	Rear exterior of unit 8878	ND	Non-Friable	Fair	400 SF

ND: Not Detected

SF: Square Feet

LF: Linear Feet

Laboratory analysis of screening samples did not identify ACM. The asbestos laboratory report is presented in Appendix G.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also be present in areas of the buildings that were accessed as part of this assessment. The sampling conducted as part of this limited visual screening survey is not designed to comply with regulatory requirements for planned building material disturbances including, but not limited to, renovation or demolition.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Los Angeles County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the non-residential nature of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the non-residential use of the existing buildings and in accordance with the scope of work of this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from

corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg/L).

Municipal water service is provided to the Subject Property by the City of Beverly Hills. Potable water is reportedly obtained from the City's reverse osmosis water treatment plant and from the Metropolitan Water District. Based upon review of the 2017 Drinking Water Supply and Water Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

7.5 LIMITED MICROBIAL SURVEY

Microbial growth (e.g., mold or fungus) on building materials may occur when excess moisture is present. Porous building materials such as gypsum board, insulation in walls and ceilings, and carpeting retain moisture and become microbial growth sites if moisture sources are not controlled or mitigated. Potential sources of moisture include rainwater intrusion, groundwater intrusion, condensation on cold surfaces, and water leaks from building systems (e.g., plumbing leaks, HVAC system leaks, overflowing drains, etc.). Inadequate ventilation of clothes dryers and shower stalls may also result in excess moisture conditions. Microbial growth may be clearly visible (e.g., ceramic tile mortar in shower stalls) or may be concealed with no visible evidence of its existence (e.g., inside wall cavities).

Interior areas of the Subject Property buildings to which access was provided and in which building elements were readily observable were inspected for the presence of moisture and visible or olfactory evidence of microbial development. No disassembly of systems or building components or physical or invasive testing was performed. No observations were conducted within concealed locations (construction elements behind wall and ceiling finishes, and other building components, etc.). The scope of this assessment was limited to visual observations of accessible areas for microbial growth and water damaged materials and did not include the collection and laboratory analysis of bulk samples or air samples to confirm the presence of microbial elements.

Representative observations revealed no obvious visual or olfactory indications of the presence of active moisture or mold activity at the Subject Property. In addition to our observation efforts, a questionnaire provided to Subject Property personnel did not indicate the presence of mold, and Subject Property personnel were not aware of the presence of moisture or mold activity. Based on the interviews and conditions as observed at the time of assessment, mold does not appear to be a concern at the Subject Property.

7.6 WETLANDS

EBI reviewed available information regarding wetlands on the Subject Property, including National Wetlands Inventory online GIS mapping. EBI additionally made general site observations for readily observable potential wetland characteristics. In general, to be considered a wetland, an area must have hydrophytic vegetation, evidence of wetland hydrology, and hydric soils.

Review of the U.S. Department of the Interior, Fish & Wildlife Service's National Wetland Inventory (NWI) Map (available online at <http://www.fws.gov/wetlands/Data/Mapper.html>) indicated that the Subject Property is not located on or adjacent to a wetlands area. Additionally, EBI did not observe surface water bodies, marshy areas, hydrophytic evidence of potential wetlands vegetation (aquatic

plants), hydric soils, or other visible indications of potential wetland areas on or adjacent to the Subject Property. It should be noted that a detailed wetland study or wetland delineation was not included within the scope of this assessment. A copy of the NWI wetlands map is included in Appendix B.

7.7 CONTAMINATED DRYWALL

Foreign drywall was imported by the United States during the construction boom between 2001 and 2009. According to a 2010 laboratory study, one hundred percent of affected drywall samples obtained from homes located in the southeastern United States tested positive for the presence of *Thiobacillus ferrooxidans*, an iron and sulfur reducing bacterium. Laboratory tests of samples for volatile chemicals have identified emissions of the sulfurous gases carbon disulfide, carbonyl sulfide, and hydrogen sulfide.

The presence of Chinese drywall has been reported in 42 states, the District of Columbia and Puerto Rico. The states of Florida (59%), Louisiana (20%), Mississippi (6%) and Alabama (5%) made up 90% of the 3,082 cases reported to the U.S. Consumer Product Safety Commission (CPSC). Homeowners alleging that they installed contaminated drywall have reported numerous incidents of corroding copper and other metals in their homes.

EBI contacted Ms. Kimberly Quijada, Property Manager, to find out if she was aware of any issues with contaminated drywall at the Subject Property. Ms. Quijada reported that she had not received any reports of the potential concerns including rotten egg, ammonia, or burning plastic odors. Ms. Quijada, did not receive any reports of corrosion/pitting of HVAC equipment or indications of blackened wiring, etc. Representative observations revealed no obvious visual or olfactory indications of the presence of Chinese drywall (i.e. unusual odors such as rotten eggs, ammonia or overheating plastic), corrosion/pitting of HVAC or plumbing equipment, or indications of blackened wiring (where readily visible). Based on the information provided by Ms. Quijada, and observations during the site assessment, the presence of Chinese drywall is not anticipated.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property, except for the following:

- A Shell Service Station (8873 W. Sunset Boulevard) was historically located on the north adjoining property and is identified on the HIST Auto Station, UST, LUST, Cortese, and RCRA-SQG databases. A 2015 Case Closure Denial letter from the RWQCB was reviewed. According to this letter, the site historically operated eight USTs containing fuel and waste oil that were removed in 1962 and 1988. In 2007, one additional waste oil tank was removed. Several investigations conducted 1985 – 2013 identified total petroleum hydrocarbons as gasoline (TPHg) up to 6,500 parts per million (ppm), TPH as diesel (TPHd) up to 1,200 ppm, total recoverable petroleum hydrocarbons (TRPH) up to 4,100 ppm, and benzene up to 105 ppm in soil. In 1988 and 1989, approximately 277 tons of impacted soil were excavated during station demolition and an additional 1,845 tons of soil were excavated in 2004 to an approximate depth of 35 feet bgs. Fifteen groundwater monitoring wells have been installed on and off site (including five wells on the Subject Property that were installed in 1994). Free product up to 2.88 feet was observed in several wells through 1985. Free product was last observed in 2002, and through remedial action 1,616.7 gallons of free product were removed. From 1994 to 2002, groundwater extraction remediation removed approximately 2.4 million gallons of groundwater. In 2010, ten wells were removed to allow for site redevelopment. Groundwater data reported in 2015 notably identified TPHg up to 11,000 parts per billion (ppb) and benzene up to 2,500 ppb. In 2013, a soil vapor investigation was performed near the eastern adjacent residential properties to this site and the results concluded that elevated vapor risks were not identified according to the Vapor Intrusion to Indoor Air Criteria for Low Threat Closure Program (LTCP) of the Underground Storage Tank Cleanup Fund. However, the site was denied closure because all conditions to meet LTCP criteria were not satisfied as the residual groundwater contamination remained a concern. Additional groundwater monitoring was necessary to confirm the groundwater contamination levels exhibited a stable and/or declining trend. Various wells are currently sampled on a quarterly, semi-annual and annual basis. In March 2017, it was documented that the prior three semi-annual groundwater monitoring events in the well of concern (MW-11), located immediately east of the former gas station, had not demonstrated a stable or declining trend for benzene and it was proposed and approved that two rounds of groundwater extraction by means of a vacuum truck be performed. In May 2017, the first round was completed and removed approximately 300 gallons of groundwater from MW-11. Review of a June 2017 groundwater contour map showed 19,000 ppb benzene remained in well MW-11, along with TPHg up to 91,000 ppb. TPHg, TPHd, benzene and other related fuel contaminants, except for DIPE (diisopropyl ether, an oxygenate gasoline additive identified up to 14 ppb in two on-site wells in June 2017), were reported as non-detect in the five wells on the Subject Property and in three wells in the sidewalk located on the south side of the former Shell Station. The residual contaminants were located on the general east side and due east of the former gas station and not south-southeast toward the Subject Property. Review of historical groundwater monitoring results show maximum TPHg and benzene results up to 300 ppb and 4 ppb, respectively, identified in on-site wells since 1994 and have been non-detect for these contaminants since 2010. The groundwater monitoring data indicates that no significant impact to the Subject Property from the Shell Station has been identified. Based on the open case status of this LUST incident and the low level contaminants in the groundwater on the Subject Property, this is considered a *recognized environmental condition (REC)* until such time as regulatory closure is granted to the case. However,

based on the low contaminant levels identified in the groundwater monitoring wells on the Subject Property in 2017, the impacts to the Subject Property from this off-site release are not currently considered a current vapor intrusion concern to the Subject Property. Additionally, the Subject Property does not use groundwater for drinking water purpose and the Responsible Party for this release has been identified.

Additionally, the following *historic recognized environmental condition (HREC)*, condition of environmental interest, and *considerations outside the scope of ASTM Practice E 1527-13* were identified:

- An ARCO gas station (8900-8906 W. Sunset Boulevard) is currently located on the west adjoining property and is identified on the HIST Auto Station, UST, LUST, and Cortese databases. According to a 2014 UST Low Risk Case Review Form, four gasoline USTs and one waste oil UST were removed and replaced in 1988 by three 12,000-gallon gasoline USTs that remain active. Notable maximum contaminant levels identified in soil included TPHg up to 4,000 ppm and benzene up to 61.9 ppm from 1985 to 1999. Maximum groundwater contaminants notably included TPHg as free product with benzene up to 14,000 ppb, methyl tertiary butyl ether (MTBE) up to 500,000 ppb and tertiary butyl alcohol (TBA) at from 1986 to 2002. The most recent soil results reported TPHg at 700 ppm and benzene at 0.72 ppm in 2004; and groundwater results reported TPHg at 6,200 ppb, benzene at 145 ppb, MTBE at 354 ppb and TBA at 50,600 ppb in 2014. Free product was encountered at the site and was deemed fully removed as of August 2009. Other remedial action included soil remediation that removed a total of 1,894 pounds of product from 2002 to 2009 and free product bailing and pilot testing that resulted in the removal of 360 gallons of free product and 2,410 gallons of groundwater. Based on the declining to stable groundwater contamination levels, this site was issued regulatory closure through the Low Threat UST Closure Policy on July 7, 2015. It was noted that TBA levels remained elevated but were restricted to two on-site wells located near the center and south side of the ARCO site. Continued use of the site as a gas station negated vapor intrusion considerations. ARCO installed one well on the Subject Property, E-12, and sampling results were reported on the Geotracker website for this well from 2003 to 2011. Maximum groundwater contaminants in E-12 were reported as TPHg at 150 ppb in 2004, xylenes up to 1 ppb in 2006, and TBA up to 7.9 in 2004. All contaminants were reported as non-detect in groundwater in 2011. As historically elevated TBA and other contaminants do not appear to have been identified on the east side of the ARCO Station toward the Subject Property and only low levels of TBA were identified in the well on the Subject Property, it does not appear that the ARCO Station site had significantly impacted the Subject Property as of 2014. Based on the information reviewed and the regulatory closure of this case, this is considered an *historical recognized environmental condition (HREC)*.
- EBI observed six groundwater monitoring wells on the southern parking lot portion of the Subject Property. According to the California Regional Water Quality Control Board (RWQCB) online GeoTracker program (<https://geotracker.waterboards.ca.gov>), five of the wells correlate with monitoring wells (identified as MW-14, 15, 16, 17, and 18) installed as part of the north adjoining active Shell Station LUST site (LUST # T0603704683) and the remaining monitoring well (identified as E-12) correlates to a monitoring well installed as part of the west adjoining closed ARCO LUST site (T0603701226).
- EBI conducted a limited screening survey for the presence of asbestos-containing materials (ACM) at the Subject Property, including the collection four representative bulk samples of suspect ACM. Laboratory analysis indicated that none of the materials tested were identified as ACM. These materials were observed to be undamaged and in good to fair condition at the time of assessment. Please note that this survey was limited to observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of

undamaged suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Based on the condition of the identified ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following recommendations:

- Based on the planned redevelopment of the Subject Property and known low level impacts to the Subject Property from the off-site gas station release, EBI recommends that a Soil/Groundwater Management Plan (SGWMP) be developed and implemented during the proposed construction activities. The purpose of the SGWMP is to suggest procedures for the proper handling and disposal of potentially impacted soil/groundwater disturbed during on-site activities where future soil excavation and/or groundwater dewatering may occur. Estimated Cost: \$2,500-\$3,500. Additionally, EBI recommends that the Regional Water Quality Control Board (RWQCB) be contacted prior to demolition activities in order to have the monitoring wells associated with the off-site gas station LUST incidents properly abandoned. Estimated Cost: Action Item.
- EBI recommends the development and implementation of a Lead-Based Paint Operations and Maintenance (O&M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to lead and minimize release of lead to the environment. This O&M Plan is a long term management approach. Estimated cost: \$500.

Re: Property Condition Report & Environmental Site Assessment Questionnaire for property known as or located at		
8850 SUNSET BLVD		
We have been requested by:	Subject:	EBI Project #:
Ladder Capital Finance LLC	To complete an Engineering and Environmental survey of the above mentioned property.	1118003187

1. Please read these instructions and those on the following page carefully.
2. Please assemble this original questionnaire and one copy of pertinent property documents, and forward all information to the site or the site contact for the Engineer and/or Scientist to use during the site visit. This documentation will be included in our reports.
3. Please fill out this questionnaire to the best of your knowledge and email or fax it back to us within three business days.
4. The Engineer and/or Scientist will contact you directly to schedule the site visit.
5. This information is extremely time sensitive and necessary to provide your lender with accurate and timely reports.

Please fill out and sign this questionnaire to the best of your knowledge for the Engineer's/Scientist's site visit. Email to **Esther Kacmar** at REResearchGroup@ebiconsulting.com or fax to (781) 425-3623, for our report files, and keep the original to provide to the Engineer or Scientist.

PROPERTY CONDITION REPORT PRE-SURVEY QUESTIONNAIRE

Additional plans and documentation (see page 4) must be forwarded to the site for the Engineer during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Engineer's report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #? Lots 1-8 4339-017-001 to -008, Tract 318
2. What is the legal Municipality or County that has jurisdiction over the property? Los Angeles
3. What is the assessors file ID number and tax file ID number if available? See above APN

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? 0.92 Acres
5. How many parking spaces (and HCP parking spaces) are present at the property? ~30
6. How many buildings comprise the subject property? 3 (multiple connected strip centers)
 - a. If the property is a mall or large retail center, please confirm and list ownership of each building.
7. What is the gross and net rentable square footage of the building(s)? Net 13,400
8. What is the date of construction of the building(s)? When was the building(s) first occupied?
9. How many tenant spaces or apartments are at the Subject Property? 8 or 9 (1 sub-let)
 - a. If the property is apartments, please provide a unit and type count by bedroom and square feet.
10. Please list, to the best of your knowledge, any deficiencies or problems with the site, parking area, amenities or utilities. None to my knowledge
11. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems. None to my knowledge
12. During the last five years, have any major capital improvements been made to the site or building(s)? If so, please explain, with the approximate cost. None to my knowledge

13.

Does the property have	Y or N	Does the property have	Y or N
Polybutylene piping	TBD	Compressed wood or composite board siding	TBD
Galvanized steel water lines	TBD	EIFS exterior finishes	TBD
ABS sanitary lines	TBD	Fire Retardant Treated plywood	TBD
Aluminum branch wiring	N	Cadet/Encore electric heaters installed 1982-99	TBD
Omega (Central or CSC) brand sprinkler heads	TBD	GE or Hotpoint dishwashers installed 1983-89	TBD

14. Please list any deficiencies noted during any Building, Fire or Health Department inspections in the last three years.
None to my knowledge

15. When were the fire alarm systems and/or sprinkler system (if any) last tested? Unknown

16. Please list the following utility providers: Electricity: Unknown
 Water: Unknown Storm Drainage: Unknown
 Sanitary Sewer: Unknown Natural Gas or Oil: Unknown
 Trash Hauler: Unknown and, Frequency of Pick-ups: Unknown

17. If you are performing or planning any repairs or replacement work to the property that will exceed an aggregate cost of \$2,000 please explain, with the approximate cost, N/A

18. Please list the responsible party for tenant improvements and maintenance of major systems (if applicable).
Unknown

18. Please attach a brief history of the property. This information helps us properly assess, evaluate and understand your property, and will assist in the financial analysis. The information should include:

- The date of approvals and construction, the contractor who built the property
- History of major capital improvements, repairs, additions or modifications
- History of fires or violations
- A list of any ongoing maintenance issues
- Tenant history, approximate turnover rate

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

A. Plans	B. Municipal Documents	C. Additional Information
▪ ALTA Survey or Site Plan* ▪ Architectural Building Plans* - plans, elevations, wall section, foundation, HVAC & elec. schedules ▪ Reduced scale Site and Building Plans ▪ <i>Extremely critical for properties in Seismically active zones 3 and 4*</i>	▪ Certificate of Occupancy* ▪ Building Permit* ▪ Façade inspection compliance* ▪ Copy of tax cards ▪ Copy of violations	▪ Capital expense report for 1 to 3 years* ▪ Tenant Rent Roll* ▪ Roof warranty ▪ History of recent improvements ▪ Schedule of Floor Area Measurements
	B.1 NYC Projects	

STRUCTURAL PLANS – Seismic Assessments are required for these properties. Structural drawings must be provided at the time of the site visit. If no drawings are provided, the report will be delayed and the Seismic Assessment may be overly conservative.	▪ Department of Building Violations* ▪ Environmental Control Board Violations* ▪ Local Law 11 Facade Reports*	- Gross and Rentable Square Feet ▪ Previous Due Diligence or Building Component Reports, <u>including, but not limited to</u>, façade*, roof*, mechanical*, electrical, elevator, sprinkler, fire alarm or life safety equipment, or pavement. ▪ Copy of most Recent Appraisal

EBI ACCESS REQUIREMENTS

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.
- All building perimeters
- All site amenities
- All building interiors, including as applicable, common areas, lobbies, a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, garages.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. Retail and Liquor. No known oil/chemical usage.
2. Describe the past uses of the property noting tenant names and oil/chemical usage. There does not appear to be any.
3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy? Yes, for our own review. You may have a copy upon request.
4. (Y) (N) Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property? Unknown
5. (Y) (N) Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation? No Contamination as per the Phase I
6. (Y) (N) Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation? Unknown
7. (Y) (N) Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation? Not listed
8. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation? Unknown
9. (Y) (N) Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation? Unknown
10. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation? Unknown
11. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe. None that we know of.
12. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? Unknown
13. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at or adjacent to the property? If yes, please describe. Unknown
14. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe. None that we know of.

15. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe. No

16. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe. Unknown

17. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation: No

19. Additional comments and/or pertinent information relevant to this Phase I ESA:

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

PIN: 4339-017-001
EBI Project No. 1118003187**

Dear Ms. Bennett:

EBI Consulting (EBI) is conducting a Phase I Environmental Site Assessment (ESA) and Property Condition Report (PCR) at the above-referenced Subject Property. As part of the research process, we would like to request access to records regarding the following, as applicable:

- Installation or removal of storage tanks (above and underground)
- Hazardous materials storage or release
- Hazardous waste generation or discharge
- Asbestos or lead-based paint abatement
- Current and historical fire code violations
- Open fire code violations
- Date of last fire inspection

We understand that these records may not be available. Please complete the applicable area below regarding record availability and return to our attention either via email at REResearchGroup@ebiconsulting.com or via fax at (781) 425-3623. If these records are available, EBI field personnel will be stopping by to review these records in the next several days. If there are any questions or concerns, please do not hesitate to contact us.

Sincerely,

Esther Kacmar
21 B Street
Burlington, MA 01803
reresearchgroup@ebiconsulting.com

I hereby certify that requested records ☐ are ☐ are not available in this Department. If records are available, an appointment to review ☐ is not ☐ is required.

LAND SURVEYING

TITLE: ALTA/NSPS LAND TITLE SURVEY	
8850-8878 SUNSET BOULEVARD & 1029 LARRABEE STREET, WEST HOLLYWOOD, CA 90069	
CLIENT: REM FINANCE, INC.	JOB NO: 18-13292
SCALE: 1" = 10'	DATE: 08/21/17
DESIGNED BY: F.C. / FG	REVISION (S): 09/27/17, 05/17/18
DRAWN BY: MC/RZD/DC/MC	SHEET 1 OF 1 SHEET
CHECKED BY: C.D.L.	

ZONING AND ZONING REQUIREMENTS:

Zoning Designation: Area 6-E of the Sunset Specific Plan (SSP)
Source: Zoning Report dated August 22, 2017 prepared by Partner Engineering and Science, Inc. as Project No. 17-088441 (Zoning Report)
Pursuant to the Zoning Report the subject property is conforming with respect to height, and floor area requirements. Setback requirements of the SSP are not applicable as subject was developed prior to adoption of the SSP and subject is legal nonconforming with respect to parking requirements.

FOR ZONING REGULATIONS:
<http://www.cityofwesthollywood.org/showdocument?id=4508>

PARKING COUNT:

64 REGULAR STORMED PARKING SPACES
1 HANDICAP PARKING SPACE
TOTAL: 65 PARKING SPACES

FLOOD INFORMATION:

SUBJECT PROPERTY IS ZONE "X" AREA OUTSIDE 1-PERCENT ANNUAL CHANCE OF FLOOD PLAN
FEMA PANEL NO. 080370158F
EFFECTIVE DATE: 09/26/2008

MISCELLANEOUS NOTES:

1) AT THE TIME OF THE SURVEY, THERE WAS NO OBSERVED SURFACE EVIDENCE OF EARTH MOVING, BUILDING CONSTRUCTION OR BUILDING ADDITIONS WITHIN RECENT MONTHS.
2) AT THE TIME OF THE SURVEY, THERE WAS NO OBSERVED EVIDENCE OF ANY RECENT CHANGES IN STREET RIGHT-OF-WAY LINES EITHER COMPLETED OR PROPOSED, AND AVAILABLE FROM THE CONTROLLING DISTRICT.

SCHEDULE B / EASEMENT(S):

20. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERE TO, AS GRANTED IN A DOCUMENT GRANTED TO: COUNTY OF LOS ANGELES
PURPOSE: PUBLIC ROADWAY AND HIGHWAY PURPOSES
RECORDING NO: BOOK 13807 PAGE 278, OFFICIAL RECORDS
AFFECTS: PARCEL 2
NOT FUTURE.

21. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERE TO AS CONDEMNED BY AN INSTRUMENT
INSTRUMENT: DATED: FINAL ORDER OF CONDEMNATION
COURT: SUPERIOR COURT
CASE NO: 16-00147
IN FAVOR OF: COUNTY OF LOS ANGELES
PURPOSE: PUBLIC STREET
RECORDING DATE: AUGUST 16, 1967
RECORDING NO: INSTRUMENT NO. 1447
AFFECTS: PARCELS 3, 4 AND 7
NOT FUTURE.

APPENDIX D

PROFESSIONAL QUALIFICATIONS

Summary of Experience

Mr. Renato a. Nalupa, P.E. has over 22 years extensive experience in conducting property condition assessments, physical needs assessment, phase I environmental site assessments, and energy audits for property owners, property management groups, mortgages bankers, and other consultants. He is registered mechanical engineer in the state of California and AHERA asbestos building inspector.

Relevant Project Experience

Mr. Nalupa has extensive experience on property condition assessments and evaluations of a variety of properties ranging from complicated properties such as high-rise office buildings (up to 72-stories), high-rise luxury hotels (up to 990 rooms), high-rise apartment buildings (up to 1,500 units), and retail shopping malls up to 2 million square feet. Experience with other property types includes nursing homes, mobile home parks, self, storage facilities, and light and heavy industrial facilities. Mr. Nalupa also has experience conducting energy audits and designs of HVAC and commercial refrigeration for commercial properties. His property condition assessment experience also includes the preparation of multi-year projection of anticipated immediate, short term, and capital expenditures. Mr. Nalupa has assisted with estimating probable maximum loss in seismic sensitive zones. During the property condition assessment process, Mr. Nalupa has conducted studies and consultations integrated with various lenders and client requirements including: project capital needs assessments (PCNAS), HUD, ASTM, CMBS, Freddie Mac, Fannie Mae protocols; and CAL FHA load inspections with 20 to 55-year reserve analysis. Other property condition systems evaluated include ancillary items such as site drainage, pavement, sidewalks, landscaping, swimming pools, and appurtenant structures. He has worked on property acquisition or other real estate transactions located throughout the continental U.S. and from Guam to St. Lucia, West Indies.

Mr. Nalupa's is an environmental professional, exceptionally qualified to execute a complete range of environmental services consisting of environmental site assessments (ESAS), and quality assurance reviews of documents prepared by other environmental consulting firms. He has managed and personally performed ESA, for work scopes including housing and urban development (HUD) ASTM, CMBS, Freddie Mac; and Fannie Mae protocol studies associated with commercial and residential development, and multi-site portfolios for national wireless communication companies including various tribal authorities.

Education

Bachelor of Science, Mechanical Engineering, Adamson University

Professional Registrations

Registered Mechanical Engineer – State of California
AHERA: Building Inspector and Management Planner

Summary of Experience

Mr. Maglietta is an environmental scientist with over 31 years of experience in performing and managing environmental investigations and site assessments in the U.S., Canada, and Mexico. Mr. Maglietta also has extensive experience conducting regulatory file reviews and performing asbestos, radon, lead paint, lead in water, and indoor air quality surveys.

Mr. Maglietta has performed or managed over 12,000 Phase I and II Environmental Site Assessments, Transaction Screens, Desk Reviews, Database Reviews, and regulatory file reviews for a wide range of properties for the purpose of evaluating site conditions, potential off-site liabilities, and site remediation costs. These services have been performed in order to advise property owners, operators and prospective purchasers of potential and existing environmental concerns. Mr. Maglietta has worked with corporate environmental officers, numerous Wall Street lending institutions, legal counsel, governmental agencies including HUD, SBA, FDIC and state governments, rating agencies, investment companies and real estate brokers to develop strategies for managing properties with environmental concerns.

Relevant Project Experience

Environmental Site Assessments: Mr. Maglietta has conducted ASTM Phase I Environmental Site Assessments, Environmental Site Screenings, and soil and groundwater sampling for various clients and has prepared Phase I and Phase II reports for a variety of properties located in the United States, Canada, and Mexico. These properties have included industrial, commercial, retail, healthcare, raw land, and multi-family residential properties. Mr. Maglietta has provided project management for underground storage tank removals and site characterizations, and has performed sampling for radon, asbestos-containing materials, lead-based paint and lead in water.

Subsurface Investigations: Mr. Maglietta has completed subsurface investigations at retail, commercial and industrial properties. Subsurface investigations have included direct-push sampling methodology, hollow-stem auger methodology, the installation of soil borings and shallow and deep groundwater monitoring wells, and subsequent sampling of soil and groundwater.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

WEST HOLLYWOOD ELEME	970 N HAMMOND ST	WSW 1/8 - 1/4 (0.159 mi.)	G47	68

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2018 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 33 RGA LUST sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:

0926

File Location:

Regional Board

Potential Media Affected:

Aquifer used for drinking water supply, Soil, Soil Vapor

Potential Contaminants of Concern:

Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE)

Site History:

The site property consists of one single-story, multi-tenant commercial building and one two-story, multi-use building, located at 8715-8727 Santa Monica Boulevard, in the City of West Hollywood. The property is occupied by several commercial businesses. The subject dry-cleaners were located on the first floor of the two-story building. Since 1983, the site had been occupied by several dry-cleaning businesses. A Phase I Environmental Site Assessment conducted by WEECO in April 1999 reported that the dry-cleaners had been cited for improper chemical handling. Subsequent site investigations revealed the impact of underlying soil and groundwater. The soil impact soil was successfully remediated via a soil vapor extraction system (SVE) from June 2002 to December 2002.

CANYON CLEANER FACILITY (FORMER) (Continued)

S108747237

Regional Board granted a No-further-action status in October 2003 for the soil. Groundwater monitoring continues to monitor the minor remaining PCE concentrations in one of the groundwater monitoring wells. A final remedy is being evaluated.

Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: This site is being remediated by the RPs with oversight by the RWQCB. Consequently, there are no plans to spend Bond funds for this site at this time. Sunlin, Inc., operates the Santa Palm Car Wash. The facility sold unleaded gasoline which was stored in underground tanks.
Site Description: Beginning in March, 1985, complaints of strong gasoline odors were received from residents in the vicinity. Unleaded gasoline has been identified on the surface of the ground water beneath the car wash and downgradient. Gasoline contains benzene, ethyl benzene, xylene, and toluene.
Hazardous Waste Desc: A plume of gasoline contamination exists in an elongated 900 foot northwest-southeast direction. The contamination is found in the soil and ground water. Ongoing air monitoring now shows no elevated hydrocarbons in

residences. Three ground water treatment systems are currently online and were designed to further reduce contaminant levels in the ground water. The Regional Water Quality Control Board is the lead agency for ongoing ground water remedial activities to recover free product and contaminated ground water. In June, 1985, the Department made a determination of imminent or substantial endangerment and a RAO ordered the potentially responsible parties (PRPs) to initiate immediate interim remedial measures. The PRPs have three ground water treatment systems online. The dates for the systems' initiation are: June 19, 1985, January 27, 1986, and August 25, 1986. A fourth system should be online November, 1988.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 90924

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 2166

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.

Amount (Lbs): 112

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 04/27/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704

Number of Days to Update: 92	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/09/2018	Source: EPA
Date Data Arrived at EDR: 02/06/2018	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 66	Next Scheduled EDR Contact: 07/30/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/09/2018	Source: EPA
Date Data Arrived at EDR: 02/06/2018	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/16/2018	Source: Department of the Navy
Date Data Arrived at EDR: 02/22/2018	Telephone: 843-820-7326
Date Made Active in Reports: 05/11/2018	Last EDR Contact: 05/09/2018
Number of Days to Update: 78	Next Scheduled EDR Contact: 08/27/2018
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/27/2018	Telephone: 703-603-0695
Date Made Active in Reports: 05/11/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 73	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Data Release Frequency: Varies

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

BEVERLY HILLS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types: loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types: fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types: stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

This material is proprietary and the subject of copyright protection and other intellectual property rights owned by or licensed to Tele Atlas North America, Inc. The use of this material is subject to the terms of a license agreement. You will be held liable for any unauthorized copying or disclosure of this material.

This Report contains certain products owned by or licensed by Tele Atlas North America, Inc. ("TANA") and licensed to EDR pursuant to an agreement between EDR and TANA (the "TANA Agreement"). Such products include the Dynamap®/2000 (commencing with the most current version, nationwide coverage, ArcInfo™ format, tiled by county, with semi-annual Updates) and are referred to in this Report as the "Licensed Products".

The use of the Licensed Products with a non-TANA map may result in increased variance between the location displayed on the map and ground truth location.

The recipient of the Report (hereinafter referred to as an "End User") shall use such Report solely for its internal purposes and not for resale.

U.S. GOVERNMENT RIGHTS. If End User is an agency, department, or other entity of the United States Government, or funded in whole or in part by the United States Government, then use, duplication, reproduction, release, modification, disclosure or transfer of this commercial product and accompanying documentation, is restricted in accordance with the LIMITED or RESTRICTED rights as described in DFARS 252.227-7014(a)(1) (JUN 1995) (DOD commercial computer software definition), DFARS 227.7202-1 (DOD policy on commercial computer software), FAR 52.227-19 (JUN 1987) (commercial computer software clause for civilian agencies), DFARS 252.227-7015 (NOV 1995) (DOD technical data – commercial items clause); FAR 52.227-14 Alternates I, II, and III (JUN 1987) (civilian agency technical data and noncommercial computer software clause); and/or FAR 12.211 and FAR 12.212 (commercial item acquisitions), as applicable. In case of conflict between any of the FAR and DFARS provisions listed herein, the construction that provides greater limitations on the Government's rights shall control. Contractor/manufacture is Tele Atlas North America, Inc., 11 Lafayette Street, Lebanon, NH 03766-1445. Phone: 603.643. 0330. The Licensed Products are ©1984-2008 by Tele Atlas North America, Inc. ALL RIGHTS RESERVED. For purpose of any public disclosure provision under any federal, state or local law, it is agreed that the Licensed Products are a trade secret and a proprietary commercial product and not subject to disclosure.

If End User is an agency, department, or other entity of any State government, the United States Government or any other public entity or funded in whole or in part by the United States Government, such End User agrees to protect the Licensed Products from public disclosure and to consider the Licensed Products exempt from any statute, law, regulation, or code, including any Sunshine Act, Public Records Act, Freedom of Information Act, or equivalent, which permits public access and/or reproduction or use of the Licensed Products. In the event that such exemption is challenged under any such laws, any and all right to retain any copies or to use of the Licensed Products shall be terminated and considered immediately null and void. Any copies of the Licensed Products held by End User shall immediately be destroyed. If any court of competent jurisdiction considers this clause void and unenforceable, in whole or in part, for any reason, then all Licensed Products previously delivered to End User will be destroyed.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The condition of the samples analyzed was acceptable upon receipt per laboratory protocol unless otherwise noted on this report. Each distinct component in an inhomogeneous sample was analyzed separately and reported as a composite. Results represent the analysis of samples submitted by the client. Sample location, description, area, volume, etc., was provided by the client. This report cannot be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government. This report shall not be reproduced except in full, without the written consent of the Environmental Hazards Service, L.L.C. California Certification #2319 NY ELAP #11714 NVLAP #101882-0 VELAP 460172. All information concerning sampling location, date, and time can be found on Chain-of-Custody. Environmental Hazards Services, L.L.C. does not perform any sample collection.

Environmental Hazards Services, L.L.C. recommends reanalysis by point count (for more accurate quantification) or Transmission Electron Microscopy (TEM), (for enhanced detection capabilities) for materials regulated by EPA NESHAP (National Emission Standards for Hazardous Air Pollutants) and found to contain less than ten percent (<10%) asbestos by polarized light microscopy (PLM). Both services are available for an additional fee.

400 Point Count Analysis, where noted, performed per EPA Method 600/R-93/116 with a Reporting Limit of 0.25%.

* All California samples analyzed by Polarized Light Microscopy, EPA Method 600/M4-82-020, Dec. 1982.

**Subject: Phase I Environmental Site Assessment
8850 - 8878 W. Sunset Boulevard
8850 - 8878 W. Sunset Boulevard, West Hollywood, California
EBI Project No. 1117006994**

Dear Mr. Cooper:

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you. This report has been completed in general conformance with the ASTM Standard E 1527-13.

The purpose of this report is to acquire environmental information, observe the general condition and maintenance status of the Subject Property, to suggest remediation and/or maintenance practices considered customary for the Subject Property to continue in its current operation, compared to properties of similar age and condition, and to identify recognized environmental conditions in connection with the Subject Property described in this report.

Reliance on the report and the information contained herein shall mean (i) the report may be relied upon by a lender to be selected by *REM Finance, Inc.*, in determining whether to make a loan evidenced by a note secured by the Subject Property ("the Mortgage Loan"); (ii) the report may be relied upon by any purchaser in determining whether to purchase the Mortgage Loan (but not the Subject Property) from that lender, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the report may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; (iv) the report speaks only as of its date in the absence of a specific written update of the report signed and delivered by EBI Consulting.

There are no intended or unintended third-party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to *REM Finance, Inc.*. Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,

APPENDIX H	TERMINOLOGY	

EXECUTIVE SUMMARY

At the request of REM Finance, Inc., EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 8850 - 8878 W. Sunset Boulevard in West Hollywood, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes eight contiguous parcels totaling 0.913± acres. The three parcels on the north side are improved with four commercial buildings, two with billboards on top, along West Sunset Boulevard. The buildings total 13,554 square feet and were initially constructed 1921 – 1937 with limited additions through 1958, according to Los Angeles County Assessor data. The buildings were constructed slightly into the sloping site with basements. The western building includes a full walk-out basement used as retail space. Although the building heights are similar, some of the building spaces include split levels or improved mezzanine areas. Parking areas associated with these buildings are located on the south side of their respective parcels. The other five parcels are paved parking lots operated independently of the commercial buildings. The parking lot area is generally split in half with a short retaining wall to accommodate the southern down-sloping topography with upper and lower parking lots. There is an additional retaining wall along the southern boundary. Landscaping is limited to a few sidewalk trees on the north side and minimal planter beds on the south side of the buildings.

At the time of EBI's site visit, the Subject Property was occupied by nine commercial tenants that included stores, restaurants, offices and a night club. There were no industrial or manufacturing activities.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

ASSESSMENT SUMMARY TABLE 8850 - 8878 W. SUNSET BOULEVARD 8850 - 8878 W. SUNSET BOULEVARD, WEST HOLLYWOOD, CALIFORNIA

Regulatory Review	4.1	☐	☒	☒	☐	☐	See below	See below
Potential Off-site Sources	2.5, 4.1	☐	☒	☒	☐	☐	Based on the planned redevelopment of the Subject Property and known low level impacts to the Subject Property from the off-site gas station release, EBI recommends that a Soil/Groundwater Management Plan (SGWMP) be developed and implemented during the proposed construction activities. The purpose of the SGWMP is to suggest procedures for the proper handling and disposal of potentially impacted soil/groundwater disturbed during on-site activities where future soil excavation and/or groundwater dewatering may occur. Additionally, EBI recommends that the Regional Water Quality Control Board (RWQCB) be contacted prior to demolition activities in order to have the monitoring wells associated with the off-site gas station LUST incidents properly abandoned.	\$2,500-\$3,500 for to prepare SGWMP Action Item for Monitoring Well Abandonment

I.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 8850 - 8878 W. Sunset Boulevard in West Hollywood, California.

I.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

I.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water and radon.

I.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of REM Finance, Inc., in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by REM Finance, Inc. (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit REM Finance, Inc. to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute “all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice” as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the

information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with authorities having jurisdiction over the Subject Property. REM Finance, Inc. agrees that EBI has no obligation to independently verify the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI Services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

I.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to assist a lender to be selected by REM Finance, Inc. in determining whether to make a loan evidenced by a note secured by the Subject Property. Reliance upon this report does not extend to entities or individuals interested in purchasing the Subject Property. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. EBI's liability to a purchaser wishing to use this report is limited to the cost of the report. Payment for the report is made by, and EBI's contract and report extends to REM Finance, Inc. only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

I.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Los Angeles County Assessor's Office, the Subject Property is owned by 5th Gear, LLC. The Subject Property is located at 8850 - 8878 W. Sunset Boulevard in West Hollywood, Los Angeles County, California. The Subject Property includes eight contiguous rectangular-shaped parcels, cumulatively totaling approximately 0.913 acres identified as the following Assessor Parcel Numbers (APNs):

- APN 4339-017-001, addressed as 8850 W. Sunset Boulevard
- APN 4339-017-002, addressed as 8866 W. Sunset Boulevard
- APN 4339-017-003, addressed as 8874 W. Sunset Boulevard
- APN 4339-017-004, parking lot, no assigned address
- APN 4339-017-005, parking lot, no assigned address
- APN 4339-017-006, addressed as 1029 Larrabee Street, parking lot
- APN 4339-017-007, parking lot, no assigned address
- APN 4339-017-008, parking lot, no assigned address

The Subject Property is located on the south side of West Sunset Boulevard and is enclosed by San Vicente Boulevard on the west and Larrabee Street on the east. Figure 1 - Location Map depicts the location of the Subject Property on a street map of West Hollywood, California. Figure 2 - Locus Map depicts the location of the Subject Property on the Beverly Hills, California United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property includes eight contiguous parcels totaling 0.913± acres. The three parcels on the north side are improved with four commercial buildings, two with billboards on top, along West Sunset Boulevard. The buildings total 13,554 square feet and were initially constructed 1921 – 1937 with limited additions through 1958, according to Los Angeles County Assessor data. The buildings were constructed slightly into the sloping site with basements. The western building includes a full walk-out basement used as retail space. Although the building heights are similar, some of the building spaces include split levels or improved mezzanine areas. Parking areas associated with these buildings are located on the south side of their respective parcels. The other five parcels are paved parking lots operated independently of the commercial buildings. The parking lot area is generally split in half with a short retaining wall to accommodate the southern down-sloping topography with upper and lower parking lots. There is an additional retaining wall along the southern boundary. Landscaping is limited to a few sidewalk trees on the north side and minimal planter beds on the south side of the buildings. The four buildings and land areas including the following:

SUBJECT PROPERTY IMPROVEMENTS					
Address	Floors	Basement	Square Feet*	Date of Construction*	Lot Size (Acres)*
8850-8856 W. Sunset Boulevard	1+	Yes	7,115	1921 – 1930	0.179
8860 W. Sunset Boulevard	1	Yes			
8866-8874 W. Sunset Boulevard	1+	Yes	3,092	1935 – 1958	0.073
8874-8878 W. Sunset Boulevard	1	Yes	3,347	1937 - 1950	0.063
Parking Lots	NA	NA	NA	NA	0.598

* Data provided by the Los Angeles County Assessor indicate initial construction of 1921 – 1937 with later additions/modifications

The Subject Property is planned to be redeveloped into a mixed-use hotel with two sub-slab parking garage levels, hotel suites, residential condominiums, retail stores, and a restaurant.

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of EBI's site visit, the Subject Property was occupied by nine commercial tenants that included stores, restaurants, offices and a night club. There were no industrial or manufacturing activities. The current tenant summary is presented in the following table.

CURRENT OCCUPANTS AND OPERATIONS			
Occupant	Location	Operations	Notable Hazardous Substances / Petroleum Products Identified
Terner's Liquor and Deli	8850	Store	None
Viper Room	8852	Club	None
Sun Bee Market	8860	Store	None
Barcode Barbershop	8860A	Barbershop	None
Ta-ke Sushi	8866	Restaurant	None
Amarone	8868	Restaurant	None
Waterfall Bridge Capital	8870	Offices	None
Glenn Lerner	8872	Offices	None
Aahs	8878	Store	None

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	Provider/Source
Potable Water Supply	City of Beverly Hills
Sewage Disposal System	City of Los Angeles
Electrical Service	Southern California Edison Company
Natural Gas Service	Southern California Gas Company
Oil Service	Not provided
Heating/Cooling Systems	Primarily rooftop HVAC units with some through-window and exterior wall-mounted units, natural gas and electric
Emergency Power	Not provided

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by residential and retail / commercial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by West Sunset Boulevard followed by commercial buildings (offices, restaurants and stores) at 8833 – 8901 W. Sunset Boulevard.
South	The Subject Property is bound to the south by The London Hotel at 1020 N. San Vicente Boulevard.
East	The Subject Property is bound to the east by North Larrabee Street followed by Chase

ADJOINING PROPERTIES	
	Bank at 8830 W. Sunset Boulevard and a multi-family building at 1014 – 1018 N. Larrabee Street.
West	The Subject Property is bound to the west by North San Vicente Boulevard followed by a gas station at 8906 W. Sunset Boulevard and by houses at 1019 – 1023 N. San Vicente Boulevard.

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties, except for the gas station on the west adjoining property, which is further discussed in Section 4.1. Additional adjoining properties identified on the regulatory database report are also further discussed in Section 4.1.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by REM Finance, Inc. with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire was not completed and returned to EBI. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by REM Finance, Inc.. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

REM Finance, Inc. has provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

REM Finance, Inc. provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

REM Finance, Inc. has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

REM Finance, Inc. has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

REM Finance, Inc. provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

REM Finance, Inc. retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded “orphan” properties within the same zip code. The database report is presented in Appendix E.

The database report identified three “orphan sites.” Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. Based on review of the limited locational data provided, none of the orphan sites appear to be located within a radius from the Subject Property that would indicate an environmental concern to the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listings Within Search Distance
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal SEMS Sites	0.5 mile	No	0
Federal SEMS-Archive Sites	0.5 mile	No	0
Federal RCRA CORRACTS Sites	1.0 mile	No	0
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	No	1
Federal Engineering / Institutional Control Sites	0.5 mile	No	0
Federal ERNS Sites	Property	No	NA
CA High-Priority Confirmed Release Sites (RESPONSE)	1.0 mile	No	0
CA Hazardous Waste Sites (ENVIROSTOR)	1.0 mile	No	3
CA Cal-Sites/HIST Cal-Sites	1.0 mile	No	0
CA Proposition 65 Notification Records (Notify 65)	1.0 mile	No	1
CA Toxic Pits Cleanup Act Sites (Toxic Pits)	1.0 mile	No	0
CA Bond Expenditure Plan	1.0 mile	No	1
CA Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)	0.5 mile	No	14
CA Spill, Leaks, Investigations, and Cleanup (SLIC)	0.5 mile	No	1
CA Voluntary Cleanup Program (VCP) Properties	0.5 mile	No	0
CA Leaking Underground Storage Tanks (LUST)	0.5 mile	No	16
CA Storage Tank Databases (AST, UST, FID UST, HIST)	Property & Adjoining	No	2

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS

4.1.1 Federal Agency Database Records

National Priority List (NPL)

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor sites located within 1 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL.

Superfund Enterprise Management System (SEMS)

SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on the SEMS database.

SEMS – ARCHIVE

SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- No Further Remedial Action Planned (NFRAP) list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on the SEMS-ARCHIVE database.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Subject Property nor sites located within 1 mile of the Subject Property were identified on the CORRACTS database.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor sites located within 1 mile of the Subject Property were identified on the TSD database.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. The Subject Property was not identified on the RCRA Generators database. However, the following adjoining site was identified on the RCRA Generator database:

RCRA GENERATOR			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Shell Service Station 8873 Sunset Blvd West Hollywood, CA	Adjacent/ (across street) North / Upgradient	CAD981405939	Small Quantity Generator. No violations reported.
*Presumed direction of groundwater flow			

This property is further discussed in the LUST database section below (Section 4.1.2).

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on the Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

4.1.2 State and Tribal Agency Database Records

California High-Priority Confirmed Release Sites (RESPONSE)

The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in the remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. Neither the Subject Property nor sites located within 1.0 mile of the Subject Property were identified on the RESPONSE database.

California Hazardous Waste Sites (ENVIROSTOR)

The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Subject Property was not identified on the ENVIROSTOR database. However, three sites located within 1.0 mile of the Subject Property were identified on the ENVIROSTOR database and none represent an environmental concern to the Subject Property based on their downgradient locations of at least 0.3 mile from the Subject Property.

Cal-Sites/HIST Cal-Sites

Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control (DTSC). This database is no longer updated by the state agency. It has been replaced by ENVIROSTOR. Neither the Subject Property nor sites within 1 mile of the Subject Property were identified on the Cal-Site/HIST Cal-Sites databases.

Proposition 65 Notification Records (Notify 65)

Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. The Notify 65 database includes listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency. The Subject Property is not identified on the Notify 65 database. However, one site located within 1.0 mile of the Subject Property is identified on the Notify 65 database. The listed site is located approximately 0.47 mile from the Subject Property in a presumed crossgradient to downgradient location. Based upon the distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified facility represent an environmental concern to the Subject Property.

Toxic Pits Cleanup Act Sites (Toxic Pits)

The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Toxic Pits database.

California Bond Expenditure Plan (BEP)

The California Bond Expenditure Plan (BEP) was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds. The Subject Property was not identified on the BEP. However, one site within 1 mile of the Subject Property was identified on the BEP and does not represent an environmental concern to the Subject Property based on its downgradient location of 0.35 mile from the Subject Property.

Leaking Underground Storage Tank Sites (LUST)

The California Water Resources Control Board along with their Regional Offices maintain databases of reported Leaking Underground Storage Tank sites. The Subject Property was not identified on the LUST List. However, 16 sites (reduced from a total listing of 21 sites due to duplicate sites) located within 0.5 mile of the Subject Property were identified on the LUST databases. Fourteen (14) of the 16 LUST sites are not likely to represent an environmental concern to the Subject Property based on their location of at least 0.1 mile from the Subject Property and their case closed status and/or crossgradient or downgradient location. The remaining sites are discussed in the following table.

LUST			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Shell Service Station 8873 W. Sunset Blvd West Hollywood, CA	Adjacent/ (across street) North-Northwest/ Crossgradient to Upgradient	T0603704683	Release of gasoline to aquifer reported 1985. Open – Verification Monitoring as of 08/17/2015.
ARCO #5122 Station 8906 W. Sunset Blvd Los Angeles, CA	Adjacent/ (across street) West-Northwest/ Crossgradient to Upgradient	T0603701226	Release of gasoline to aquifer reported 1985. Case closed 07/07/2015.
*Presumed direction of groundwater flow			

A Shell Service Station (8873 W. Sunset Boulevard) was historically located on the north adjoining property and is identified on the HIST Auto Station, UST, LUST, Cortese, and RCRA-SQG databases. A 2015 Case Closure Denial letter from the RWQCB was reviewed. According to this letter, the site historically operated eight USTs containing fuel and waste oil that were removed in 1962 and 1988. In 2007, one additional waste oil tank was removed. Several investigations conducted 1985 – 2013 identified total petroleum hydrocarbons as gasoline (TPHg) up to 6,500 parts per million (ppm), TPH as diesel (TPHd) up to 1,200 ppm, total recoverable petroleum hydrocarbons (TRPH) up to 4,100 ppm, and benzene up to 105 ppm in soil. In 1988 and 1989, approximately 277 tons of impacted soil was excavated during station demolition and an additional 1,845 tons of soil were excavated in 2004 to an approximate depth of 35 feet bgs. Fifteen groundwater monitoring wells have been installed on and off site (including five wells on the Subject Property that were installed in 1994). Free product up to 2.88 feet was observed in several wells through 1985. Free product was last observed in 2002 and through remedial action, 1,616.7 gallons of free product was removed. From 1994 to 2002, groundwater extraction remediation removed approximately 2.4 million gallons of groundwater. In 2010, ten wells were removed to allow for site redevelopment. Groundwater data reported in 2015 notably identified TPHg up to 11,000 parts per billion (ppb) and benzene up to 2,500 ppb. In 2013, a soil vapor investigation was performed near the eastern adjacent residential properties to this site and the results concluded that elevated vapor risks were not identified according to the Vapor Intrusion to Indoor Air Criteria for Low Threat Closure Program (LTCP) of the Underground Storage Tank Cleanup Fund.

However, the site was denied closure because all conditions to meet LTCP criteria were not satisfied as the residual groundwater contamination remained a concern. Additional groundwater monitoring was necessary to confirm the groundwater contamination levels exhibited a stable and/or declining trend. Various wells are currently sampled on a quarterly, semi-annual and annual basis. In March 2017, it was documented that the prior three semi-annual groundwater monitoring events in the well of concern (MW-11), located immediately east of the former gas station, had not demonstrated a stable or declining trend for benzene and it was proposed and approved that two rounds of groundwater extraction by means of a vacuum truck be performed. In May 2017, the first round was completed and removed approximately 300-gallons of groundwater from MW-11. Review of a June 2017 groundwater contour map showed 19,000 ppb benzene remained in well MW-11, along with TPHg up to 91,000 ppb. TPHg, TPHd, benzene and other related fuel contaminants, except for DIPE (diisopropyl ether, an oxygenate gasoline additive, identified up to 14 ppb in two on-site wells in June 2017), were reported as non-detect in the five wells on the Subject Property and in three wells in the sidewalk located on the south side of the former Shell Station. The residual contaminants were located on the general east side and due east of the former gas station and not south-southeast toward the Subject Property. Review of historical groundwater monitoring results show maximum TPHg and benzene results up to 300 ppb and 4 ppb, respectively, identified in on-site wells since 1994 and have been non-detect for these contaminants since 2010. The groundwater monitoring data indicates significant impact to the Subject Property from the Shell Station has not been identified. Based on the open case status of this LUST incident and the low level contaminants in the groundwater on the Subject Property, this is considered a *recognized environmental condition* (REC) until such time as regulatory closure is granted to the case. However, based on the low contaminant levels identified in the groundwater monitoring wells on the Subject Property in 2017, the impacts to the Subject Property from this off-site release are not currently considered a current vapor migration concern to the Subject Property. Additionally, the Subject Property does not use groundwater for drinking water purpose and the Responsible Party for this release has been identified.

An ARCO gas station (8900-8906 W. Sunset Boulevard) is currently located on the west adjoining property and is identified on the HIST Auto Station, UST, LUST, and Cortese databases. According to a 2014 UST Low Risk Case Review Form, four gasoline USTs and one waste oil UST were removed and replaced in 1988 by three 12,000-gallon gasoline USTs that remain active. Notable maximum contaminant levels identified in soil included TPHg up to 4,000 ppm and benzene up to 61.9 ppm from 1985 to 1999. Maximum groundwater contaminants notably included TPHg as free product with benzene up to 14,000 ppb, methyl tertiary butyl ether (MTBE) up to 500,000 ppb and tertiary butyl alcohol (TBA) at from 1986 to 2002. The most recent soil results reported TPHg at 700 ppm and benzene at 0.72 ppm in 2004; and groundwater results reported TPHg at 6,200 ppb, benzene at 145 ppb, MTBE at 354 ppb and TBA at 50,600 ppb in 2014. Free product was encountered at the site and was deemed fully removed as of August 2009. Other remedial action included soil remediation that removed a total of 1,894 pounds of product from 2002 to 2009 and free product bailing and pilot testing that resulted in the removal of 360 gallons of free product and 2,410 gallons of groundwater. Based on the declining to stable groundwater contamination levels, this site was issued regulatory closure through the Low Threat UST Closure Policy on July 7, 2015. It was noted that TBA levels remained elevated but were restricted to two on-site wells located near the center and south side of the ARCO site. Continued use of the site as a gas station negated vapor intrusion considerations. ARCO installed one well on the Subject Property, E-12, and sampling results were reported on the Geotracker website for this well from 2003 to 2011. Maximum groundwater contaminants in E-12 were reported as TPHg at 150 ppb in 2004, xylenes up to 1 ppb in 2006, and TBA up to 7.9 in 2004. All contaminants were reported as non-detect in groundwater in 2011. As historically elevated TBA and other contaminants do not appear to have been identified on the east side of the ARCO Station toward the Subject Property and only low levels of TBA were identified in the well on the Subject Property, it does not

appear that the ARCO Station site had significantly impacted the Subject Property as of 2014. Based on the information reviewed and the regulatory closure of this case, this is considered a *historic recognized environmental condition* (HREC).

Spill, Leaks, Investigations, and Cleanup (SLIC)

The Spills, Leaks, Investigations, and Cleanups (SLIC) database, maintained by the California Water Resources Control Board, includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites. The Subject Property was not identified on the SLIC List. However, one site (reduced based on duplicative listing) within 0.5 mile of the Subject Property was identified on the SLIC List and does not represent an environmental concern to the Subject Property based on its downgradient location of 0.33 mile from the Subject Property.

Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)

The Hazardous Waste and Substance Site List (also known as the Cortese/HIST Cortese databases) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California DTSC is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese/HIST Cortese databases. The Subject Property was not identified on the Cortese/HIST Cortese databases. However, 14 sites located within 0.5 mile of the Subject Property were identified on the Cortese/HIST Cortese databases and were all duplicate listings identified on the LUST List and were previously discussed.

Voluntary Cleanup Program (VCP) Properties

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on the VCP database.

California Storage Tank Databases (AST, UST, FID UST, HIST UST, SWEEPS UST)

The California Environmental Protection Agency, the California Water Resources Control Board and other entities previously maintained or currently maintain various lists recording permitted aboveground and underground storage tank (AST/UST) sites in California. The Subject Property was not identified on the AST/UST databases. However, the following adjacent sites were identified on the AST/UST databases.

UST			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Shell Oil/Service Station 8873 Sunset Blvd West Hollywood, CA	Adjacent/ (across street) North-Northwest/ Upgradient	5560	Six USTs reported on the SWEEPS database (no size/contents/dates provided) last active in 1989. Reported REMOVED on the Los Angeles County List.

UST			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
ARCO #5122 Station/ Sunset Oil/ Hassan A Soltani 8906 W. Sunset Blvd Los Angeles, CA	Adjacent/ (across street) West-Northwest/ Crossgradient to Upgradient	000264CC 26791 2091 8001	Three USTs reported on the HIST UST List under ID 000264CC: 6,000-gallon gasoline UST installed 1971; 4,000-gallon gasoline UST installed 1967; and 550-gallon waste oil UST, installed date unknown. Five USTs reported on the HIST UST List under ID 00026791: two 6,000-gallon gasoline USTs installed 1971; two 4,000-gallon gasoline USTs installed 1967; and a 550-gallon waste oil UST, installed date unknown. Eight USTs reported active on the SWEEPS UST List (no data provided) in 1989 under ID 2091. Five USTs reported active on the SWEEPS UST List active in 1994 under ID 8001: four 10,000-gallon gasoline USTs and a 5,000-gallon gasoline UST. On FID and Los Angeles County UST lists – no data.
*Presumed direction of groundwater flow			

Both UST sites were identified on the LUST List and were previously discussed.

Solid Waste Information System (SWIS and SWF/LF)

The Solid Waste Information System (SWIS and SWF/LF) facility database contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For each facility, the database contains information about location, owner, operator, facility type, regulatory and operational status, authorized waste types, local enforcement agency and inspection and enforcement records. Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on the SWIS and SWF/LF databases.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)

The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board (SWRCB) and the Regional Water Quality Control Boards (RWQCBs) for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on the WMUDS/SWAT database.

California Hazardous Material Incident Report System (CHMIRS)

The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the California Office of Emergency Services. The Subject Property was not identified on the CHMIRS database.

Hazardous Waste Information System (HAZNET)

The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. The Subject Property was not identified on the HAZNET database.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Engineering Control or Institutional Control Registries.

State and Tribal Brownfield Sites

Neither the Subject Property nor sites located within 0.5 mile of the Subject Property were identified on state or tribal Brownfield Sites databases.

Tribal Environmental Databases

The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acres. No tribal administered lands were identified within 1.0 mile of the Subject Property.

Other Relevant Database Listings

A large number of EDR Historic Auto Station and Dry Cleaner sites were identified on the adjoining properties in the regulatory database reported. Releases associated with these historic uses were previously discussed in the various databases above. If not discussed above, based upon the off-site locations, absence of reported releases, and/or redevelopment of these properties with the current improvements, it is considered unlikely that conditions associated with the listed sites represents an environmental concern to the Subject Property.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

City of West Hollywood Building Department

EBI submitted a request for a building permit history to the City of West Hollywood Building Department. As of the date of this report, a response had not been received. Should relevant information impacting the findings of this report be provided at a later date, this information will be forwarded in a timely manner.

Los Angeles County Assessor Office

The following parcel information was identified on file at the Los Angeles County Assessor's Office for the Subject Property:

- APN 4339-017-001, addressed as 8850 W. Sunset Boulevard - Commercial/Industrial property type, 7,115 square foot building area on a 7,817 square foot parcel, year built 1921 / 1930.
- APN 4339-017-002, addressed as 8866 W. Sunset Boulevard - Commercial/Industrial property type, 3,092 square foot building area on a 3,195 square foot parcel, year built 1935 / 1958.
- APN 4339-017-003, addressed as 8874 W. Sunset Boulevard - Commercial/Industrial property type, 3,347 square foot building area on a 2,750 square foot parcel, year built 1937 / 1950.
- APN 4339-017-004, no assigned address - Commercial/Industrial property type, 4,200 square foot building area on a 2,640 square foot parcel, year built 1960 / 1960 [note: there is no building on this parcel].
- APN 4339-017-005, no assigned address - Commercial/Industrial property type, 3,000 square foot building area on a 3,000 square foot parcel, year built 1950 / 1950 [note: there is no building on this parcel].
- APN 4339-017-006, addressed as 1029 W. Larrabee Street - Commercial/Industrial property type, 7,225 square foot building area on a 7,225 square foot parcel, year built not provided [note: there is no building on this parcel].
- APN 4339-017-007, no assigned address - Commercial/Industrial property type, 7,225 square foot building area on a 7,225 square foot parcel, year built not provided [note: there is no building on this parcel].
- APN 4339-017-008, no assigned address - Commercial/Industrial property type, 5,800 square foot building area on a 5,970 square foot parcel, year built 1965 / 1965 [note: there is no building on this parcel].

County of Los Angeles Fire Department – Health Hazardous Materials Department (CUPA)

EBI submitted a written request to CUPA for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property. According to a written response, no related records were identified on file.

California Water Resources Control Board

EBI accessed this agency's Geotracker system through their website at <http://www.geotracker.swrcb.ca.gov/>. This website lists regulated facilities in California including leaking USTs, other contaminated properties reported on the Spills, Leaks, Investigations and Cleanup List (SLIC), wells, land disposal sites, military sites and permitted UST sites. The Subject Property was not identified on the Geotracker system. However, the Geotracker mapping application depicted six groundwater monitoring wells on the Subject Property that were installed by the existing gas station to the west (ARCO/Sunset Oil) and former gas station (Shell) to the north. Data regarding these wells was previously discussed in Section 4.1.2.

Department of Toxic Substances Control (DTSC)

EBI searched the DTSC's databases of Hazardous Waste and Substances Site List – Site Cleanup and Envirostor List that includes NPL sites, State Response Sites, Voluntary Cleanup Sites, School Cleanup Sites and Corrective Action Sites at the website <http://www.dtsc.ca.gov/> and the Subject Property was not identified on either of these state databases.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-10. The scope of this screening was limited to visual observations of review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm the presence of airborne contaminants by vapor intrusion.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 340 - 360 feet above mean sea level (msl). The topography of the Subject Property slopes down to the southeast. The vicinity exhibits an overall downslope to the southeast (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Beverly Hills, California USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California Region (1995). The Subject Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments.

According to the soil summary data presented in the Physical Setting Source Addendum to the appended database report prepared by Environmental Data Resources, Inc., the soil type mapped at the Subject Property is Urban Land. Near-surface geology in heavily developed areas such as the Subject Property and vicinity is considered "urban land" and is characterized by a non-homogeneous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, subway systems and other construction results in a varied subsurface profile. In this setting, estimation of local subsurface parameters such as permeability, moisture content, and organic fraction is not feasible without site-specific testing data.

4.2.3 Hydrogeology and Hydrology

No surface water bodies were identified within the immediately vicinity of the Subject Property. The nearest significant water body is Ballona Creek located 4± mile to the southeast.

According to a 2014 UST Low Risk Case Review Form completed for the western adjacent ARCO Station at 8906 W. Sunset Boulevard and the 2017 Groundwater Monitoring Report for the northern

adjacent former Shell Station at 8873 W. Sunset Boulevard, the direction of groundwater flow was reported to the east, south and southeast. As part of Leaking UST investigations conducted for these two gas station sites, six groundwater monitoring wells were installed and remain on the Subject Property as further discussed in Section 5.6. First depth to groundwater in the wells on the Subject Property were reported at approximately 16 to 28 feet below ground surface (bgs) in the years 1994 to 2017. Based on this data and the southeasterly vicinity downslope, the presumed predominant direction of groundwater flow in the vicinity is to the southeast.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	Historical Uses		Source(s)
	Subject Property	Surrounding Area	
Prior to 1910	Undeveloped	Sunset Boulevard and a few structures present (use not known)	Fire Insurance Maps Topographic Maps City Directories
At least 1910 - 1921	Partially residentially developed	Partially residential developed	Fire Insurance Maps Topographic Maps City Directories
1921 - 1977	Residential and commercial (stores, night club and restaurants)	Residential and commercial with two gas stations	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records
1977 to Present	Commercial (stores, night club, offices and restaurants) and parking lots	Residential and commercial with a current gas station and former gas station (1938 – 1980s).	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records Other Historical Records

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review, except or the following:

An ARCO Station has operated on the eastern adjacent property since at least the 1940s and a Shell Station formerly operated on the northern adjacent property from at least 1938 into the 1980s. Both properties were identified on the LUST List and were previously discussed in Section 4.1.2. Additionally, multiple former dry cleaners and other auto stations were historically identified on the surrounding properties. These were previously discussed in Section 4.1.2.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of the aerial photographs are presented in Appendix F.

AERIAL PHOTOGRAPH SUMMARY

Year	Issues Noted	Observations
1928	No	Subject Property: The Subject Property appeared to be developed with two or more houses. The northeast corner was dark and features were not discernable in this aerial. Surrounding Area: The current streets were present, and the surrounding properties were undeveloped, residential or commercial.
1938	Yes	Subject Property: The current commercial buildings were present on the north side. What appeared to be residences were present on the southeast and southwest sides. Surrounding Area: Additional commercial development was present including a gas station to the north.
1948 1952 1964 1970 1977	Yes	Subject Property: Conditions on the Subject Property appeared similar to the 1938 aerial. Surrounding Area: Additional commercial development was present including a gas station to the west.
1964	No	Subject Property: Conditions on the Subject Property appeared similar to the previous aerials except that the residence on the west side was no longer present and the west-southwest side was a paved parking lot. Surrounding Area: Similar to the previous aerials.
1977 1979 1981	No	Subject Property: Conditions on the Subject Property appeared similar to the previous aerial except that the residence on the east side was no longer present and the site conditions inclusive of the four commercial buildings on the northern third and paved parking lots on the southern two-thirds was present. Surrounding Area: Similar to the previous aerials.
1989 1994 2002 2005	No	Subject Property: Conditions on the Subject Property appeared similar to their current conditions. Surrounding Properties: Similar to the previous aerials except the gas station to the north was no longer present and some newer commercial buildings had replaced previous buildings.
2009 2012	No	Subject Property: Conditions on the Subject Property appeared similar to the previous aerials. Surrounding Properties: Similar to the previous aerials except a commercial building had been constructed in the location of the former gas station to the north.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the fire insurance maps are presented in Appendix F.

FIRE INSURANCE MAP SUMMARY		
Year	Issues Noted	Observations
1910	No	Subject Property: Partially residentially developed. Surrounding Properties: The current streets were present. Land use to the north was not shown. Land to the east, south and west was partially residentially developed.
1926	No	Subject Property: A commercial building(s) with stores and a bottling works facility were present on the northeast side. Residences remained on the central and southwest sides. The northwestern and southeastern areas were shown undeveloped. Surrounding Properties: Land use to the north was not shown. Stores to the east and homes to the south and west were present.
1950	Yes	Subject Property: Commercial buildings with stores and restaurants were present on

FIRE INSURANCE MAP SUMMARY		
Year	Issues Noted	Observations
		the north side. Two residences remained on the central-east and southwest sides. Surrounding Properties: Gas stations were present to the north and west beyond the streets. Stores and restaurants were also present to the north and east with residential developed to the general south.
1969	Yes	Subject Property: Commercial buildings with stores and restaurants were present on the north side. Two parking lots were shown on the west-southwest side and no development or land use was depicted on the east-southeast side. Surrounding Properties: Similar to the previous map.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the topographic maps are presented in Appendix F.

TOPOGRAPHIC MAP SUMMARY		
Year	Issues Noted	Observations
1896 1900	No	Subject Property: No structures or features are depicted on the Subject Property. Surrounding Properties: A street was present to the north. A few non-descript, small buildings were in the vicinity including a structure possibly adjacent to the east.
1920	No	Subject Property: Non-descript structures were shown along the northern and western boundaries. Surrounding Properties: The current streets were present with non-descript general development shown to occupy at least half of the vicinity properties.
1924 1926	No	Subject Property: A larger structure on the northeast corner, small structure on the central-east side, and three small structures on the west side were shown. Surrounding Properties: The current streets were present with non-descript general development shown to occupy at least half of the vicinity properties.
1966 1972 1981 1991 1995	No	Subject Property: Included in a shaded area to indicate dense urban development without benefit of showing specific structures or land uses. Surrounding Properties: Included in a shaded area to indicate dense urban development without benefit of showing specific structures or land uses. The current vicinity streets are present.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). An abstract report was provided with listings at approximate 5-year intervals from 1920 to 2014. Historical street directories

were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

STREET DIRECTORY SUMMARY		
Year	Issues Noted	Observations
1920-1923	No	Subject Property: No listings provided.
		Surrounding Properties: No listings provided.
1924-1945	No	Subject Property: No listings provided.
		Surrounding Properties: Limited commercial and residential in the vicinity.
1951-2014	No	Subject Property: Commercial occupants (night club, stores, salons, restaurants) at 8850, 8852, 8860, 8866, 8868, 8870, 8872, 8874, 8876 and/or 8878 W. Sunset Boulevard. Residential occupants at 1029 N. Larrabee (1951 – 1965). No tenants of potential environmental concern noted.
		Surrounding Properties: Residential and commercial notably including gas stations to the west at 8900 W. Sunset (1951 - 1991) and to the north at 8873 W. Sunset (1971 – 1985).

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A “chain of title” is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

According to the Los Angeles County Assessor’s Office, the Subject Property was initially developed 1921 – 1937.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

Phase I Environmental Site Assessment, 8850 – 8878 Sunset Boulevard, West Hollywood, California, UES Consulting Services, Inc. (UES), June 21, 2017. The UES 2016 report was completed in conformance with ASTM 1527-13. The scope of the investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records and a review of the physical characteristics and history of the Subject Property. Relevant information is summarized as follows:

- At the time of the assessment, the Subject Property was developed and occupied similar to its current conditions. Five groundwater monitoring wells were identified on the Subject Property that were associated with the adjacent current gas station to the west and former gas station to the north.

- Based on a review of historical sources, the Subject Property was initially residential by 1910 with initial commercial development in 1921. UES's review of prior land use did not identify environmental concerns.
- The immediately surrounding properties consisted of commercial and residential properties. A former Shell Station to the north and current Arco/Sunset Oil Station were identified on the LUST List and the report concluded neither presented a recognized environmental condition to the Subject Property. No other off-site properties likely to represent an environmental concern to the Subject Property were identified through review of historical sources and regulatory databases.

UES concluded that no current or historical recognized environmental conditions were identified during the course of their assessment and presented no recommendations for further action. However, UES recommended the Subject Property owner continue to cooperate with the RWQCB including access to the monitoring wells on the Subject Property until the LUST site [Shell] receives closure.

4.3.9 Other Historical Records and Interviews

Mr. Brett Summers of REM Finance, Inc. completed EBI's Pre-Survey Questionnaire and indicated no knowledge of the construction date for the current buildings.

Ms. Maxx Rifkin of Abady Holdings Corporation also was not aware of the exact construction date but believed the buildings were constructed sometime around or before the 1950s. Ms. Rifkin was not aware of the former presence of any dry cleaners or past tenants of potential environmental concern at the Subject property.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Ms. Jodi Vanneman, EBI Senior Scientist, on December 6, 2017. Ms. Vanneman was accompanied by Ms. Maxx Rifkin of Abady Holdings Corporation.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was sunny and approximately 65° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. EBI was not able to access to the two restaurant units as the tenants were not present. Otherwise, there were no other significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	Approximate Quantity / Container / Material	Location	Storage Condition
Cleaning Compounds, Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Janitorial Closets	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL			
Classification	Type of Waste / Generation Process	Type of Storage / Location	Disposal Method / Contractor
Non-regulated Solid Waste	Municipal Solid Waste and Mixed Recyclables/ Routine Operations	Dumpsters behind the buildings	Athens Services
Non-regulated Liquid Waste	Sanitary Sewage	NA (Municipal Sanitary Sewer)	City of West Hollywood
	Food grease	One 55-gallon drum adjacent to the restaurants' back doors	Tallow rendering company transports for off-site disposal
Regulated Solid or Liquid Waste	None identified	NA	NA
Biomedical Waste	None identified	NA	NA

Note that the food grease drum used by one or both of the restaurants had a label indicating it contained "T-Maz 60 K", a sorbitan monostearate (non-hazardous surfactant). EBI did not identify evidence of haphazard dumping or improper management of wastes or chemicals on the Subject Property.

5.4 UNDERGROUND STORAGE TANKS (USTs) & ABOVEGROUND STORAGE TANKS (ASTs)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs or ASTs located at the Subject Property.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of former USTs or ASTs located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBs)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

Based upon the absence of transformers or other oil-containing equipment, no potential PCB-containing equipment was identified at the Subject Property.

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	Identified
Interior Drains, Trenches, or Sumps	No
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	No
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	Yes
Petroleum or Natural Gas Pipelines/Easements	No

EBI observed six groundwater monitoring wells on the southern parking lot portion of the Subject Property. According to the California Regional Water Quality Control Board (RWQCB) online GeoTracker program (<https://geotracker.waterboards.ca.gov>), five of the wells correlate with monitoring wells (identified as MW-14, 15, 16, 17, and 18) installed as part of the north adjoining active Shell Station LUST site (LUST # T0603704683) and the remaining monitoring well (identified as E-12) correlates to a monitoring well installed as part of the west adjoining closed ARCO LUST site (T0603701226).

6.0 INTERVIEWS

The site contact or Key Site Manager was contacted to be interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was completed. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The Pre-Survey Questionnaire is presented in Appendix C.

KEY SITE MANAGER INTERVIEW			
Contact / Affiliation	Date of Communication	Years Associated with Subject Property	Telephone No.
Maxx Rifkin Abady Holdings Corporation	12/06/2017	<1	maxx@ abadyholdingscorp.com

The following additional persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property.

ADDITIONAL INTERVIEWS			
Contact / Affiliation	Date of Communication	Years Associated with Subject Property	Telephone No.
Brett Summers REM Finance, Inc.	12/01/2017	<1	bsummers@ remfinance.com
Wendy Kampen Los Angeles County Fire Department	12/13/2017	NA	Wendy.Kampen@fire.la county.gov/

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

EBI conducted a limited visual screening survey for the presence of asbestos-containing material (ACM) at the Subject Property. EBI identified friable suspect ACM in the form of plaster walls and ceilings, sheetrock/joint compound composite material, and acoustical ceiling tile and non-friable suspect ACM in the form of vinyl flooring, floor mastic, various construction mastics and caulking, and roofing materials. At the time of EBI's site visit, the suspect ACMs were generally observed to be in good condition. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also present in areas of the buildings that were accessed as part of this assessment.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Los Angeles County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Based on the commercial use of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Painted surfaces at the Subject Property were generally observed to be in good condition. However, based on the date of construction, it is likely that lead-based paint (LBP) is present.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg/L).

Municipal water service is provided to the Subject Property by the City of Beverly Hills. Potable water is reportedly obtained from the City's reverse osmosis water treatment plant and from the Metropolitan Water District. Based upon review of the 2017 Drinking Water Supply and Water Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property, except for the following:

- A Shell Service Station (8873 W. Sunset Boulevard) was historically located on the north adjoining property and is identified on the HIST Auto Station, UST, LUST, Cortese, and RCRA-SQG databases. A 2015 Case Closure Denial letter from the RWQCB was reviewed. According to this letter, the site historically operated eight USTs containing fuel and waste oil that were removed in 1962 and 1988. In 2007, one additional waste oil tank was removed. Several investigations conducted 1985 – 2013 identified total petroleum hydrocarbons as gasoline (TPHg) up to 6,500 parts per million (ppm), TPH as diesel (TPHd) up to 1,200 ppm, total recoverable petroleum hydrocarbons (TRPH) up to 4,100 ppm, and benzene up to 105 ppm in soil. In 1988 and 1989, approximately 277 tons of impacted soil was excavated during station demolition and an additional 1,845 tons of soil were excavated in 2004 to an approximate depth of 35 feet bgs. Fifteen groundwater monitoring wells have been installed on and off site (including five wells on the Subject Property that were installed in 1994). Free product up to 2.88 feet was observed in several wells through 1985. Free product was last observed in 2002 and through remedial action, 1,616.7 gallons of free product was removed. From 1994 to 2002, groundwater extraction remediation removed approximately 2.4 million gallons of groundwater. In 2010, ten wells were removed to allow for site redevelopment. Groundwater data reported in 2015 notably identified TPHg up to 11,000 parts per billion (ppb) and benzene up to 2,500 ppb. In 2013, a soil vapor investigation was performed near the eastern adjacent residential properties to this site and the results concluded that elevated vapor risks were not identified according to the Vapor Intrusion to Indoor Air Criteria for Low Threat Closure Program (LTCP) of the Underground Storage Tank Cleanup Fund. However, the site was denied closure because all conditions to meet LTCP criteria were not satisfied as the residual groundwater contamination remained a concern. Additional groundwater monitoring was necessary to confirm the groundwater contamination levels exhibited a stable and/or declining trend. Various wells are currently sampled on a quarterly, semi-annual and annual basis. In March 2017, it was documented that the prior three semi-annual groundwater monitoring events in the well of concern (MW-11), located immediately east of the former gas station, had not demonstrated a stable or declining trend for benzene and it was proposed and approved that two rounds of groundwater extraction by means of a vacuum truck be performed. In May 2017, the first round was completed and removed approximately 300-gallons of groundwater from MW-11. Review of a June 2017 groundwater contour map showed 19,000 ppb benzene remained in well MW-11, along with TPHg up to 91,000 ppb. TPHg, TPHd, benzene and other related fuel contaminants, except for DIPE (diisopropyl ether, an oxygenate gasoline additive, identified up to 14 ppb in two on-site wells in June 2017), were reported as non-detect in the five wells on the Subject Property and in three wells in the sidewalk located on the south side of the former Shell Station. The residual contaminants were located on the general east side and due east of the former gas station and not south-southeast toward the Subject Property. Review of historical groundwater monitoring results show maximum TPHg and benzene results up to 300 ppb and 4 ppb, respectively, identified in on-site wells since 1994 and have been non-detect for these contaminants since 2010. The groundwater monitoring data indicates significant impact to the Subject Property from the Shell Station has not been identified. Based on the open case status of this LUST incident and the low level contaminants in the groundwater on the Subject Property, this is considered a *recognized environmental condition*

(REC) until such time as regulatory closure is granted to the case. However, based on the low contaminant levels identified in the groundwater monitoring wells on the Subject Property in 2017, the impacts to the Subject Property from this off-site release are not currently considered a current vapor migration concern to the Subject Property. Additionally, the Subject Property does not use groundwater for drinking water purpose and the Responsible Party for this release has been identified.

Additionally, the following *historic recognized environmental condition (HREC)*, condition of environmental interest, and *considerations outside the scope of ASTM Practice E 1527-13* were identified:

- An ARCO gas station (8900-8906 W. Sunset Boulevard) is currently located on the west adjoining property and is identified on the HIST Auto Station, UST, LUST, and Cortese databases. According to a 2014 UST Low Risk Case Review Form, four gasoline USTs and one waste oil UST were removed and replaced in 1988 by three 12,000-gallon gasoline USTs that remain active. Notable maximum contaminant levels identified in soil included TPHg up to 4,000 ppm and benzene up to 61.9 ppm from 1985 to 1999. Maximum groundwater contaminants notably included TPHg as free product with benzene up to 14,000 ppb, methyl tertiary butyl ether (MTBE) up to 500,000 ppb and tertiary butyl alcohol (TBA) at from 1986 to 2002. The most recent soil results reported TPHg at 700 ppm and benzene at 0.72 ppm in 2004; and groundwater results reported TPHg at 6,200 ppb, benzene at 145 ppb, MTBE at 354 ppb and TBA at 50,600 ppb in 2014. Free product was encountered at the site and was deemed fully removed as of August 2009. Other remedial action included soil remediation that removed a total of 1,894 pounds of product from 2002 to 2009 and free product bailing and pilot testing that resulted in the removal of 360 gallons of free product and 2,410 gallons of groundwater. Based on the declining to stable groundwater contamination levels, this site was issued regulatory closure through the Low Threat UST Closure Policy on July 7, 2015. It was noted that TBA levels remained elevated but were restricted to two on-site wells located near the center and south side of the ARCO site. Continued use of the site as a gas station negated vapor intrusion considerations. ARCO installed one well on the Subject Property, E-12, and sampling results were reported on the Geotracker website for this well from 2003 to 2011. Maximum groundwater contaminants in E-12 were reported as TPHg at 150 ppb in 2004, xylenes up to 1 ppb in 2006, and TBA up to 7.9 in 2004. All contaminants were reported as non-detect in groundwater in 2011. As historically elevated TBA and other contaminants do not appear to have been identified on the east side of the ARCO Station toward the Subject Property and only low levels of TBA were identified in the well on the Subject Property, it does not appear that the ARCO Station site had significantly impacted the Subject Property as of 2014. Based on the information reviewed and the regulatory closure of this case, this is considered a *historic recognized environmental condition (HREC)*.
- EBI observed six groundwater monitoring wells on the southern parking lot portion of the Subject Property. According to the California Regional Water Quality Control Board (RWQCB) online GeoTracker program (<https://geotracker.waterboards.ca.gov>), five of the wells correlate with monitoring wells (identified as MW-14, 15, 16, 17, and 18) installed as part of the north adjoining active Shell Station LUST site (LUST # T0603704683) and the remaining monitoring well (identified as E-12) correlates to a monitoring well installed as part of the west adjoining closed ARCO LUST site (T0603701226).
- EBI conducted a limited visual screening survey for the presence of asbestos-containing material (ACM) at the Subject Property. EBI identified friable suspect ACM in the form of plaster walls and ceilings, sheetrock/joint compound composite material, and acoustical ceiling tile and non-friable suspect ACM in the form of vinyl flooring, floor mastic, various construction mastics and caulking,

and roofing materials. At the time of EBI's site visit, the suspect ACMs were generally observed to be in good condition. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

- Painted surfaces at the Subject Property were generally observed to be in good condition. However, based on the date of construction, it is likely that lead-based paint (LBP) is present. LBP is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following recommendations:

- Based on the planned redevelopment of the Subject Property and known low level impacts to the Subject Property from the off-site gas station release, EBI recommends that a Soil/Groundwater Management Plan (SGWMP) be developed and implemented during the proposed construction activities. The purpose of the SGWMP is to suggest procedures for the proper handling and disposal of potentially impacted soil/groundwater disturbed during on-site activities where future soil excavation and/or groundwater dewatering may occur. Estimated Cost: \$2,500-\$3,500. Additionally, EBI recommends that the Regional Water Quality Control Board (RWQCB) be contacted prior to demolition activities in order to have the monitoring wells associated with the off-site gas station LUST incidents properly abandoned. Estimated Cost: Action Item.
- Based on the planned redevelopment of the Subject Property, EBI recommends that all suspect asbestos-containing materials (ACM) identified be bulk sampled by a licensed asbestos inspector prior to any renovation or demolition activities. Any materials that are determined to be asbestos-containing through bulk sampling should be removed by a licensed abatement contractor prior to renovation or demolition activities that would disturb these materials. Estimated Cost: Action Item.
- Based on the planned redevelopment of the Subject Property, EBI recommends that Occupational Safety and Health Administration (OSHA) requirements in association with lead-based paint (LBP) be followed as part of any demolition activities. Estimated cost: Action Item.

Re: Property Condition Report & Environmental Site Assessment Questionnaire for property known as or located at 8850 AND 8878 SUNSET BOULEVARD		
We have been requested by:	Subject:	EBI Project #:
REM Finace	To complete an Engineering and Environmental survey of the above mentioned property.	1117006994

1. Please read these instructions and those on the following page carefully.
2. Please assemble this original questionnaire and one copy of pertinent property documents, and forward all information to the site or the site contact for the Engineer and/or Scientist to use during the site visit. This documentation will be included in our reports.
3. Please fill out this questionnaire to the best of your knowledge and email or fax it back to us within three business days.
4. The Engineer and/or Scientist will contact you directly to schedule the site visit.
5. This information is extremely time sensitive and necessary to provide your lender with accurate and timely reports.

Please fill out and sign this questionnaire to the best of your knowledge for the Engineer's/Scientist's site visit. Email to **Esther Kacmar** at REResearchGroup@ebiconsulting.com or fax to (781) 425-3623, for our report files, and keep the original to provide to the Engineer or Scientist.

Subject Property Name: 8850 and 8878 Sunset Boulevard **EBI Project #:** 1117006994

Address: 8850 and 8878 Sunset Boulevard Hollywood CA

Subject Property Owner: Abady Holdings, Inc **Purchase Date:** Unknown

On-Site Property Contact: Jeremy Dupree **Telephone:** 310-980-7372

Fax: _____ **Email:** jeremy@abadyholdings.com

Brett Summers, Analyst 12/1/17

Your Name and title	Signature	Date

PROPERTY CONDITION REPORT PRE-SURVEY QUESTIONNAIRE

Additional plans and documentation (see page 4) must be forwarded to the site for the Engineer during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Engineer's report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #? 4339-07-(001-008)
2. What is the legal Municipality or County that has jurisdiction over the property? City of West Hollywood LA County
3. What is the assessors file ID number and tax file ID number if available? Unknown

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? 0.91
5. How many parking spaces (and HCP parking spaces) are present at the property? ~30
6. How many buildings comprise the subject property? 3
 - a. If the property is a mall or large retail center, please confirm and list ownership of each building. _____
7. What is the gross and net rentable square footage of the building(s)? Net: 13,400; Gross Unknown
8. What is the date of construction of the building(s)? When was the building(s) first occupied? Unknown
9. How many tenant spaces or apartments are at the Subject Property? 8
 - a. If the property is apartments, please provide a unit and type count by bedroom and square feet. _____
10. Please list, to the best of your knowledge, any deficiencies or problems with the site, parking area, amenities or utilities. None to my knowledge
11. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems. None to my knowledge
12. During the last five years, have any major capital improvements been made to the site or building(s)? If so, please explain, with the approximate cost. None to my knowledge

13.

Does the property have	Y or N	Does the property have	Y or N
Polybutylene piping	TBD	Compressed wood or composite board siding	TBD
Galvanized steel water lines	TBD	EIFS exterior finishes	TBD
ABS sanitary lines	TBD	Fire Retardant Treated plywood	TBD
Aluminum branch wiring	TBD	Cadet/Encore electric heaters installed 1982-99	TBD
Omega (Central or CSC) brand sprinkler heads	TBD	GE or Hotpoint dishwashers installed 1983-89	TBD

14. Please list any deficiencies noted during any Building, Fire or Health Department inspections in the last three years.

None to my knowledge15. When were the fire alarm systems and/or sprinkler system (if any) last tested? Unknown

16. Please list the following utility providers:

Electricity: UnknownWater: UnknownStorm Drainage: UnknownSanitary Sewer: UnknownNatural Gas or Oil: UnknownTrash Hauler: Unknownand, Frequency of Pick-ups: Unknown17. If you are performing or planning any repairs or replacement work to the property that will exceed an aggregate cost of \$2,000 please explain, with the approximate cost. N/A

18. Please list the responsible party for tenant improvements and maintenance of major systems (if applicable).

Unknown

18. Please attach a brief history of the property. This information helps us properly assess, evaluate and understand your property, and will assist in the financial analysis. The information should include:

- The date of approvals and construction, the contractor who built the property
- History of major capital improvements, repairs, additions or modifications
- History of fires or violations
- A list of any ongoing maintenance issues
- Tenant history, approximate turnover rate

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

A. Plans	B. Municipal Documents	C. Additional Information
▪ ALTA Survey or Site Plan* ▪ Architectural Building Plans* - plans, elevations, wall section, foundation, HVAC & elec. schedules ▪ Reduced scale Site and Building Plans ▪ <i>Extremely critical for properties in Seismically active zones 3 and 4*</i>	▪ Certificate of Occupancy* ▪ Building Permit* ▪ Façade inspection compliance* ▪ Copy of tax cards ▪ Copy of violations	▪ Capital expense report for 1 to 3 years* ▪ Tenant Rent Roll* ▪ Roof warranty ▪ History of recent improvements ▪ Schedule of Floor Area Measurements
	B.1 NYC Projects	

STRUCTURAL PLANS – Seismic Assessments are required for these properties. Structural drawings must be provided at the time of the site visit. If no drawings are provided, the report will be delayed and the Seismic Assessment may be overly conservative. ▪	▪ Department of Building Violations* ▪ Environmental Control Board Violations* ▪ Local Law 11 Facade Reports*	- Gross and Rentable Square Feet ▪ Previous Due Diligence or Building Component Reports, including, but not limited to, façade*, roof*, mechanical*, electrical, elevator, sprinkler, fire alarm or life safety equipment, or pavement. ▪ Copy of most Recent Appraisal

EBI ACCESS REQUIREMENTS

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.
- All building perimeters
- All site amenities
- All building interiors, including as applicable, common areas, lobbies, a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, garages.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. Retail and Liquor. No known oil/chemical usage.
2. Describe the past uses of the property noting tenant names and oil/chemical usage. Unknown
3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy? Unknown
4. (Y) (N) Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property? Unknown
5. (Y) (N) Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation? Unknown
6. (Y) (N) Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation? Unknown
7. (Y) (N) Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation? Unknown
8. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation? Unknown
9. (Y) (N) Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation? Unknown
10. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation? Unknown
11. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe.
12. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? Unknown
13. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at or adjacent to the property? If yes, please describe. Unknown
14. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe. Unknown

15. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe, Unknown

16. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe, Unknown

17. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation: No _____

19. Additional comments and/or pertinent information relevant to this Phase I ESA: _____

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

Subject: 17-3043, 17-3049: Public Records Requests

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 8850-8878 (*even*) *W Sunset Blvd, West Hollywood, CA 90069*
1029 Larrabee St, W Hollywood, CA 90069

This search revealed that no records were found for the above noted address(es).

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

If you have any questions regarding your request, please contact our office at 626-430-3260.

July 13, 2017

California Regional Water Quality Control Board
Los Angeles Region
320 West 4th Street, Suite 200
Los Angeles, California 90013

Attention: Ms. Chandra Tyler

SUBJECT: GROUNDWATER MONITORING AND STATUS REPORT
SECOND QUARTER 2017
FORMER SHELL SERVICE STATION
8873 SUNSET BOULEVARD (at Clark Street)
WEST HOLLYWOOD, CALIFORNIA
AGENCY FILE: R-05560
PLANET ID: 10039900
PROJECT ID: 36557

Dear Ms. Tyler:

Wayne Perry, Inc. (WPI), on behalf of Equilon Enterprises LLC dba Shell Oil Products US (Equilon), is submitting this Groundwater Monitoring Report. This report includes a description of the groundwater monitoring activities, tables, figures showing groundwater data, copies of field data sheets and analytical reporting.

SITE DESCRIPTION

The Site is located on the northeast corner of the intersection of Sunset Boulevard and Clark Street in West Hollywood, California (Figure 1).

Surrounding land use is a combination of residential and commercial. Multi-family housing is located immediately north and northeast of the site. Commercial properties are located across Clark Street and Sunset Boulevard and immediately east of the site. An ARCO Service Station is located on the southwest corner of the intersection of Sunset Boulevard and Clark Street.

A Shell Service Station operated at the Site from at least 1962 until 1988. Two 8,000-gallon and two 6,000-gallon single-walled steel USTs containing gasoline, a 550-gallon single walled steel UST containing waste oil, two dispenser islands, and a building with two service bays were decommissioned from the Site in October 1988. The Site was undeveloped until approximately 2008 when it was redeveloped as a multi-tenant commercial property.

WORK PERFORMED THIS REPORTING PERIOD

Remedial Activities

As a result of the teleconference conducted on March 10, 2017 between the CRWQCB-LA and WPI, a work plan was submitted on March 17, 2017, proposing to conduct up to two groundwater extraction events at off-site well MW-11 to reduce benzene concentrations in groundwater. The CRWQCB-LA approved this proposed work scope in a letter dated March 29, 2017.

The first groundwater extraction event was completed on May 11, 2017, using a vacuum truck and degassing trailer. As discussed during the teleconference, the vacuum truck was staged in the alley north of the former Shell site. Groundwater measurements could not be collected in the field due to failure of the electronic interface probe. The well was fitted with an air-tight well cap and a stinger, lowered until the intake was approximately one foot below the surface of the groundwater. A total of 300 gallons of impacted groundwater were extracted from well MW-11 during an approximate seven-hour period. Equipment setup and takedown in addition to relocation of vehicles in the adjacent parking garages accounted for approximately two hours. Extracted groundwater generated during the event was removed from the Site and disposed of at an appropriate off-site facility. A copy of the waste manifest is in Appendix A.

Groundwater Monitoring Activities

Groundwater monitoring was conducted at all Site wells on June 14, 2017. Benzene concentrations increased in nearby well MW-12 and remained the same order of magnitude in extraction well MW-11. Groundwater sampling procedures are in

8873 Sunset Boulevard, West Hollywood
Page 3

Appendix B. Field data sheets and laboratory reports are in Appendix C. The site history is summarized in Appendix D.

WORK TO BE PERFORMED

Remedial Activities

Based on the data, wells MW-11 and MW-12 will be utilized for extraction during the second groundwater extraction event to be scheduled during the fourth quarter.

Groundwater Monitoring Activities

Groundwater monitoring will be conducted in the fourth quarter 2017.

Reports will be prepared semi-annually during the second and fourth quarters.

This report has been prepared by WPI for the exclusive use of Equilon, as it pertains to the Site. Our professional services have been performed using that degree of care and skill ordinarily exercised under similar circumstances by other geologists, hydrogeologists, and engineers practicing in this field. No other warranty, express or implied, is made as to the professional advice in this report.

If you have any questions regarding this project, please contact Ms. Ginny Murphy of WPI at (714) 826-0352 or Ms. Deborah Pryor of Equilon at (323) 291-9595.

Sincerely,
WAYNE PERRY, INC.
