Appendix G

Part 3 of 3

APPENDIX B

Sampling Procedures

GROUNDWATER GAUGING PROCEDURES

Prior to purging, each well was measured for total depth, depth to groundwater, and separate-phase hydrocarbon thickness, if present, using an electronic interface probe. The electronic interface probe sounds an intermittent alarm when in contact with water, and a continuous alarm when in contact with petroleum hydrocarbons. A measuring tape, graduated to hundredths of a foot, was attached to the electronic interface probe and adjusted for length of the probe. The electronic interface probe was lowered into the well and stopped when an alarm sounded. The depth to groundwater was determined by recording the length of the extended measuring tape referenced to the top of the well casing, usually a mark on the top of the casing on the north side of the well. Separate readings for the depth to separate-phase hydrocarbon and groundwater were recorded, if necessary.

To prevent cross-contamination, the electronic interface probe was washed with non-phosphate soap and double-rinsed in de-ionized water prior to each measurement. Additionally, each well was gauged in order of increasing petroleum hydrocarbon concentrations based on laboratory results of previous groundwater sampling.

GROUNDWATER SAMPLING PROCEDURES

Each well that was sampled was purged of water prior to sampling, using a PVC bailer. Fast recharging wells were purged of at least three casing volumes of water. Slow recharging wells were purged until dry and allowed to recover for at least two hours before sampling. Each casing volume was field tested for temperature, conductivity, and pH, turbidity and dissolved oxygen were measured after the last or fourth casing volume.

Each groundwater sample was collected using a Teflon® bailer, equipped with a bottom-emptying device, which was attached to clean, commercial twine and gently lowered into the well. The bailer was allowed to sink into the standing water and fill, and was then recovered. The water from the bailer was slowly poured into 40-ml VOA vials with Teflon® septa, in a manner that prevented air bubbles from being trapped within the sample vial. Each sample was placed on ice to reduce volatilization, prior to being received by the analytical laboratory. Groundwater samples were delivered under chain of custody to a state-certified analytical laboratory for chemical analyses.

All re-usable sampling equipment, including bailers, were washed in non-phosphate soap and double-rinsed in distilled water between wells to reduce the possibility of cross-contamination.

Comments
No additional comments.

Receipt
The samples were received on 6/15/2017 6:05 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.3° C.

GC/MS VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA
Method(s) 8015B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 440-412417 and analytical batch 440-412367. The laboratory control sample (LCS) was performed in duplicate to provide precision data for this batch.

Method(s) 8015B: The following sample required a dilution due to the nature of the sample matrix: MW-11 (440-186568-7). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information. preparation batch 440-412417 and analytical batch 440-412961

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: Wayne Perry, Inc.
Project/Site: Shell- 8873 Sunset Blvd., West Hollywood

TestAmerica Job ID: 440-186568-1

Laboratory: TestAmerica Irvine

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date

Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

APPENDIX D

Site History

SITE HISTORY

Date	Activity/Method	No. of Wells, Borings or Samples	Report Date	Consultant	Comments
6/85	Site assessment	4 groundwater (GW) wells	6/17/85 12/3/85 12/15/86	Hydro-Fluent and Wayne Perry, Inc. (WPI)	Site assessment was initiated as part of a regional assessment requested by the California Regional Water Quality Control Board, Los Angeles Region (CRWQCB-LA). Dissolved-phase hydrocarbons (HCs) and separate-phase hydrocarbons (SPH) were detected in GW samples.
8/85	Site assessment	5 GW wells	12/3/85 12/15/86	Hydro-Fluent and WPI	No evidence of HCs were in the soil SPH was observed in Well B-4.
8/85	Began manual SPH recovery		12/3/85	Hydro-Fluent	Forty-five gallons of SPH were recovered through Dec. 1985.
11/85	Site assessment	4 GW wells	11/20/85	Hydro-Fluent	HCs were detected in GW samples collected from the off-site wells to the east.
12/85	Assessed GW beneath Le Belage Hotel (south of site)	1 GW well	12/20/85	Hydro-Fluent	Responded to apparent seepage of SPH into the hotel parking garage on 9/85. Dissolved-phase HCs were found in the GW sample collected 1 foot below the parking garage.
7/86	Site assessment	4 GW wells	12/15/86	WPI	HCs were not detected in GW samples collected from wells between the hotel and Shell site.
6/88	Supplemental site assessment	4 borings	11/28/88	WPI	HCs were detected in soil samples from the vadose-zone and capillary fringe.
6/88	Slug testing	3 wells tested	10/13/89	WPI	Achievable pumping rates were estimated at 0.1 to 0.2 gallon per minute.
8/88 to 9/88	Neutron logging of GW wells	logged 10 existing wells	9/27/88	IBK/TTI	Results were inconclusive.
10/88 to 12/88	Station demolition	9 soil samples	2/9/89 4/25/89	WPI	Approx. 200 cubic yards of excavated soil were removed.
10/88	Additional site assessment	2 borings and 6 SVE wells	11/28/88	WPI	HCs were detected in soil samples collected from the vadose-zone and capillary fringe. The most HC-affected areas were beneath the eastern side of the recently removed underground storage tanks (USTs), the dispenser islands, and the western side area of the USTs that were removed in 1962.
11/88 to 12/88	Soil vapor extraction (SVE) test	—	2/9/89	WPI	Soil was not conducive to SVE; some venting was performed with ICE prior to the UST removal.
12/88	Additional site assessment	4 borings	4/25/89	WPI	HCs were detected in soil samples collected from beneath the former USTs.
1/89	Additional site assessment	3 borings	4/25/89	WPI	HCs were detected in soil samples collected from beneath the dispenser islands.
2/89	Remedial action plan	—	2/9/89	WPI	Recommended soil excavation and removal from beneath the dispenser islands.
3/89 to present	Quarterly GW sampling	—	various	WPI	—
8/89 to 9/89	Soil excavation	9 soil samples	10/13/89	WPI	Approximately 825 cubic yards of soil were excavated from beneath the dispenser islands and the former 1962 UST zone to a depth of 20 feet.

Date	Activity/Method	No. of Wells, Borings or Samples	Report Date	Consultant	Comments
10/89	Groundwater remediation plan	—	10/13/89	WPI	Recommended GW depression to enhance SPH recovery.
5/90	Aquifer test	—	11/16/90	WPI	Transmissivities were approx. 244 gpd/ft. Recommended three GW extraction wells pumping at 0.3 gpm to contain HCs in GW.
1/91	Work plan for GW remediation; NPDES application	—	1/16/91	WPI	NPDES permit was granted in Aug. 1991.
5/93	SVE testing	—	8/12/93	WPI	SVE was not cost effective due to low soil permeabilities.
6/94	GW extraction and treatment began	—	9/22/94	WPI	GW extraction Wells MW-1, MW-5, and MW-8 were pumped beginning on 6/16/94. GW was treated using carbon and then discharged to the storm drain.
3/96	Off-site assessment	4 cone penetrometer tests and 3 Hydropunch® samples	4/20/96	WPI	HCs were detected in the downgradient groundwater samples.
3/96	Aerial photographs reviewed	—	4/20/96	WPI	The site appears to have been a service station since 1940; the southwestern corner of the same intersection appears to have been a service station since 1937 (currently an ARCO).
9/97 to present	MTBE confirmation analyses	—	various	WPI	Based on the results of MTBE confirmation analyses for GW samples by EPA Method 8260A, the MTBE results obtained by EPA Method 8020 are false positives.
4/00	Groundwater treatment system evaluation	—	4/28/00	WPI	Groundwater pump and treat system has been marginally successful in remediating the site.
8/01	Work plan for additional assessment	—	8/16/01	WPI	Proposed eighteen borings to obtain additional information regarding site lithology and the extent of hydrocarbon-impacted soil.
10/01	Agency response	—	10/1/01	CRWQCB-LA	The CRWQCB-LA response to the work plan requested fewer borings and modification to boring locations.
10/01	Addendum to work plan	—	10/30/01	WPI	Addendum to work plan proposed boring locations.
11/01	Agency approval	—	11/9/01	CRWQCB-LA	Approval of amended work plan by CRWQCB-LA.
3/02	Groundwater remediation system shutdown	—	3/29/02	WPI	WPI correspondence notified the CRWQCB-LA that the groundwater remediation system was going to be shut down and evaluated. The system was shut down on 3/30/02.

Date	Activity/Method	No. of Wells, Borings or Samples	Report Date	Consultant	Comments
4/02	Additional site assessment	—	9/20/02	WPI	Data obtained during assessment indicate residual hydrocarbons are present in the soil primarily at 25 and 30 feet and are relatively immobile. Permeability analyses of soil samples ($1.42x10^{-7}$ to 5.70^{-7} cm/s) indicate high-vac dual-phase extraction (DPE) may be a viable remedial alternative. Therefore, a DPE test using one DPE well and two nested observation wells was proposed.
1/9/03	Agency response	—	—	CRWQCB-LA	CRWQCB-LA response to the WPI work plan, dated 9/20/02, requested a plot plan indicating position of DPE test wells.
2/13/03	Addendum to work plan	—	2/13/03	WPI	Submitted plot plan for review to the CRWQCB-LA.
3/11/03	Approval of work plan			CRWQCB-LA	Approved well locations.
3/03	DPE well installation	—	3/31/03	WPI	One dual-phase extraction well and two nested vacuum monitoring wells were installed for use during a high vacuum dual-phase extraction test.
4/18/03	DPE test	—	—	WPI	Conducted DPE test.
5/21/03	Remedial action plan (RAP)	—	5/21/03	WPI	Submitted remedial action plan documenting results of DPE test and proposing excavation with a drill rig, addition of oxygen release compound® (ORC) to the subsurface, and monitored natural attenuation.
6/13/03	Meeting at the CRWQCB-LA	—	—	Various	Representatives of the CRWQCB-LA, the property owner, SHELL, and WPI met to discuss site development and implementation of the RAP.
6/19/03	Addendum to remedial action plan	—	6/19/03	WPI	Addendum addressed installation of nine additional groundwater monitoring wells to be installed as well as the requirement for a waste discharge permit prior to addition of ORC to the subsurface.
2/04 through 3/04	Well abandonment	Wells MW-1 through MW-10 and MW-19, and D-1, V-1, and V-2	4/07/04	WPI	Abandoned wells to allow for site development. ORC was placed from 40 to 25 feet in the boreholes for Wells MW-1, MW-2, MW-6, MW-7, MW-8, and MW-19.
3/04	Remedial excavation	—	4/07/04	WPI	Soil in the vicinity of Wells MW-4, MW-5, MW-9, and MW-10 was excavated to a depth of approximately 35 feet. ORC was mixed into the cement slurry backfill from 24 to 35 feet along eastern edge of excavated area.
6/04	Soil Vapor Survey	—	6/15/04	WPI	Soil vapor samples collected at 2 and 7 feet. All samples were ND for petroleum constituents.
11/06	Additional Site Assessment	4 groundwater monitoring wells (MW-20 through MW-23)	2/28/07	WPI	The highest concentrations of TPH-G and benzene in soil were detected between 20 and 30 feet. TPH-G, benzene, MTBE, and TBA were detected in groundwater.

Date	Activity/Method	No. of Wells, Borings or Samples	Report Date	Consultant	Comments
7/07	UST Removal and Over Excavation	9 soil samples collected	7/11/07	WPI	On April 16, 2007, WPI removed one 200-gallon UST, which was located during site redevelopment activities. Based on analytical data collected on April 16, over excavation activities were conducted on April 23 and 26, 2007. Petroleum hydrocarbon-impacted soil was removed to a depth of approximately 12 feet.
3/10	Additional Site Assessment Work Plan	—	3/29/10	WPI	WPI proposed two CPT borings and hydropunch samples to define benzene in groundwater east of MW-11.
01/11	Work Plan Addendum for Additional Site Assessment		01/12/11	WPI	Revised the work plan proposing using a drill rig due to safety concerns.
04/11	Remedial Action Plan	—	04/11/11	WPI	Data indicate that dual-phase extraction, groundwater pump and treat, air sparging or ISCO are not feasible for treatment of residual hydrocarbons in groundwater off-site. Proposed a hydrogen peroxide injection test to determine whether it is a viable alternative to reduce hydrocarbon concentrations in the groundwater offsite.
12/11	Site Assessment	2 GW Wells (MW-24 and MW-25)	04/11/12	WPI	Data indicate that the extent of benzene in the soil has been defined and that the lateral extent of benzene in groundwater east of the Site has been defined.
9/13	Work Plan for Vapor Risk Assessment	—	09/13/13	WPI	Review of analytical data indicated that benzene concentrations in groundwater samples from well MW-11 on the property immediately east of the site have consistently been >10,000 since February 2005. WPI proposed to install eight vapor probes to collect data to evaluate vapor intrusion risk.
11/13	Soil Vapor Risk Analyses	Vapor Probes (VP-1 through VP-8)	01/16/14	WPI	Soil vapor sampling was conducted and analyzed in regard to vapor intrusion risk. Data indicate the cumulative calculated incremental cancer risk did not exceed the DTSC point of departure value of $1x10^{-6}$. Therefore, no further vapor intrusion investigation or evaluations are warranted at this time.
12/14	Request for Site Closure	—	12/15/14	WPI	Data indicate that residual hydrocarbons do not pose a potential threat to human health and safety or to the environment and the site conditions meet the Low Threat Closure Policy guidelines. WPI recommended the CRWQCB-LA consider the Site eligible for low threat closure. Site closure was requested.

Date	Activity/Method	No. of Wells, Borings or Samples	Report Date	Consultant	Comments
8/15	Agency Correspondence	—	8/17/15	—	The CRWQCB-LA denied the request for case closure.
11/15	Request for Reduced Groundwater Well Array and Sampling	—	11/19/15		WPI requested that the well array be reduced during semi-annual sampling, that wells MW-11, MW-12, and MW-13 be sampled quarterly to assess trends, and that ethanol and naphthalene no longer be required analytes.
12/15	Agency Correspondence	—	12/2/15	—	The CRWQCB-LA approved the well array reduction request, and a request to conduct sampling on a quarterly basis to assess trends at select wells.
4/16	Request for Reduction in Groundwater Sampling Frequency	—	4/22/16	WPI	WPI requested cessation of quarterly sampling at wells MW-11, MW-12, and MW-13, and revert back to semi-annual sampling only.
5/16	Agency Correspondence	—	5/13/16	—	The CRWQCB-LA approved the well array reduction request to revert back to the semi-annual and annual sampling schedule.
3/17	Groundwater Extraction Event Work Plan	—	3/17/17	WPI	WPI proposed to conduct two groundwater extraction events at well MW-11 to reduce benzene concentrations in groundwater.
3/17	Agency Correspondence		3/29/17	—	The CRWQCB-LA approved the work proposed in the March 17, 2017, work plan.

Underground Storage Tank Program – Directive to Take Corrective Action In Response to Unauthorized Underground Storage Tank Release – Health and Safety Code Section 25296.10 and Title 23, Chapter 16, California Code of Regulations, Section 2720-2727.
Former Shell Service Station – Case Closure Denial
8873 Sunset Boulevard, West Hollywood
(Case No. R-05560); (Priority C-1 Site)

Dear Ms. Wing:

Pursuant to Health and Safety Code section 25296.10, Shell Oil Products Company US (Shell) is required to take corrective action (i.e., Preliminary Site Assessment, Soil and Water Investigation, Corrective Action Plan Implementation, and Verification Monitoring) to ensure protection of human health, safety and the environment. Corrective action requirements are set forth in California Code of Regulations (CCR), title 23, Chapter 16, sections 2720 through 2727.

We have reviewed the "Second Quarter 2015 Groundwater Monitoring and Status Report (Monitoring Report)" dated July 10, 2015 and the "Request for Site Closure" dated December 19, 2014, prepared by your consultant Wayne Perry, Inc. (WPI) for the subject site. We have also reviewed other technical reports contained in our case file. WPI recommended closure under the Low Threat Underground Storage Tank (UST) Case Closure Policy (LTCP). Regional Board staff has evaluated the closure request and have the following comments with requirements addressed below.

Site Background

The subject site is a former Shell service station that historically contained eight gasoline underground storage tanks (USTs), one waste oil tank, two dispenser islands, and a station building with two service bays. The USTs were removed in 1962 and 1988. In 2007, one additional waste oil tank was removed. Currently, the site is redeveloped into a retail facility with above ground parking. Residential apartments and commercial properties are located north and east of the site.

Soil - Several site investigations conducted between 1985 and 2013 indicated the maximum concentrations of total petroleum hydrocarbons as gasoline (TPH_G) up to 6,500 milligrams per kilogram (mg/kg), 1,200 mg/kg total petroleum hydrocarbons as diesel (TPH_D), 4,100 mg/kg total recoverable petroleum hydrocarbons (TRPH), 105 mg/kg benzene, 224 mg/kg ethylbenzene, 5.3 mg/kg MTBE, and 0.16 mg/kg tertiary butyl alcohol (TBA) in the soil.

Free product - Free product (up to 2.88 feet) was observed in monitoring wells MW-2, MW-4, MW-5, MW-6; and MW-9 through MW-12 in 1985. Free product was last observed in 2002. Approximately 1,616.7 gallons of free product has been removed.

Groundwater - Fifteen groundwater monitoring wells (MW-11 through MW-25) are associated with the site. Groundwater monitoring was initiated in 1992. Monitoring wells MW-1 through MW-10 were abandoned in 2004 to allow for site redevelopment. Historically, the maximum concentrations of 5,800,000 micrograms per liter (µg/L) TPH_G, 37,000 µg/L benzene, 20 µg/L MTBE, and 450 µg/L TBA were detected in the groundwater. The most recent sampling data (April 2015) indicated the maximum concentrations detected in the groundwater were 11,000 µg/L TPH_G, 2,500 µg/L benzene, 16 µg/L MTBE, and 360 µg/L TBA. Depth to groundwater was measured at approximately 28 to 45 feet below ground surface (bgs). Groundwater flow direction varies toward the east to south-southeast.

Remediation - Between 1988 and 1989, approximately 277 tons of impacted soil was excavated during station demolition and USTs/dispenser removal activities. In 2004, an additional 1,845 tons of soil was excavated to a depth of 35 feet in the eastern area of the site. Oxygen releasing compounds were mixed into the slurry used as backfill. In 1993, a soil vapor extraction (SVE) test was deemed ineffective due to low soil permeability. In 2003, dual-phase extraction was deemed ineffective. Between 1994 and 2002, groundwater extraction events (GT), removed approximately 2.4 million gallons of groundwater. The GT system was shut down in 2002.

Waste Discharge Requirements (WDR) - In September 2011, Regional Board approved a remedial action plan (RAP) for hydrogen peroxide injection to reduce residual petroleum hydrocarbons in the groundwater. In December 2011, a General WDR permit application was submitted to the Regional Board. However, due to city complaints from adjacent tenants regarding parking restrictions, the property owners would not sign the access agreements to drill injection wells on their property. To date, the WDR permit application has not been processed.

Soil Vapor Investigation (SVI) - In November 2013, WPI conducted a SVI near the offsite eastern residential properties. Soil vapor samples detected benzene up to 3.8 $\mu g/m^3$ and ethylbenzene up to 4.5 $\mu g/m^3$ at 5 feet bgs. Naphthalene was not detected. Soil matrix samples were not collected. However, previous soil samples collected in 2002 and 2003 indicated non-detect concentrations of TPH_G at a depth of 5 feet bgs. Oxygen levels were 20 to 21%. The soil gas concentrations did not exceed the soil gas criteria (with Bioattenuation Zone Oxygen ≥ 4%), and the TPH_G criteria (<100 mg/kg at 5 feet bgs) under Scenario 4 - Direct Measurement of Soil Gas Concentrations of the LTCP. The soil vapor results were used to conduct a human health risk assessment. WPI concluded that the incremental lifetime cancer risk (6×10^{-9}) was below the generally accepted risk threshold level of 1×10^{-6} and the hazard index (7×10^{-5}) was below the target value of 1 for residential receptors. In August 2015, the Underground Storage Tank Cleanup Fund concurred that the site meets the Vapor Intrusion to Indoor Air criteria of the LTCP.

Low-Threat Closure Review

Regional Board staff has evaluated the closure request and has determined that the site does not meet all of the required criteria of the LTCP. Therefore, closure cannot be granted for the subject site at this time for the following reasons:

- The case does not meet the LTCP for the Groundwater-specific Criteria (2): Although the most recent groundwater monitoring results indicate benzene concentrations in the groundwater has significantly reduced (from 17,000 µg/L in October 2014 to the current 2,500 µg/L), additional monitoring is necessary to establish a stable and declining trend. Therefore, the Conceptual Site Model is not complete before we consider the site for closure.

Groundwater Monitoring Program (Per CCR, Title 23, §2727)

Shell is required to continue a semi-annual groundwater monitoring program to monitor plume stability and comply with the following requirements:

1. All existing and new groundwater monitoring wells related to the site must be sampled.

2. Groundwater monitoring reports must be submitted according to the following schedule, with the next semi-annual monitoring report due by **January 15, 2016**:

Reporting Period	Sampling Period	Report Due Date
January – June	April – June	July 15th
July – December	October – December	January 15th

3. Groundwater samples must be analyzed by Cal-LUFT GC/FID or Cal-LUFT GC/MS Method for TPH_G, total petroleum hydrocarbons as diesel (TPH_D) when diesel is identified at the site; and by EPA Method 8260B for benzene, toluene, ethylbenzene and xylenes (BTEX), naphthalene, and fuel oxygenate compounds including MTBE, di-isopropyl ether (DIPE), ethyl tertiary butyl ether (ETBE), tertiary amyl methyl ether (TAME), and TBA. Ethanol is also required and shall be analyzed by either method above. The analytical detection limits must conform to the Regional Board General Laboratory Testing Requirements (9/06) (http://www.waterboards.ca.gov/losangeles/publications_forms/forms/lust/lab_forms/labreq9-06.pdf). All respective analytical methods must be certified by the California Environmental Laboratory Accreditation Program (ELAP). All analytical data must be reported by a California-certified laboratory.

4. Since the site has a history of a waste oil tank, prior to case closure the full suite of aromatic and chlorinated organic compounds must be analyzed and reported per EPA Method 8260B.

General Requirements

1. Shell is required to obtain all necessary permits must be obtained from the appropriate agencies prior to the start of work.

2. The contractor who conducts the environmental work as required in this directive letter shall, at all times, comply with all applicable State laws, rules, regulations, and local ordinances specifically, including but not limited to, environmental, procurement and safety

laws, rules, regulations, and ordinances. The contractor shall obtain the services of a Professional Geologist or Engineer, Civil (PG/PE-Civil) to comply with the applicable requirements of the Business and Professions Code, sections 7800 et seq. implementing regulations for geological or engineering analysis and interpretation for this case. All documents prepared for others by the contractor that reflect or rely upon geological or engineering interpretations by the contractor shall be signed or stamped by the PG/PE-Civil indicating her/his responsibility for them as required by the Business and Professions Code.

3. Prior to commencing any field work, you must provide Regional Board staff a minimum of **10 days** advance notice so that one of our staff may be present.

4. Effective November 1, 2011, the Regional Board implemented a Paperless Office system. For all parties who upload electronic documents to the GeoTracker database, it is no longer necessary to email a copy of these documents to losangeles@waterboards.ca.gov or submit hard copies to our office. The Regional Board will no longer accept documents (submitted by either hard copy or email) already uploaded to GeoTracker.

Pursuant to section 25299(d) of the Health and Safety Code, any person who violates any corrective action requirement established by, or issued pursuant to, section 25296.10 is liable for a civil penalty of not more than ten thousand dollars, ($10,000) for each underground storage tank for each day of violation. A civil penalty may be imposed by civil action pursuant to section 25299(d)(2) or imposed administratively by the Regional Board pursuant to Water Code sections 13323 through 13328.

If you have any questions regarding this matter, please call Ms. Chandra Tyler at (213) 576-6782 or email her at cetyler@waterboards.ca.gov.

Sincerely,

Samuel Unger

Waste manifest document: **N/A**	Volume of soil disposal/mass removal: 1. **145 POUNDS** 2. **860 POUNDS** 3. **889 POUNDS TOTAL: APPROXIMATELY 1,894 POUNDS**

VII. GROUNDWATER REMEDIATION

Method: 1. **FREE PRODUCT BAILING** 2. **HVDPE PILOT TEST**	Duration of remediation: 1. **SEPTEMBER 1985 THROUGH AUGUST 2009** 2. **DECEMBER 2002**
	Mass removal: 1. **360 GALLONS OF FREE PRODUCT** 2. **2,410 GALLONS OF GROUNDWATER**

VIII. COMMENTS AND JUSTIFICATION FOR RECOMMENDED ACTION

SITE HISTORY:

The site is ARCO Station No. 5122 located at 8906 Sunset Boulevard in the City of Los Angeles. The site is an active fuel dispensing facility containing three 12,000-gallon gasoline underground storage tanks; two dispenser islands, and a mini-mart. The site is located in a mixed residential and commercial area. (See Figure 1)

This case was referred to the Regional Board on April 15, 1985, by the City of Los Angeles Fire Department.

DATA SUMMARY:

Between August 1985 and March 1987, thirteen monitoring wells (1 through 4 and E-1 through E-9) were installed. The maximum depth sampled was 39.0 feet bgs. The maximum TPH_G concentration reported in the soil was 105 mg/kg in well 3 at 5.0 feet bgs. All soil samples reported non-detect concentrations for benzene. Soil samples were not analyzed for MTBE or TBA. (See Figure 2: Table 1)

Between February 1988 and March 1988, five underground storage tanks (one 500-gallon waste-oil, two 4,000-gallon and two 6,000-gallon gasoline) were removed. Ten soil samples (T-1A, T-1B, T-2A, T-2B, T-3A, T-3B, T-4A, T-4B, WO-9, and WO-16) were collected. The maximum depth sampled was 16.0 feet bgs. The maximum TPH_G and benzene concentrations reported in the soil were 3,680 mg/kg (TPH_G in T-1A at 13.5 feet bgs) and 61.9 mg/kg (benzene in T-1A at 13.5 ft. bgs). Soil samples were not analyzed for MTBE or TBA. (See Figure 2; Table 1)

In May 1988 and April 1994, two monitoring wells (E-10 and E-11) were installed. The maximum depth sampled was 26.0 feet bgs. The maximum TPH_G and benzene concentrations reported in the soil were 250 mg/kg (TPH_G at 22.0 feet bgs) and 4.1 mg/kg (benzene at 22.0 feet bgs). Soil samples were not analyzed for MTBE or TBA. (See Figure 3: Tables 1)

In August 1999, eight samples (D1 through D8) were collected. The maximum depth sampled was 2.0 feet bgs. The maximum TPH_G, benzene, and MTBE concentrations reported in the soil were 4,800 mg/kg (TPH_G in D2 at 2.0 feet bgs), 11 mg/kg (benzene in D2 at 2.0 feet bgs), and 1.1 mg/kg (MTBE in D4 at 2.0 feet bgs). Soil samples were not analyzed for TBA. (See Figure 3; Table 1)

Between July 2003 and November 2004, three soil borings (SB-1 through SB-3) were drilled and three air-sparge / soil vapor extraction wells (AS/SVE-1 through AS/SVE-3) and four monitoring wells (E-12 through E-15) were installed. The maximum depth sampled was 45.0 feet bgs. The maximum TPH_G, benzene, MTBE, and TBA concentrations reported in the soil were 810 mg/kg (TPH_G in AS-3 at 25.0 feet bgs), 4.2 mg/kg (benzene in AS-1 at 25.0 feet bgs), 3.8 mg/kg (MTBE in AS-2 at 20.0 feet bgs), and 3.2 mg/kg (TBA in SB-1 at 25.0 feet bgs). (See Figure 3; Table 1)

There are nine groundwater monitoring wells (1, 2, E-5 through E-11) associated with this site. The depth to groundwater ranges from approximately 12.37 feet to 31.37 feet bgs. The groundwater flow direction is towards the southeast. Groundwater monitoring began in September 1986 (Third Quarter 1986) and continued through July 2014 (Third Quarter 2014). Historically, the maximum TPH_G, benzene, MTBE, and TBA concentrations reported in the groundwater were 160,000 µg/L (TPH_G), 14,000 µg/L (benzene), 500,000 µg/L (MTBE), and 86,000 µg/L (TBA). Currently, the maximum TPH_G, benzene, MTBE, and TBA concentrations reported in the groundwater are 6,200 µg/L (TPH_G), 145 µg/L (benzene), 354 µg/L (MTBE), and 50,600 µg/L (TBA). (See Figures 4, 5, 6, 7, 8, & 9; Tables 2 & 3)

Site remediation consisted of free product bailing, soil vapor extraction / air-sparging, and multiple high vacuum dual-phase extraction pilot tests resulting in the removal of approximately 360 gallons of free product, 1,894 pounds of vapor phase, and 2,410 gallons of dissolved phase groundwater from beneath the site. (Tables 4, 5, & 6)

There is no school within 1,000.0 feet of the site.

The nearest production well is located approximately 3,511 feet from the site.

LOW THREAT UST CLOSURE POLICY CRITERIA EVALUATION:

General Criteria: The site meets all General Criteria components of the Low-Threat Closure Policy.

a. The water purveyor within the area of the site is the City of Beverly Hills;
b. The site is an active fuel dispensing facility (petroleum only);
c. The leaking underground storage tanks were removed in February 1998;
d. Free product was last detected in August 2009;
e. A site conceptual model was developed;
f. Site remediation consisted of free product bailing, soil vapor extraction / air-sparging, and multiple high vacuum dual-phase extraction pilot tests resulting in the removal of approximately 360 gallons of free product, 1,894 pounds of vapor phase, and 2,410 gallons of dissolved phase;
g. Soil and groundwater samples were tested for MTBE; and
h. The site does not create a nuisance.

Groundwater: The site meets Class 2 of the Low-Threat Closure Policy.

a. The length of the contaminant plume is approximately 130.0 feet (less than 250.0 feet);
b. Free product was last detected in August 2009;
c. The nearest supply is more than 1,000.0 feet from the edge of the plume (approximately 3,000.0 feet);
d. The current maximum benzene concentration reported in the groundwater is 145 µg/L (less than 3,000 µg/L); and
e. The current maximum MTBE concentration reported in the groundwater is 354 µg/L (less than 1,000 µg/L).

Vapor Intrusion To Indoor Air: This section of the Low-Threat Closure Policy is not applicable.

a. The site is an active fuel dispensing facility.

Direct Contact And Outdoor Air Exposure: Soil concentrations do not exceed Table 1 of the Low-Threat Closure Policy.

a. Soil samples were not collected at 5.0 feet or 10.0 feet bgs during the most recent sampling event (November 2004);
b. All soil samples reported non-detect concentrations for benzene and ethylbenzene at 15.0 feet bgs;
c. Soil samples were not analyzed for naphthalene; and
d. The site is paved; the risk for direct contact exposure is low.

Site Name/Address: **ARCO STATION NO. 5122** **8906 SUNSET BOULEVARD, LOS ANGELES, CASE NO. 900690107**	Staff Initial: **DP**

FACTORS SUPPORTING LOW RISK CLOSURE:

1. The extent of the soil and groundwater contamination has been adequately defined.
2. The source of the contamination has been removed to the extent practicable.
3. Historically, the maximum TPH_G, benzene, MTBE, and TBA concentrations reported in the groundwater were 160,000 µg/L (TPH_G), 14,000 µg/L (benzene), 500,000 µg/L (MTBE), and 86,000 µg/L (TBA).
4. Currently, the maximum TPH_G, benzene, MTBE, and TBA concentrations reported in the groundwater are 6,200 µg/L (TPH_G), 145 µg/L (benzene), 354 µg/L (MTBE), and 50,600 µg/L (TBA).
5. Free product was last detected in August 2009.
6. Site remediation consisted of free product bailing, soil vapor extraction / air-sparging, and multiple high vacuum dual-phase extraction pilot tests resulting in the removal of approximately 360 gallons of free product, 1,894 pounds of vapor phase, and 2,410 gallons of dissolved phase groundwater from beneath the site.
7. The residual contamination does not pose an unacceptable risk.
8. Active remediation has reduced contaminant concentrations such that current concentrations are several orders of magnitude less than their reported historical highs; TPH_G concentrations have reduced from 160,000 µg/L (February 2002) to 6,200 µg/L, benzene concentrations from 14,000 µg/L (August 2002) to 145 µg/L, and MTBE concentrations from 500,000 µg/L (February 2002) to 354 µg/L.
9. TBA concentrations remain elevated but are limited to two onsite wells.
10. Current TBA concentrations (50,600 µg/L) are similar in magnitude to the historical high of 86,000 µg/L (August 2002).
11. Down-gradient and perimeter wells reported low to non-detect TBA concentrations suggesting that the plume is well delineated, limited in area, stable, decreasing, and is expected to further attenuate.
12. There is no school within one-thousand feet of the site.
13. Case closure is consistent with the Low-Threat Closure Policy.
14. Additional soil and/or groundwater characterization, monitoring, and/or remediation are not required.

IX. MTBE FATE & TRANSPORT PLUME LENGTH MODELING ANALYSIS

The MTBE Plume Length Model is not needed because the plume is delineated with monitoring wells reporting non-detect concentrations.

X. ELECTRONIC DELIVERABLE FORMAT (EDF) SUBMISSION

Has electronic data reporting requirement been met? **YES**

- TPH = Total petroleum hydrocarbons.
- BTEX = benzene, toluene, ethylbenzene, and xylenes, respectively. MTBE = methyl tertiary butyl ether.
- Respective MCLs (ppm): B = 0.001, T = 0.15, E = 0.7, X = 1.75, MTBE = 0.013.
- BTEX screening concentrations determined per the attenuation factor method as described in RWQCB Guidance for VOC Impacted Sites (March 1996), with a natural degradation factor of 11 for BTEX and of 3 for MTBE. Table values can be linearly interpolated between distances above groundwater and are proportional to fraction of each lithological thickness.
- Values in Table 4-1 are for soils above drinking water aquifers. All groundwater is considered as drinking water resources unless exempted by one of the criteria as defined under SWRCB Resolution 88-63 (TDS>3000 mg/L, or deliverability <200 gal/day, or existing contamination that cannot be reasonably treated). Regional Board staff will make a determination of potential water use at a particular site considering water quality objectives and beneficial uses. For non-drinking water aquifers, regardless of depth, TPH for ">150 feet" category in the table should be used;
- Distance above groundwater must be measured from the highest anticipated water level. Lithology is based on the USCS scale.
- In areas of naturally-occurring hydrocarbons, Regional Board staff will make determinations on TPH levels.

Notes:

feet bgs = feet below ground surface
TRH = Total recoverable petroleum hydrocarbons; analyzed by EPA Method 418.1.
GRO = Gasoline range petroleum hydrocarbons; analyzed in accordance with EPA Methods 8015 and 8015M. (C_4-C_{12})
MTBE = Methyl tertiary butyl ether
TAME = Tertiary amyl methly ether
ETBE = Ethyl tertiary butyl ether
DIPE = Di-isopropyl ether
TBA = Tertiary butyl alcohol
mg/kg = Milligrams per kilogram
J = Estimated value. Analyte detected at a level les than the Reporting Limit and greater than or equal to the Method Detection Limit
< = Analyte not detected at or above the specified reporting limit.
NA = Not analyzed
(a) = As stated in International Technology Corporation's September 25, 1985 analytical reported in EMCON Associates' October 1985 *Site Assessment*, a value representing "xylenes and ethyl benzene" was report as a single number.
(b) = Collected sample was first analyzed by EPA Method 8021M reporting a concentration of 54 mg/kg then anlyzed by EPA Method 8260B and reported as non detect at or above 0.250 mg/kg.

Notes:

GRO = Gasoline range organics
B = Benzene
T = Toluene
E = Ethylbenzene
X = Total xylenes
MTBE = Methyl tert-butyl ether
TBA = Tert-butyl alcohol
DIPE = Di-isopropyl ether
ETBE = Ethyl tert-butyl ether
TAME = Tert-amyl methyl ether
TOC = Top of casing (surveyed)
DTW = Depth to water
LNAPL = Light non aqueous phase liquid (LPH)
Calc. GW Elev. = Calculated groundwater elevation
ft msl = Feet above mean sea level
µg/L = Micrograms per liter
< = Analyte was not detected above the specified method reporting limit
-- = Not measured or analyzed
ABN = Well abandoned; no sampling performed
DUP = Duplicate
GAU = Well was gauged but not sampled
INACT = Well inaccessible; not sampled
MD = Sampling and gauging performed over multiple days during this event
N = Identity of contaminant uncertain (hydrocarbon pattern atypical of indicated analyte); see lab report
NS = Not sampled
LPH = Liquid phase hydrocarbons; well not sampled due to the presence of LPH
J = Estimated value; below the reporting limit and above the method detection limit
J3 = The associated batch QC was outside the established quality control range for precision
J5 = The sample matrix interferred with the ability to make any accurate determination; spike value is high

Total Pounds of Hydrocarbons Removed during Field Event	**144.58**
Total Pounds Converted to Gallons of Hydrocarbons Removed	**23.78**

Notes:

(scfm) - Standard cubic feet per minute
(ppmv) - Parts per million by volume
(lbs/hr) - Pounds per hour
(lbs) - Pounds
(NS) - Not sampled
(*) - Sample improperly labeled during collection of sample, actual sample collected from wells E-5, E-10, and E-11; not MW-5, MW-10, and MW-11.

Mass Rate = (scfm)* (60 min / 1 hour) * ((reported lab concentration (ppmv)) / 1,000,000) * (100 (lbs/lbs mole)) / (379 (cubic feet/lbs mole))
- Assumes molecular weight of gasoline is 100 lbs / lbs mole
- Pounds of hydrocarbons removed converted to gallons using the equation:
(Pounds of hydrocarbons) / 6.08 = gallons of hydrocarbons.

TOTAL MASS OF HYDROCARBONS REMOVED DURING EVENT									**TOTAL (pounds) =**	862.72																		

Notes:

HVDPE = High vacuum dual phase extraction. Efforts performed with stinger pipe advanced to approximate water table within well casing.
SVE = Soil vapor extraction. Efforts performed with same equipment for HVDPE, without stinger pipe advanced to approximate water table within well casing.
In Hg = Inches of mercury
SCFM = Standard cubic feet per minute
PPMV = Parts per million volumetric
DEG F = Degrees Fahrenheit
HC = Hydrocarbons
lbs/hr = Pounds per hour
VAC = Induced vacuum influence in observation wells, measured in inches of water
DTW = Depth to groundwater, measured in feet
NA = Not available/measured
(A) = Approximate hours of remedial extraction operation
(B) = System flow rates reported from 6/1/04 through 6/3/04 @ 11:00a were assumed inaccurate. As a result, on 6/3/04 the system flowrate meter was replaced.
For calculation purposes, readings collected prior to the 6/4/04 @ 4:00 was utilized for previous readings at that rate or divided by 3 to obtain the single well extraction flow (E-10) efforts.
(C) = Laboratory reported gasoline range total petroleum vapor /and hydrocarbons (C_4 - C_{12}) analyzed by EPA Method 8015M.
(D) = Hydrocarbon mass removed calculated by: M = (V C Mw F1) / (F2 F3), where M = mass of hydrocarbons removed in lbs/hr, V = flow rate in SCFM,
C = Laboratory reported concentration in PPMV collected within approximately 1-hour of data collection, Mw = Molecular weight of TPHg (100 lb/lb mole),
F1 = hours to minutes conversion, F2 = PPMV conversion factor (1 X 10^6), and F3 = Ideal gas molar volume (359 ft^3/lb mol).
For concentrations reported as non detect at or above the laboratory method detection limits (MDLs), a concentration of '0' was used to calculate mass removed.

EBI Consulting
environmental | engineering | due diligence

Jodi Vanneman
Environmental Consultant

SUMMARY OF EXPERIENCE

Ms. Vanneman's expertise is knowledge and application of environmental regulations pertaining to both the environment and occupational health and safety.

Facilities audited for environmental and health and safety compliance by Ms. Vanneman include foundries, cabling operations, extrusion/molding operations, aerospace, commercial printing, food preparation/packaging, metal plating/etching, automotive, painting, woodworking, biomedical, concrete mixing/molding, and other various commercial and industrial facilities. Ms. Vanneman has also conducted numerous facility dismantling/decontamination projects.

To assist the financial community, Ms. Vanneman has performed and/or managed over 1,000 Phase I, II and III Environmental Site Assessments/Remediation including several types of properties not limited to industrial, commercial residential, and agricultural. These projects range from single-property transactions to multi-site portfolios. Environmental issues addressed include radon, EMR, asbestos, lead, wetlands, third-party hydrocarbon contamination, and previous on-site contaminants.

EDUCATION

BA Biology, Hastings College, Hastings, NE.

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Registered environmental assessor, R.E.A. #05291
EPA approved lead inspectors course
Lead risk assessment course
40-hour radiation safety in radiography
Calepa/EPA sponsored risk assessment courses
Certified AHERA building inspector
Certified AHERA management planner
Certified AHERA contractor/supervisor/competent person
Cal/OSHA certified asbestos consultant

EBI Consulting
environmental | engineering | due diligence

Michele R. Perkins
Program Manager
Denver, CO 80401
Office/Mobile: 720.281.3655

Summary of Experience

Ms. Perkins is a Senior Scientist at EBI Consulting with over 15 years of experience in the environmental consulting industry. Ms. Perkins specializes in phase I environmental site assessments (ESAS), subsurface investigations and remediation activities, national environmental policy act (NEPA) assessments, limited compliance audits. She also completes radon, lead, asbestos, moisture intrusion, and mold sampling assessments.

Relevant Project Experience

Ms. Perkins has performed, managed, and provided review/technical guidance for phase I ESAS on hundreds of properties throughout the United States in conformance with ASTM and/or specific lender or equity requirements. These properties have included multi-family residential, commercial, mining, light industrial, heavy industrial and manufacturing facilities, undeveloped and agricultural tracts, and telecommunication facilities. She has performed limited compliance audits as part of phase I ESAS on industrial and manufacturing properties. Duties included site observations, permit review, interviews, and local, state, and federal regulation review. Ms. Perkins has performed limited asbestos, lead-based paint, mold and moisture intrusion, and radon sampling assessments in conjunction with phase I ESAS. Additionally, Ms. Perkins has prepared sampling reports and operations & maintenance programs, as well as performed oversight for abatement activities.

Ms. Perkins has conducted subsurface investigation and remediation activities on various properties and prepared reports for various clients and state regulatory agencies. Specific duties included the development and implementation of site health and safety plans, the advancement and sampling of soil borings, the installation and development of groundwater monitoring wells, groundwater sampling, groundwater monitoring well abandonment, enhanced fluid recovery oversight, vapor intrusion sampling, and hazardous material/waste characterization and disposal.

Education

B. A. Biology, North Central College, Naperville, Illinois, 2000

Professional Registrations/Certifications

40-Hour OSHA HazMat/HazWaste Site Worker
AHERA Certified Building Inspector
Colorado Certified Asbestos Building Inspector Certificate #13063

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WEST HOLLYWOOD ELEME	970 N HAMMOND ST	WSW 1/8 - 1/4 (0.159 mi.)	H46	64

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

SHELL OIL CO	***8873 SUNSET***	***NNW 0 - 1/8 (0.009 mi.)***	***A2***	***8***

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 9 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

Violation Status: No violations found

FINDS:

Registry ID: 110002697038

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:	0926
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE)
Site History:	The site property consists of one single-story, multi-tenant commercial building and one two-story, multi-use building, located at 8715-8727 Santa Monica Boulevard, in the City of West Hollywood. The property is occupied by several commercial businesses. The subject dry-cleaners were located on the first floor of the two-story building. Since 1983, the site had been occupied by several dry-cleaning businesses. A Phase I Environmental Site Assessment conducted by WEECO in April 1999 reported that the dry-cleaners had been cited for improper chemical handling. Subsequent site investigations revealed the impact of underlying soil and groundwater. The soil impact soil was successfully remediated via a soil vapor extraction system (SVE) from June 2002 to December 2002. Regional Board granted a No-further-action status in October 2003 for the soil. Groundwater monitoring continues to monitor the minor remaining PCE concentrations in one of the groundwater monitoring wells. A final remedy is being evaluated.

CA BOND EXP. PLAN:

Reponsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	This site is being remediated by the RPs with oversight by the RWQCB. Consequently, there are no plans to spend Bond funds for this site at this time.
Site Description:	Sunlin, Inc., operates the Santa Palm Car Wash. The facility sold unleaded gasoline which was stored in underground tanks.
Hazardous Waste Desc:	Beginning in March, 1985, complaints of strong gasoline odors were received from residents in the vicinity. Unleaded gasoline has been identified on the surface of the ground water beneath the car wash and downgradient. Gasoline contains benzene, ethyl benzene, xylene, and toluene.

WEST HOLLYWOOD/SUNLIN, INC./SANTA PALM CAR WASH (Continued) **S100833481**

Threat To Public Health & Env: A plume of gasoline contamination exists in an elongated 900 foot northwest-southeast direction. The contamination is found in the soil and ground water. Ongoing air monitoring now shows no elevated hydrocarbons in residences. Three ground water treatment systems are currently online and were designed to further reduce contaminant levels in the ground water.

Site Activity Status: The Regional Water Quality Control Board is the lead agency for ongoing ground water remedial activities to recover free product and contaminated ground water. In June, 1985, the Department made a determination of imminent or substantial endangerment and a RAO ordered the potentially responsible parties (PRPs) to initiate immediate interim remedial measures. The PRPs have three ground water treatment systems online. The dates for the systems' initiation are: June 19, 1985, January 27, 1986, andAugust 25, 1986. A fourth system should be online November, 1988.

Land type:	Private
Classification:	Large Quantity Generator
Description:	Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Owner/Operator Summary:

Owner/operator name:	CEDARS SIANI MEDICAL CENTER
Owner/operator address:	BEVERLY BLVD. LOS ANGELES, CA 90048
Owner/operator country:	US
Owner/operator telephone:	310-423-4336
Owner/operator email:	Not reported
Owner/operator fax:	Not reported
Owner/operator extension:	Not reported

CEDARS SINAI MEDICAL CENTER (Continued) **1000156119**

Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 01/01/1976
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): Yes
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: No

Waste type: Lamps
Accumulated waste on-site: Yes
Generated waste on-site: No

Waste type: Thermostats
Accumulated waste on-site: Yes
Generated waste on-site: No

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

CEDARS SINAI MEDICAL CENTER (Continued) **1000156119**

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 90924

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 2166

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Amount (Lbs): 2346

Waste code: D038
Waste name: PYRIDINE
Amount (Lbs): 200

CEDARS SINAI MEDICAL CENTER (Continued) **1000156119**

Waste code:	F001
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	290
Waste code:	F002
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	490
Waste code:	F003
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	3740
Waste code:	F005
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	200
Waste code:	P030
Waste name:	CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
Amount (Lbs):	15
Waste code:	P087
Waste name:	OSMIUM OXIDE OSO4, (T-4)-
Amount (Lbs):	13
Waste code:	P105
Waste name:	SODIUM AZIDE
Amount (Lbs):	7

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

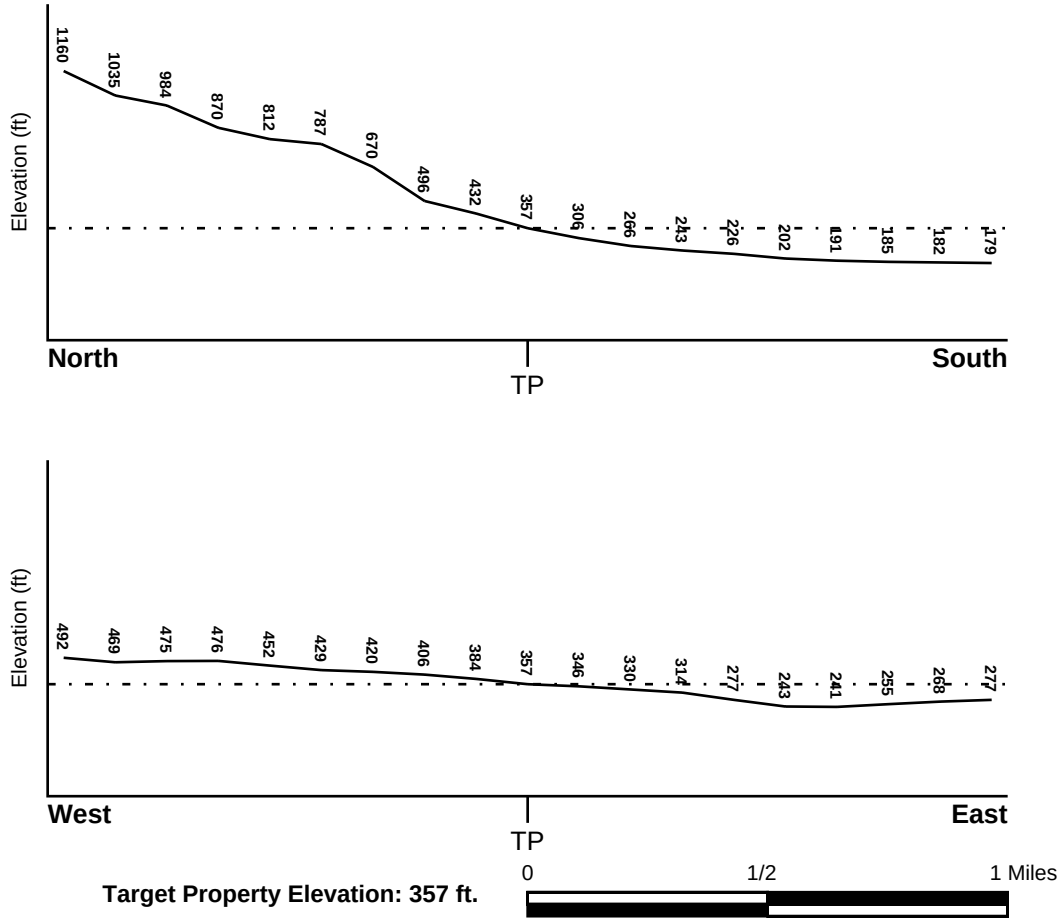

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1585F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BEVERLY HILLS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

This material is proprietary and the subject of copyright protection and other intellectual property rights owned by or licensed to Tele Atlas North America, Inc. The use of this material is subject to the terms of a license agreement. You will be held liable for any unauthorized copying or disclosure of this material.

This Report contains certain products owned by or licensed by Tele Atlas North America, Inc. ("TANA") and licensed to EDR pursuant to an agreement between EDR and TANA (the "TANA Agreement"). Such products include the Dynamap® /2000 (commencing with the most current version, nationwide coverage, ArcInfo™ format, tiled by county, with semi−annual Updates) and are referred to in this Report as the "Licensed Products".

The use of the Licensed Products with a non−TANA map may result in increased variance between the location displayed on the map and ground truth location.

The recipient of the Report (hereinafter referred to as an "End User") shall use such Report solely for its internal purposes and not for resale.

U.S. GOVERNMENT RIGHTS. If End User is an agency, department, or other entity of the United States Government, or funded in whole or in part by the United States Government, then use, duplication, reproduction, release, modification, disclosure or transfer of this commercial product and accompanying documentation, is restricted in accordance with the LIMITED or RESTRICTED rights as described in DFARS 252.227−7014(a)(1) (JUN 1995) (DOD commercial computer software definition), DFARS 227.7202−1 (DOD policy on commercial computer software), FAR 52.227−19 (JUN 1987) (commercial computer software clause for civilian agencies), DFARS 252.227−7015 (NOV 1995) (DOD technical data − commercial items clause); FAR 52.227−14 Alternates I, II, and III (JUN 1987) (civilian agency technical data and noncommercial computer software clause); and/or FAR 12.211 and FAR 12.212 (commercial item acquisitions), as applicable. In case of conflict between any of the FAR and DFARS provisions listed herein, the construction that provides greater limitations on the Government's rights shall control. Contractor/manufacturer is Tele Atlas North America, Inc., 11 Lafayette Street, Lebanon, NH 03766−1445. Phone: 603.643. 0330. The Licensed Products are ©1984−2008 by Tele Atlas North America, Inc. ALL RIGHTS RESERVED. For purpose of any public disclosure provision under any federal, state or local law, it is agreed that the Licensed Products are a trade secret and a proprietary commercial product and not subject to disclosure.

If End User is an agency, department, or other entity of any State government, the United States Government or any other public entity or funded in whole or in part by the United States Government, such End User agrees to protect the Licensed Products from public disclosure and to consider the Licensed Products exempt from any statute, law, regulation, or code, including any Sunshine Act, Public Records Act, Freedom of Information Act, or equivalent, which permits public access and/or reproduction or use of the Licensed Products. In the event that such exemption is challenged under any such laws, any and all right to retain any copies or to use of the Licensed Products shall be terminated and considered immediately null and void. Any copies of the Licensed Products held by End User shall immediately be destroyed. If any court of competent jurisdiction considers this clause void and unenforceable, in whole or in part, for any reason, then all Licensed Products previously delivered to End User will be destroyed.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RE: Phase I Environmental Site Assessment
8850-8878 Sunset Boulevard
West Hollywood, Los Angeles County, California 90069

UES Consulting Services is pleased to submit the enclosed Phase I Environmental Site Assessment performed on the above-referenced subject property.

This assessment was conducted in accordance with the American Standards for Testing and Materials (ASTM) Practice E1527-13. The results of the assessment were based upon historical documentation and observations made on the subject property at the time of the on-site inspection.

Thank you for the opportunity to be of service. Should you have any questions, please feel free to contact our office.

Sincerely,

UES CONSULTING SERVICES, INC.

SUMMARY OF FINDINGS

SUBJECT PROPERTY

CURRENT CONDITIONS	
Date of Inspection	June 20, 2017
Property location	8850-8878 Sunset Boulevard West Hollywood, Los Angeles County, California 90069
Description of improvements	The subject property includes three 1- and 2-story brick, wood, and stucco multi-tenant retail buildings with basements. The buildings were constructed between 1921 and 1958, and contain approximately 13,554 total square feet. Parking lots are located on the south side of the subject property.
Land Size	0.85 acres
Current tenant(s)	various retail tenants (listed in Section 3.4)
Water wells	none
Septic systems	none
Hazardous materials	typical maintenance supplies
Hazardous waste	none
Underground storage tanks	none
Above-ground storage tanks	none
Drums	one (1) used cooking oil drum, two (2) empty drums
Suspect PCB equipment	none
Monitoring wells	five (5) monitoring wells (see database listings summary below)
Other environmental items	none

HISTORICAL RESEARCH
The current buildings have been occupied by various retail tenants and restaurants since construction (see Section 5.1 for detailed list of past tenants). Prior to the current improvements, the subject property included residential development and vacant land.

DATABASE LISTINGS
The subject property is not registered on any federal or state databases.

ADJACENT PROPERTIES

DIRECTION	CURRENT USES	PAST USES
NORTH	Restaurants, furniture store, tattoo shop, pet grooming, cigar store, audio equipment sales, psychic reader	Vacant land, residential development, gas station, various retail tenants
EAST	Bank, restaurant, apartment building	Vacant land, multi-tenant retail center/ various retail tenants, residential development
SOUTH	Hotel	Vacant land, residential development
WEST	Gas station, apartment building	Vacant land, residential development

Based upon a visual reconnaissance and a review of available historical records, there was no evidence to suggest that any current or past uses on any of the adjacent properties have impacted the subject property.

DATABASE LISTINGS/ADJACENT PROPERTIES AND SURROUNDING AREA

UNDERGROUND STORAGE TANKS	2	0	0		
ABOVE-GROUND STORAGE TANKS	0	0	0		
HAZARDOUS WASTE GENERATORS	1	0	1		

Former Shell Service Station, previously located adjacent north, is registered as a leaking underground storage tank (LUST) site and historical underground storage tank (UST) site. According to the case file obtained from the California Regional Water Quality Control Board (RWQCB)- Los Angeles Region, a gas station operated at this site for several decades prior to 1988, when it was demolished and two (2) 8,000-gallon gasoline USTs, two (2) 6,000-gallon

gasoline USTs, and one (1) 550-gallon waste oil UST were removed. A petroleum hydrocarbon release impacting soil and groundwater was discovered during a site assessment in June 1985. A total of 2,145 cubic yards of impacted soil were removed from the site between 1988 and 2004, to a maximum depth of 35 feet, and an oxygen release compound (ORC) was placed at the bottoms of the excavations in order to expedite the remediation process. Groundwater extraction and treatment was conducted between 1994 and 2002, which removed 2.4 million gallons of contaminated groundwater. Since 1992, several groundwater monitoring wells have been installed and sampled on the site, on the property to the east, and in the parking lots on the south side of the subject property, where there are currently five (5) monitoring wells. According to the subject property well data, they were installed in 2001 and sampled regularly until April 2016, the date of the most recent available sample results. All contaminants of concern were non-detect, and have historically been non-detect with the exception of some very low contaminant levels detected occasionally during the mid 2000s; no contaminants have ever been detected above state action levels on the subject property. The groundwater contamination plume has been delineated, and groundwater sampling continues to be conducted on a semi-annual basis in order to assess trends and to determine if the contamination is decreasing and not migrating. According to the most recent available monitoring report prepared by Wayne Parry, Inc., dated January 3, 2017, the groundwater contamination plume with concentrations remaining above the target water quality objectives is located on the east side of the former gas station property and has also migrated onto the properties adjacent east of the former gas station. It appears that this site is nearing closure, has not adversely impacted the subject property, and will not likely impact the subject property in the future based on the available information. Therefore, it does not represent a recognized environmental condition. In addition, based on the results of a soil vapor risk analysis performed in 2014 concluding that vapor intrusion is not an issue for this site, and because there is no soil or groundwater contamination present on the subject property, a vapor encroachment condition does not exist for the subject property. The site is currently in the state UST cleanup fund. A copy of the January 2017 monitoring report is included in Appendix D. Shell Oil is also registered as a small quantity hazardous waste generator with no reported violations.

Arco #5211 (Sunset Oil), located adjacent west, is registered as a LUST site and UST site. According to the case file obtained from the Los Angeles RWQCB, a petroleum hydrocarbon release impacting soil and groundwater was discovered during a site assessment in April 1985. In 1988, four (4) gasoline USTs and one (1) waste oil UST were removed. Site remediation activities included free product bailing, installation of an air sparge/soil vapor extraction remediation system, and groundwater monitoring from 1986 to 2014. Based on a review of contamination plume maps, the contamination has not migrated off-site in the direction of the subject property, and this site did not impact the subject property. Monitoring results showed that the contaminant levels had decreased so that they no longer posed a threat to human health, and the site was closed with no further action required on July 7, 2015. Three (3) 12,000-gallon gasoline USTs are currently in use at this site.

Based upon the review of federal and state records, a visual reconnaissance, presumed groundwater flow, distance, and/or geological characteristics in the area, there is no evidence to suggest any of the sites listed in the database report have impacted the subject property.

CONCLUSIONS

UES Consulting Services, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the aforementioned subject property. The purpose of the Phase I Environmental Site Assessment is to ascertain if there are any ***recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, and/or de minimis conditions*** associated with the subject property.

Recognized Environmental Conditions

According to ASTM Practice E1527-13, *recognized environmental conditions* means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to a release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. A release or threatened release of a hazardous substance includes any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping or disposing into the environment (including the abandonment or discarding of barrels, containers and other closed receptacles containing any hazardous substance, pollutant or contaminant).

This assessment has determined there are ***no recognized environmental conditions*** associated with the subject property.

Controlled Recognized Environmental Conditions

According to ASTM Practice E1527-13, *controlled recognized environmental conditions* is defined as *recognized environmental conditions* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

This assessment has determined there are ***no controlled recognized environmental conditions*** associated with the subject property.

Historical Recognized Environmental Conditions

According to ASTM Practice E1527-13, *historical recognized environmental conditions* is a past release of any hazardous substances or petroleum products that has occurred in connection with the property, and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This assessment has determined there are ***no historical recognized environmental conditions*** associated with the subject property.

De Minimis Conditions

According to ASTM Practice E1527-13, *de minimis conditions* are environmental conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions* nor *controlled recognized environmental conditions*.

This assessment has determined there are ***no de minimis conditions*** associated with the subject property.

RECOMMENDATIONS

No further environmental studies are recommended at this time.

There are five (5) monitoring wells currently located in the parking lots on the south side of the subject property; they are associated with the active LUST site adjacent to the north of the subject property (see discussion of the Former Shell Service Station site above). It is recommended that the owner of the subject property continue to cooperate with the Los Angeles RWQCB, including allowing access to the monitoring wells on the subject property, until the LUST site receives closure. The monitoring wells are required to remain undisturbed until the RWQCB determines they can be properly closed/abandoned; well abandonment is the responsibility of the state and/or identified responsible party.

PHASE I

ENVIRONMENTAL SITE ASSESSMENT

1.0 INTRODUCTION

UES Consulting Services, Inc. (UES) was retained by Abady Holdings Corp. (hereafter referred to as Client), to perform a Phase I Environmental Site Assessment (ESA) of the property located at 8850-8878 Sunset Boulevard in West Hollywood, California (subject property). UES performed the ESA in conformance with the provisions of the American Standard for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13, thereby satisfying United States Environmental Protection Agency's "Standards and Practices for All Appropriate Inquiries (AAI); Final Rule" (40 Code of Federal Regulations Part 312) 78 Federal Register 79319 (December 30, 2013).

This report presents the results of a Phase I environmental assessment of the subject property conducted by UES Consulting Services, Inc. The purpose of the Phase I is to identify historical, existing, or potential environmental hazards.

2.0 SCOPE OF WORK

This Phase I environmental assessment has been performed in accordance with the guidelines set forth in the American Standard for Testing and Materials (ASTM) Practice E1527-13. The purpose of the Phase I is to identify any *recognized environmental conditions* associated with the subject property. This is accomplished by an on-site visual inspection of the interior and exterior of the subject property, a visual reconnaissance of the adjacent properties and surrounding area, a regulatory database review, historical records research, and interviews.

The investigation and inclusion of the following environmental items are *NOT* currently required by ASTM Practice E1527-13:

Asbestos	Mold	Industrial Hygiene
Radon	Health and safety	High voltage power lines
Lead-based paint	Ecological resources	Regulatory compliance
Lead in drinking water	Endangered species	Historic site registry
Indoor air quality	Wetlands	

DEVIATIONS FROM ASTM PRACTICE E1527-13

There were no deviations from the scope and limitations of ASTM Practice E1527-13 in this report.

ADDITIONAL SERVICES

There were no additional services performed for this site assessment above the scope and limitations of ASTM Practice E1527-13.

SPECIAL CONTRACTUAL CONDITIONS

There were no special contractual conditions placed on UES Consulting Services in completion of the Phase I assessment.

DATA GAPS

There were no significant data gaps that affected the ability of UES Consulting Services to determine if there were any recognized environmental conditions in connection with the subject property.

3.0 ON-SITE INSPECTION

3.1 DATE OF INSPECTION

The on-site inspection of the subject property was conducted on June 20, 2017. Select tenant spaces and all exterior areas were inspected on the subject property. There were no limitations during the site inspection.

3.2 SITE LOCATION

The subject property is located on the southeast corner of Sunset Boulevard and North San Vicente Boulevard in West Hollywood, California. An area location map is included in Figure 1.

3.3 SITE DESCRIPTION

The subject property includes three 1- and 2-story brick, wood, and stucco multi-tenant retail buildings with basements. The buildings were constructed between 1921 and 1958, and contain approximately 13,554 total square feet. Parking lots are located on the south side of the subject property. The subject property encompasses approximately 0.85 acres.

The legal description of the subject property is included as Appendix A, and photographs of the subject property and adjacent properties are included as Appendix B.

3.4 CURRENT USE

The subject property was occupied by the following retail tenants at the time of the inspection:

Address	Tenant	Description
8850	Terner's Liquor	liquor store
8852	The Viper Room	night club/live music venue
8860	Sun Bee Food & Liquor Mart	convenience store
8860-A	Barcode Barbershop	barber shop
8866	Ta-Ke Sushi	restaurant
8870	Amarone	restaurant
8872	Glen Lerner Injury Attorneys	law firm office
8878	Aahs! The Ultimate Gift Store	gift shop

3.5 WATER WELLS/SOURCE OF POTABLE WATER

Water to the subject property is supplied by Beverly Hills Water and meets all state and federal standards for safe drinking water. There were no water wells observed on the subject property.

3.6 HEATING SOURCE

There are no petroleum fuel sources for heat on the subject property.

3.7 SEPTIC SYSTEMS/SEWAGE DISPOSAL

The subject property is connected to the municipal sewage disposal system. There are no known septic systems located on the subject property.

3.8 HAZARDOUS SUBSTANCES

There were no hazardous substances observed on the subject property during the site inspection other than small quantities of typical household maintenance and cleaning supplies.

3.9 HAZARDOUS WASTE

There was no hazardous waste noted on the subject property during the site inspection.

3.10 PETROLEUM PRODUCTS

There were no petroleum products noted on the subject property during the site inspection.

3.11 STORAGE TANKS

There were no pump islands, vent pipes, or fill ports typically associated with underground storage tanks observed on the subject property during the site inspection. In addition, there are no above-ground storage tanks located on the subject property.

3.12 ODORS

There were no unusual odors detected on the subject property during the site inspection.

3.13 Pools of Liquid

There were no pools of liquid noted on the subject property during the site inspection.

3.14 Drums

A 55-gallon drum containing what appears to be used cooking oil was observed behind the restaurant tenant spaces. In addition, two empty drums were noted nearby.

3.15 Unidentified Substance Containers

There were no unidentified substance containers located on the subject property during the site inspection.

3.16 PCBs

Polychlorinated biphenyls (PCBs) are toxic organic compounds also known as chlorinated hydrocarbons. PCBs were used as insulating liquids in electric transformers, capacitors, and hydraulic fluid from 1929 to 1979. The manufacture, process, distribution in commerce, or use of any PCBs in equipment in concentrations greater than 50 ppm was prohibited after July 2, 1979. The following equipment that commonly contains electrical insulating fluid or hydraulic fluid was noted on the subject property:

Transformers	Type	none
	Location	
	Non-PCB label	
	Signs of damage, leaks, fire

3.17 Interior Stains or Corrosion

There was no staining or corrosion of environmental concern noted on the subject property during the site inspection.

3.18 Interior Drains/Separators/Sump Pumps

Floor drains are located in the restrooms, and kitchen and bar areas on the subject property. There was no staining or odors of environmental concern noted in or around the floor drains. There were no oil/water separators or sump pumps located on the subject property.

3.19 Pits/Ponds/Lagoons

There were no pits, ponds, or lagoons located on the subject property.

3.20 Stained Soil/Pavement

There was no stained soil or pavement observed on the subject property during the site inspection other than minor staining on parking surfaces from vehicles.

3.21 Stressed Vegetation

There was no stressed vegetation of environmental concern detected on the subject property during the site inspection.

3.22 Solid Waste/Land Fill

There was no evidence of land filling, garbage dump, or any significant areas of solid waste disposal observed on the subject property during the site inspection.

3.23 Waste Water

There was no waste water discharge detected on the subject property during the site inspection. In the event of rain, storm water would appear to flow in a south-southeasterly direction.

3.24 Monitoring Wells

There are five (5) monitoring wells currently located in the parking lots on the south side of the subject property; they are associated with the active LUST site adjacent to the north of the subject property (see discussion of the Former Shell Service Station site in the Executive Summary or Section 5.7). It is recommended that the owner of the subject property continue to cooperate with the Los Angeles RWQCB, including allowing access to the

monitoring wells on the subject property, until the LUST site receives closure. The monitoring wells are required to remain undisturbed until the RWQCB determines they can be properly closed/abandoned; well abandonment is the responsibility of the state and/or identified responsible party.

3.25 Petroleum Pipelines

There were no markings or signage designating petroleum pipelines on or adjacent to the subject property.

4.0 INTERVIEWS

Interviews with the current owner of the subject property, and the previous owner of the subject property are required by ASTM Practice E1527-13 if the name and contact information have been provided by the client.

Current and/or previous owners interviewed, and the contents of each interview conducted to obtain information regarding the subject property, are as follows:

Current Owner

Information to contact the owner was not provided by the client.

Previous Owner

Information to contact the previous owner(s) was not provided by the client.

Persons knowledgeable with the subject property, and local, state, and/or federal agencies contacted for information are detailed below:

Los Angeles County Fire Department
Health Hazardous Materials Division
Contacted: June 16, 2017

The fire department has not yet responded to a request for information on the subject property. Any pertinent information obtained later will be forwarded upon receipt.

Ms. Jasmine Chavez
Staff Member, Terner's Liquor/Tenant on Subject Property
Interviewed: June 20, 2017

Ms. Chavez stated that she has been working at the subject property for 11 years. She said she was not aware of any current or former underground storage tanks, dry cleaners, or gas stations located on the subject property.

5.0 HISTORICAL RESEARCH

ASTM Practice E1527-13 requires the review of only as many historical sources necessary, reasonably ascertainable, and likely to be useful to determine prior uses of the subject property back to 1940, or the subject property's first development (whichever is earlier). The following historical documentation was obtained and/or reviewed.

5.1 CITY DIRECTORIES

Historical city directories were reviewed at approximate 5-year intervals (if available) to ascertain if past tenants would pose an environmental concern to the subject property. Listings for the subject property were as follows:

Year of Directory	Listings
1920-1950	None
1951	Residential listing Snyders Melody Room Sunset LA Sunbee Food Mart Sunset LA Reisner Clara Institute Petchers Real Estate Louis Efros painting contr Delmar Dagmar drsmkr Verna Studio of Beauty Morgan Atwill insurance Western Union Telegraph Co Willinger L photgrphr Troc Drug Co

2014	Terners Liquor & Deli Nakamura Corporation Anarone Kitchen and Wine Polastri Partners LLC Hippocampus Store Soundcheck Hollywood Sumerian Retail Inc Safe in Haven Dead Productions

5.2 Fire Insurance Maps

Sanborn fire insurance maps were originally produced for the fire insurance industry and often identified environmental items, such as fuel tanks, and also identified structures that existed on a property at the time the map was produced. The availability of Sanborn fire insurance maps for certain areas is limited or non-existent.

Sanborn fire insurance maps on the subject property were obtained and reviewed. The description the subject property and adjacent properties as viewed on the maps is as follows:

Year of Map	Description	
1910	Subject Property	Shown with residential development
	North	Not shown
	East	Vacant land
	South	Residential development, vacant land
	West	Residential development
1926	Subject Property	Shown with residential development and a portion of the current improvements occupied by a drug store, restaurant, bottling works, and other retail shops
	North	Not shown
	East	Multi-tenant retail center, residential development
	South	Residential development, vacant land
	West	Residential development

1950	SUBJECT PROPERTY	Shown with residential development and the current improvements occupied by a drug store, restaurants, and other retail shops
	NORTH	Gas station, retail shops
	EAST	Multi-tenant retail center, residential development
	SOUTH	Residential development
	WEST	Gas station, residential development
1960	SUBJECT PROPERTY	Not shown
	NORTH	Gas station, retail shops, print shop
	EAST	Not shown
	SOUTH	Not shown
	WEST	Not shown
1969	SUBJECT PROPERTY	Shown with the current improvements occupied by retail shops and a restaurant
	NORTH	Gas station, retail shops, print shop
	EAST	Restaurant, residential development
	SOUTH	Residential development
	WEST	Gas station, apartment building

Copies of the Sanborn fire insurance maps are included in Figure 2.

5.3 AERIAL PHOTOGRAPHY

Aerial photographs of the subject property were obtained and reviewed. The year of the aerial photograph, and a description of the subject property and adjacent properties as viewed on the photographs, are as follows:

YEAR OF PHOTOGRAPH	DESCRIPTION	
1928	SUBJECT PROPERTY	Shown with a portion of the current improvements and residential development
	NORTH	Residential development, vacant land
	EAST	Commercial, residential development
	SOUTH	Residential development
	WEST	Residential development

1938	SUBJECT PROPERTY	Shown with the current improvements and residential development
	NORTH	Commercial development
	EAST	Commercial, residential development
	SOUTH	Residential development
	WEST	Residential development
1948	SUBJECT PROPERTY	Shown with the current improvements and residential development
	NORTH	Commercial development
	EAST	Commercial, residential development
	SOUTH	Residential development
	WEST	Commercial, residential development
1952	SUBJECT PROPERTY	Shown with the current improvements and residential development
	NORTH	Commercial development
	EAST	Commercial, residential development
	SOUTH	Residential development
	WEST	Commercial, residential development
1964	SUBJECT PROPERTY	Shown with the current improvements
	NORTH	Commercial development
	EAST	Commercial, residential development
	SOUTH	Residential development
	WEST	Commercial, residential development
1979	SUBJECT PROPERTY	Shown with the current improvements
	NORTH	Commercial development
	EAST	Commercial, residential development
	SOUTH	Residential development, vacant land
	WEST	Commercial, residential development
1989	SUBJECT PROPERTY	Shown with the current improvements
	NORTH	Commercial development, vacant land
	EAST	Commercial, residential development
	SOUTH	Commercial development
	WEST	Commercial, residential development

1994	SUBJECT PROPERTY	Shown with the current improvements
	NORTH	Commercial development, vacant land
	EAST	Commercial, residential development
	SOUTH	Commercial development
	WEST	Commercial, residential development
2005	SUBJECT PROPERTY	Shown with the current improvements
	NORTH	Commercial development, vacant land
	EAST	Commercial, residential development
	SOUTH	Commercial development
	WEST	Commercial, residential development
2012	SUBJECT PROPERTY	Shown with the current improvements
	NORTH	Commercial development
	EAST	Commercial, residential development
	SOUTH	Commercial development
	WEST	Commercial, residential development

Copies of the aerial photographs are included in Appendix C.

5.4 TOPOGRAPHIC MAP

The U.S.G.S. topographic map of the subject property was reviewed for structures, objects, or items of environmental concern, such as landfills, dumps, tank farms, and petroleum pipelines, on the subject property. A review of the map revealed no items of environmental concern on or adjacent to the subject property. A copy of the topographic map is included in Figure 3.

5.5 CHAIN-OF-TITLE

Recorded land titles are records usually maintained by the county recorder of deeds which detail ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against the subject property. Due to state land trust regulations and laws, land title records will often only provide trust names, bank trust numbers, owners names, or easement holders, and not information concerning previous uses or occupants of the subject property. For these reasons, this report has relied upon other standard historical information sources assumed to be more accurate or informative than recorded land titles.

5.6 Prior Environmental Reports

There were no prior environmental reports provided by the client.

5.7 Agency File Reviews

The subject property was not identified in any regulatory databases.

Former Shell Service Station, previously located adjacent north, is registered as a leaking underground storage tank (LUST) site and historical underground storage tank (UST) site. According to the case file obtained from the California Regional Water Quality Control Board (RWQCB)- Los Angeles Region, a gas station operated at this site for several decades prior to 1988, when it was demolished and two (2) 8,000-gallon gasoline USTs, two (2) 6,000-gallon gasoline USTs, and one (1) 550-gallon waste oil UST were removed. A petroleum hydrocarbon release impacting soil and groundwater was discovered during a site assessment in June 1985. A total of 2,145 cubic yards of impacted soil were removed from the site between 1988 and 2004, to a maximum depth of 35 feet, and an oxygen release compound (ORC) was placed at the bottoms of the excavations in order to expedite the remediation process. Groundwater extraction and treatment was conducted between 1994 and 2002, which removed 2.4 million gallons of contaminated groundwater. Since 1992, several groundwater monitoring wells have been installed and sampled on the site, on the property to the east, and in the parking lots on the south side of the subject property, where there are currently five (5) monitoring wells. According to the subject property well data, they were installed in 2001 and sampled regularly until April 2016, the date of the most recent available sample results. All contaminants of concern were non-detect, and have historically been non-detect with the exception of some very low contaminant levels detected occasionally during the mid 2000s; no contaminants have ever been detected above state action levels on the subject property. The groundwater contamination plume has been delineated, and groundwater sampling continues to be conducted on a semi-annual basis in order to assess trends and to determine if the contamination is decreasing and not migrating. According to the most recent available monitoring report prepared by Wayne Parry, Inc., dated January 3, 2017, the groundwater contamination plume with concentrations remaining above the target water quality objectives is located on the east side of the former gas station property and has also migrated onto the properties adjacent east of the former gas station. It appears that this site is nearing closure, has not adversely impacted the subject property, and will not likely impact the subject property in the future based on the available information. Therefore, it does not represent a recognized environmental condition. In addition, based on the results of a soil vapor risk analysis performed in 2014 concluding that vapor intrusion is not an issue for this site, and because there is no soil or

groundwater contamination present on the subject property, a vapor encroachment condition does not exist for the subject property. The site is currently in the state UST cleanup fund. A copy of the January 2017 monitoring report is included in Appendix D. Shell Oil is also registered as a small quantity hazardous waste generator with no reported violations.

Arco #5211 (Sunset Oil), located adjacent west, is registered as a LUST site and UST site. According to the case file obtained from the Los Angeles RWQCB, a petroleum hydrocarbon release impacting soil and groundwater was discovered during a site assessment in April 1985. In 1988, four (4) gasoline USTs and one (1) waste oil UST were removed. Site remediation activities included free product bailing, installation of an air sparge/soil vapor extraction remediation system, and groundwater monitoring from 1986 to 2014. Based on a review of contamination plume maps, the contamination has not migrated off-site in the direction of the subject property, and this site did not impact the subject property. Monitoring results showed that the contaminant levels had decreased so that they no longer posed a threat to human health, and the site was closed with no further action required on July 7, 2015. Three (3) 12,000-gallon gasoline USTs are currently in use at this site.

5.8 Data Failure

There was no significant historical data failure encountered that prohibited the determination of the history of the subject property.

5.9 Site History Summary

The current buildings have been occupied by various retail tenants and restaurants since construction (see Section 5.1 for detailed list of past tenants). Prior to the current improvements, the subject property included residential development and vacant land. Based on historical records reviewed, there does not appear to be prior uses, tenants, or structures on the subject property that would constitute any recognized environmental conditions.

6.0 USER PROVIDED INFORMATION

In order to meet the required guidelines of ASTM E1527-13, and the EPA's All Appropriate Inquiries (AAI) Rule, certain information is to be provided by the user. The user is defined as the potential purchaser of the property, a potential tenant of the property, an owner of the property, a lender, or a property manager. Mr. Jeremy Dupree provided the following information.

6.1 TITLE RECORDS

The purpose of the title report is to identify environmental liens or activity and use limitations that may be recorded against the subject property.

An environmental lien is a charge or encumbrance upon the title of a property to secure payment of costs, damages, or debts incurred out of response actions, clean-up, or other remediation of hazardous substances or petroleum products on the property.

Activity and use limitations (AULs) are legal or physical restrictions on the use of, or access to, a property to reduce or eliminate potential exposure to hazardous materials in the soil or ground water on a property. AULs may also be in place to prevent activities on the property that could interfere with the effectiveness of a response action put into effect to protect against exposure of hazardous materials in the soil and/or ground water.

Mr. Dupree was not aware of any environmental liens or AULs recorded against the subject property.

6.2 SPECIALIZED KNOWLEDGE

According to ASTM guidelines, specialized knowledge or experience would include the involvement of the user in the same line of business as the current or former occupants of the subject property, or an adjoining property, so that the user would have specialized knowledge of the possible chemicals and/or processes used by the same type of business.

Mr. Dupree stated he has specialized knowledge of the subject property based on having general knowledge of previous uses of parking and retail. No chemicals were used on the subject property to the best of his knowledge.

6.3 COMMONLY KNOWN/REASONABLY ASCERTAINABLE INFORMATION

According to Mr. Dupree, past uses of the subject property included retail and parking. He had no knowledge of any hazardous chemical use or releases, or environmental cleanups at the subject property.

6.4 Valuation Reduction for Environmental Issues

According to Mr. Dupree, the purchase price for the subject property reasonably reflects the fair market value.

6.5 Reason for Requesting Phase I

According to Mr. Dupree, the Phase I was requested due to a purchase and financing of the subject property.

6.6 User Questionnaire

A copy of the user questionnaire is included in Appendix E.

7.0 PHYSICAL SETTING

SOILS	According to the USDA soil survey, the soils in the area of the subject property are classified as Urban land. This unit is covered with streets, buildings, parking lots, and other structures that obscure or alter the soils to the extent that the original soil is no longer identifiable.	
GEOLOGY	Era:	Cenozoic
	System:	Quaternary
	Series:	Quaternary
GROUNDWATER FLOW	presumed south-southeast	
Note: To determine exact soils, geology, and groundwater flow/depth on the subject property, additional geological and subsurface studies would be required.		
SURFACE GROUND SLOPE	south-southeast	
PONDS/RIVERS/LAKES/TRIBUTARIES	none	
RETENTION PONDS/DRAINAGE CANALS	none	
UNUSUAL CHARACTERISTICS	none	

8.0 ADJACENT PROPERTIES

ASTM Practice E1527-13 describes an adjacent property as any property or properties with boundaries that are contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property if not for a street, road, or other public thoroughfare separating them.

8.1 ADJACENT ROADS/STREETS/THOROUGHFARES

DIRECTION	STREETS	# OF LANES
NORTH	Sunset Boulevard	5
EAST	Larrabee Street	2
SOUTH	none	
WEST	North San Vicente Boulevard	5

8.2 CURRENT USES

DIRECTION	USES
NORTH	Daikokuya (restaurant), Modani Furniture, Tattoo Mania, Subway Sandwiches, Paws n Claws (pet grooming), LSTN Sound Co., Cuban Seed Cigar Co., Panini Italian Kitchen, Psychic Readings by Crystal
EAST	Chase Bank, Pono Kitchen & Bar, apartment building
SOUTH	The London West Hollywood Hotel
WEST	Sunset Oil & Mini Mart (gas station), apartment building

CURRENT OCCUPANT DATABASE LISTINGS		
DIRECTION	NAME	REGISTRATION
NORTH	none	
EAST	none	
SOUTH	none	
WEST	Arco #5122 (Sunset Oil)	Leaking underground storage tank site: closed; no further action required Underground storage tank site (listed twice): three (3) 12,000-gallon gasoline tanks currently in use; five (5) tanks previously removed

8.3 PAST USES

A review of available historical information was performed to determine the past uses of the adjacent properties.

DIRECTION	PAST USES
NORTH	Vacant land, residential development, gas station, various retail tenants (pager store, restaurants, wrought iron shop, property management, travel agency, image center, theatrical agency, print shop, beauty salons, radio & appliance repair, gift shop, tailor, florist, liquor store, religious center, grocery store, jewelry store, locksmith, insurance agency)
EAST	Vacant land, multi-tenant retail center/various retail tenants (dressmaker, hatmaker, music and video store, publisher, restaurants), residential development
SOUTH	Vacant land, residential development
WEST	Vacant land, residential development

PAST OCCUPANT DATABASE LISTINGS		
DIRECTION	NAME	REGISTRATION
NORTH	Former Shell Service Station	Leaking underground storage tank site: active* Historical underground storage tank site: two (2) 8,000-gallon gasoline tanks, two (2) 6,000-gallon gasoline tanks, and one (1) 550-gallon waste oil tank removed Small quantity hazardous waste generator: no violations
EAST	none	
SOUTH	none	
WEST	none	

*Based on a file review (see Section 5.7), this site has not impacted the subject property and does not represent a recognized environmental condition.

8.4 SUMMARY OF ADJACENT PROPERTIES

A visual reconnaissance, a review of state and federal databases, and a review of available historical records were performed to determine if any environmental concerns existed that could impact the subject property. There was no evidence to suggest that any current or past uses on the adjacent properties have impacted the subject property.

The subject property is located in an area consisting of commercial and residential development. There was no extensive industrial or manufacturing activities observed within close proximity of the subject property.

9.0 DATABASE REVIEW

UES Consulting reviewed available information provided by Environmental Data Resources (EDR) to evaluate potential environmental concerns with respect to the subject property and the area where the subject property is located. A brief description of each database searched, the designated search distance, and the sites found in each designated search area, are described below. The database report, including a map of the identified sites, is included in Appendix F.

Note: The following section lists only primary federal and state databases. For a review of all properties with environmental listings in the area, please refer to the database report.

9.1 NATIONAL PRIORITY LIST (NPL)/SUPERFUND SITE INVENTORY

SEARCH RADIUS: 1 MILE + SUBJECT PROPERTY

The NPL is a result of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, and Re-authorization Act (SARA) of 1986. The NPL sites are those identified by the EPA which require remediation of hazardous material.

NAME OF SITE	DISTANCE	DIRECTION	STATUS
None			

9.2 DEPARTMENT OF DEFENSE (DOD)

SEARCH RADIUS: 1 MILE + SUBJECT PROPERTY

The DOD database identifies federally-owned or administered lands of the Department of Defense with greater than 630 acres.

NAME OF SITE	DISTANCE	DIRECTION	STATUS
None			

9.3 STATE HAZARDOUS WASTE (SHWS)

SEARCH RADIUS: 1 MILE + SUBJECT PROPERTY

SHWS records are the states' equivalent to CERCLIS. These sites may or may not be listed on the federal CERCLIS list. Priority sites planned for clean-up using state funds are identified, along with sites where clean-up will be paid for by potentially responsible parties.

NAME OF SITE	DISTANCE	DIRECTION	STATUS
FD 8725/Canyon Cleaner Facility	1/2 mile	SE	active*
W Hollywood/Sunlin Inc/Palm Car Wash	1/2 mile	SSE	referred to other agency*

Schrillo Aero Tool Engineering Co	1/2 mile	SSE	active*
Cedars Sinai Medical Center	1 mile	SSE	referred to other agency*

*Based on their distant locations and presumed groundwater flow direction to the southeast, these sites have not likely impacted the subject property.

9.4 CORRECTIVE ACTION (CORRACTS)

SEARCH RADIUS: 1 MILE + SUBJECT PROPERTY

The CORRACTS database identifies hazardous waste handlers with corrective action activity.

NAME OF SITE	DISTANCE	DIRECTION	STATUS
None			

9.5 CERCLIS/SEMS

SEARCH RADIUS: 1/2 MILE + SUBJECT PROPERTY

The EPA Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list, now known as the Superfund Enterprise Management System (SEMS), was reviewed as part of this assessment. CERCLIS-listed sites are identified by the EPA as sites with potential environmental problems related to the presence or release of hazardous substances.

NAME OF SITE	DISTANCE	DIRECTION	STATUS
None			

9.6 TRANSPORT, STORAGE, DISPOSAL (TSD) FACILITIES

SEARCH RADIUS: 1/2 MILE + SUBJECT PROPERTY

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA facilities database is a compilation by the EPA of facilities that report generation, storage, transportation, treatment, or disposal of hazardous waste.

NAME OF SITE	DISTANCE	DIRECTION	STATUS
None			

9.7 STATE LANDFILL (SWLF)

SEARCH RADIUS: 1/2 MILE + SUBJECT PROPERTY

This database lists solid waste landfills.

Name of Site	Distance	Direction	Status
None			

9.8 Voluntary Clean-Up Program (VCP)

Search Radius: 1/2 Mile + Subject Property

This database lists sites participating in the voluntary clean-up program.

Name of Site	Distance	Direction	Status
None			

9.9 Brownfields

Search Radius: 1/2 Mile + Subject Property

The EPA describes brownfields as abandoned, idle, or under-used industrial or commercial facilities or sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

US Brownfields			
Name of Site	**Distance**	**Direction**	**Status**
None			

State Brownfields			
Name of Site	**Distance**	**Direction**	**Status**
None			

9.10 U.S. Engineering Controls

Search Radius: 1/2 Mile + Subject Property

Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Name of Site	Distance	Direction	Engineering Control
None			

9.11 U.S. Institutional Controls

Search Radius: 1/2 Mile + Subject Property

Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent

exposure to contaminants remaining on a site. Deed restrictions are generally required as part of the institutional controls.

Name of Site	Distance	Direction	Institutional Control
None			

9.12 Leaking Underground Storage Tanks (LUST)

Search Radius: 1/2 Mile + Subject Property

This database identifies leaking underground storage tank sites.

Name of Site	Distance	Direction	Status
Arco #5122 (Sunset Oil- listed twice)	adjacent	west	closed; no further action required
Former Shell SS	adjacent	north	active*
Budget Rent A Car (listed twice)	1/8 mile	ENE	closed; no further action required
West Hollywood Elementary Sch	1/4 mile	SW	active**
Hav A Car/David Shane (listed twice)	1/4 mile	ENE	closed; no further action required
LA Co Fire Department	1/4 mile	ESE	closed; no further action required
Chevron #9-0775	1/4 mile	west	closed; no further action required
10 sites	1/2 mile	various	2 sites active** / 8 closed

*Based on a file review (see Section 5.7), this site has not impacted the subject property and does not represent a recognized environmental condition.

**Based on their distant locations and presumed groundwater flow direction, these sites have not likely impacted the subject property.

9.13 Leaking Above-Ground Storage Tanks (LAST)

Search Radius: 1/2 Mile + Subject Property

This database identifies leaking above-ground storage tank sites.

Name of Site	Distance	Direction	Status
None			

9.14 Underground Storage Tanks (UST)

Search Radius: 1/4 Mile + Subject Property

This database identifies underground storage tank sites.

Name of Site	Distance	Direction	Status
Arco #5122 (Sunset Oil - listed twice)	adjacent	west	tanks in use
Shell Oil (historical UST site)	adjacent	north	tanks removed

9.15 Above-Ground Storage Tanks (AST)

Search Radius: 1/4 Mile + Subject Property

This database identifies above-ground storage tank sites.

Name of Site	Distance	Direction	Status
None			

9.16 Hazardous Waste Generators

Search Radius: 1/4 Mile + Subject Property

The EPA RCRA generators database is a list maintained by the EPA of facilities that have obtained an EPA I.D. number identifying them as generators of hazardous waste.

Name of Site	Distance	Direction	Status
Shell Oil Co	adjacent	north	no violations
West Hollywood Elementary	1/4 mile	WSW	no violations

9.17 Emergency Response Notification System (ERNS)

Search Radius: Subject Property

The ERNS database is a national list collecting information on reported releases of oil and hazardous substances. The database contains information from spill reports made to federal authorities, including the EPA, the U.S. Coast Guard, the National Response Center, and the Department of Transportation.

Subject Property	Description of Release
Not listed	

9.18 SPILLS

Search Radius: Subject Property

This database tracks reported spills.

Subject Property	Description of Spill
Not listed	

9.19 Orphan Sites

Due to poor or inadequate address information, certain sites within the database search were not mapped. Upon review, it was determined that none of the sites listed in the orphan summary would pose an environmental concern to the subject property.

9.20 SUMMARY OF DATABASE SITES

Based upon the review of federal, state, and tribal records, a visual reconnaissance, presumed groundwater flow, distance, and/or geological characteristics in the area, there is no evidence to suggest any of the sites listed in the database report have impacted the subject property.

9.21 VAPOR MIGRATION

A Vapor Encroachment Screen was conducted for the subject property using Environmental Data Resources' (EDR) quick screen application. There were no sites identified within the search distance/designated area of concern that would pose a potential for vapor migration to impact the subject property. A copy of the vapor screen report is included in Appendix F.

11.0 PROFESSIONAL STATEMENT

I declare that, to the best of my knowledge, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Krista Kasper
Environmental Professional

12.0 STATEMENT OF QUALIFICATIONS LIMITATIONS ASSUMPTIONS AND LIMITING CONDITIONS

STATEMENT OF QUALIFICATIONS

UES Consulting Services, Inc. (UES) is an engineering and environmental consulting firm for commercial real estate transactions specializing in Property Condition Assessments, Phase I Environmental Assessments, Phase II Subsurface Investigations, and Remediation and Removal.

Founded in 1989, UES personnel have over 100 years combined experience in property assessments and petroleum remediation. In addition, UES has experience performing asbestos, lead, radon and mold surveys.

Since our inception, UES continues to grow to meet the needs of our diverse and changing client base. We currently provide our consulting services to Freddie Mac, Fannie Mae, Department of Housing and Urban Development (HUD), various financial institutions, mortgage brokers and numerous life insurance companies, real estate companies and developers.

With offices located in Kansas City, Missouri, and Irvine, California, we currently provide our services to clients throughout the United States. Our staff of in-house professionals allows UES to address your issues quickly, confidentially and in the most cost-effective manner. Our success and growth can be attributed directly to the quality of our service and customer satisfaction.

UES has performed Property Condition Assessments, Phase I Environmental Assessments and Phase II Subsurface Investigations in various cities across the country and on many different property types, including office buildings, industrial buildings, warehouses, condominiums, townhomes, retail centers, retirement and assisted living facilities, gas stations and multi-family housing.

LIMITATIONS

The findings and conclusions presented in this report are based on the tasks stated in the scope of work. Professional judgments expressed herein are based on the facts currently available within the limits of the existing data, scope of work, budget and schedule limitations. No conclusions are intended or implied beyond those stated herein. UES Consulting Services, Inc. exercised reasonable standards applicable to the industry today in completing this Phase I environmental assessment.

UES Consulting Services, Inc. does not warrant the work of regulatory agencies or other third parties supplying information which may have been used during the performance of this assessment.

ASSUMPTIONS AND LIMITING CONDITIONS

1. The inspection procedures and this report have been developed considering various federal, state, and local laws and regulations, including the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA/Superfund), and its 1986 Amendments (SARA).

2. The information in this report has been compiled from sources believed to be reliable. We cannot, however, guarantee the accuracy of information supplied by others.

3. The inspector has visually assessed the property, both the land and improvements thereon, where applicable. It is impossible to personally observe conditions that may exist below the surface or that may be hidden within the structure of the improvements. Therefore, no representations are made regarding such matters unless they are specifically considered in this report.

4. The extent of the activities carried out during the inspection and documented in this report are governed by the scope of work. No activity, including the sampling, assessment, or evaluation of any material or by-product, may be assumed to be included in the screening unless specifically considered therein.

5. The findings of the inspection that are contained in this report are based upon quantitative and qualitative factors that exist on the date of the inspection. There can be no assurance that intervening factors will not arise that will affect the report's conclusions.

6. If a preliminary inspection for suspect asbestos-containing materials was conducted on the subject property, no assurances can be made that no other asbestos-containing materials not visibly apparent during the site inspection exist in the structure(s) on the subject property. It is recommended that a comprehensive asbestos survey be conducted prior to any major remodeling or demolition.

7. Sketches, floor plans, and maps used in this report are included to aid the visual understanding of the reader and should not be considered surveys or engineering studies.

8. The report is intended only for the internal use of the addressee or their authorized representative, and possession does not imply the right of publication or the use for any other purpose without the written consent of UES Consulting Services, Inc.

9. Neither all nor any part of this report shall be conveyed to the public through advertising, public relations, news, sales, or other media without the prior written consent of UES Consulting Services, Inc.

10. Testimony, depositions, or interviews by any member of the staff of UES Consulting Services, Inc. in connection with any legal action is beyond the scope of this screening. If required, prior agreement as to the time and compensation for the additional services must be made in writing.

APPENDIX H

TERMINOLOGY

DRAFT

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or

DRAFT

substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

APPENDIX I

TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).
