

General Plan Advisory Committee Meeting #8
February 2, 2010
Infrastructure: Policy Framework

Provide functional, safe and well maintained infrastructure throughout the City.

- | | | |
|---|---|---|
| 1. Maintain City streets, sidewalks and other public ways in an excellent condition, promoting safety, aesthetics and healthy activities such as walking and biking. | Y | N |
| 2. Seek to maintain citywide access to high-quality water, gas, electricity and telecommunications services. | Y | N |
| 3. Implement best practices for solid waste management, generating less waste and diverting more of it from landfills. | Y | N |
| 4. Maintain a well-designed stormwater system, encouraging environmentally preferable methods such as infiltration and on-site reuse. | Y | N |
| 5. Maintain the City's wastewater system to protect health safety and welfare. | Y | N |
| 6. Require that developers of new projects pay for the costs of construction and expansion of streets and utility system improvements necessitated by that development. | Y | N |
| 7. Require new development to demonstrate sufficient access to necessary infrastructure and services, such as water, provided by outside service providers. | Y | N |
