Ref. DOC 6309602

Mr. Doug Vu, Senior Planner  
 8300 Santa Monica Boulevard  
 West Hollywood, CA 90069

Dear Mr. Vu:

**DEIR Response to 8850 Sunset Boulevard Project**

The Los Angeles County Sanitation Districts (Districts) received a Draft Environmental Impact Report (DEIR) for the subject project on September 13, 2021. The proposed project is located within the jurisdictional boundaries of District No. 4. Previous comments submitted by the Districts in correspondence dated November 22, 2019 (copy enclosed) to your agency still apply to the subject project with the following update and comment:

A3-1

1. The expected increase in average wastewater flow from the project site, described in the DEIR and associated appendices as a 41-unit residential use with amenities; a 115-room hotel with amenities; a 6,119 square foot (sf) night club; a 21,139 sf quality restaurant; a 8,141 sf high-turnover restaurant; a 3,496 sf lounge/bar; and a 4,301 sf pool is 95,719 gallons per day, after the structures on the project site are demolished. A copy of District No. 4's average wastewater generation factors may be found at <https://www.lacsd.org/home/showdocument?id=3318>.

A3-2

2. **Section 3.14—Utilities and Service Systems, Sewer System, page 3.14-3:** the first paragraph stated that "the Sanitation Districts of Los Angeles County (County Sanitation), District Number 4, provides sewer trunk infrastructure and wastewater treatment services to the City." While the Districts provides trunk sewer infrastructures downstream from the project site, the Districts does not provide wastewater treatment service for the proposed project. Wastewater generated by the proposed project will be treated by the City of Los Angeles's Hyperion Treatment System.

A3-3

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2743 or at [mandyhuffman@lacsd.org](mailto:mandyhuffman@lacsd.org).

Very truly yours,

*Mandy Huffman*

DOC 6357141.D04

November 22, 2019

Ref. DOC 5309606

Mr. Doug Vu, ASLA  
Senior Planner  
City of West Hollywood  
8300 Santa Monica Boulevard  
West Hollywood, CA 90069

Dear Mr. Vu:

**NOP Response for the 8850 Sunset Boulevard Project**

The Sanitation Districts of Los Angeles County (Districts) received a Notice of Preparation of a Draft Environmental Impact Report (NOP) for the subject project on September 19, 2019. The proposed project is located within the jurisdictional boundaries of District No. 4. We offer the following comments regarding sewerage service:

1. The wastewater flow originating from the proposed project will discharge to a local sewer lines, which are not maintained by the Districts, for conveyance to either or both the Districts' Sherman Trunk Sewer, located in Huntley Drive at Santa Monica Boulevard or the Sherman Relief Trunk Sewer, located in Palm Avenue north of Santa Monica Boulevard. The Districts' 12-inch diameter Sherman Trunk Sewer has a capacity of 3.7 million gallons per day (mgd) and conveyed a peak flow of 0.8 mgd when last measured in 2013. The Districts' 18-inch diameter Sherman Relief Trunk Sewer has a capacity of 4.1 mgd and conveyed a peak flow of 1.6 mgd when last measured in 2013.
2. Wastewater generated by the proposed project will be treated by the City of Los Angeles Hyperion Treatment System. Questions regarding sewerage service for the proposed project should also be directed to the City of Los Angeles' Department of Public Works.
3. The expected increase in average wastewater flow from the project site, described in the notice as a 275,078 square-foot mixed use development, is 33,423 gallons per day, after the structures on the project site are demolished. For a copy of the Districts' average wastewater generation factors, go to [www.lacsd.org](http://www.lacsd.org), Services, select Will Serve Program under Wastewater Program and Permits, and scroll down to click on the [Table 1, Loadings for Each Class of Land Use](#) link.
4. The Districts are empowered by the California Health and Safety Code to charge a fee for the privilege of connecting (directly or indirectly) to the Districts' Sewerage System for increasing the strength or quantity of wastewater discharged from connected facilities. This connection fee is a capital facilities fee that is imposed in an amount sufficient to construct an incremental expansion of the Sewerage System to accommodate the proposed project. Payment of a connection fee will

be required before this project is permitted to discharge to the Districts' Sewerage System. For more information and a copy of the Connection Fee Information Sheet, go to [www.lacsd.org](http://www.lacsd.org), Services, select Rates & Fees under Wastewater (Sewage). In determining the impact to the Sewerage System and applicable connection fees, the Districts will determine the user category (e.g. Condominium, Single Family home, etc.) that best represents the actual or anticipated use of the parcel(s) or facilities on the parcel(s) in the development. For more specific information regarding the connection fee application procedure and fees, the developer should contact the Districts' Wastewater Fee Public Counter at (562) 908-4288, extension 2727.

5. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CCA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service, but is to advise the developer that the Districts intend to provide this service up to the levels that are legally permitted and to inform the developer of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2717.

Very truly yours,

Adriana Raza

RE: 8850 Sunset Boulevard – Notice of Availability of a Draft Environmental Impact Report (EIR)

Dear Mr. Vu:

Thank you for coordinating with the Los Angeles County Metropolitan Transportation Authority (Metro) regarding the proposed 8850 Sunset Boulevard (Blvd.) Project (Project) located at 8850-8878 Sunset Blvd. and 1025-1029 Larrabee Street (St.) in the City of West Hollywood (City). Metro is committed to working with local municipalities, developers, and other stakeholders across Los Angeles County on transit-supportive developments to grow ridership, reduce driving, and promote walkable neighborhoods. Transit Oriented Communities (TOCs) are places (such as corridors or neighborhoods) that, by their design, allow people to drive less and access transit more. TOCs maximize equitable access to a multi-modal transit network as a key organizing principle of land use planning and holistic community development.

A4-1

The purpose of this letter is to provide the City with recommendations on topics regarding the Project's potential impacts on the Metro bus facilities and services, which should be analyzed in the Draft Environmental Impact Report (DEIR). In addition to the specific comments outlined below, Metro would like to provide the City and Silver Creek Commercial Development, LLC (Applicant) with the Metro Adjacent Development Handbook (attached), which provides an overview of common concerns for development adjacent to Metro right-of-way (ROW) and transit facilities, available at [www.metro.net/projects/devreview/](http://www.metro.net/projects/devreview/).

### **Project Description**

The proposed project consists of a new mixed-use hotel and residential building. The Project include a 15 story building, incorporate new digital and static billboard signage on Sunset Boulevard. The Project would also include five subterranean level, four of which would primarily be used as a parking garage, providing 240 spaces.

A4-2

## Recommendations for EIR Scope and Content

### *Bus Service Adjacency*

1. Service: Metro Bus Lines 2, 16, and 105 operate on North San Vicente Boulevard and Sunset Boulevard, adjacent to the Project. (Since the City's publication of the NOP, Line 30 has been discontinued in the Project vicinity.) One Metro Bus stop is directly adjacent to the Project at San Vicente Boulevard and Sunset Boulevard. Other transit operators such as West Hollywood Cityline Local may provide service in the vicinity of the Project and should be consulted.
2. Impact Analysis: The EIR should analyze potential effects on Metro Bus service and identify mitigation measures as appropriate. Potential impacts may include impacts to transportation services, stops, and temporary or permanent bus service rerouting. Specific types of impacts and recommended mitigation measures to address them include, without limitation, the following:
3. Bus Stop Condition: The EIR should identify all bus stops on all streets adjacent to the Project site on Figure 3.12-1. During construction, the Applicant may either maintain the stop in its current condition and location, or temporarily relocate the stop consistent with the needs of Metro Bus operations. Temporary or permanent modifications to any bus stop as part of the Project, including any surrounding sidewalk area, must be Americans with Disabilities Act (ADA)-compliant and allow passengers with disabilities a clear path of travel between the bus stop and the Project. Once the Project is completed, the Applicant must ensure any existing Metro bus stop affected by the Project is returned to its pre-Project location and condition, unless otherwise directed by Metro.
4. Driveways: Driveways accessing parking and loading at the Project site should be located away from transit stops, and be designed and configured to avoid potential conflicts with on-street transit services and pedestrian traffic to the greatest degree possible. Vehicular driveways should not be located in or directly adjacent to areas that are likely to be used as waiting areas for transit.
5. Bus Stop Enhancements: Metro encourages the installation of enhancements and other amenities that improve safety and comfort for transit riders. These include benches, bus shelters, wayfinding signage, enhanced crosswalks and ADA-compliant ramps, pedestrian lighting, and shade trees in paths of travel to bus stops. The City should consider requesting the installation of such amenities as part of the Project.
6. Bus Operations Coordination: The Applicant shall coordinate with Metro Bus Operations Control Special Events Coordinator at 213-922-4632 and Metro's Stops and Zones Department at 213-922-5190 not later than 30 days before the start of Project construction. Other municipal bus services may also be impacted and shall be included in construction outreach efforts.

A4-3

A4-4

### **Transit Supportive Planning: Recommendations and Resources**

Considering the Project's proximity to the Metro bus stop, Metro would like to identify the potential synergies associated with transit-oriented development:

1. Transit Supportive Planning Toolkit: Metro strongly recommends that the Applicant review the Transit Supportive Planning Toolkit which identifies 10 elements of transit-supportive places and, applied collectively, has been shown to reduce vehicle miles traveled by establishing community-scaled density, diverse land use mix, combination of affordable housing, and infrastructure projects for pedestrians, bicyclists, and people of all ages and abilities. This resource is available at <https://www.metro.net/about/funding-resources/>.
2. Land Use: Metro supports development of commercial and residential properties near transit stops and understands that increasing development near stations represents a mutually beneficial opportunity to increase ridership and enhance transportation options for the users of developments. Metro encourages the City and Applicant to be mindful of the Project's proximity to the Metro bus stop, including orienting pedestrian pathways towards the bus stop.
3. Transit Connections and Access: Metro strongly encourages the Applicant to install Project features that help facilitate safe and convenient connections for pedestrians, people riding bicycles, and transit users to/from the Project site and nearby destinations. The City should consider requiring the installation of such features as part of the conditions of approval for the Project, including:
  - a. Walkability: The provision of wide sidewalks, pedestrian lighting, a continuous canopy of shade trees, enhanced crosswalks with ADA-compliant curb ramps, and other amenities along all public street frontages of the development site to improve pedestrian safety and comfort to access the nearby Metro bus stop.
  - b. Bicycle Use and Micromobility Devices: The provision of adequate short-term bicycle parking, such as ground-level bicycle racks, and secure, access-controlled, enclosed long-term bicycle parking for residents, employees, and guests. Bicycle parking facilities should be designed with best practices in mind, including highly visible siting, effective surveillance, ease to locate, and equipment installation with preferred spacing dimensions, so bicycle parking can be safely and conveniently accessed. Similar provisions for micro-mobility devices are also encouraged.
  - c. First & Last Mile Access: The Project should address first-last mile connections to transit and is encouraged to support these connections with wayfinding signage inclusive of all modes of transportation. For reference, please review the First Last Mile Strategic Plan, authored by Metro and the Southern California Association of Governments (SCAG), available on-line at: [http://media.metro.net/docs/sustainability\\_path\\_design\\_guidelines.pdf](http://media.metro.net/docs/sustainability_path_design_guidelines.pdf)

A4-5

4. Parking: Metro encourages the incorporation of transit-oriented, pedestrian-oriented parking provision strategies such as the reduction or removal of minimum parking requirements and the exploration of shared parking opportunities. These strategies could be pursued to reduce automobile-orientation in design and travel demand.
5. Wayfinding: Any temporary or permanent wayfinding signage with content referencing Metro services or featuring the Metro brand and/or associated graphics (such as Metro Bus) requires review and approval by Metro Signage and Environmental Graphic Design.
6. Transit Pass Programs: Metro would like to inform the Applicant of Metro's employer transit pass programs, including the Annual Transit Access Pass (A-TAP), the Employer Pass Program (E-Pass), and Small Employer Pass (SEP) Program. These programs offer efficiencies and group rates that businesses can offer employees as an incentive to utilize public transit. The A-TAP can also be used for residential projects. For more information on these programs, please visit the programs' website at <https://www.metro.net/riding/eapp/>.

**Re: Comment on Draft Environmental Impact Report, 8850 Sunset Boulevard Project (SCH 2019090447)**

Dear Mr. Vu:

I am writing on behalf of Supporters Alliance For Environmental Responsibility (“SAFER”) regarding the Draft Environmental Impact Report (“DEIR”) prepared for the 8850 Sunset Boulevard Project (SCH 2019090447), including all actions related or referring to the construction of a 15-story mixed-use hotel and residential building containing 115 hotel guestrooms, 31 market-rate condominiums and 10 income-restricted units, with five subterranean levels, located at 8850–8878 Sunset Boulevard and 1025–1029 Larrabee Street in the City of West Hollywood (“Project”).

After reviewing the DEIR, we conclude that the DEIR fails as an informational document and fails to impose all feasible mitigation measures to reduce the Project’s impacts. SAFER requests that the Planning and Development Services Department address these shortcomings in a revised draft environmental impact report (“RDEIR”) and recirculate the RDEIR prior to considering approvals for the Project.

We reserve the right to supplement these comments during review of the Final EIR for the Project and at public hearings concerning the Project. *Galante Vineyards v. Monterey Peninsula Water Management Dist.*, 60 Cal. App. 4th 1109, 1121 (1997).

Sincerely,

Richard Drury

## **Re: Comments on Draft Environmental Impact Report for 8850 Sunset Boulevard Project (State Clearinghouse No. 2019090447)**

Dear Mr. Vu:

On behalf of Coalition for Responsible Equitable Economic Development Los Angeles (“CREED LA”), we submit these comments on the Draft Environmental Impact Report (“DEIR”) for the 8850 Sunset Boulevard Project (State Clearinghouse No. 2019090447) (“Project”) prepared pursuant to the California Environmental Quality Act (“CEQA”)<sup>1</sup> by the City of West Hollywood (“the City”) for the Applicant Silver Creek Commercial Development LLC (“Applicant”).

The proposed Project consists of demolition of the existing commercial buildings and surface parking on the Project site and construction and operation of a new mixed-use hotel and residential building. The new mixed-use hotel and residential building would contain approximately 240,000 square feet of floor area (420,000 gross square feet including below grade components) and 15 stories (approximately 200 feet measured from the lowest point of the site on the southwest corner and 189 feet measured from Sunset Boulevard) and would incorporate new digital and static billboard signage on Sunset Boulevard. The commercial portion of the Project would include 115 hotel guestrooms with ancillary uses such as meeting rooms, spa/gym, outdoor pools, restaurants, lounges, and retail ancillary to the

02-1

<sup>1</sup> Public Resources Code § 21000 *et seq.*; 14 Cal. Code Regs. (“C.C.R.”) §§ 15000 *et seq.*  
5621-005aep

hotel, as well as a new nightclub space for the Viper Room. The residential portion would provide 31 market-rate condominiums and 10 income-restricted units with residential amenities including a gym, movie screening room, and an outdoor pool. The Project also would include an emergency helicopter landing facility for police and fire services only, and five subterranean levels, four of which would primarily be used as a parking garage, providing 240 spaces.

Our review of the DEIR demonstrates that the DEIR fails to comply with CEQA. As explained more fully below, the DEIR fails properly analyze and mitigate air quality, health risk, and noise impacts. The DEIR fails to support its significance findings with substantial evidence, and fails to mitigate the Project's significant impacts to the greatest extent feasible, in violation of CEQA. As a result of these deficiencies, the City also cannot make the requisite findings to approve the Project under the City's municipal codes or to adopt a statement of overriding considerations pursuant to CEQA.<sup>2</sup>

These comments were prepared with the assistance of environmental health, air quality, and GHG expert Dr. James Clark, Ph.D., and noise expert Derek Watry of Wilson Ihrig. Comments and curriculum vitae of Mr. Clark are attached to this letter as Attachment A.<sup>3</sup> Mr. Watry comments and curriculum vitae are included as Attachment B.<sup>4</sup> Attachments A–B are fully incorporated herein and submitted to the City herewith. Therefore, the City must separately respond to the technical comments in Attachments A–B.

For the reasons discussed herein, and in the attached expert comments, CREED LA urges the City to remedy the deficiencies in the DEIR by preparing a legally adequate revised DEIR and recirculating it for public review and comment.<sup>5</sup>

## I. STATEMENT OF INTEREST

CREED LA is an unincorporated association of individuals and labor organizations formed to ensure that the construction of major urban projects in the Los Angeles region proceeds in a manner that minimizes public and worker health and safety risks, avoids or mitigates environmental and public service impacts, and fosters long-term sustainable construction and development opportunities. The association includes the Sheet Metal Workers Local 105, International Brotherhood of Electrical Workers Local 11, Southern California Pipe Trades District Council 16, and District Council of Iron Workers of the State of California, along with their members, their families, and other individuals who live and work in the Los Angeles region.

Individual members of CREED LA include West Los Angeles residents Hak Kim, John P. Bustos, Gery Kennon, Chriss Macias, and Robert E Murphy. These individuals live, work, recreate, and raise their families in and around the City of Los Angeles and its surrounding communities. Accordingly, they would be directly affected by the Project's environmental and health, and safety impacts. Individual members may also work on the Project itself. They will be first in line to be exposed to any health and safety hazards that exist onsite.

CREED LA has an interest in enforcing environmental laws that encourage sustainable development and ensure a safe working environment for its members. Environmentally detrimental projects can jeopardize future jobs by making it more difficult and more expensive for business and industry to expand in the region, and by making the area less desirable for new businesses and new residents. Continued environmental degradation can, and has, caused construction moratoriums and other restrictions on growth that, in turn, reduce future employment opportunities.

CREED LA supports the development of commercial, mixed use, and medical office projects where properly analyzed and carefully planned to minimize impacts on public health, climate change, and the environment. These projects should avoid adverse impacts to air quality, public health, climate change, noise, and traffic, and must incorporate all feasible mitigation to ensure that any remaining adverse impacts are reduced to the maximum extent feasible. Only by maintaining the highest standards can commercial development truly be sustainable.

O2-1  
Cont.

## II. LEGAL BACKGROUND

CEQA requires public agencies to analyze the potential environmental impacts of their proposed actions in an EIR.<sup>6</sup> The EIR is a critical informational document, the “heart of CEQA.”<sup>7</sup> “The foremost principle under CEQA is that the Legislature intended the act to be interpreted in such manner as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language.”<sup>8</sup>

CEQA has two primary purposes. First, CEQA is designed to inform decision makers and the public about the potential, significant environmental effects of a project.<sup>9</sup> “Its purpose is to inform the public and its responsible officials of the environmental consequences of their decisions before they are made. Thus, the EIR ‘protects not only the environment but also informed self-government.’”<sup>10</sup> The EIR has been described as “an environmental ‘alarm bell’ whose purpose it is to alert the public and its responsible officials to environmental changes before they have reached ecological points of no return.”<sup>11</sup> As the CEQA Guidelines explain, “[t]he EIR serves not only to protect the environment but also to demonstrate to the public that it is being protected.”<sup>12</sup>

Second, CEQA requires public agencies to avoid or reduce environmental damage when “feasible” by requiring consideration of environmentally superior alternatives and adoption of all feasible mitigation measures.<sup>13</sup> The EIR serves to

<sup>13</sup> 14 C.C.R. § 15002(a)(2), (3); see also *Berkeley Jets*, 91 Cal.App.4th at 1354; *Citizens of Goleta Valley*, 52 Cal.3d at 564.

5621-005acp

provide agencies and the public with information about the environmental impacts of a proposed project and to “identify ways that environmental damage can be avoided or significantly reduced.”<sup>14</sup> If the project will have a significant effect on the environment, the agency may approve the project only if it finds that it has “eliminated or substantially lessened all significant effects on the environment” to the greatest extent feasible and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns.”<sup>15</sup>

While courts review an EIR using an “abuse of discretion” standard, “the reviewing court is not to ‘uncritically rely on every study or analysis presented by a project proponent in support of its position. *A clearly inadequate or unsupported study is entitled to no judicial deference.*”<sup>16</sup> As the courts have explained, a prejudicial abuse of discretion occurs “if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process.”<sup>17</sup> “The ultimate inquiry, as case law and the CEQA guidelines make clear, is whether the EIR includes enough detail ‘to enable who did not participate in its preparation to understand and to consider meaningfully the issues raised by the proposed project.’”<sup>18</sup>

County of Stanislaus* (1994) 27 Cal.App.4th 713, 722 (error is prejudicial if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process); *Galante Vineyards v. Monterey Peninsula Water Management Dist.* (1997) 60 Cal.App.4th 1109, 1117 (decision to approve a project is a nullity if based upon an EIR that does not provide decision-makers and the public with information about the project as required by CEQA); *County of Amador v. El Dorado County Water Agency* (1999) 76 Cal.App.4th 931, 946 (prejudicial abuse of discretion results where agency fails to comply with information disclosure provisions of CEQA).

<sup>18</sup> *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 516, *quoting Laurel Heights*, 47 Cal.3d at 405.

### III. THE EIR FAILS TO ADEQUATELY ANALYZE AND MITIGATE POTENTIALLY SIGNIFICANT IMPACTS

#### A. The DEIR Fails to Disclose and Analyze the Health Risk Posed by the Project's Air Emissions from Construction and Operation

The DEIR fails to disclose and analyze health risk from construction emissions and lacks a quantified health risk analysis ("HRA"), in violation of CEQA.

An agency must support its findings of a project's potential environmental impacts with concrete evidence, with "sufficient information to foster informed public participation and to enable the decision makers to consider the environmental factors necessary to make a reasoned decision."<sup>19</sup> In particular, a project's health risks "must be 'clearly identified' and the discussion must include 'relevant specifics' about the environmental changes attributable to the Project and their associated health outcomes."<sup>20</sup>

Courts have held that an environmental review document must disclose a project's potential health risks to a degree of specificity that would allow the public to make the correlation between the project's impacts and adverse effects to human health.<sup>21</sup> In *Bakersfield*, the court found that the EIRs' description of health risks were insufficient and that after reading them, "the public would have no idea of the health consequences that result when more pollutants are added to a nonattainment basin."<sup>22</sup> Likewise in *Sierra Club*, the Supreme Court held that the EIR's discussion of health impacts associated with exposure to the named pollutants was too general and the failure of the EIR to indicate the concentrations at which each pollutant would trigger the identified symptoms rendered the report inadequate.<sup>23</sup> Some connection between air quality impacts and their direct, adverse effects on human health must be made. As the Court explained, "a sufficient discussion of significant impacts requires not merely a determination of whether an impact is significant, but some effort to explain the nature and magnitude of the

<sup>23</sup> *Sierra Club*, at 521.

impact.”<sup>24</sup> CEQA mandates discussion, supported by substantial evidence, of the nature and magnitude of impacts of air pollution on public health.<sup>25</sup>

The failure to provide information required by CEQA makes meaningful assessment of potentially significant impacts impossible and is presumed to be prejudicial.<sup>26</sup> Challenges to an agency’s failure to proceed in the manner required by CEQA, such as the failure to address a subject required to be covered in an EIR or to disclose information about a project’s environmental effects or alternatives, are subject to a less deferential standard than challenges to an agency’s factual conclusions.<sup>27</sup> Courts reviewing challenges to an agency’s approval of a CEQA document based on a lack of substantial evidence will “determine de novo whether the agency has employed the correct procedures, scrupulously enforcing all legislatively mandated CEQA requirements.”<sup>28</sup>

The DEIR claims that emissions of toxic air contaminants (“TACs”) will be less than significant without including a detailed or quantitative HRA to disclose the adverse health impacts that will be caused by exposure to TACs from the Project’s construction and operational emissions. As a result, the DEIR fails to disclose the potentially significant health risk posed to nearby residents and children from TACs, and fails to mitigate it. Because the DEIR fails to include the necessary analysis disclosing the extent and severity of the Project’s health risk, and fails to compare the Project’s TAC emissions to applicable significance thresholds, the DEIR lacks substantial evidence to support its conclusion that the Project will not have significant health impacts from human exposure to diesel particulate matter (“DPM”) emissions generated during Project construction and operation.

One of the primary emissions of concern regarding health effects for land development projects is DPM, which can be released during Project construction and operation. The DEIR acknowledges that the greatest potential for TAC emissions during construction would be related to DPM emissions associated with

heavy-duty equipment during construction.<sup>29</sup> However, the DEIR failed to perform a quantitative assessment of the Project's DPM emissions, instead concluding that the Project's cancer risk from exposure to DPM would be less than significant based on the DEIR's conclusion that the Project's *criteria pollutant* emissions are less than significant.

The DEIR's failure to quantify the health risk from DPM exposure is a failure to proceed in the manner required by law. CEQA expressly requires that an EIR discuss, *inter alia*, "health and safety problems caused by the physical changes" resulting from the project.<sup>30</sup> When a project results in exposure to toxic contaminants, this analysis requires a "human health risk assessment."<sup>31</sup> OEHHA<sup>32</sup> guidance also sets a recommended threshold for preparing an HRA of a construction period of two months or more.<sup>33</sup> Construction of the instant Project will last at least 31 months, as the DEIR puts forth a timeline for construction of September 2022 through April 2025.<sup>34</sup> A detailed health risk analysis is necessary to determine how significant those impacts will be and if mitigation measures are sufficient to avoid risks to public health.

02-2  
Cont.

#### **1. The DEIR Fails to Evaluate the Project's TAC Emissions Against Applicable Significance Thresholds.**

The DEIR relies on the South Coast Air Quality Management District's ("SCAQMD") cancer risk significance thresholds for TACs to evaluate the Project's health risk, which include the following:

Maximum incremental cancer risk 10 in 1 million

Cancer Burden >0.5 excess cancer cases (in areas  $\geq 1$  in 1 million)

<sup>34</sup> DEIR, p. 3.1-21

5621-005acp

Chronic and acute hazard index 1.0 (project increment).<sup>35</sup>

The DEIR also explains that SCAQMD Rule 1401 and 1401.1 health risk thresholds apply to operational impacts from the Project's diesel backup generator ("BUG").<sup>36</sup> Those thresholds provide that permits to operate may not be issued when emissions of TACs result in a maximum incremental cancer risk greater than 1 in 1 million without application of best available control technology for toxics ("T-BACT"), or a maximum incremental cancer risk greater than 10 in 1 million with application of T-BACT, or if the cumulative cancer burden (i.e., increase in cancer cases in the population) from all TACs emitted from a single piece of equipment exceeds 0.5, or a health hazard index (chronic and acute) greater than 1.0.<sup>37</sup>

The DEIR concludes that Project construction "would not result in exposure of sensitive receptors to substantial air pollutant concentrations" in excess of thresholds,<sup>38</sup> and regarding Project operation, concludes that "the proposed project would not result in non-permitted stationary sources that would emit substantial air pollutants or TACs."<sup>39</sup> However, as discussed above, the DEIR failed to quantify the Project's DPM emissions from construction or operation.<sup>40</sup> The City also failed to perform the necessary step of comparing the Project's DPM emissions to the applicable significance thresholds to determine whether or not they exceed the thresholds, nor could it have because the DEIR lacks the emissions calculations with which to do so. The City therefore lacks any quantitative evidence demonstrating that the Project's DPM emissions will not exceed thresholds.

The DEIR next states that the Applicant would be required to work with the SCAQMD to obtain permits to operate for the BUG, and appears to defer to SCAQMD's future analysis to determine whether or not the BUG poses a significant health risk.<sup>41</sup> This approach is prohibited by CEQA. The lead agency may not

<sup>41</sup> DEIR, p. 3.1-32 to -33.

5621-005acp

completely defer analysis of potential environmental impacts to an outside regulatory scheme, as the City has done here.<sup>42</sup>

The DEIR must be revised and recirculated to accurately analyze the health risks from the Project, determine whether they exceed the applicable SCAQMD significance thresholds, and to incorporate binding mitigation to reduce potentially significant health risk impacts to less than significant levels.<sup>43</sup>

**2. The DEIR's Analysis of Emissions From the On-Site Back Up Generator Ignores Substantial Emissions that Are Reasonably Likely to Occur From Non-Testing Operational Periods**

The DEIR's analysis of the air quality impacts from the BUG makes two improper assumptions. First, it assumes the BUG will be maintained and tested for no more than 50 hours per year even though SCAQMD permits up to 200 hours of testing per year.<sup>44</sup> As Dr. Clark explains, the "City's assumption that the BUG would operate at a substantially reduced rate ignores the legally acceptable threshold outlined in SCAQMD Rule 1470."<sup>45</sup> The City has therefore failed to properly measure the potential impact of DPM emissions from the BUG on the receptors nearby, and from BUG emissions of NOx. Thus, the DEIR's conclusion that there will be less than significant impacts from the BUG is unsupported.

Secondly, the DEIR fails to analyze all uses that stem from the reasonably foreseeable increase of generator use during Public Safety Power Shutoff ("PSPS") events and extreme heat events. The recent rise of Extreme Heat Events in the State has increased the amount of PSPS events and thus increased the amount of time generators are being run at hospitals.<sup>46</sup>

5621-005acp

Dr. Clark explains that EHEs “are defined as periods where in the temperatures throughout California exceed 100 degrees Fahrenheit.”<sup>47</sup> In 2021 alone, the Governor released one Executive Order regarding EHEs and one Proclamation for a State of Emergency with the intention to help avoid PSPS events.<sup>48</sup> CARB notes though that the number of Extreme Heat Events is likely to increase, and thereby PSPS events, with the continuing change in climate that the State is currently undergoing.<sup>49</sup>

According to the California Public Utilities Commission (“CPUC”) de-energization report<sup>50</sup> in October 2019, there were almost 806 PSPS events that impacted almost 973,000 customers (~7.5% of households in California) of which ~854,000 of them were residential customers, and the rest were commercial/industrial/medical baseline/other customers. CARB’s data also indicated that on average each of these customers had about 43 hours of power outage in October 2019.<sup>51</sup> Dr. Clark notes that CARB concluded that PSPS events in October of 2019 alone generated 126 tons of NOx, 8.3 tons or particulate matter, and 8.3 tons of DPM.<sup>52</sup>

Dr. Clark concludes that “power produced [from generators] during PSPS or extreme heat events is expected to come from [diesel] engines” and would result in increased DPM

While the City is not required to analyze the worst case scenarios, there is substantial evidence demonstrating that PSPS events and EHE are reasonably foreseeable events which will require the use of the BUG beyond mere testing operations. A detailed analysis of the emissions and noise from these additional

hours of BUG operation should be included in a revised EIR, including the extra time the BUG will need to run to account for EHEs and PSPS.

02-4  
Cont.

**3. There is Substantial Evidence Demonstrating that the BUG's Emissions Exceed 10 in One Million thus Resulting in Significant Operational Health Risk and Preventing SCAQMD from Issuing a Permit to Operate for the BUG**

Dr. Clark performed a quantified HRA for the BUG and found that the BUG's DPM emissions will result in a significant health risk which exceeds SCAQMD thresholds.

The DEIR assumes that use of the Project's BUG system will be restricted to maintenance and testing for 50 hours per year or less, the model calculates emissions of DPM of approximately 16.2 lbs. per year.<sup>53</sup> However, the DEIR failed to compare these emissions to SCAQMD thresholds. Dr. Clark compared the DPM emissions described in the DEIR to SCAQMD thresholds, and found that the BUG's DPM emissions would exceed thresholds, resulting in a significant impact. Dr. Clark explains that "[b]ased on the emission of 16.2 lbs. per year of DPM, the SCAQMD Risk Tool calculates a risk of 14.9 in 1,000,000 for residents living within 300 feet (91.44 meters) of the Project Site for 2 years to 32.3 in 1,000,000 for residents living within 300 feet (91.44 meters) of the Project Site for 30 years. Commercial workers located within 80 feet (25 meters) of the site face a potential health risk of 113 in 1,000,000. The model was set to assume T-BACT controls were in place for the generator."<sup>54</sup>

02-5

These numbers exceed those set forth by SCAQMD under Rule 1401.1 given that West Hollywood elementary is within 300 feet of the Project.<sup>55</sup> Dr. Clark's analysis provides substantial evidence demonstrating that the BUG's operational DPM emissions, even at minimal levels, will result in a significant health risk impact that the DEIR failed to analyze and mitigate and which would prevent SCAQMD from granting a permit for the BUG. The City must perform an HRA and if their results are consistent with those here mitigate them.

<sup>55</sup> DEIR 3.1-30.

5621-005acp

## **B. The DEIR Fails to Accurately Disclose and Mitigate Significant Noise Impacts**

The CEQA Guidelines require an EIR to consider “whether a project would result in...[g]eneration of a substantial temporary or periodic increase in ambient noise levels in the vicinity of the project . . .”<sup>56</sup> The DEIR’s noise analysis fails to accurately disclose the Project’s noise impacts for several reasons.

### **1. The DEIR Fails to Analyze All Relevant Noise-Sensitive Receptors**

The DEIR acknowledges that the Project’s construction noise impacts will be significant and unavoidable. However, as explained by Mr. Watry in his comments, the DEIR fails to consider the all relevant noise receptors of the Project’s construction noise.<sup>57</sup> Specifically, Mr. Watry explains that the DEIR’s analysis only contemplates a person standing in the middle of the passage way into the London Hotel, and not any of the hotel guests in rooms on the north side.<sup>58</sup> The DEIR’s calculations assume that the operable balcony doors on the north-facing façade would remain closed by potentially hundreds or thousands of guest over a three year construction time line.<sup>59</sup> This assumption is illogical at best, and unsupported by any evidence. As such the DEIR’s noise analyses fails to accurately describe the impacts to hotel patrons on the south side of the Project.

The DEIR failed to accurately assess the severity of the Project’s noise impacts on all sensitive receptors, and therefore lacks substantial evidence to support a conclusion that noise impacts have been mitigated to the greatest extent feasible. The DEIR must be revised and recirculated to correct these errors.

### **2. Mitigation Measures Will Not be as Effective as the DEIR Claims**

The DEIR concludes that noise impacts will be significant and unavoidable even with mitigation measures. To address this, the DEIR includes in its mitigation measures the installation of a 24-foot barrier to be erected during demolition and

02-6

02-7

---

<sup>56</sup> CEQA Guidelines, Appendix G, Sec. XII(d).

<sup>57</sup> DEIR p. 3.9-16.

<sup>58</sup> Watry Comments, p. 3.

<sup>59</sup> Watry Comments, p. 3.

5621-005acp

excavation/grading activities,<sup>60</sup> the barrier will do nothing to combat the noise impacts to multi-story residential buildings around the Project site.<sup>61</sup> The DEIR concludes that noise impacts to nearby receptors from construction of the Project will still remain significant with this mitigation.<sup>62</sup>

Mr. Watry concludes that the mitigation offered by the DEIR is wholly insufficient. He explains that a 24-foot high barrier is inadequate to mitigate noise impacts at the London Hotel south of the Project, which is multiple stories with numerous windows facing the Project Site.<sup>63</sup> Mr. Watry notes that the 24 foot barrier will only offer noise reduction through the fourth or fifth story and that the sixth through ninth stories will receive no benefit from the sound barrier. As a result, the noise mitigation proposed in the DEIR will be ineffective to reduce noise impacts, and is not adequate to support a statement of overriding consideration.

02-7  
Cont.

### **3. The DEIR Fails to Take All Reasonable Mitigation Measures to Reduce Significant Impacts**

As noted above, Mr. Watry concludes that the mitigation offered by the DEIR is wholly insufficient. He explains that a 24-foot high barrier is inadequate to mitigate noise impacts at the London Hotel south of the Project, which is multiple stories with numerous windows facing the Project Site.<sup>64</sup> Mr. Watry identified additional feasible mitigation that would further reduce the Project's construction noise impacts. Mr. Watry recommends that the DEIR's mitigation measure be revised to provide either plexiglass barriers or sound blankets attached to scaffolding for each story as the project is constructed in order to reduce noise above the 24-foot barrier.<sup>65</sup>

02-8

The DEIR's failure to implement all feasible mitigation measures to reduce construction noise impacts before declaring them significant and unavoidable is a separate CEQA violation. The DEIR concludes that construction noise impacts are significant and unavoidable. Therefore, the DEIR must adopt all feasible mitigation

5621-005aep

measures to reduce construction noise impacts to the greatest extent feasible, including but not limited to those recommended by Mr. Watry.<sup>66</sup>

### **C. The DEIR Fails to Adequately Analyze the Project's Cumulative Impacts**

CEQA requires the lead agency to include a reasonable and good faith analysis of cumulative impacts in an EIR.<sup>67</sup> The analysis must be sufficiently detailed to correspond to the severity of the impact and the likelihood that it will occur.<sup>68</sup> While an EIR may provide less detail in its cumulative impact analysis than for project-specific effects, the discussion must provide sufficient specificity to enable the agency to make findings that a project will, or will not, have a significant cumulative impact where the possible effects of the project are “individually limited but cumulatively considerable.”<sup>69</sup>

The DEIR's cumulative impact analysis fails to comply with CEQA in at least two major ways. First, the DEIR fails to analyze the cumulative health risk of the Project with other nearby projects that are within 1000 feet of the Project site and may undergo concurrent construction, including the Arts Club Project and 9034 Sunset, both of which have pending CEQA documents before the City.<sup>70</sup>

The DEIR explains that “the proposed project could combine with related projects in the immediate vicinity to produce a cumulative impact, namely, the Arts Club Project at 8920 Sunset Boulevard and a proposed hotel at 9034 Sunset Boulevard, both located within 1,000 feet of the project site (see projects #78 and #79 on Figure 4-1, respectively).”<sup>71</sup> However, as discussed above, the DEIR fails to quantify the Project's construction TAC emissions. Therefore, the DEIR lacks any analysis or supporting evidence to conclude that the Project's cumulative health risk impacts will be less than significant.

<sup>66</sup> *Covington*, 43 Cal.App.5th at 883.

<sup>67</sup> 14 §§ CCR 15130(a); 15065(a); 15355(b); *Cadiz Land Co., Inc. v. Rail Cycle, L.P.* (2000) 83 Cal.App.4th 74, 109.

<sup>68</sup> 14 CCR § 15130(b); *Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692, 729 (EIR inadequate for failure to include “some data” on cumulative groundwater impacts).

<sup>71</sup> See DEIR, p. 4-8.  
5621-005acp

02-8  
Cont.

02-9

Second, the DEIR relies on an impermissibly narrow geographical list of cumulative projects. CEQA Guidelines section 15130(b)(1) provides two options for analyzing cumulative impacts: (A) list “past, present, and probable future projects producing related or cumulative impacts, including, if necessary, those projects outside the control of the agency, or” (B) summarize “projection contained in an adopted local, regional or statewide plan, or related planning document that describes or evaluates conditions contributing to the cumulative effect.”<sup>72</sup>

The DEIR relies on a list of cumulative projects, which it explains include other projects in West Hollywood and in the neighboring City of Beverly Hills.<sup>73</sup> However, the DEIR completely omits any cumulative projects in the City of Los Angeles, which completely surrounds the City of West Hollywood<sup>74</sup> and has dozens of pending development projects:<sup>75</sup>

The DEIR must be revised and recirculated to analyze all cumulative projects in the City of Los Angeles and Los Angeles County generally which may have

relevant cumulative air quality, health risk, GHGs, noise, traffic and VMT impacts when combined with the Project's impacts.

02-9  
Cont.

#### IV. THE CITY LACKS SUBSTANTIAL EVIDENCE TO APPROVE THE PROJECT'S LOCAL LAND USE PERMITS AND THE VESTING TENTATIVE MAP

The Project requires a number of discretionary entitlements and related approvals under local City plans and codes, including: a Specific Plan Amendment; a Development Permit; a Demolition Permit;<sup>76</sup> a Conditional Use permit for alcohol sales; a Conditional Use Permit for the Viper Room; a Minor Conditional Use permit for a restaurant with alcohol sales; a Vesting Tentative Tract Map ("VTM"); a Sign Permit; and an Administrative Permit.<sup>77</sup>

Each permit requires the City to make findings regarding land use consistencies and/or environmental factors. As discussed throughout this letter, the DEIR fails to disclose the Project's potentially significant, unmitigated impacts on air quality, health risk, and noise. These impacts also create inconsistencies with Development Permit, the Conditional Use Permits, the Minor Conditional Use Permit, and the VTM which the DEIR fails to disclose and mitigate. As a result of these impacts, the City is unable to make the necessary findings under the City's municipal codes and State land use laws to approve the Project's local land use permits.

02-10

##### A. The City Cannot Make the Required Findings for a Development Permit, Conditional Use Permit, or Minor Conditional Use Permit

In order to approve the Project's conditional use permits, the City's Municipal Code requires the City to make a finding that the permit sought will not "otherwise constitute a menace to the public convenience, health, interest, safety, or general welfare of persons residing or working in the neighborhood of the proposed use."<sup>78</sup>

As discussed herein, the Project has potentially significant, unmitigated impacts on air quality, health risk, and noise that are likely to cause a menace to

---

<sup>76</sup> DEIR, p. 3-12.

<sup>77</sup> DEIR, pp. 3-12 to 3-13.

<sup>78</sup> West Hollywood Municipal Code sections 19.52.040, 19.48.050.  
5621-005acp

public health and welfare if not fully mitigated. In particular, the DEIR's proposed finding that the Project will result in significant and unavoidable construction noise impacts<sup>79</sup> demonstrates that the Project's construction noise will constitute an ongoing menace to local sensitive receptors from noise throughout the Project's 3-year construction period.

These unmitigated impacts render the Project inconsistent with the user permit standards set forth in the Municipal Code. The City therefore cannot make the necessary findings under the Code to approve the Project's Development Permit, Conditional Use Permits, and Minor Conditional Use Permits until these deficiencies in the DEIR are corrected, and until these impacts are fully mitigated.

**B. The City Cannot Make the Required Findings for a Vesting Tentative Map Due to the Substantial Environmental Damage Caused By the Project**

The Subdivision Map Act ("SMA") provides guidance as to the findings that the agency must make when approving a tentative map, and requires agencies to deny map approval if the project would result in significant environmental or public health impacts.

Government Code, section 66474, provides:

A legislative body of a city or county shall deny approval of a tentative map, or a parcel map for which a tentative map was not required, if it makes any of the following findings:

- (a) That the proposed map is not consistent with applicable general and specific plans as specified in Section 65451.
- (b) That the design or improvement of the proposed subdivision is not consistent with applicable general and specific plans.
- (c) That the site is not physically suitable for the type of development.
- (d) That the site is not physically suitable for the proposed density of development.

---

<sup>79</sup> DEIR, p. 3.9-18.  
5621-005acp

**(e) That the design of the subdivision or the proposed improvements are likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat.**

**(f) That the design of the subdivision or type of improvements is likely to cause serious public health problems.**

(g) That the design of the subdivision or the type of improvements will conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision. In this connection, the governing body may approve a map if it finds that alternate easements, for access or for use, will be provided, and that these will be substantially equivalent to ones previously acquired by the public. This subsection shall apply only to easements of record or to easements established by judgment of a court of competent jurisdiction and no authority is hereby granted to a legislative body to determine that the public at large has acquired easements for access through or use of property within the proposed subdivision.

02-10  
Cont.

(Emphasis added.)

Furthermore, where an EIR has been prepared, and demonstrates that there will be significant and unavoidable environmental impacts, a Vesting Tentative Map (“VTM”) can be certified only if the decision makers issue a statement of overriding considerations, per Government Code, section 66474.01:

Notwithstanding subdivision (e) of Section 66474, a local government may approve a tentative map, or a parcel map for which a tentative map was not required, if an environmental impact report was prepared with respect to the project and a finding was made pursuant to paragraph (3) of subdivision (a) of Section 21081 of the Public Resources Code that specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the environmental impact report.<sup>80</sup>

---

<sup>80</sup> Gov. Code, § 66474.01.  
5621-005acp

Government Code, section 66474, subsections (e) and (f) implicate CEQA, and prohibit decision makers from approving a tract map where the project is “likely to cause substantial environmental damage” or “cause serious public health problems.”<sup>81</sup> And the City is unable to make a statement of overriding considerations for the Project under CEQA because the City has not mitigated the Project’s construction noise impacts to the greatest extent feasible, and has not demonstrated that the Project’s benefits outweigh its costs, including providing employment opportunities for highly trained workers.<sup>82</sup>

02-10  
Cont.

Here, approval of the project is likely to cause substantial impacts to air quality, public health, and noise. The City’s decision makers therefore cannot make the necessary SMA findings based on the record before it. The City must correct the errors in the DEIR, adopt adequate mitigation measures to reduce impacts to less than significant levels, and must provide substantial evidence supporting the Project’s proposed statement of overriding considerations to address the Project’s outstanding, unmitigated significant impacts before the City can approve the VTTM.

**V. THE STATEMENT OF OVERRIDING CONSIDERATION MUST CONSIDER WHETHER THE PROJECT PROVIDES EMPLOYMENT OPPORTUNITIES FOR HIGHLY TRAINED WORKERS**

The DEIR acknowledges that the Project will have significant and unavoidable environmental impacts related to on-site noise during construction.<sup>83</sup> Therefore, in order to approve the Project, CEQA requires the City to adopt a statement of overriding considerations, providing that the Project’s overriding benefits outweigh its environmental harm.<sup>84</sup> An agency’s determination that a project’s benefits outweigh its significant, unavoidable impacts “lies at the core of the lead agency’s discretionary responsibility under CEQA.”<sup>85</sup>

02-11

The City must set forth the reasons for its action, pointing to supporting substantial evidence in the administrative record.<sup>86</sup> This requirement reflects the

<sup>81</sup> Gov. Code, § 66474, subds. (e), (f).

<sup>82</sup> Pub. Res. Code § 21081(a)(3), (b).

<sup>83</sup> DEIR, p. 3.9-18.

<sup>84</sup> CEQA Guidelines, § 15043.

<sup>85</sup> *Laurel Heights Improvement Assn. v. Regents of University of California* (1988) 47 Cal.3d 376, 392.

<sup>86</sup> Pub. Resources Code, § 21081, subd. (b); CEQA Guidelines, § 15093, subds. (a) and (b); *Cherry Valley Pass Acres & Neighbors v. City of Beaumont* (2010) 190 Cal.App.4th 316, 357.

5621-005acp

policy that public agencies must weigh a project's benefits against its unavoidable environmental impacts, and may find the adverse impacts acceptable only if the benefits outweigh the impacts.<sup>87</sup> A statement of overriding considerations is legally inadequate if it fails to accurately characterize the relative harms and benefits of a project.<sup>88</sup>

In order to approve the Project, the City must make findings supported by substantial evidence that the Project's significant, unavoidable impacts are outweighed by the Project's benefits to the community. CEQA specifically references employment opportunities for highly trained workers as a factor to be considered in making the determination of overriding benefits.<sup>89</sup> Currently, there is not substantial evidence in the record showing that the Project's significant, unavoidable impacts are outweighed by benefits to the community. For example, there is no evidence in the record that the Applicant has made any commitments to employ graduates of state approved apprenticeship programs or taken other steps to ensure employment of highly trained and skilled workers on Project construction, an action contemplated by CEQA Section 21081. Absent substantial evidence in the record demonstrating that the Project's benefits outweigh its environmental costs, the City would not fulfill its obligations under CEQA if it adopted a statement of overriding considerations and approved the Project.

We urge the City to prepare and circulate a revised DEIR which identifies the Project's potentially significant impacts, requires all feasible mitigation measures and analyzes all feasible alternatives to reduce impacts to a less than significant level. If a Statement of Overriding Considerations is adopted for the Project, we urge the City to require the Applicant to provide the City with substantial evidence demonstrating that the Project will result in employment opportunities for highly trained workers.

## VI. CONCLUSION

For the reasons discussed above, the DEIR for the Project remains wholly inadequate under CEQA. It must be thoroughly revised to provide legally adequate analysis of, and mitigation for, all of the Project's potentially significant impacts. These revisions will necessarily require that the DEIR be recirculated for public

**Subject: Comments on Draft Environmental Impact Report  
(DEIR) For 8850 Sunset Boulevard Project State  
Clearinghouse No. 2019090447**

---

Dear Mr. Key:

At the request of Adams Broadwell Joseph & Cardozo (ABJC), Clark and Associates (Clark) has reviewed materials related to the above referenced project.

Clark's review of the materials in no way constitutes a validation of the conclusions or materials contained within the plan. If we do not comment on a specific item, this does not constitute acceptance of the item.

**General Comments:**

The proposed project is located in a dense portion of Los Angeles. The sensitive receptors include residences (located less than 180 feet to the southeast of the Project site on Harrat Street) and a school (located less than 300 feet to the southwest of the Project site). No effort has been made to quantify the potential health impacts from construction activities or operational activities from the site on these sensitive receptors. Additionally, the City has failed to assess the cumulative impacts from the construction and operational phases of the Project with existing with other nearby projects that are within 1000 feet of the Project site and may undergo concurrent construction – including the Arts Club Project and 9034 Sunset, both of which have pending CEQA documents before the City.

02-13

The project site is located in the City of West Hollywood (the City). The City covers 1.9 square miles in the Los Angeles Metropolitan Area. The City is located within the County of Los Angeles (County), approximately 7.5 miles northwest of downtown Los Angeles. Regional access to the project site is provided via U.S. Route 101 (US 101, Hollywood Freeway), located approximately 4.4 miles east of the project site.

The proposed project site is located along the south side of Sunset Boulevard in the City of West Hollywood. The approximately 39,983-square foot project site is bound by Sunset Boulevard to the north, Larrabee Street to the east, the London Hotel to the south, and San Vicente Boulevard to the west. The addresses associated with the project site consist of 8850–8878 Sunset Boulevard and 1025–1029 Larrabee Street, West Hollywood. The project site is comprised of eight Assessor Parcel Numbers (APNs): 4339-017-001, 4339-017-002, 4339-017-003, 4339-017-004, 4339-017-005, 4339-017-006, 4339-017-007, and 4339-017-008.

The project site is currently developed with four one- and two-story commercial buildings totaling approximately 21,000 square feet. The existing buildings are currently occupied by the Viper Room nightclub, two liquor stores, two restaurants, a barbershop, a professional office, and two retail stores. The project site also has existing surface parking lots totaling 27,450 square feet and four existing billboards. The existing commercial buildings appear to be one-story along Sunset Boulevard with the second story daylighting in the back (south side) due to the slope of the project site. The surface parking lots are located on the southern portion of the project site. On the east end of the project site, located above the liquor store at 8850 Sunset Boulevard, is a roof-mounted, east-facing 14-foot by 48-foot billboard. The billboard is 54 feet above Sunset Boulevard and is visible to westbound traffic. On the west end of the project site, there are three roof-mounted billboards. One east-facing 14-foot by 48-foot billboard is 54 feet above Sunset Boulevard, visible to westbound traffic on Sunset Boulevard. One west-facing 14-foot by 48-foot billboard is 45 feet above Sunset Boulevard, visible to eastbound traffic on Sunset Boulevard. One south-facing 14-foot by 48-foot billboard is 41 feet above Sunset Boulevard, visible to northbound traffic on San Vicente Boulevard.

The proposed project consists of the demolition of all existing improvements and construction and operation of a new mixed-use hotel and residential building on a property along the south side of Sunset Boulevard, extending the full city block between Larrabee Street and San Vicente Boulevard, in the City of West Hollywood (Project Site). The new mixed-use hotel and residential building would

02-13  
Cont.

contain approximately 240,000 square feet of floor area (420,000 gross square feet including below grade components) and 15 stories (approximately 200 feet measured from the lowest point of the site on the southwest corner and 189 feet measured from Sunset Boulevard) and would incorporate new digital and static billboard signage on Sunset Boulevard. The commercial portion of the project would include 115 hotel guestrooms with ancillary uses such as meeting rooms, spa/gym, outdoor pools, restaurants, lounges, and retail ancillary to the hotel, as well as a new nightclub space for the Viper Room. A publicly accessible outdoor café and terrace with an adjacent landscaped green roof garden (that itself would not be accessible) would be provided three to four stories above Sunset Boulevard. The residential portion would provide 31 market-rate condominiums and 10 income-restricted units with residential amenities including a gym, movie screening room, and an outdoor pool. The proposed project also would include an emergency helicopter landing facility for police and fire services only, and five subterranean levels, four of which would primarily be used as a parking garage, providing 240 spaces.

Land uses surrounding the project site include commercial and residential uses. To the immediate north of the project site, on the north side of Sunset Boulevard, are commercial uses located in one- and two-story buildings. Multi-family residential buildings are further to the north of Sunset Boulevard, along Larrabee Street and North Clark Street. The multi-family residential buildings range in height from approximately two stories to five stories. However, the project area slopes up towards the north, and multi-family residential uses to the north appear greater in height from the project site level. At the northeast corner of Larrabee Street are a four-story office building, one-story commercial building, and surface parking lot. To the immediate east of the project site, there are several one to two-story commercial buildings, and a four-story multi-family residential building. Further east, along Nellis Street, are several multi-story residential uses and a seven-story office building that fronts Sunset Boulevard. The southern project boundary abuts a property that is developed with the London Hotel, which is an 11-story luxury hotel with a rooftop pool. To the west of the project site is a gas station and mini-mart, one- and two-story commercial buildings, and two- and three-story multi-family residential buildings. Transit stops are located immediately adjacent to the project site, at the intersection of Sunset Boulevard and San Vicente Boulevard. Additionally, the project site is located approximately 0.4 mile from a major transit stop at the intersection of San Vicente Boulevard and Santa Monica Boulevard.

## Specific Comments:

### 1. The City's Air Quality Analysis Fails To Include A Quantitative Health Risk Analysis Of The Impacts Of Toxic Air Contaminants From The Construction Phase And Operational Phase Of The Project For The Nearest Sensitive Receptor(s)

The City has failed to conduct a numerical health risk analysis (HRA) for Project. The DEIR states that, for the purposes of assessing pollution concentrations upon sensitive receptors, the SCAQMD has developed LSTs that are based on the number of pounds of emissions per day that can be generated by a project that would cause or contribute to adverse localized air quality impacts.<sup>1</sup> For the Criteria Pollutants assessed under CEQA, this is correct. For toxic air contaminants (TACs), there are no LSTs, nor levels of significance based on the pounds per day. Instead, the determination of a significance threshold is based on a **quantitative risk analysis** that requires the City to perform a multistep, quantitative health risk analysis.

TACs, including diesel particulate matter (DPM)<sup>2</sup>, contribute to a host of respiratory impacts and may lead to the development of various cancers. Failing to quantify those impacts places the community at risk for unwanted adverse health impacts. *Even brief exposures to the TACs could lead to the development of adverse health impacts over the life of an individual.*

Diesel exhaust contains nearly 40 toxic substances, including TACs and may pose a serious public health risk for residents in the vicinity of the facility. TACs are airborne substances that are capable of causing short-term (acute) and/or long-term (chronic or carcinogenic, i.e., cancer causing) adverse human health effects (i.e., injury or illness). TACs include both organic and inorganic chemical substances. The current California list of TACs includes approximately 200 compounds, including particulate emissions from diesel-fueled engines.

---

<sup>1</sup> City of West Hollywood. 2021. 8850 Sunset Boulevard Project, Draft Environmental Impact Report, State Clearinghouse No. 2019090447. Prepared by City of West Hollywood. pg 3.1-19

<sup>2</sup> Because DPM is a TAC, it is a different air pollutant than criteria particulate matter (PM) emissions such as PM10, PM2.5, and fugitive dust. DPM exposure causes acute health effects that are different from the effects of exposure to PM alone.

02-13  
Cont.

Diesel exhaust has been linked to a range of serious health problems including an increase in respiratory disease, lung damage, cancer, and premature death.<sup>3,4,5</sup> Fine DPM is deposited deep in the lungs in the smallest airways and can result in increased respiratory symptoms and disease; decreased lung function, particularly in children and individuals with asthma; alterations in lung tissue and respiratory tract defense mechanisms; and premature death.<sup>6</sup> Exposure to DPM increases the risk of lung cancer. It also causes non-cancer effects including chronic bronchitis, inflammation of lung tissue, thickening of the alveolar walls, immunological allergic reactions, and airway constriction.<sup>7</sup> DPM is a TAC that is recognized by state and federal agencies as causing severe health risk because it contains toxic materials, unlike PM<sub>2.5</sub> and PM<sub>10</sub>.<sup>8</sup>

The inherent toxicity of the TACs requires the City to first quantify the concentration released into the environment at each of the sensitive receptor locations through air dispersion modeling, calculate the dose of each TAC at that location, and quantify the cancer risk and hazard index for each of the chemicals of concern. Following that analysis, then the City can make a determination of the relative significance of the emissions.

There are several sensitive receptors in the direct vicinity of the Project site, including residences and a school located within 180 to 300 feet, respectively, of the Project site. These receptors would be exposed to TACs released during Project construction and operation, including DPM. No effort is made in the DEIR to quantify the potential health impacts from DPM generated by construction activities or operational activities from the Project on these sensitive receptors. The DEIR

<sup>6</sup> California Air Resources Board, Initial Statement of Reasons for Rulemaking, Proposed Identification of Diesel Exhaust as a Toxic Air Contaminant, Staff Report, June 1998.

<sup>7</sup> Findings of the Scientific Review Panel on The Report on Diesel Exhaust as adopted at the Panel's April 22, 1998 Meeting.

<sup>8</sup> Health & Safety Code § 39655(a) (defining "toxic air contaminant" as air pollutants "which may cause or contribute to an increase in mortality or in serious illness, or which may pose a present or potential hazard to human health. A substance that is listed as a hazardous air pollutant pursuant to subsection (b) of Section 112 of the federal act (42 U.S.C. Sec. 7412 (b)) is a toxic air contaminant.")

incorrectly states that construction DPM emissions from construction vehicles and haul trucks would be below SCAQMD thresholds (p. 3.1-32), and assumes that DPM emissions from the diesel backup generator would not exceed thresholds, without quantifying the DPM emissions from either. The DEIR's statements are not based on substantial evidence because the City did not quantify DPM emissions, only criterial pollutant emissions.<sup>9</sup> The City's failure to perform such an analysis is clearly a major flaw in the DEIR and may be placing the residents of the adjacent structures at risk from the construction and operational phases of the Project.

**2. Given The Proximity Of Sensitive Receptors To The Site And The Nature of The Toxic Air Contaminants Emitted, The Operational Emissions From The Back Up Generator Will Cause A Significant Health Risk To Residents Near The Project Site.**

According to the DEIR<sup>10</sup>, the proposed project would not result in non-permitted stationary sources that would emit substantial air pollutants or TACs. Routine testing and maintenance of the diesel emergency generator would result in emissions of DPM. However, the applicant would be required to work with the SCAQMD in order to obtain permits to operate. As part of the permit process, the SCAQMD will evaluate compliance with Rule 1401, New Source Review of Toxic Air Contaminants, and Rule 1401.1, Requirements for New and Relocated Facilities Near Schools. Rule 1401.1 identifies acceptable risk levels and emissions control requirements for new and modified facilities that may emit additional TACs. Under Rule 1401, permits to operate may not be issued when emissions of TACs result in a maximum incremental cancer risk greater than 1 in 1 million without application of best available control technology for toxics (TBACT), or a maximum incremental cancer risk greater than 10 in 1 million with application of T-BACT, or if the cumulative cancer burden (i.e., increase in cancer cases in the population) from all TACs emitted from a single piece of equipment exceeds 0.5, or a health hazard index (chronic and acute) greater than 1.0 (SCAQMD 2017b).

02-13  
Cont.

---

<sup>9</sup> See e.g. DEIR, Table 3.1-7 (Estimated Maximum Daily Construction Emissions), quantifying VOCs, NOx, CO, SOX, PM10 and PM2.5, but not DPM; Table 3.1-8 (Estimated Maximum Daily Operational Criteria Air Pollutant Emissions), quantifying VOCs, NOx, CO, SOX, PM10 and PM2.5, but not DPM.

<sup>10</sup> City of West Hollywood. 2021. 8850 Sunset Boulevard Project, Draft Environmental Impact Report, State Clearinghouse No. 2019090447. Prepared by City of West Hollywood. pg 3.1-25

According to the DEIR, the proposed emergency generator would be operated for a limited time (50 hours or less per year for testing and maintenance) and would be required to meet the required emissions rates for DPM at the time of installation, and must be demonstrated to meet the requirements of all applicable rules before the SCAQMD can issue the permits to operate stationary source equipment.

Using the SCAQMD's Rule 1401 Risk Assessment Programs Risk Tool V1.103 software, it is possible to generate a site-specific screening level HRA for emissions from the back-up generator (BUG). Assuming the system is restricted to maintenance and testing for 50 hours per year or less, the model calculates emissions of DPM of approximately 16.2 lbs per year. This value is the same as the amount reported in the DEIR for the operational analysis of the site.

According to the DEIR, Level B2 of the proposed building will house the emergency generator, boilers, and high-efficiency chillers to support building operations. Cooling towers for the building would be located on the roof. This will place the base of the generator 38 feet below grade. Assuming the generator's emissions will be vented at the base of Level 2 (1<sup>st</sup> level above ground level), that means the vent is 18 feet above grade level. For the Risk Tool inputs, the stack height (exit point of the generator) was set to 18 feet above grade.

Based on the emission of 16.2 lbs per year of DPM, the SCAQMD Risk Tool calculates a risk of 14.9 in 1,000,000 for residents living within 300 feet (91.44 meters) of the Project Site for 2 years to 32.3 in 1,000,000 for residents living within 300 feet (91.44 meters) of the Project Site for 30 years. Commercial workers located within 80 feet (25 meters) of the site face a potential health risk of 113 in 1,000,000. The model was set to assume T-BACT controls were in place for the generator. All of the results for this analysis are presented in Exhibit B to this letter. The City must address this significant error in their air quality analysis in a revised EIR.

**3. The City's CalEEMOD Analysis Of Emissions From The Back Up Generator (BUG)  
On-Site Must Include The Testing And Non-Testing (Operational) Impacts Of The  
BUG**

According to SCAQMD Rules 1110.2, 1470, back-up generators (BUGs) are allowed to operate for up to 200 hours per year and maintenance cannot exceed more than 50 hours per year. The assumption by the City that maintenance and testing of the BUG would not exceed 50 hours per year is unsupported. The City must revise its air quality analysis to include the use of BUGs onsite in a revised EIR.

O2-13  
Cont.

In addition to the testing emissions, the air quality analysis must include the substantial increase in operational emissions from BUGs in the Air Basin due to unscheduled events, including but not limited to Public Safety Power Shutoff (PSPS) events and extreme heat events. Extreme heat events are defined as periods where in the temperatures throughout California exceed 100 degrees Fahrenheit.<sup>11</sup> From January, 2019 through December, 2019, Southern California Edison reported 158 of their circuits underwent a PSP event<sup>12</sup>. In Los Angeles County, two circuits had 4 PSPS events during that period lasting an average of 35 to 38 hours. The total duration of the PSPS events lasted between 141 hours to 154 hours in 2019. In 2021, the Governor of California declared that, during extreme heat events, the use of stationary generators shall be deemed an emergency use under California Code of Regulations (CCR), title 17, section 93115.4 sub. (a) (30) (A)(2). The number of Extreme Heat Events is likely to increase in California with the continuing change in climate the State is currently undergoing.

Power produced during PSPS or extreme heat events is expected to come from engines regulated by CARB and California's 35 air pollution control and air quality management districts (air districts).<sup>13</sup> Of particular concern are health effects related to emissions from diesel back-up engines. Diesel particulate matter (DPM) has been identified as a toxic air contaminant, composed of carbon particles and numerous organic compounds, including over forty known cancer-causing organic substances. The majority of DPM is small enough to be inhaled deep into the lungs and make them more susceptible to injury.

According to the California Public Utilities Commission (CPUC) de-energization report<sup>14</sup> in October 2019, there were almost **806 PSPS events** (emphasis added) that impacted almost 973,000 customers (~7.5% of households in California) of which ~854,000 of them were residential customers, and the rest were commercial/industrial/medical baseline/other customers. CARB's data also

<sup>13</sup> CARB. 2019. Use of Back-up Engines For Electricity Generation During Public Safety Power Shutoff Events. October 25, 2019.

<sup>14</sup> <https://www.cpuc.ca.gov/deenergization/> as cited in CARB, 2020. Potential Emission Impact of Public Safety Power Shutoff (PSPS), Emission Impact: Additional Generator Usage associated With Power Outage..

02-13  
Cont.

indicated that, on average, each of these customers had about 43 hours of power outage in October 2019.<sup>15</sup> Using the actual emission factors for each diesel BUG engines in the air district's stationary BUGs database, CARB staff calculated that the 1,810 additional stationary generators (like those proposed for the Project) running during a PSPS in October 2019 generated 126 tons of NOx, 8.3 tons or particulate matter, and 8.3 tons of DPM.

For every PSPS or Extreme Heat Event (EHE) triggered during the operational phase of the project, significant concentrations of DPM will be released that are not accounted for in the City's analysis. In 2021, two EHEs have been declared so far. For the June 17, 2021 Extreme Heat Event, the period for which stationary generator owners were allowed to use their BUGs lasted 48 hours. For the July 9, 2021 EHE, the period for which stationary generator owners were allowed to use their BUGs lasted 72 hours. These two events would have tripled the calculated DPM emissions from the Project if only the 50 hours of testing that is allowed were quantified for the Project's operational emissions. An EIR must be written for the Project that includes an analysis of the additional operation of the BUG that will occur at the project site that is not accounted for in the current air quality analysis.

#### **4. The Potential Health Risk From The BUG's DPM Emissions May Exceed 120 In One Million**

Assuming the BUG is operated an additional 150 hours per year, for a total of 200 hours of operation per year, the BUG could be responsible for approximately 65 lbs of DPM per year of operation. Using the same model parameters as described above, the SCAQMD's Rule 1401 Risk Assessment Programs Risk Tool V1.103 software calculates a risk for residents within 300 feet of the site as 129 in 1,000,000. For staff and faculty of the nearby elementary school and for commercial workers located within 80 feet (25 meters) of the site, the potential health risk calculated from DPM emission is 451 in 1,000,000. These totals exceed both the SCAQMD TAC maximum incremental cancer risk significance threshold of 10 in one million,<sup>16</sup> and the Rule 1401 thresholds of 1 in 1 million (without TBACT) and 10 in 1 million with application of T-BACT, resulting in a significant health risk that the DEIR fails to disclose or mitigate. The City must revise its air quality analysis to include the use of BUGs onsite in a revised EIR.

---

<sup>16</sup> See DEIR Table 3.1-4 (SCAQMD Air Quality Significance Thresholds).

02-13  
Cont.

## Conclusion

The facts identified and referenced in this comment letter lead me to reasonably conclude that the Project could result in significant unmitigated impacts if the DEIR is approved. The City must re-evaluate the significant impacts identified in this letter by requiring the preparation of a revised environmental impact report.

Sincerely,

JAMES J. J. CLARK, Ph.D.

**James J. J. Clark, Ph.D.**

*Principal Toxicologist*  
**Toxicology/Exposure Assessment Modeling**  
**Risk Assessment/Analysis/Dispersion Modeling**

**Education:**

Ph.D., Environmental Health Science, University of California, 1995  
M.S., Environmental Health Science, University of California, 1993  
B.S., Biophysical and Biochemical Sciences, University of Houston, 1987

**Professional Experience:**

Dr. Clark is a well-recognized toxicologist, air modeler, and health scientist. He has 30 years of experience in researching the effects of environmental contaminants on human health including environmental fate and transport modeling (SCREEN3, AEROMOD, ISCST3, Johnson-Ettinger Vapor Intrusion Modeling, RESRAD, GENII); exposure assessment modeling (partitioning of contaminants in the environment as well as PBPK modeling); conducting and managing human health risk assessments for regulatory compliance and risk-based clean-up levels; and toxicological and medical literature research.

Significant projects performed by Dr. Clark include the following:

**LITIGATION SUPPORT**

**Case: Pamela Butler Vs. Mallinckrodt, Inc. & Cotter Corporation. Case No.: 4:2018cv01701 United States District Court Eastern District of Missouri Eastern Division**

**Case: Kenneth Edward Koterba Vs. Mallinckrodt, Inc. & Cotter Corporation. Case No.: 4:2018cv01702 United States District Court Eastern District of Missouri Eastern Division**

**Case: Anthony Hines Vs. Mallinckrodt, Inc. & Cotter Corporation. Case No.: 4:2018cv01703 United States District Court Eastern District of Missouri Eastern Division**

02-13  
Cont.

**Case: Emery David Walick, III Vs. Mallinckrodt, Inc. & Cotter Corporation. Case No.: 4:2018cv01704 United States District Court Eastern District of Missouri Eastern Division**

**Client: Humphrey, Farrington & McClain, P.C., Independence, Missouri**

Dr. Clark performed a historical dose reconstruction for community members exposed to radioactive waste released into the environment from the St. Louis Air Port Site (SLAPS) and the Hazelwood Interim Storage Site (HISS). The releases resulted in impacts to soils, sediments, surface waters, and groundwater in the vicinity of the SLAPS and HISS sites. The analysis was performed in general accordance with the methods outlined by the Agency for Toxic Substances Control (ATSDR) for assessing radiation doses from historical source areas in North St. Louis County, Missouri.

**Case Result: Trial Pending**

**Case: Don Strong, et al. vs. Republic Services, Inc., Bridgeton Landfill, LLC, vs. Cotter Corporation, N.S.L., Case No.: 17SL-CC01632-01 Circuit Court of St. Louis County, State of Missouri, Division 17**

**Client: Humphrey, Farrington & McClain, P.C., Independence, Missouri**

Dr. Clark performed a historical dose reconstruction for community members from radiologically impacted material (RIM) releases from the adjacent West Lake Landfill. The analysis was performed in general accordance with the methods outlined by the Agency for Toxic Substances Control (ATSDR) for assessing radiation doses from historical source areas in North St. Louis County, Missouri.

**Case Result: Settlement in favor of plaintiff.**

**Case: Arnold Goldstein, Hohn Covas, Gisela Janette La Bella, et al.. vs. Exxon Mobil Corporation, PBF Energy Inc., Torrance Refining Company LLC, et al., Case No.: 2:17-cv-02477DSF United States District Court for the Central District of California**

**Client: Sher Edlging, LLP, San Francisco, California and Matern Law Group , PC., El Segundo, California**

02-13  
Cont.

Dr. Clark performed a historical dose reconstruction for community members from an active 700 acre petroleum refinery in Los Angeles. The analysis included a multi-year dispersion model was performed in general accordance with the methods outlined by the U.S. EPA and the SCAQMD for assessing the health impacts in Torrance, California. The results of the analysis are being used as the basis for injunctive relief for the communities surrounding the refinery.

**Case Result: Trial Pending**

**Case: Scott D. McClurg, et al. v. Mallinckrodt Inc. and Cotter Corporation.**

**Lead Case No.: 4:12CV00361 AGF United States District Court Eastern District of Missouri Eastern Division**

**Client: Environmental Law Group, Birmingham, AL.**

Dr. Clark performed a historical dose reconstruction for community members and workers exposed to radioactive waste released into the environment from the St. Louis Air Port Site (SLAPS) and the Hazelwood Interim Storage Site (HISS). The releases resulted in impacts to soils, sediments, surface waters, and groundwater in the vicinity of the SLAPS and HISS sites. The analysis included the incorporation of air dispersion modeling across the community to determine ground-level air concentrations and deposition of thorium and uranium isotopes and their respective daughter products. The dose reconstruction considered all relevant pathways to determine total doses of radiation received across the community from 1946 through 2017.

**Case Result: Settlement in favor of plaintiff.**

**Case: Mary Ann Piccolo V. Headwaters Incorporated, et al. Seventh Judicial Court In and For Carbon County, State of Utah. Case No. 130700053**

**Client: Law Offices of Roy L. Mason. Annapolis, MD**

Dr. Clark performed a dose assessment of an individual occupationally exposed to metals and silica from fly ash who later developed cancer. A review of the individual's medical and occupational history was performed to prepare opinions regarding his exposure and later development of cancer.

02-13  
Cont.

**Case Result: Settlement in favor of plaintiff.**

**Case: Tracey Coleman V. Headwaters Incorporated, et al. Seventh Judicial Court  
In and For Carbon County, State of Utah. Case No. 140902847**

**Client: Law Offices of Roy L. Mason. Annapolis, MD**

Dr. Clark performed a dose assessment of an individual occupationally exposed to metals and silica from fly ash who later developed cancer. A review of the individual's medical and occupational history was performed to prepare opinions regarding his exposure and later development of cancer.

**Case Result: Settlement in favor of plaintiff.**

**Case: David Dominguez and Amanda Dominguez V. Cytec Industries, Inc et al.  
Superior Court of the State Of California for the County Of Los Angeles – Central  
Civil West. Civil Action. BC533123**

**Client: Rose, Klein, Marias, LLP, Long Beach, California**

Dr. Clark performed a toxicological assessment of an individual occupationally exposed to hexavalent chromium who later developed cancer. A review of the individual's medical and occupational history was performed to prepare opinions regarding her exposure and later development of cancer.

**Case Result: Settlement in favor of plaintiff.**

## **SELECTED AIR MODELING RESEARCH/PROJECTS**

### **Client(s) – Multiple**

Indoor Air Evaluations, California: Performed multiple indoor air screening evaluations and risk characterizations consistent with California Environmental Protection Agency's (Cal/EPA) Department of Toxic Substances Control (DTSC) and Regional Water Quality Control Board (RWQCB) methodologies. Characterizations included the use of DTSC's modified Johnson & Ettinger Model and USEPA models, as well as the attenuation factor model currently advocated by Cal/EPA's Office of Environmental Health and Hazard Assessment (OEHHA).

02-13

**Client – Confidential**

Dr. Clark performed a comprehensive evaluation of criteria pollutants, air toxins, and particulate matter emissions from a carbon black production facility to determine the impacts on the surrounding communities. The results of the dispersion model were used to estimate acute and chronic exposure concentrations to multiple contaminants and were be incorporated into a comprehensive risk evaluation.

**Client – Confidential**

Dr. Clark performed a comprehensive evaluation of air toxins and particulate matter emissions from a railroad tie manufacturing facility to determine the impacts on the surrounding communities. The results of the dispersion model have been used to estimate acute and chronic exposure concentrations to multiple contaminants and have been incorporated into a comprehensive risk evaluation.

**EMERGING/PERSISTENT CONTAMINANT RESEARCH/PROJECTS**

**Client: City of Santa Clarita, Santa Clarita, California**

Dr. Clark managed the oversight of the characterization, remediation and development activities of a former 1,000 acre munitions manufacturing facility for the City of Santa Clarita. The site is impacted with a number of contaminants including perchlorate, unexploded ordinance, and volatile organic compounds (VOCs). The site is currently under a number of regulatory consent orders, including an Immanent and Substantial Endangerment Order. Dr. Clark assisted the impacted municipality with the development of remediation strategies, interaction with the responsible parties and stakeholders, as well as interfacing with the regulatory agency responsible for oversight of the site cleanup.

**Client – Confidential, Los Angeles, California**

Dr. Clark is performing a comprehensive review of the potential for pharmaceuticals and their by-products to impact groundwater and surface water supplies. This evaluation will include a review if available data on the history of pharmaceutical production in the United States; the chemical characteristics of various pharmaceuticals; environmental fate and transport; uptake by xenobiotics; the potential effects of pharmaceuticals on water treatment systems; and the potential threat to public health. The results of the evaluation may be used as a briefing tool for non-public health professionals.

02-13

## **PUBLIC HEALTH/TOXICOLOGY**

### **Client: Brayton Purcell, Novato, California**

Dr. Clark performed a toxicological assessment of residents exposed to methyl-tertiary butyl ether (MTBE) from leaking underground storage tanks (LUSTs) adjacent to the subject property. The symptomology of residents and guests of the subject property were evaluated against the known outcomes in published literature to exposure to MTBE. The study found that residents had been exposed to MTBE in their drinking water; that concentrations of MTBE detected at the site were above regulatory guidelines; and, that the symptoms and outcomes expressed by residents and guests were consistent with symptoms and outcomes documented in published literature.

### **Client: Covanta Energy, Westwood, California**

Evaluated health risk from metals in biosolids applied as soil amendment on agricultural lands. The biosolids were created at a forest waste cogeneration facility using 96% whole tree wood chips and 4 percent green waste. Mass loading calculations were used to estimate Cr(VI) concentrations in agricultural soils based on a maximum loading rate of 40 tons of biomass per acre of agricultural soil. The results of the study were used by the Regulatory agency to determine that the application of biosolids did not constitute a health risk to workers applying the biosolids or to residences near the agricultural lands.

### **Client: Kaiser Venture Incorporated, Fontana, California**

Prepared PBPK assessment of lead risk of receptors at a 1,100-acre former steel mill. This evaluation was used as the basis for granting closure of the site by lead regulatory agency.

## **RISK ASSESSMENTS/REMEDIAL INVESTIGATIONS**

### **Kaiser Ventures Incorporated, Fontana, California**

Prepared health risk assessment of semi-volatile organic chemicals and metals for a fifty-year old wastewater treatment facility used at a 1,100-acre former steel mill. This evaluation was used as the basis for granting closure of the site by lead regulatory agency.

02-13  
Cont.

### **ANR Freight - Los Angeles, California**

Prepared a comprehensive Preliminary Endangerment Assessment (PEA) of petroleum hydrocarbon and metal contamination of a former freight depot. This evaluation was as the basis for reaching closure of the site with lead regulatory agency.

### **Kaiser Ventures Incorporated, Fontana, California**

Prepared comprehensive health risk assessment of semi-volatile organic chemicals and metals for 23-acre parcel of a 1,100-acre former steel mill. The health risk assessment was used to determine clean up goals and as the basis for granting closure of the site by lead regulatory agency. Air dispersion modeling using ISCST3 was performed to determine downwind exposure point concentrations at sensitive receptors within a 1 kilometer radius of the site. The results of the health risk assessment were presented at a public meeting sponsored by the Department of Toxic Substances Control (DTSC) in the community potentially affected by the site.

### **Unocal Corporation - Los Angeles, California**

Prepared comprehensive assessment of petroleum hydrocarbons and metals for a former petroleum service station located next to sensitive population center (elementary school). The assessment used a probabilistic approach to estimate risks to the community and was used as the basis for granting closure of the site by lead regulatory agency.

### **Client: Confidential, Los Angeles, California**

Managed oversight of remedial investigation most contaminated heavy metal site in California. Lead concentrations in soil excess of 68,000,000 parts per billion (ppb) have been measured at the site. This State Superfund Site was a former hard chrome plating operation that operated for approximately 40-years.

### **Client: Confidential, San Francisco, California**

Coordinator of regional monitoring program to determine background concentrations of metals in air. Acted as liaison with SCAQMD and CARB to perform co-location sampling and comparison of accepted regulatory method with ASTM methodology.

02-13  
Cont.

**Client: Confidential, San Francisco, California**

Analyzed historical air monitoring data for South Coast Air Basin in Southern California and potential health risks related to ambient concentrations of carcinogenic metals and volatile organic compounds. Identified and reviewed the available literature and calculated risks from toxins in South Coast Air Basin.

**IT Corporation, North Carolina**

Prepared comprehensive evaluation of potential exposure of workers to air-borne VOCs at hazardous waste storage facility under SUPERFUND cleanup decree. Assessment used in developing health based clean-up levels.

***James J. J. Clark, Ph.D.***

*Principal Toxicologist*

**Toxicology/Exposure Assessment Modeling**

**Risk Assessment/Analysis/Dispersion Modeling**

**Education:**

Ph.D., Environmental Health Science, University of California, 1995

M.S., Environmental Health Science, University of California, 1993

B.S., Biophysical and Biochemical Sciences, University of Houston, 1987

**Professional Experience:**

Dr. Clark is a well recognized toxicologist, air modeler, and health scientist. He has 20 years of experience in researching the effects of environmental contaminants on human health including environmental fate and transport modeling (SCREEN3, AEROMOD, ISCST3, Johnson-Ettinger Vapor Intrusion Modeling); exposure assessment modeling (partitioning of contaminants in the environment as well as PBPK modeling); conducting and managing human health risk assessments for regulatory compliance and risk-based clean-up levels; and toxicological and medical literature research.

Significant projects performed by Dr. Clark include the following:

**LITIGATION SUPPORT**

**Case: James Harold Caygle, et al, v. Drummond Company, Inc. Circuit Court for the Tenth Judicial Circuit, Jefferson County, Alabama. Civil Action. CV-2009**

**Client: Environmental Litigation Group, Birmingham, Alabama**

Dr. Clark performed an air quality assessment of emissions from a coke factory located in Tarrant, Alabama. The assessment reviewed include a comprehensive review of air quality standards, measured concentrations of pollutants from factory, an inspection of the facility and detailed assessment of the impacts on the community. The results of the assessment and literature have been provided in a declaration to the court.

02-13  
Cont.

**Case Result: Settlement in favor of plaintiff.**

**Case: Rose Roper V. Nissan North America, et al. Superior Court of the State Of California for the County Of Los Angeles – Central Civil West. Civil Action. NC041739**

**Client: Rose, Klein, Marias, LLP, Long Beach, California**

Dr. Clark performed a toxicological assessment of an individual occupationally exposed to multiple chemicals, including benzene, who later developed a respiratory distress. A review of the individual's medical and occupational history was performed to prepare an exposure assessment. The exposure assessment was evaluated against the known outcomes in published literature to exposure to respiratory irritants. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Settlement in favor of plaintiff.**

**Case: O'Neil V. Sherwin Williams, et al. United States District Court Central District of California**

**Client: Rose, Klein, Marias, LLP, Long Beach, California**

Dr. Clark performed a toxicological assessment of an individual occupationally exposed to petroleum distillates who later developed a bladder cancer. A review of the individual's medical and occupational history was performed to prepare a quantitative exposure assessment. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Summary judgment for defendants.**

**Case: Moore V., Shell Oil Company, et al. Superior Court of the State Of California for the County Of Los Angeles**

**Client: Rose, Klein, Marias, LLP, Long Beach, California**

Dr. Clark performed a toxicological assessment of an individual occupationally exposed to chemicals while benzene who later developed a leukogenic disease. A review of the individual's medical and occupational history was performed to prepare a quantitative exposure assessment. The exposure assessment was evaluated against the known outcomes in published literature to exposure to refined petroleum hydrocarbons. The results of the assessment and literature have been provided in a declaration to the court.

02-13  
Cont.

**Case Result: Settlement in favor of plaintiff.**

**Case: Raymond Saltonstall V. Fuller O'Brien, KILZ, and Zinsser, et al. United States District Court Central District of California**

**Client: Rose, Klein, Marias, LLP, Long Beach, California**

Dr. Clark performed a toxicological assessment of an individual occupationally exposed to benzene who later developed a leukogenic disease. A review of the individual's medical and occupational history was performed to prepare a quantitative exposure assessment. The exposure assessment was evaluated against the known outcomes in published literature to exposure to refined petroleum hydrocarbons. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Settlement in favor of plaintiff.**

**Case: Richard Boyer and Elizabeth Boyer, husband and wife, V. DESCO Corporation, et al. Circuit Court of Brooke County, West Virginia. Civil Action Number 04-C-7G.**

**Client: Frankovitch, Anetakis, Colantonio & Simon, Morgantown, West Virginia.**

Dr. Clark performed a toxicological assessment of a family exposed to chlorinated solvents released from the defendant's facility into local drinking water supplies. A review of the individual's medical and occupational history was performed to prepare a qualitative exposure assessment. The exposure assessment was evaluated against the known outcomes in published literature to exposure to chlorinated solvents. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Settlement in favor of plaintiff.**

02-13  
Cont.

**Case: JoAnne R. Cook, V. DESCO Corporation, et al. Circuit Court of Brooke County, West Virginia. Civil Action Number 04-C-9R**

**Client: Frankovitch, Anetakis, Colantonio & Simon, Morgantown, West Virginia.**

Dr. Clark performed a toxicological assessment of an individual exposed to chlorinated solvents released from the defendant's facility into local drinking water supplies. A review of the individual's medical and occupational history was performed to prepare a qualitative exposure assessment. The exposure assessment was evaluated against the known outcomes in published literature to exposure to chlorinated solvents. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Settlement in favor of plaintiff.**

**Case: Patrick Allen And Susan Allen, husband and wife, and Andrew Allen, a minor, V. DESCO Corporation, et al. Circuit Court of Brooke County, West Virginia. Civil Action Number 04-C-W**

**Client: Frankovitch, Anetakis, Colantonio & Simon, Morgantown, West Virginia.**

Dr. Clark performed a toxicological assessment of a family exposed to chlorinated solvents released from the defendant's facility into local drinking water supplies. A review of the individual's medical and occupational history was performed to prepare a qualitative exposure assessment. The exposure assessment was evaluated against the known outcomes in published literature to exposure to chlorinated solvents. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Settlement in favor of plaintiff.**

**Case: Michael Fahey, Susan Fahey V. Atlantic Richfield Company, et al. United States District Court Central District of California Civil Action Number CV-06 7109 JCL.**

02-13  
Cont.

**Client: Rose, Klein, Marias, LLP, Long Beach, California**

Dr. Clark performed a toxicological assessment of an individual occupationally exposed to refined petroleum hydrocarbons who later developed a leukogenic disease. A review of the individual's medical and occupational history was performed to prepare a qualitative exposure assessment. The exposure assessment was evaluated against the known outcomes in published literature to exposure to refined petroleum hydrocarbons. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Settlement in favor of plaintiff.**

**Case: Constance Acevedo, et al., V. California Spray-Chemical Company, et al., Superior Court of the State Of California, County Of Santa Cruz. Case No. CV 146344**

Dr. Clark performed a comprehensive exposure assessment of community members exposed to toxic metals from a former lead arsenate manufacturing facility. The former manufacturing site had undergone a DTSC mandated removal action/remediation for the presence of the toxic metals at the site. Opinions were presented regarding the elevated levels of arsenic and lead (in attic dust and soils) found throughout the community and the potential for harm to the plaintiffs in question.

**Case Result: Settlement in favor of defendant.**

**Case: Michael Nawrocki V. The Coastal Corporation, Kurk Fuel Company, Pautler Oil Service, State of New York Supreme Court, County of Erie, Index Number I2001-11247**

**Client: Richard G. Berger Attorney At Law, Buffalo, New York**

Dr. Clark performed a toxicological assessment of an individual occupationally exposed to refined petroleum hydrocarbons who later developed a leukogenic disease. A review of the individual's medical and occupational history was performed to prepare a qualitative exposure assessment. The exposure assessment was evaluated against the

02-13  
Cont.

known outcomes in published literature to exposure to refined petroleum hydrocarbons. The results of the assessment and literature have been provided in a declaration to the court.

**Case Result: Judgement in favor of defendant.**

## **SELECTED AIR MODELING RESEARCH/PROJECTS**

### **Client – Confidential**

Dr. Clark performed a comprehensive evaluation of criteria pollutants, air toxins, and particulate matter emissions from a carbon black production facility to determine the impacts on the surrounding communities. The results of the dispersion model will be used to estimate acute and chronic exposure concentrations to multiple contaminants and will be incorporated into a comprehensive risk evaluation.

### **Client – Confidential**

Dr. Clark performed a comprehensive evaluation of air toxins and particulate matter emissions from a railroad tie manufacturing facility to determine the impacts on the surrounding communities. The results of the dispersion model have been used to estimate acute and chronic exposure concentrations to multiple contaminants and have been incorporated into a comprehensive risk evaluation.

### **Client – Los Angeles Alliance for a New Economy (LAANE), Los Angeles, California**

Dr. Clark is advising the LAANE on air quality issues related to current flight operations at the Los Angeles International Airport (LAX) operated by the Los Angeles World Airport (LAWA) Authority. He is working with the LAANE and LAX staff to develop a comprehensive strategy for meeting local community concerns over emissions from flight operations and to engage federal agencies on the issue of local impacts of community airports.

02-13  
Cont.

**Client – City of Santa Monica, Santa Monica, California**

Dr. Clark is advising the City of Santa Monica on air quality issues related to current flight operations at the facility. He is working with the City staff to develop a comprehensive strategy for meeting local community concerns over emissions from flight operations and to engage federal agencies on the issue of local impacts of community airports.

**Client: Omnitrans, San Bernardino, California**

Dr. Clark managed a public health survey of three communities near transit fueling facilities in San Bernardino and Montclair California in compliance with California Senate Bill 1927. The survey included an epidemiological survey of the effected communities, emission surveys of local businesses, dispersion modeling to determine potential emission concentrations within the communities, and a comprehensive risk assessment of each community. The results of the study were presented to the Governor as mandated by Senate Bill 1927.

**Client: Confidential, San Francisco, California**

Summarized cancer types associated with exposure to metals and smoking. Researched the specific types of cancers associated with exposure to metals and smoking. Provided causation analysis of the association between cancer types and exposure for use by non-public health professionals.

**Client: Confidential, Minneapolis, Minnesota**

Prepared human health risk assessment of workers exposed to VOCs from neighboring petroleum storage/transport facility. Reviewed the systems in place for distribution of petroleum hydrocarbons to identify chemicals of concern (COCs), prepared comprehensive toxicological summaries of COCs, and quantified potential risks from carcinogens and non-carcinogens to receptors at or adjacent to site. This evaluation was used in the support of litigation.

**Client – United Kingdom Environmental Agency**

Dr. Clark is part of team that performed comprehensive evaluation of soil vapor intrusion of VOCs from former landfill adjacent residences for the United Kingdom's Environment

02-13  
Cont.

Agency. The evaluation included collection of liquid and soil vapor samples at site, modeling of vapor migration using the Johnson Ettinger Vapor Intrusion model, and calculation of site-specific health based vapor thresholds for chlorinated solvents, aromatic hydrocarbons, and semi-volatile organic compounds. The evaluation also included a detailed evaluation of the use, chemical characteristics, fate and transport, and toxicology of chemicals of concern (COC). The results of the evaluation have been used as a briefing tool for public health professionals.

## **EMERGING/PERSISTENT CONTAMINANT RESEARCH/PROJECTS**

### **Client: Ameren Services, St. Louis, Missouri**

Managed the preparation of a comprehensive human health risk assessment of workers and residents at or near an NPL site in Missouri. The former operations at the Property included the servicing and repair of electrical transformers, which resulted in soils and groundwater beneath the Property and adjacent land becoming impacted with PCB and chlorinated solvent compounds. The results were submitted to U.S. EPA for evaluation and will be used in the final ROD.

### **Client: City of Santa Clarita, Santa Clarita, California**

Dr. Clark is managing the oversight of the characterization, remediation and development activities of a former 1,000 acre munitions manufacturing facility for the City of Santa Clarita. The site is impacted with a number of contaminants including perchlorate, unexploded ordinance, and volatile organic compounds (VOCs). The site is currently under a number of regulatory consent orders, including an Imminent and Substantial Endangerment Order. Dr. Clark is assisting the impacted municipality with the development of remediation strategies, interaction with the responsible parties and stakeholders, as well as interfacing with the regulatory agency responsible for oversight of the site cleanup.

### **Client: Confidential, Los Angeles, California**

Prepared comprehensive evaluation of perchlorate in environment. Dr. Clark evaluated the production, use, chemical characteristics, fate and transport, toxicology, and remediation of perchlorate. Perchlorates form the basis of solid rocket fuels and have recently been detected in water supplies in the United States. The results of this research

02-13  
Cont.

were presented to the USEPA, National GroundWater, and ultimately published in a recent book entitled *Perchlorate in the Environment*.

**Client – Confidential, Los Angeles, California**

Dr. Clark is performing a comprehensive review of the potential for pharmaceuticals and their by-products to impact groundwater and surface water supplies. This evaluation will include a review if available data on the history of pharmaceutical production in the United States; the chemical characteristics of various pharmaceuticals; environmental fate and transport; uptake by xenobiotics; the potential effects of pharmaceuticals on water treatment systems; and the potential threat to public health. The results of the evaluation may be used as a briefing tool for non-public health professionals.

**PUBLIC HEALTH/TOXICOLOGY**

**Client: Brayton Purcell, Novato, California**

Dr. Clark performed a toxicological assessment of residents exposed to methyl-tertiary butyl ether (MTBE) from leaking underground storage tanks (LUSTs) adjacent to the subject property. The symptomology of residents and guests of the subject property were evaluated against the known outcomes in published literature to exposure to MTBE. The study found that residents had been exposed to MTBE in their drinking water; that concentrations of MTBE detected at the site were above regulatory guidelines; and, that the symptoms and outcomes expressed by residents and guests were consistent with symptoms and outcomes documented in published literature.

**Client: Confidential, San Francisco, California**

Identified and analyzed fifty years of epidemiological literature on workplace exposures to heavy metals. This research resulted in a summary of the types of cancer and non-cancer diseases associated with occupational exposure to chromium as well as the mortality and morbidity rates.

**Client: Confidential, San Francisco, California**

Summarized major public health research in United States. Identified major public health research efforts within United States over last twenty years. Results were used as a briefing tool for non-public health professionals.

02-13  
Cont.

**Client: Confidential, San Francisco, California**

Quantified the potential multi-pathway dose received by humans from a pesticide applied indoors. Part of team that developed exposure model and evaluated exposure concentrations in a comprehensive report on the plausible range of doses received by a specific person. This evaluation was used in the support of litigation.

**Client: Covanta Energy, Westwood, California**

Evaluated health risk from metals in biosolids applied as soil amendment on agricultural lands. The biosolids were created at a forest waste cogeneration facility using 96% whole tree wood chips and 4 percent green waste. Mass loading calculations were used to estimate Cr(VI) concentrations in agricultural soils based on a maximum loading rate of 40 tons of biomass per acre of agricultural soil. The results of the study were used by the Regulatory agency to determine that the application of biosolids did not constitute a health risk to workers applying the biosolids or to residences near the agricultural lands.

**Client – United Kingdom Environmental Agency**

Oversaw a comprehensive toxicological evaluation of methyl-*tertiary* butyl ether (MtBE) for the United Kingdom's Environment Agency. The evaluation included available data on the production, use, chemical characteristics, fate and transport, toxicology, and remediation of MtBE. The results of the evaluation have been used as a briefing tool for public health professionals.

O2-13  
Cont.

**Client – Confidential, Los Angeles, California**

Prepared comprehensive evaluation of *tertiary* butyl alcohol (TBA) in municipal drinking water system. TBA is the primary breakdown product of MtBE, and is suspected to be the primary cause of MtBE toxicity. This evaluation will include available information on the production, use, chemical characteristics, fate and transport in the environment, absorption, distribution, routes of detoxification, metabolites, carcinogenic potential, and remediation of TBA. The results of the evaluation were used as a briefing tool for non-public health professionals.

**Client – Confidential, Los Angeles, California**

Prepared comprehensive evaluation of methyl *tertiary* butyl ether (MTBE) in municipal drinking water system. MTBE is a chemical added to gasoline to increase the octane

rating and to meet Federally mandated emission criteria. The evaluation included available data on the production, use, chemical characteristics, fate and transport, toxicology, and remediation of MTBE. The results of the evaluation have been used as a briefing tool for non-public health professionals.

**Client – Ministry of Environment, Lands & Parks, British Columbia**

Dr. Clark assisted in the development of water quality guidelines for methyl tertiary-butyl ether (MTBE) to protect water uses in British Columbia (BC). The water uses to be considered includes freshwater and marine life, wildlife, industrial, and agricultural (e.g., irrigation and livestock watering) water uses. Guidelines from other jurisdictions for the protection of drinking water, recreation and aesthetics were to be identified.

**Client: Confidential, Los Angeles, California**

Prepared physiologically based pharmacokinetic (PBPK) assessment of lead risk of receptors at middle school built over former industrial facility. This evaluation is being used to determine cleanup goals and will be basis for regulatory closure of site.

**Client: Kaiser Venture Incorporated, Fontana, California**

Prepared PBPK assessment of lead risk of receptors at a 1,100-acre former steel mill. This evaluation was used as the basis for granting closure of the site by lead regulatory agency.

**RISK ASSESSMENTS/REMEDIAL INVESTIGATIONS**

**Client: Confidential, Atlanta, Georgia**

Researched potential exposure and health risks to community members potentially exposed to creosote, polycyclic aromatic hydrocarbons, pentachlorophenol, and dioxin compounds used at a former wood treatment facility. Prepared a comprehensive toxicological summary of the chemicals of concern, including the chemical characteristics, absorption, distribution, and carcinogenic potential. Prepared risk characterization of the carcinogenic and non-carcinogenic chemicals based on the exposure assessment to quantify the potential risk to members of the surrounding community. This evaluation was used to help settle class-action tort.

02-13  
Cont.

**Client: Confidential, Escondido, California**

Prepared comprehensive Preliminary Endangerment Assessment (PEA) of dense non-aqueous liquid phase hydrocarbon (chlorinated solvents) contamination at a former printed circuit board manufacturing facility. This evaluation was used for litigation support and may be used as the basis for reaching closure of the site with the lead regulatory agency.

**Client: Confidential, San Francisco, California**

Summarized epidemiological evidence for connective tissue and autoimmune diseases for product liability litigation. Identified epidemiological research efforts on the health effects of medical prostheses. This research was used in a meta-analysis of the health effects and as a briefing tool for non-public health professionals.

**Client: Confidential, Bogotá, Columbia**

Prepared comprehensive evaluation of the potential health risks associated with the redevelopment of a 13.7 hectares plastic manufacturing facility in Bogotá, Colombia. The risk assessment was used as the basis for the remedial goals and closure of the site.

**Client: Confidential, Los Angeles, California**

Prepared comprehensive human health risk assessment of students, staff, and residents potentially exposed to heavy metals (principally cadmium) and VOCs from soil and soil vapor at 12-acre former crude oilfield and municipal landfill. The site is currently used as a middle school housing approximately 3,000 children. The evaluation determined that the site was safe for the current and future uses and was used as the basis for regulatory closure of site.

**Client: Confidential, Los Angeles, California**

Managed remedial investigation (RI) of heavy metals and volatile organic chemicals (VOCs) for a 15-acre former manufacturing facility. The RI investigation of the site included over 800 different sampling locations and the collection of soil, soil gas, and groundwater samples. The site is currently used as a year round school housing approximately 3,000 children. The Remedial Investigation was performed in a manner

02-13  
Cont.

that did not interrupt school activities and met the time restrictions placed on the project by the overseeing regulatory agency. The RI Report identified the off-site source of metals that impacted groundwater beneath the site and the sources of VOCs in soil gas and groundwater. The RI included a numerical model of vapor intrusion into the buildings at the site from the vadose zone to determine exposure concentrations and an air dispersion model of VOCs from the proposed soil vapor treatment system. The Feasibility Study for the Site is currently being drafted and may be used as the basis for granting closure of the site by DTSC.

**Client: Confidential, Los Angeles, California**

Prepared comprehensive human health risk assessment of students, staff, and residents potentially exposed to heavy metals (principally lead), VOCs, SVOCs, and PCBs from soil, soil vapor, and groundwater at 15-acre former manufacturing facility. The site is currently used as a year round school housing approximately 3,000 children. The evaluation determined that the site was safe for the current and future uses and will be basis for regulatory closure of site.

**Client: Confidential, Los Angeles, California**

Prepared comprehensive evaluation of VOC vapor intrusion into classrooms of middle school that was former 15-acre industrial facility. Using the Johnson-Ettinger Vapor Intrusion model, the evaluation determined acceptable soil gas concentrations at the site that did not pose health threat to students, staff, and residents. This evaluation is being used to determine cleanup goals and will be basis for regulatory closure of site.

**Client –Dominguez Energy, Carson, California**

Prepared comprehensive evaluation of the potential health risks associated with the redevelopment of 6-acre portion of a 500-acre oil and natural gas production facility in Carson, California. The risk assessment was used as the basis for closure of the site.

**Kaiser Ventures Incorporated, Fontana, California**

Prepared health risk assessment of semi-volatile organic chemicals and metals for a fifty-year old wastewater treatment facility used at a 1,100-acre former steel mill. This evaluation was used as the basis for granting closure of the site by lead regulatory agency.

02-13  
Cont.

#### ANR Freight - Los Angeles, California

Prepared a comprehensive Preliminary Endangerment Assessment (PEA) of petroleum hydrocarbon and metal contamination of a former freight depot. This evaluation was as the basis for reaching closure of the site with lead regulatory agency.

#### **Kaiser Ventures Incorporated, Fontana, California**

Prepared comprehensive health risk assessment of semi-volatile organic chemicals and metals for 23-acre parcel of a 1,100-acre former steel mill. The health risk assessment was used to determine clean up goals and as the basis for granting closure of the site by lead regulatory agency. Air dispersion modeling using ISCST3 was performed to determine downwind exposure point concentrations at sensitive receptors within a 1 kilometer radius of the site. The results of the health risk assessment were presented at a public meeting sponsored by the Department of Toxic Substances Control (DTSC) in the community potentially affected by the site.

#### **Unocal Corporation - Los Angeles, California**

Prepared comprehensive assessment of petroleum hydrocarbons and metals for a former petroleum service station located next to sensitive population center (elementary school). The assessment used a probabilistic approach to estimate risks to the community and was used as the basis for granting closure of the site by lead regulatory agency.

#### **Client: Confidential, Los Angeles, California**

Managed oversight of remedial investigation most contaminated heavy metal site in California. Lead concentrations in soil excess of 68,000,000 parts per billion (ppb) have been measured at the site. This State Superfund Site was a former hard chrome plating operation that operated for approximately 40-years.

#### **Client: Confidential, San Francisco, California**

Coordinator of regional monitoring program to determine background concentrations of metals in air. Acted as liaison with SCAQMD and CARB to perform co-location sampling and comparison of accepted regulatory method with ASTM methodology.

02-13  
Cont.

**Client: Confidential, San Francisco, California**

Analyzed historical air monitoring data for South Coast Air Basin in Southern California and potential health risks related to ambient concentrations of carcinogenic metals and volatile organic compounds. Identified and reviewed the available literature and calculated risks from toxins in South Coast Air Basin.

**IT Corporation, North Carolina**

Prepared comprehensive evaluation of potential exposure of workers to air-borne VOCs at hazardous waste storage facility under SUPERFUND cleanup decree. Assessment used in developing health based clean-up levels.

Darien K. Keys, Esq.  
Adams Broadwell Joseph & Cardozo  
601 Gateway Boulevard, Suite 1000  
South San Francisco, CA 94080

Subject: *8850 Sunset Boulevard Project, Los Angeles, California*  
*Draft Environmental Impact Report*  
*Review and Comment on Noise Analysis*

Dear Mr. Keys,

As requested, we have reviewed the information and noise impact analyses in the following document:

*8850 Sunset Boulevard Project, Los Angeles, California*  
*Draft Environmental Impact Report ("DEIR")*  
*State Clearinghouse No. 2019090447*  
*September 2021*

This letter reports our comments on the noise analysis in the subject document.

Wilson, Ihrig & Associates, Acoustical Consultants, has practiced exclusively in the field of acoustics since 1966. During our 55 years of operation, we have prepared hundreds of noise studies for Environmental Impact Reports and Statements. We have one of the largest technical laboratories in the acoustical consulting industry. We also utilize industry-standard acoustical programs such as Environmental Noise Model (ENM), Traffic Noise Model (TNM), SoundPLAN, and CADNA. In short, we are well qualified to prepare environmental noise studies and review studies prepared by others.

02-14

## Adverse Effects of Noise<sup>1</sup>

Although the health effects of noise are not taken as seriously in the United States as they are in other countries, they are real and, in many parts of the country, pervasive.

**Noise-Induced Hearing Loss.** If a person is repeatedly exposed to loud noises, he or she may experience noise-induced hearing impairment or loss. In the United States, both the Occupational Health and Safety Administration (OSHA) and the National Institute for Occupational Safety and Health (NIOSH) promote standards and regulations to protect the hearing of people exposed to high levels of industrial noise.

**Speech Interference.** Another common problem associated with noise is speech interference. In addition to the obvious issues that may arise from misunderstandings, speech interference also leads to problems with concentration fatigue, irritation, decreased working capacity, and automatic stress reactions. For complete speech intelligibility, the sound level of the speech should be 15 to 18 dBA higher than the background noise. Typical indoor speech levels are 45 to 50 dBA at 1 meter, so any noise above 30 dBA begins to interfere with speech intelligibility. The common reaction to higher background noise levels is to raise one's voice. If this is required persistently for long periods of time, stress reactions and irritation will likely result. The problems and irritation that are associated with speech disturbance have become more pronounced during the COVID-19 pandemic because many people find themselves and the people they live with trying to work and learn simultaneously in spaces that were not designed for speech privacy.

**Sleep Disturbance.** Noise can disturb sleep by making it more difficult to fall asleep, by waking someone after they are asleep, or by altering their sleep stage, e.g., reducing the amount of rapid eye movement (REM) sleep. Noise exposure for people who are sleeping has also been linked to increased blood pressure, increased heart rate, increase in body movements, and other physiological effects. Not surprisingly, people whose sleep is disturbed by noise often experience secondary effects such as increased fatigue, depressed mood, and decreased work performance.

**Cardiovascular and Physiological Effects.** Human's bodily reactions to noise are rooted in the "fight or flight" response that evolved when many noises signaled imminent danger. These include increased blood pressure, elevated heart rate, and vasoconstriction. Prolonged exposure to acute noises can result in permanent effects such as hypertension and heart disease.

**Impaired Cognitive Performance.** Studies have established that noise exposure impairs people's abilities to perform complex tasks (tasks that require attention to detail or analytical processes) and it makes reading, paying attention, solving problems, and memorizing more difficult. This is why there are standards for classroom background noise levels and why offices and libraries are designed to provide quiet work environments. While sheltering-in-place during the COVID-19 pandemic,

---

<sup>1</sup> More information on these and other adverse effects of noise may be found in *Guidelines for Community Noise*, eds B Berglund, T Lindvall, and D Schwela, World Health Organization, Geneva, Switzerland, 1999. (<https://www.who.int/docstore/peh/noise/Comnoise-1.pdf>)

many people are finding working and learning more difficult because their home environment is not as quiet as their office or school was.

## Comments on Construction Noise Analysis

### 1.1 DEIR Fails to Analyze All Relevant Noise-Sensitive Receptors

Table 3.9-6 of the DEIR presents the assessment of construction noise prior to the implementation of any mitigation measures. [DEIR at p. 3.9-15] The backup details for the calculations are provided in the “Construction Noise Model Input / Output” section of Appendix I (Noise Data Analysis). The noise level calculations themselves provide the distance between each piece of equipment and the receptor. For example, during Demolition, the use of two concrete saws is anticipated – one will be 25 feet from the receptor at Hotel London and the other will be 100 feet away. These calculations do not require any information about the height of either the noise source or the receptor. However, the “Ray-Trace Program (For A Point-Source)” sheet, which provides information about the noise attenuation from proposed noise barriers, gives explicit information about both sources and receptors. For the receptor at the London Hotel, the following information may be gleaned:

|                                |       |                                                   |
|--------------------------------|-------|---------------------------------------------------|
| Distance: source to barrier:   | 10 ft | (25 ft source-receiver minus 15 ft receiver-wall) |
| Height of source:              | 8 ft  | (Standard height of equipment exhaust stack)      |
| Distance: receiver to barrier: | 15 ft | (Middle of Passageway at London Hotel)            |
| Height of receiver:            | 5 ft  | (Standard height of a person in acoustics)        |

So, from this information we see that the only receptor analyzed at the London Hotel is a person standing in the middle of the Passageway (entrance driveway). This person is not the only or most noise-sensitive receiver at the hotel – the hotel guests are. Specifically, the hotel guests in the north-facing rooms that overlook the site.

The hotel guests are seemingly dismissed by the DEIR by assuming that the operable balcony doors on the north-facing façade would remain closed. Specifically, the DEIR states “The hotel structure and windows likely provide approximately 25 dB to 30 dB of exterior-to-interior noise reduction”. The DEIR does not calculate noise levels in the hotel rooms at all. However, it does acknowledge that “[b]ased on guidance from the FHWA (FHWA 2017), the reduction in noise provided by a structure (with windows open) is approximately 10 dB”. Given that the DEIR states that the London Hotel “would experience exceedances of the City’s construction noise significance threshold . . . ranging from approximately 17 dB . . . to 23 dB . . .” and that the façade attenuation is only 10 dB when the balcony doors are open, it is clear that the hotel guests themselves would potentially be significantly impacted by construction noise, but the DEIR failed to conduct the requisite analysis. [All quotes in this paragraph are from the DEIR at p. 3.9-16]

### 1.2 Hotel Guests Significantly Impacted by Noise Even with Proposed 24 ft Barrier

As stated above, the backup details for calculations are provided in the “Construction Noise Model Input / Output” section of Appendix I (Noise Data Analysis). The information provided is both clear and complete enough for me to replicate the DEIR’s calculations. My replication is presented in Table A of the Appendix to this letter.

O2-14  
Cont.

As explained above, the analysis in the DEIR (and Table A) are for a person standing in the middle of the Passageway at the London Hotel. Using the same calculation methodology, I have calculated the noise levels in the hotel rooms on the eight guest floors of the London Hotel. My calculations use the following information and data, all obtained from the DEIR:

|                                |        |                                                                  |
|--------------------------------|--------|------------------------------------------------------------------|
| Distances: sources to barrier: | Varies | (DEIR Appendix I, "RCNM" sheets)                                 |
| Height of sources:             | 8 ft   | (DEIR Appendix I, "Ray-Trace Program" sheet)                     |
| Distance: façade to barrier:   | 29 ft  | (DEIR Appendix B, p. 11, "Existing Site . . . Plan")             |
| Height of receivers:           | Varies | (Based on DEIR Appendix B, p. 52, "West Elevation") <sup>2</sup> |
| Façade attenuation             | 10 dB  | (DEIR at p. 3.9-16, balcony door open)                           |

I use the same outdoor sound attenuation rate as the DEIR, 6 dB per doubling of distance, based on the slant distance from the equipment to the hotel balconies, not the horizontal distance between the equipment and the façade. For the higher floors, the slant distance gets to be much larger than the horizontal distance. As one would expect, the larger slant distance results in lower noise levels.

Details of my calculations are provided in Tables B-1 to B-9 in the Appendix to this letter.

Table I summarizes the noise levels inside the hotel rooms (with balcony doors open) and assesses them against the DEIR's adopted threshold of significance, 67 dBA Leq, even though that threshold is intended for exterior noise levels.<sup>3</sup> The DEIR did not establish a significance threshold for interior noise levels, but it should be lower.

O2-14  
Cont.

**Table I Unmitigated Construction Noise Levels Inside Hotel Rooms (Balcony Doors Open)**

| Floor   | Height Above Grade (ft) | Equivalent Noise Levels (dBA Leq) |             |              |                      |
|---------|-------------------------|-----------------------------------|-------------|--------------|----------------------|
|         |                         | Demolition                        | Grading     | Construction | Paving/<br>Finishing |
| Second  | 36                      | <b>75.6</b>                       | <b>73.0</b> | <b>72.4</b>  | <b>69.2</b>          |
| Third   | 47                      | <b>74.8</b>                       | <b>72.2</b> | <b>71.5</b>  | <b>68.3</b>          |
| Fourth  | 59                      | <b>73.9</b>                       | <b>71.4</b> | <b>70.6</b>  | <b>67.2</b>          |
| Fifth   | 70                      | <b>73.1</b>                       | <b>70.6</b> | <b>69.8</b>  | 66.2                 |
| Sixth   | 81                      | <b>72.4</b>                       | <b>69.6</b> | <b>69.0</b>  | 65.3                 |
| Seventh | 93                      | <b>71.6</b>                       | <b>69.2</b> | <b>68.2</b>  | 64.3                 |
| Eighth  | 104                     | <b>71.0</b>                       | <b>68.6</b> | <b>67.5</b>  | 63.5                 |
| Ninth   | 115                     | <b>70.4</b>                       | <b>68.0</b> | 66.8         | 62.8                 |

Note: Levels that exceed the DEIR threshold of significance, 67 dBA Leq, are shown in **bold**

<sup>2</sup> The elevations for the London Hotel are similar those for the project (both second floors are at about the same elevation). However, project 0'-0" elevation is about 13 feet above grade at the London and the acoustical receiver is assumed to be 5' tall, so 18' are added to the elevations given in the "West Elevation" drawing.

<sup>3</sup> "Leq" denotes the *equivalent sound level* which is the steady sound level that has the same amount of acoustical energy as the actual time-varying sound during a given period. It may be thought of as the average sound level.

The DEIR proposes that a 24-foot sound barrier be constructed along the southern edge of the project site to mitigate noise impacts at the London Hotel. [MM-NOI-2 at p. 3.9-26] The DEIR itself acknowledges that this barrier will not fully mitigate the noise impact to the person it analyzed in Passageway. It will do even less for guests in the hotel rooms who overlook the project site. Figure 1 provides a graphic that shows the line-of-sight from each guest floor of the London Hotel to the height of the exhaust stacks on the project site. The extent of the site is approximately 150 feet from the property line.

I have calculated the noise levels in the hotel rooms using the same equations in the DEIR, including the one for barrier attenuation (shielding). The results are summarized in Table II and the details may be found in Tables B1 to B9 of the appendix.

| <b>Table II Construction Noise Levels in Hotel Rooms (Balcony Doors Open) with 24-ft Barrier</b> |                         |                                   |             |              |                      |
|--------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------|-------------|--------------|----------------------|
| Floor                                                                                            | Height Above Grade (ft) | Equivalent Noise Levels (dBA Leq) |             |              |                      |
|                                                                                                  |                         | Demolition                        | Grading     | Construction | Paving/<br>Finishing |
| Second                                                                                           | 36                      | <b>70.7</b>                       | <b>68.6</b> | <b>67.5</b>  | 60.2                 |
| Third                                                                                            | 47                      | <b>72.1</b>                       | <b>69.6</b> | <b>68.2</b>  | 64.6                 |
| Fourth                                                                                           | 59                      | <b>72.0</b>                       | <b>69.5</b> | <b>68.2</b>  | 64.5                 |
| Fifth                                                                                            | 70                      | <b>71.7</b>                       | <b>69.2</b> | <b>68.0</b>  | 64.1                 |
| Sixth                                                                                            | 81                      | <b>72.4</b>                       | <b>69.6</b> | <b>69.0</b>  | 65.3                 |
| Seventh                                                                                          | 93                      | <b>71.6</b>                       | <b>69.2</b> | <b>68.2</b>  | 64.3                 |
| Eighth                                                                                           | 104                     | <b>71.0</b>                       | <b>68.6</b> | <b>67.5</b>  | 63.5                 |
| Ninth                                                                                            | 115                     | <b>70.4</b>                       | <b>68.0</b> | 66.8         | 62.8                 |

Note: Levels that exceed the DEIR threshold of significance, 67 dBA Leq, are shown in **bold**

The noise barrier will be most effective for the second and third floors and only slightly effective for the fourth and fifth floors. It will do nothing to shield the sixth through ninth floors because they are so much higher than the top of the barrier. (The noise level at the sixth floor is higher than at the fifth floor because, even though it is higher, it is the lowest floor that has a direct line-of-sight to all of the equipment in the acoustical calculation model.)

Although the DEIR did not calculate noise levels in the hotel rooms, it does tacitly acknowledge that the guests will be significantly impacted by noise, stating

... construction noise impacts at upper levels of the hotel building to the south would remain significant during periods of the project's construction phase, because of the proposed project's proximity to the hotel building as well as the hotel building's overall height relative to the project site. More specifically, the noise barrier's effectiveness at higher elevations on the hotel building would be negligible, as sound associated with construction on the project site – even at ground level - would travel over the noise barrier and reach the hotel building's upper levels. [DEIR at p. 3.9-18]

**Figure 1 Lines-of-sight from the London Hotel guest rooms**

As shown in detail in Table II and qualitatively acknowledged by the DEIR in the above passage, the hotel guests will be significantly impacted by construction noise, even with the proposed 24-foot barrier.

### 1.3 Alternative Noise Mitigation

The DEIR states

There are no other feasible mitigation measures [than the proposed 24-foot barrier] to further reduce the construction noise to below the significance threshold. (The potential for a taller noise barrier is addressed as an alternative in Chapter 5 of this EIR. As explained therein, a taller noise barrier is not considered feasible based on safety and engineering constraints.) [DEIR at p. 3.9-18]

Years ago, I was involved with a construction project that was immediately adjacent to the large headquarters building of a major stock brokerage. Because the stockbrokers felt that exposure to several years of construction noise would be detrimental to their business, the project developer put up a scaffolding system the entire height of the stock brokerage building and covered the entire façade with construction noise control blankets. The scaffolding was secured laterally by tying it into (securely connecting to) the headquarters building itself. I suggest the same may be done in this situation.

In order for the noise barrier to reduce noise levels inside every hotel room to a level that does not exceed the DEIR threshold of significance, it would have to be 78 feet high. Details of this calculation for the ninth floor – the last to be fully mitigated – are provided in Table C of the Appendix.

02-14  
Cont.

Whereas the stockbrokers will willing to have practically all natural light blocked off for an extended period, the Hotel London likely will not. The solution is to sheath the scaffolding on the project side primarily with plexiglass rather than opaque blankets. Plexiglass that is 1/4" thick has a surface density of 1.5 pounds per square foot (lb/sq ft) which is adequate. As with all noise barriers, there cannot be any open gaps in the final Plexiglass noise barrier wall.

Note about mufflers: MM-NOI-1 of the DEIR requires all equipment be fit with properly-working mufflers. While this is prudent, this will not reduce the noise levels relative to those calculated for the DEIR because the calculations utilize the FHWA Roadway Construction Noise Model ("RCNM"). The bulk of the sound data in this model was obtained during the 1990s and 2000s during the Central Artery Tunnel project in Boston ("The Big Dig"). By the 1990s, virtually all construction equipment was fit with mufflers, so the reference sound levels already account for the noise reduction they provide. Prior to the RCNM, the most widely-disseminated data on construction equipment was published by the Environmental Protection Agency in 1971. What that data was gathered in the late 1960s, mufflers were not in widespread use, so requiring a muffler as a mitigation measure in the 1970s could result in a substantial reduction in noise levels. Today, requiring that equipment be muffled simply ensures that noise levels are not unduly high because of faulty or missing components.

## Conclusion

The *Findings* document for the 121 W 3<sup>rd</sup> Street Project purports to support a Class 32 Categorical Exemption for the project, but, as stated in the document itself, one of the requirements for this is that:

Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality. [*Findings* at p. III-1, emphasis added]

That requirement is not met for the temporary increase in noise that will result from the 16 months of construction as determined by correct application of the *Findings'* threshold of significance to the *Findings'* construction noise calculations.

## DEREK L. WATRY

*Principal*

Since joining Wilson Ihrig in 1992, Derek has gained experienced in many areas of practice including environmental, construction, forensic, architectural, and industrial. For all of these, he has conducted extensive field measurements, established acceptability criteria, and calculated future noise and vibration levels. In the many of these areas, he has prepared CEQA and NEPA noise technical studies and EIR/EIS sections. Derek has a thorough understanding of the technical, public relations, and political aspects of environmental noise and vibration compliance work. He has helped resolve complex community noise issues, and he has also served as an expert witness in numerous legal matters.

### Education

- M.S. Mechanical Engineering, University of California, Berkeley
- B.S. Mechanical Engineering, University of California, San Diego
- M.B.A. Saint Mary's College of California

### Project Experience

#### ***12<sup>th</sup> Street Reconstruction, Oakland, CA***

Responsible for construction noise control plan from pile driving after City received complaints from nearby neighbors. Attendance required at community meetings.

#### ***525 Golden Gate Avenue Demolition, San Francisco, CA***

Noise and vibration monitoring and consultation during demolition of a multi-story office building next to Federal, State, and Municipal Court buildings for the SFDPW.

#### ***911 Emergency Communications Center, San Francisco, CA***

Technical assistance on issues relating to the demolition and construction work including vibration monitoring, developing specification and reviewing/recommending appropriate methods and equipment for demolition of Old Emergency Center for the SFDPW.

#### ***Central Contra Costa Sanitary District, Grayson Creek Sewer, Pleasant Hill, CA***

Evaluation of vibration levels due to construction of new sewer line in hard soil.

#### ***City of Atascadero, Review of Walmart EIR Noise Analysis, Atascadero, CA***

Review and Critique of EIR Noise Analysis for the Del Rio Road Commercial Area Specific Plan.

#### ***City of Fremont, Ongoing Environmental Services On-Call Contract, Fremont, CA***

Work tasks primarily focus on noise insulation and vibration control design compliance for new residential projects and peer review other consultant's projects.

#### ***City of Fremont, Patterson Ranch EIR, Fremont, CA***

Conducted noise and vibration portion of the EIR.

#### ***City of King City, Silva Ranch Annexation EIR, King City, CA***

Conducted the noise portion of the EIR and assessed the suitability of the project areas for the intended development. Work included a reconnaissance of existing noise sources and receptors in and around the project areas, and long-term noise measurements at key locations.

02-14  
Cont.

***Conoco Phillips Community Study and Expert Witness, Rodeo, CA***

Investigated low frequency noise from exhaust stacks and provided expert witness services representing Conoco Phillips. Evaluated effectiveness of noise controls implemented by the refinery.

***Golden Gate Park Concourse Underground Garage, San Francisco, CA***

Noise and vibration testing during underground garage construction to monitor for residences and an old sandstone statue during pile driving for the City of San Francisco.

***Laguna Honda Hospital, Clarendon Hall Demolition, San Francisco, CA***

Project manager for performed vibration monitoring during demolition of an older wing of the Laguna Honda Hospital.

***Loch Lomond Marina EIR, San Rafael, CA***

Examined traffic noise impacts on existing residences for the City of San Rafael. Provided the project with acoustical analyses and reports to satisfy the requirements of Title 24.

***Mare Island Dredge and Material Disposal, Vallejo, CA***

EIR/EIS analysis of noise from planned dredged material off-loading operations for the City of Vallejo.

***Napa Creek Vibration Monitoring Review, CA***

Initially brought in to peer review construction vibration services provided by another firm, but eventually was tapped for its expertise to develop a vibration monitoring plan for construction activities near historic buildings and long-term construction vibration monitoring.

***San Francisco DPW, Environmental Services On-Call, CA***

Noise and vibration monitoring for such tasks as: Northshore Main Improvement project, and design noise mitigation for SOMA West Skate Park.

***San Francisco PUC, Islais Creek Clean Water Program, San Francisco, CA***

Community noise and vibration monitoring during construction, including several stages of pile driving. Coordination of noise and ground vibration measurements during pile driving and other construction activity to determine compliance with noise ordinance. Coordination with Department of Public Works to provide a vibration seminar for inspectors and interaction with Construction Management team and nearby businesses to resolve noise and vibration issues.

***San Francisco PUC, Richmond Transport Tunnel Clean Water Program, San Francisco, CA***

Environmental compliance monitoring of vibration during soft tunnel mining and boring, cut-and-cover trenching for sewer lines, hard rock tunnel blasting and site remediation. Work involved long-term monitoring of general construction activity, special investigations of groundborne vibration from pumps and bus generated ground vibration, and interaction with the public (homeowners).

***Santa Clara VTA, Capitol Expressway Light Rail (CELR) Bus Rapid Transit (BRT) Update EIS, CA***

Reviewed previous BRT analysis and provide memo to support EIS.

O2-14  
Cont.

***Shell Oil Refinery, Martinez, CA***

Identified source of community noise complaints from tonal noise due to refinery equipment and operations. Developed noise control recommendations. Conducted round-the-clock noise measurements at nearby residence and near to the property line of the refinery and correlated results. Conducted an exhaustive noise survey of the noisier pieces of equipment throughout the refinery to identify and characterize the dominant noise sources that were located anywhere from a quarter to three-quarters of a mile away. Provided a list of actions to mitigate noise from the noisiest pieces of refinery equipment. Assisted the refinery in the selection of long-term noise monitoring equipment to be situated on the refinery grounds so that a record of the current noise environment will be documented, and future noise complaints can be addressed more efficiently.

***Tyco Electronics Corporation, Annual Noise Compliance Study, Menlo Park, CA***

Conducted annual noise compliance monitoring. Provided letter critiquing the regulatory requirements and recommending improvements.

***University of California, San Francisco Mission Bay Campus Vibration Study, CA***

Conducted measurements and analysis of ground vibration across site due to heavy traffic on Third Street. Analysis included assessment of pavement surface condition and propensity of local soil structure.

Re: Comments re 8850 Sunset Project ("Project") Draft EIR ("DEIR")

Dear Mr. Vu,

This firm is legal counsel for Mani Brothers Nine Thousand (DE), LLC, owner of the property at 9000 Sunset Boulevard in the City of West Hollywood, two blocks west of the Project site. Our client has numerous concerns and offers the comments below regarding Draft EIR for the 8850 Sunset Project.

The following comments address the adequacy of the DEIR, and should also be considered comments on the merits of the Project and its non-conformity with the City of West Hollywood General Plan, the Sunset Specific Plan, code requirements, and other applicable laws.

As a general comment, this Project would extend 74 feet down below ground and tower nearly 200 feet tall above ground, far out of scale with surrounding development including low-rise residential development. It is twice the height and twice the bulk (FAR) allowed by the Sunset Specific Plan. It is severely underparked, providing only 240 parking spaces for the undisclosed number (likely in the thousands) of guests, residents and employees who will occupy its myriad hotel rooms, residences, banquet hall, meeting rooms, lounges and restaurants, nightclub, pools, and spa, creating a 24/7 whirlwind of traffic, noise and toxic emissions. The DEIR fails to adequately disclose both the scope and magnitude of these issues, or to identify feasible ways to avoid them.

Specific concerns include the following:

1. Inadequate/Inconsistent Project Description. The DEIR Project Description on page 1-7 states the "building would contain approximately 240,000 square feet of floor area (420,000 gross square feet including below grade components). Yet adding up the square footage of "Proposed Uses" in Table 2-1 yields a total of 485,144 s.f. of proposed uses. This might be explained by footnote 2 in Table 2-1 which states that "square footage in this table exceeds the total building size because outdoor areas have been included." But little or no detail is provided on which "outdoor areas" have been included.

Some of the important unanswered questions regarding the Project Description include:

03-1

03-2

03-3

- Please provide floor-by-floor plans and a summary table identifying which outdoor areas have been included and which have not been included in the “Proposed Uses”.
- For example, have the residential balconies been included in Proposed Uses?
- Which outdoor landscaped areas have been included in Proposed Uses?
- What use is proposed for the large roof/pool deck? Will this be used as event space?
- Will there be food and/or beverage service on the roof deck? Landscaping? Amplified sound?
- What is the maximum area throughout the building that can be aggregated for meetings, banquets and other special events (e.g. business conferences, weddings, galas, etc.)?
- What is the anticipated maximum permitted occupancy for the entire building, including all indoor and outdoor spaces?
- The DEIR at pp. 3.8-12 states that the project will include “the largest conference/event space on the Sunset Strip”. Where is that space described on the Proposed Uses table (Table 2-1)? How large is the conference/event space?
- Please also provide a breakdown of maximum permitted occupancy for each component (e.g. hotel rooms, residences, Viper room, banquet space, restaurant, café, pool deck, etc.)
- Will any of the landscaped areas (lawns, terraces, planters, etc.) be accessible for walking on, seating, sunbathing, etc.?

03-3

## 2. The Project is Not Consistent with the General Plan

### a. Land Use and Urban Form Element.

The Project site has a general plan land use designation of “SSP (Sunset Specific Plan)” (see Figure 3-4). The City of West Hollywood General Plan describes this designation as follows:

“This designation implements the Sunset Specific Plan (SSP). The density/intensity, height and number of stories vary along the corridor. Specific information on each parcel may be found in the Sunset Specific Plan.” (Land Use and Urban Form Element, p. 3-19.)

In other words, the General Plan incorporates the Sunset Specific Plan (SSP) by reference. To the extent the Project is not consistent with the SSP, therefore, it is also not consistent with the General Plan. See the detailed discussion later in this comment letter regarding SSP inconsistencies.

03-4

It should be noted, furthermore, that the version of the SSP incorporated by reference in the general plan was the SSP in the form that existed when the General Plan was adopted. The General Plan does not and could not incorporate the provisions of the SSP “as amended from time to time”. Rather, a formal amendment of the General Plan is needed to incorporate changes to the SSP every time the SSP is amended. Amendment of the General Plan requires following a specific process specified by state law (Gov’t Code section 65350 et seq.). These procedures cannot be circumvented by incorporating another planning document by reference.

Just as it ignores and distorts the Specific Plan, the DEIR likewise ignores the policies in the West Hollywood General Plan designed to protect adjacent properties and neighborhoods. For example, the DEIR dwells at length in page after page on the Project’s consistency with a few meaninglessly vague and generic General Plan policies such as: “Maintain an urban form and land use pattern that enhances quality of life and meets the community’s vision for its future” (LU-1); and “Ensure that onsite signs are an asset to the City” (LU-17). The DEIR downplays, however, numerous General Plan policies specifically

designed to protect surrounding neighborhoods from the impacts of oversized development projects, such as the following policies in the General Plan Land Use element:

- LU-1.2 Consider the scale of new development within its urban context to avoid abrupt changes in scale and massing.
- LU-1.11 Prohibit new land uses that harm the physical health and well-being of the community.
- LU-2.2 Consider the scale and character of existing neighborhoods and whether new development improves and enhances the neighborhood when approving new infill development.
- LU-2.10 Encourage the reuse of existing commercial structures through the use of incentives in order to maintain the scale of neighborhoods.
- LU-4.4 Require development projects along commercial corridors to employ architectural transitions to adjoining residential properties to ensure compatibility of scale and a sense of privacy for the existing residences.
- LU-8.1 Consider the scale and character of existing residential neighborhoods during the approval of new development.

The glaring inconsistency of the Project with these policies is obvious. Yet by casting a blind eye to these relevant policies and cherry-picking policies to analyze which deal generically with quality of life, signage, and economic growth, the DEIR erroneously finds the Project consistent with the General Plan Land Use and Urban Form Element.

b. Mobility Element

General Plan Policy M-5.9 states: “Require new development to pay its share of transportation improvements necessitated by that development.”

This policy is specifically mentioned on p. 3.12-6 of the DEIR, but there is no analysis or discussion of the Project’s consistency or inconsistency with the policy. The lack of discussion is particularly surprising, given that the Threshold of Significance for transportation impacts identified on the very next page includes: “Conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities.” (DEIR, p. 3.12-7.) Unless the DEIR adequately describes the Project’s fair share costs, there will be no way for the decisionmaker or the public to know whether or not the Project is consistent with this important policy of the General Plan, and no way for the City to impose the appropriate fair share cost on the Project.

To be consistent with Policy M-5.9, the DEIR will need to be revised to analyze the Project’s demand on local and regional street and highway networks, bikeways, bus and rail lines and other transportation facilities. The DEIR should be revised to include:

- Quantification of the project’s fair share of street and highway improvements.
- Quantification of the project’s fair share of bikeway improvements.
- Quantification of the project’s fair share of bus and rail line improvements.
- Quantification of the project’s fair share of other transportation improvement needs, such as car parking, bike parking, scooter parking, Uber/Lyft rideshare dropoff areas, etc.

If there are citywide traffic impact fees or other Project contributions towards its fair share of transportation improvement costs, then the DEIR should identify how much the Project will be required to pay in fees and compare that amount to the quantified fair share. The DEIR should also discuss the

03-4  
Cont.

03-5

capital improvement plans and schedules under which any impact fees will be utilized to pay for the necessary improvements. The revised and recirculated DEIR should provide public disclosure of any time lag between the anticipated Project opening date and the timing for implementation of the necessary transportation improvements.

### 3. Traffic and Transportation Impacts.

The Transportation impact analyses in Section 3.12 of the DEIR and in the Transportation Appendix are inadequate and misleading.

#### a. The Project is Not Exempt from VMT Analysis.

For one thing, the analysis mistakenly relies on a “screening” exemption from Vehicle Miles Traveled (VMT) analysis.

The Transportation Appendix erroneously states (pp. 7-8) that the Project is deemed to have no impact and is exempt from further analysis because it meets all five of the “screening criteria” adopted by the City of West Hollywood, including Criterion #5 which requires that the Project would not “generate a significant regional draw”.

Contrary to the unsupported conclusion of the DEIR and Transportation Appendix, the project is specifically designed to be a regional draw. As acknowledged in the General Plan consistency discussion on pp. 3.8-11 and 3.8-12 of the DEIR (emphasis added):

“The proposed project would **introduce new uses of significant importance** on the site and provide public benefits, including include a **larger, re-envisioned and enhanced Viper Room** (a **culturally important live music venue** in the City), an extensive terrace park and café above Sunset Boulevard open to the public, ... **the largest conference/event space on the Sunset Strip**, ... a street-level restaurant and café with outdoor dining on Sunset Boulevard, and a roof-top restaurant. The proposed project also would provide a **landmark architectural design** that is of **unusual merit** and would enhance the City and support **the Sunset Strip’s iconic status** with a building of architectural merit designed by a renowned architectural firm.” (Emphasis added.)

Now contrast the foregoing passage with this misleading and conclusory discussion in the transportation section of the DEIR (pp. 3.12-14, emphasis added):

“The project **proposes a mix of uses similar to existing uses** within the City such as hotel, restaurant/bars, residential uses, and meeting spaces and therefore would not require a skilled and specialized **workforce** to draw **employees** from greater distances in the region. More specifically, these are the types of uses that draw their employment base from the existing available workforce within the City and within neighboring areas, which results in a low VMT to access the project site due to both physical proximity and available transit options and alternate modes of transportation. Accordingly, and consistent with the City Council’s findings for the City’s VMT regulations, the uses in the proposed project **would not have a significant regional draw.**”

Notice the numerous fallacies in the second passage. For one thing, it states that uses would be “similar to existing uses” which is in direct contradiction to the statement earlier in the DEIR that the project would “introduce new uses”. (DEIR, page 3.8-11). Second, it is not reasonable to assume that “similarity to existing uses” correlates to lower VMT, since adding yet another iconic luxury hotel with nightclubs,

restaurants and meeting space will tend to amplify and increase regional, national and international tourism to the iconic Sunset Strip. Third, the passage focuses only on employee trips and ignores the much greater number and length of trips associated with hotel guests, meeting attendees, restaurant diners, nightclub patrons, etc.<sup>1</sup>

While some of the future Project visitors (and particularly the residents of the Project's residential tower) will be local, it is absurd to claim that this Project will not be a "regional draw" – with its new 115-room conference hotel, multiple restaurants and lounges (including the legendary Viper Room), all in a "landmark architectural design" building on one of the most heavily-touristed streets in the greater Los Angeles area, renowned as the "entertainment capital of the world"<sup>2</sup>

The legislative history of the "regional draw" language confirms that this project is of the type intended to be considered a "regional draw". For example, during the West Hollywood City Council meeting on November 16, 2020 when the Council adopted the current Local Transportation Guidelines, Mayor Pro-Tem Heilman acknowledged: **"A lot of projects in West Hollywood do draw regionally, and we promote that.** Nightclubs -- many of the hotels have banquet facilities or have nightclubs." (Emphasis added.) Mayor Horvath expressed her agreement with Heilman, and none of the other Councilmembers disagreed as they concluded the public hearing and voted to approve the Guidelines. Accordingly, it was clearly understood by City Council when they adopted the "regional draw" criterion that nightclubs and hotels with meeting rooms would be considered to be regional draws and would not be exempt from VMT and traffic impact analysis.

In conclusion, the Project is not exempt from VMT analysis and the DEIR should be revised to include this analysis, and then re-circulated for public review and comment. Keep in mind that the VMT analysis must be thoroughly informative as required by the CEQA Guidelines: "Any assumptions used to estimate vehicle miles traveled ... should be documented and explained in the environmental document prepared for the project." (14 Cal. Code Regs. 15064.3(b)(4).)

b. Reliance on Ineffective Bicycle-Related Trip Reduction Measures.

Among other nuggets in the Gibson technical appendix is the Pedestrian/Bicycle count tables presented in Attachment C. The trip count data collected through six hours of observation (7-10 am and 4-7 pm during a weekday in May 2019) at nine study intersections revealed a total of 161,994 counted vehicular trips, but only 94 bicycle trips. Notice that observed vehicle trips outnumbered observed bicycle trips by a factor of more than 1000:1. On average, only 1.7 bicycles were observed per intersection per hour (i.e. 94 total bike trips during the six hours of observation at each of nine intersections). Because such a tiny percentage of employees, customers and residents are evidently traveling by bicycle, this data proves the inefficacy of the bike-related TDM measures the City has been pushing for years. Six of the

<sup>1</sup> It is patently absurd – especially with regard to a hotel – to evaluate vehicle miles traveled solely with regard to employee trips and ignore the (typically far greater) number of hotel guest and visitor trips. Gibson may have been misled/misdirected by City staff on this point, judging by a recent agenda report where staff made the untenable assertion that "Trips attributed to visitors are varied and unpredictable, making modeling impossible. Therefore, visitors are not considered in VMT analysis." (Agenda Report for City Council Adoption of Updates to the Local Transportation Guidelines, November 16, 2020 (Agenda Item 5.A.), p. 3.) There are obviously methods available for estimating visitor trip lengths, such as guest surveys conducted at comparable hotels. Gibson purports to rely on surveys of other local hotels for purposes of trip generation (see, e.g. Table 4 in the Transportation Appendix), and there is no reason it couldn't do the same for visitor trip length.

<sup>2</sup> See, e.g. The Great Music City by Andrea Baker (Palgrave/Macmillan 2019), p. 90: "As the entertainment capital of the world ... Los Angeles has the most live music venues ... iconic venues have been built in the city and have played a seminal role in the US and the global music industry. For example, the ... Viper Room ... "

24 items on the City's TDM menu ("Bike Repair Station", "Bike Racks", "Secure Bike Storage", "On-Site Bike Share Hub", "Bike Share Membership" and "Showers & Lockers") listed in Attachment D to the Gibson study are based on the false assumption that project trips can be meaningfully reduced by persuading people to use bicycles. The Gibson study and DEIR need to be revised and recirculated to delete the ineffectual bicycle-related TDM measures. And the Project should not be allowed to use any bicycle-related TDM strategies to meet the City's TDM requirements.

03-7  
Cont.

- c. The Project Fails to Include an Analysis of Impacts on Transportation Improvements and Quantification of the Project's Fair Share Contribution as Required by the City of West Hollywood Local Transportation Guidelines and General Plan Policy M-5.9.

As noted above in the discussion of the Project's lack of consistency with plans and policies, General Plan Policy M-5.9 requires an analysis of impacts on the transportation system and quantification of the project's fair share contribution. This analysis is also required by the City's adopted Local Transportation Guidelines.

The DEIR's analysis of Project impacts on the street network is wholly inadequate. The project trip generation is grossly understated and no level of service (LOS) data is provided.

The Gibson Technical Appendix does offer some information on trip generation and trip distribution, but that information is deeply flawed. For example, Footnote (b) in the trip generation table (Table 4) indicates that the source of most of the trip generation estimates is unspecified "empirical studies conducted in the City of West Hollywood." The studies are not identified or included in the technical appendices. (Please post them online with the other environmental documents.)

Based on unidentified assumptions, Table 4 discloses that the project will add over 3,000 daily trips to the street network, including more than 300 trips during the most congested PM peak traffic hour. Of the 300 PM peak trips, however, nearly all the peak hour trips are ascribed to patrons of the Project's restaurant venues, and only 47 peak hour trips (of which only 20 were arrivals and 27 were departures) were estimated for the hotel component of the Project, which we are informed by a footnote in the table includes ancillary uses such meeting rooms and lounges. Given the size and capacity of the meeting facilities, the 20 peak hour trip arrivals estimate is absurdly low, considering it includes overnight guests from the 115 hotel rooms as well as short-term guests attending large banquets, conferences and galas or just meeting a few friends at the lobby bar and lounge. While overnight hotel guest arrivals and departures may be spread across a period of several hours, banquets, conferences and special events often have a fixed start time and/or end time, with the result that hundreds of guests may be arriving or departing at roughly the same time. The trip generation (along with VMT and parking analyses) must account for the reasonable "worst case" scenario where hundreds of hotel banquet or wedding guests arrive within a short period of time for a scheduled event, combined with the normal arrivals and departures of overnight hotel guests, restaurant patrons, shift workers, deliveries, etc.

03-8

A full disclosure of the Project trip generation is critical not only for a proper evaluation of consistency with the City's General Plan Mobility Element (see discussion above), but also for consistency with the City's Local Transportation Guidelines. These Guidelines were adopted in 2009 and were most recently amended by the City Council in November 2020 to include the VMT screening criteria discussed above.

As adopted in 2009, the Local Transportation Guidelines require that larger projects meeting certain screening thresholds provide a detailed analysis of level of service (LOS) impacts on the affected roadway network. The 2009 thresholds were based on the Project's contributions to intersection delay and percentage increase in daily trip volumes on residential street segments.

In November 2020, the City Council amended the Local Transportation Guidelines to replace the 2009 thresholds with new the new VMT-based screening criteria (including the “regional draw” criterion discussed above). Projects (such as this one) with the “potential for significant regional draw” must provide a detailed VMT analysis. In addition, the Project must provide a level of service (LOS) and residential street analysis.<sup>3</sup> (See Exhibit A to City Council Resolution 20-5344, adopted November 16, 2020.)

Accordingly, the DEIR and Transportation Appendix should be revised and re-circulated to include, among other things, the following:

- Guest surveys at other similar area hotels (Beverly Hilton, etc.) to provide a reasonable basis for estimating guest trip/tour lengths for overnight, restaurant and special event guests.
- Employee surveys should also be conducted at similar hotels to determine length of employee trips.
- Reasonable “worst-case” estimates of peak hour trips assuming simultaneous guest arrivals for a maximum capacity special event along with peak guest and employee arrivals and departures for the residential, hotel room, restaurants, nightclub and other project components.
- Source documents should be included and summarized by methodology and results for all trip generation estimates.
- A detailed VMT analysis including assumptions, sources, analysis and conclusions should be provided. Trip lengths and number of trips should reflect and be consistent with the updated guest surveys and maximum event capacity (times number of events) as indicated above.
- A revised and expanded LOS and street analysis should be provided in accordance the City’s Local Transportation Guidelines and General Plan Policy M-5.9.
- The project’s impact on the transportation system (streets, intersections, sidewalks, bus, transit, rideshare, etc.) should be quantified and mitigated.
- The TDM menu should be revised to eliminate all bicycle-related measures (due to their proven inefficacy as discussed above).
- Analyses of noise, air quality and other impact sections in the DEIR should be revised in accordance with the changes to trip generation and trip length indicated above.<sup>4</sup>

d. The Project Lacks Sufficient Parking.<sup>5</sup>

Table 3 in the Gibson Transportation Appendix provides the calculation of “Code Required Parking” and concludes that only 240 spaces are required.

<sup>3</sup> Although the LOS and residential street analysis may not be used to demonstrate a significant environmental impact based on project-induced traffic delays (CEQA Guidelines 15064.3), these factors will inform other CEQA and non-CEQA considerations such as traffic noise, air quality, fair-share impact analysis, and consistency with adopted plans and policies. As noted above, this letter is both a CEQA comment letter on the DEIR and also a public comment letter regarding non-CEQA issues such as consistency with the Specific Plan, General Plan, state planning and zoning code, etc.

<sup>4</sup> For example, the Air Quality analysis and CalEEMod modeling results presented in the DEIR are premised on the flawed trip generation assumptions of the Transportation Appendix and must be re-done. (See, e.g. DEIR, page 3.1-24: “Trip generation rates for the project and the existing scenario are based on the traffic data provided in Appendix L of this EIR.”)

<sup>5</sup> While CEQA (Pub. Res. Code 21099(b)(3)) states that a parking shortage is not itself an environmental impact, it goes on to state that: “This subdivision does not relieve a public agency of the requirement to analyze a project’s potentially significant transportation impacts related to air quality, noise, safety, or any other impact associated

The numbers given in Table 3, however, are clearly erroneous and understated. For one thing, the table uses the wrong parking ratios. Table 3-6 in Section 19.28.040 of the Municipal Code states that hotels should provide: “0.5 space for each guest room; plus retail, restaurant, and conference uses calculated at 50% of the requirements of this table, and all other uses at 100% of the requirements of this table.” (Emphasis added.) The DEIR and Transportation Appendix, however, applies the 50% discount not just to retail, restaurant, and conference uses, but also to all the bars and lounges and to the Viper Room nightclub as well. This error results in an undercount of at least 20 spaces.<sup>6</sup>

In addition, contrary to the Municipal Code, the DEIR and Transportation Appendix fail to assign any parking at all to the following uses:

- Rooftop bar and serving area.
- Spa and gym.
- Recording studio.

Please also provide shaded or color-coded floor plans indicating the areas included in each use category for purposes of the parking calculations, so that the public can see what areas are included and which areas are counted and which areas are not counted. In this regard, please note that: “In any case where this Zoning Ordinance establishes a parking requirement based on the floor area of a use in a specified number of square feet (for example: 1 space per 1,000 sq. ft.), the floor area shall be construed to mean **gross floor area** unless otherwise specified.” (WHMC 19.28.040(E)(2), emphasis added.)

Even once these errors are corrected and the true code parking requirement is disclosed, that will still understate the magnitude of the parking demand. For example, if the area given in the EIR for the Banquet Hall is correctly stated to be 4,117 s.f. and is properly classified as a “hotel restaurant” or “hotel banquet” use entitled to the 50% parking credit, then only 17 parking spaces are required by code for this use. Yet the floor plans show 264 seats in the banquet hall.<sup>7</sup> It is not credible to expect that only one parking space per 15 banquet guests will be sufficient (not to mention waitstaff, chefs and employees who also need parking)! Even if some banquets and events will be attended by people also staying as guests at the hotel (or living in the 41 residential units), other types of events will draw mostly patrons who are not overnight guests or residents. Please provide revised peak parking demand estimates including: (i) empirical data from other conference/banquet hotels; (ii) reasonable assumptions about peak aggregate occupancy (by patrons, guests, residents, employees, etc.) of the 8850 Sunset project during periods when the restaurant, banquet, meeting, hotel, lounge, nightclub venues are fully occupied; along with (iii) mode split assumptions supported by empirical studies showing occupants per car, use of rideshare and public transportation, etc.

Once the full peak parking demand is disclosed and compared to the quantity of parking provided at the Project, then please provide an adequate discussion of the secondary environmental impacts of any parking shortfall, such as impacts on noise, air quality and safety as frustrated drivers looking for parking

---

with transportation.” Furthermore, this comment letter is not purely directed towards CEQA violations, but is also an objection to the project on grounds of inconsistency with other laws and regulations, such as failure of the project to provide the number of parking spaces required by the City’s municipal code.

<sup>6</sup> The DEIR erroneously discounted the Viper Room parking requirement by 16 spaces, and the Hotel Lounge requirement by 8.5 spaces.

<sup>7</sup> The Chair of the Planning Commission described the Project during the 10/21/21 meeting as having a “500-person event space”. Please confirm and disclose the maximum event capacity of the Project.

clog up the surrounding streets and drive around residential neighborhoods, park and stop illegally, etc.<sup>8</sup> The congestion will be particularly acute during peak periods when crowds are simultaneously coming and going from events at the London Hotel and nearby venues – the cumulative effects of peak demand parking shortages in the surrounding areas should be analyzed. The resulting impact assessment will also inform the Project’s fair-share transportation facility contribution pursuant to Policy M-5.9 of the General Plan Mobility Element.

03-9  
Cont.

4. The Project is Inconsistent with the Sunset Specific Plan.

The City’s key planning and regulatory document for this area is the Sunset Specific Plan (SSP), which has guided development over the past 25 years. The unique importance of the SSP is reflected in the fact that it serves not just as a zoning and regulatory document, but also has been adopted as the General Plan land use document for this area.

As stated in the SSP’s introduction: “This plan is the result of a collective effort of community residents, business and property owners, West Hollywood City staff, and planning consultants. Participants in the Specific Plan process started by identifying key goals and objectives for the Plan in the areas of economic development, urban design, transportation, and the recognition of cultural resources. ... The Plan seeks to integrate Sunset Boulevard into the greater community, balancing commercial needs and the neighborhood concerns.” (SSP, page 11.)

All of these carefully laid plans will be blown apart by the proposed 8850 Sunset Project. For example:

- The SSP (p. 59) provides for a maximum F.A.R. of 2.75 on this site (designated “Site 6E”); whereas the Project has an F.A.R. of 6.0.
- The SSP (p. 65) provides for a maximum height of 110 feet compatible with the adjacent London Hotel at 117 feet tall; whereas, the proposed Project will be 200 feet tall and will loom over the London Hotel.
- The SSP (pp. 65 and 219) specifies that the northern portion of the site along Sunset should be no more than 35 feet in height, with a taller height of up to 110 feet allowed in the southern portion; whereas, the proposed Project will appear to hang over Sunset Boulevard with two 200’ towers, one of which is set back less than 5 feet from Sunset at most floor levels.
- The SSP allowed a maximum commercial development cap, whereas the Project will exceed the development cap by hundreds of thousands of square feet of development.
- The SSP did not identify this site as being appropriate for residential development (SSP, p. 103), and yet the Project includes 41 residential units.
- The SSP (p. 100) has a policy of encouraging the development of Class “A” office space on Site 6E, and yet the Project includes no commercial office space.
- The SSP (p. 221) requires the Project to have a coordinated entry plaza shared with the London Hotel to the south; whereas, the proposed Project has no coordinated entry or plaza.

03-10

---

<sup>8</sup> For example, the DEIR noise analysis (p. 3.9-22) relies upon the existence of adequate onsite parking to reduce noise from concert and event patrons parking and walking through surrounding residential neighborhoods at night: “... the provision of underground parking would reduce the number of event attendees that park and walk through nearby neighborhoods.” If the onsite parking is not sufficient to meet demand, however, this will impact surrounding neighborhoods in ways that are well documented. <https://www.insidehook.com/article/restaurants-bars/legacy-sunset-strip-glam-rock-bars-1980s>.

As these examples illustrate, the project is diametrically opposed in every way – height, bulk, use, design, parking – from what was envisioned and prescribed in the SSP. Far from being a community asset harmoniously planned in a coordinated fashion, this hulking project will tower over its neighbors (including low-rise residential development on two sides) and create exactly what its architecture suggests – a towering vortex of activity spewing noise, shadows, traffic, greenhouse gases throughout the neighborhood and beyond. (See Figure 1 and Figure 2 below.)

Fig. 1 – TORNADO

Fig. 2 – 8850 PROJECT

03-10  
Cont.

5. The Air Quality Analysis in the DEIR is Flawed and Must Be Re-Done.

Because the DEIR Air Quality modeling and analysis depended on the severely understated trip generation assumed in the traffic report, it must be re-done. See footnote 4 above.

In addition, the regional Air Quality Management Plan consistency analysis relies on a contorted argument to conclude that the Project is consistent with regional growth projections. That assumption is undermined by the text of the DEIR itself, which acknowledges that the Project exceeds projected buildout projections for the Sunset Specific Plan (SSP) area:

**“The commercial development cap from the SSP has already been realized.** The SSP states that the City may need to reevaluate the development cap during SSP implementation to determine whether it should be increased. The City may also need to reevaluate the assumed land use mix. If either the cap or the land use mix are changed from the assumptions set forth in the SSP, the City would be required to prepare supplemental environmental analyses to evaluate those changes. The proposed project would involve the construction of 181,903 square feet of commercial uses and 41 dwelling units. As such, the proposed project would contribute to commercial and residential development within the SSP area. While **the proposed project would contribute to an exceedance of the commercial cap in the SSP,** the proposed project

03-11

would require an SSP amendment, which is being analyzed for its potential environmental impacts within this EIR.” (DEIR 3.1-26, emphasis added.)

The DEIR improperly minimizes the impact and concludes there will be no inconsistency with the AQMP even though the entire project exceeds the SSP buildout cap which has already been reached:

“As such, the addition of 187 net new employees and 66 residents associated with the project would be minimal and would not exceed the growth projections for 2040 anticipated in the RTP/SCS. The proposed hotel use would temporarily allow visitors to stay on site in its proposed 115 guest rooms. The temporary stay of hotel guests **would be minimal in comparison to the anticipated population increase of the SCAG Growth Forecast**. Therefore, the proposed project would not stimulate population growth or a population concentration or employment above what is assumed in local and regional land use plans, or in projections made by regional planning authorities.” (DEIR 3.1-26, emphasis added.)

By dismissing the Project’s contribution to impacts as “minimal” in comparison to the cumulative regional growth, the DEIR here is making the same fatal error identified in Kings County Farm Bureau v. City of Hanford (1990) 221 CA3d 692, 718. In that case, the city’s EIR concluded that a proposed cogeneration plant’s air emissions were not a significant cumulative impact based on a determination that the plant’s emissions would be less than 1 percent of area emissions of the relevant pollutants. The court characterized the EIR analysis as a “ratio theory” that masked the seriousness of the cumulative problem; under such a theory, the larger the existing problem, the more likely that any proposed project would have an insignificant impact. Given the air basin is already a “non-attainment area” for air quality, every project that exceeds local development plans and caps should be considered cumulatively significant.

To rectify this error, the DEIR should be revised to acknowledge the Project’s significant contribution to cumulative air quality impacts. The DEIR should also identify other related projects in the air basin that required density bonuses or plan amendments to increase density (zoning amendments, specific plan amendments and/or general plan amendments).

\*\*\*

For each of the foregoing reasons, the Project should be sent back to the applicant for redesign. Once the applicant comes forward with a new application reflecting a design meeting the requirements of the General Plan, zoning code and Specific Plan, then the DEIR can be revised and re-circulated.

Beyond the critical environmental and legal requirements which residents trust their City government to follow, voters hope that at a bare minimum their elected representatives will support projects that improve their daily lives, rather than those such as this Project that will exacerbate the most aggravating conditions such as traffic, parking, noise, pollution and visual blight.

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

### Introduction

This is the first in a series of surveys on the **8850 Sunset / Viper Room Project** which will give the community an opportunity to weigh in on different aspects of this project.

Comments are supposed to be based on issues that were raised in DEIR (Draft Environmental Report) and are due to the City by no later than November 5, 2021. **This survey will be open until November 1, 2021.**

This first survey is looking for feedback on the project's **Height and Design** elements.

### 8850 Sunset

A full description of the project is here - [8850Sunset](#)

Please note: The results of this survey, including comments, will be submitted to the City of West Hollywood as a reflection of community feedback on this project for them to consider as part of the DEIR process.

Real names and addresses are NOT required to participate in this survey, nor does one have to live or work in WeHo to participate.

However, only those responses which DO include real names and addresses will become part of the official record. Anonymous responses will not become part of the official record but hopefully the City will consider them, assuming they are reasonable and respectful.

Because of that, we hope you will participate **on the record** as those comments will carry more weight.

Thank you.

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

### Page 1

1. Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

☐ Live

☐ Work

☐ Drive

Other (please specify)

### 8850 Sunset / Viper Room block

Photo A

Photo B

2. Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

☐ Yes

☐ No

3. Did you frequent any of these places?

- ☐ More than once a month
- ☐ A few times a year
- ☐ Less than once a year
- ☐ Never

4. Are you aware that this block is slated for development?

- ☐ Yes
- ☐ No

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

### Sunset Specific Plan (SSP)

#### Sunset & San Vicente

### **Sunset Specific Plan (SSP)**

In 1996, the City created a plan envisioning future development of every block of Sunset called the **Sunset Specific Plan (SSP)**.

In that plan, every parcel of the 1.2 mile stretch of Sunset Blvd, from the border with Beverly Hills on the west to the border with Los Angeles on the east, was identified with new zoning recommendations for **height, density, massing and use** (i.e. office, retail, hotel, entertainment/restaurant, etc.). The average zoning height of the majority of the properties along Sunset is between four and six stories.

The SSP has not been updated and development along Sunset has been operating along these parameters ever since. When a property veers from these guidelines, a developer requests “**variances**” which the City can choose to grant or not. Usually – and most often, these variances take the form of additional height requests.

### **Target Sites**

In the SSP, certain sites were designated **Target Sites**. These sites were chosen as places where additional height could be accommodated, up to ten stories. They were at major intersections such as Sunset & Doheny and Sunset & La Cienega. This site, **Sunset & San Vicente, is a Target Site**, meaning it is entitled to be **developed up to ten stories**. Anything above ten stories will require a variance that the City can choose whether or not to grant.

### **Rationale behind 15-stories**

The developer and architect of 8850 Sunset has proposed a **15-story structure, five stories above allowable zoning**. They have proposed **two separate towers** so the north-facing rooms of the London Hotel on the hillside just below will have a **view corridor to the Sunset Strip hills**. To do that, the walkway connecting the two towers needs to be higher, presumably justifying the 15-story height.

There are currently four one- and two-story buildings on the site, with the appearance along Sunset of being only one-story. The proposed project will be **15-stories in two towers, rising 200 feet from its lowest point / 189 feet above Sunset**.

5. Given the rationale for the 15-stories, do you support the additional height for this project?

- ☐ Yes
- ☐ No

6. If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

- |                          |                                         |

8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

**Architectural Style**

## 8850 Sunset Ground Level looking up

The **award-winning architect, Thom Mayne**, <https://www.morphosis.com/>, is based here in LA. A local example of his work can be seen just a couple miles down the road - **Emerson College, 5960 Sunset, Hollywood**.

### **Architectural Description** from the DEIR –

The lower portion of the proposed building would consist of an **undulating one- to three-story transparent volume**, visible along the Sunset Boulevard façade, that would **wrap around the east and west facades** of the structure. The **predominantly glass volume** would include the hotel lobby, the entry to the Viper Room, a restaurant/bar, and café that would activate the street level during the day and night and would incorporate a multi-dimensional digital and static off-site sign. Above this lower portion would be **two separate rectilinear volumes** that would house the residential and hotel uses, which would be **set apart from each other by an approximately 120-foot opening**. By locating these two separate volumes on the east and west sides of the building, the **design provides a large view corridor between them in the center of the building** (i.e., an open volume of approximately 166,150 square feet in area) allowing for north–south views through the site and providing an architectural element for the project. The focal point of the opening would be a **landscaped roof** with publicly accessible terraces that would be visible from Sunset Boulevard. The building would be **capped with a bridge** connecting the residential volume and the hotel volume **at the top floor (level 15)**. The bridge would house a publicly accessible restaurant, bar, and terrace. Pools for hotel guests also would be located on the roof of the bridge component, while a separate pool for residents and their guests would be located on the roof of the residential volume.

7. What do you think about the design of the project?

- |                                                                                                                                    |                                                                                                  |
|------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| <input type="radio"/> It is very <b>unique</b> , makes a statement, and would be a <b>World-Class addition</b> to the Sunset Strip | <input type="radio"/> <b>Belongs in Dubai</b> , not WeHo. Nothing to save here, let's start over |
| <input type="radio"/> <b>Interesting</b> , very interesting                                                                        | <input type="radio"/> <b>Haven't decided yet</b>                                                 |
| <input type="radio"/> It is unusual, perhaps not to my taste, but I <b>could live with it</b>                                      | <input type="radio"/> <b>What do I know about architecture? Who Cares? Or No Opinion.</b>        |
| <input type="radio"/> Some of his other work which is not quite so wild and <b>more toned down would be better.</b>                | <input type="radio"/> None of the above                                                          |
| <input type="radio"/> It is too different and out of place for WeHo; while I like a modern look, this is <b>too much.</b>          |                                                                                                  |

8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

**Towers**

**Hotel and Condo Towers**

**8. Two Towers with London Hotel View Corridor**

Do you think two towers is an important part of the project's concept?

- ☐ Yes
- ☐ No

**9. If so, why? Check all that apply**

- ☐ To save the London Hotel's view
- ☐ To separate the condo/affordable housing from the hotel rooms

Other (please specify)

10. There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

- ☐ Very positive
- ☐ Positive
- ☐ Neutral
- ☐ Negative
- ☐ Very negative
- ☐ Other (please specify)

| 49 | I reside on Larrabee Street                                                                                                    | 9/28/2021 12:00 PM |
| 50 | I've lived in west hollywood since the '50s and am very familiar with the city                                                 | 9/28/2021 11:09 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                           |                   |
|----|---------------------------------------------------------------------------------------------------------------------------|-------------------|
| 51 | I drive regularly along this strip, as I live in the Norma Triangle below this proposed project.                          | 9/27/2021 3:21 PM |
| 52 | My office is on Sunset and I live on Westbourne Drive so I regularly travel on Sunset Blvd. in front of the project site. | 9/27/2021 8:58 AM |
| 53 | Have previously worked in the Sunset (Sunset @ Alta Loma) and have been a member at the Equinox on Sunset for 8 years     | 9/27/2021 7:44 AM |
| 54 | Norma Triangle                                                                                                            | 9/27/2021 7:33 AM |
| 55 | Live close by in Norma Triangle.                                                                                          | 9/26/2021 9:18 PM |

## Q2 Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

Answered: 460 Skipped: 8

| ANSWER CHOICES | RESPONSES |     |
|----------------|-----------|-----|
| Yes            | 98.70%    | 454 |
| No             | 1.30%     | 6   |
| TOTAL          |           | 460 |

### Q3 Did you frequent any of these places?

Answered: 465    Skipped: 3

| ANSWER CHOICES         | RESPONSES |     |
|------------------------|-----------|-----|
| More than once a month | 22.15%    | 103 |
| A few times a year     | 39.35%    | 183 |
| Less than once a year  | 20.22%    | 94  |
| Never                  | 18.28%    | 85  |
| TOTAL                  |           | 465 |

Q4 Are you aware that this block is slated for development?

Answered: 467    Skipped: 1

| ANSWER CHOICES | RESPONSES |     |
|----------------|-----------|-----|
| Yes            | 88.65%    | 414 |
| No             | 11.35%    | 53  |
| TOTAL          |           | 467 |

Q5 Given the rationale for the 15-stories, do you support the additional height for this project?

Answered: 451    Skipped: 17

| ANSWER CHOICES |  | RESPONSES |     |
|----------------|--|-----------|-----|
| Yes            |  | 29.49%    | 133 |
| No             |  | 70.51%    | 318 |
| TOTAL          |  |           | 451 |

**Q6 If not, what is the maximum height that would be acceptable to you?  
Bear in mind that the site is already allowed to be 10 stories under the  
SSP.**

Answered: 361 Skipped: 107

| ANSWER CHOICES    | RESPONSES |     |
|-------------------|-----------|-----|
| None of the above | 37.95%    | 137 |
| 10                | 57.06%    | 206 |
| 11                | 0.83%     | 3   |
| 12                | 1.94%     | 7   |
| 13                | 0.00%     | 0   |
| 14                | 2.22%     | 8   |
| TOTAL             |           | 361 |

| # | OTHER (PLEASE SPECIFY)                                                                                                                            | DATE               |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 1 | Its out of proportion for the neighborhood and will block my view                                                                                 | 11/1/2021 3:32 PM  |
| 2 | 2 stories is tall enough. The more stories that are built will cast a massive shadow on Sunset Blvd.                                              | 10/28/2021 8:40 AM |
| 3 | Prefer to leave as is.                                                                                                                            | 10/28/2021 2:51 AM |
| 4 | Even if 10 storys are allowed, as the SSP is 25 years old, why are we not reevaluating whether the plan is valid for current and future planning? | 10/27/2021 5:04 PM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                      |                     |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 5  | Approve the height                                                                                                                                                                                                                                                                                                                                   | 10/23/2021 9:15 AM  |
| 6  | 6 to 7 stories seems more appropriate and will not be as big of an eye sore                                                                                                                                                                                                                                                                          | 10/22/2021 2:56 PM  |
| 7  | This entire project is unacceptable to me. Not just the height. There is already a hotel (The London) that does not need to be obstructed by this monstrosity. And the block and surrounding area are already too congested.                                                                                                                         | 10/21/2021 6:56 PM  |
| 8  | 6 stories to keep growth in check and to keep the buildings below the sight line of the hills                                                                                                                                                                                                                                                        | 10/18/2021 9:13 PM  |
| 9  | 15 is fine                                                                                                                                                                                                                                                                                                                                           | 10/17/2021 10:40 AM |
| 10 | The additional height makes this block stick out like a sore thumb. I think keeping it closer to the ground will make this block feel more elegantly integrated into the existing surroundings.                                                                                                                                                      | 10/16/2021 3:58 PM  |
| 11 | 10 or less                                                                                                                                                                                                                                                                                                                                           | 10/15/2021 5:30 AM  |
| 12 | 10 stories is way too high for the area. It looks hideous. It doesn't fit in with Sunset Strip in that area. Traffic is already clogged around there. Such a large capacity building will only add to the congestion.                                                                                                                                | 10/14/2021 12:38 AM |
| 13 | Original zoning is for the average height of the majority of the properties along Sunset between four and six stories. To be in line with other new developments and existing sites the average seems to be no more than eight stories.                                                                                                              | 10/13/2021 11:28 AM |
| 14 | I support 15 stories. The London behind the site is approximately the same. Also - there are many new development projects I've seen that will be of a similar height.                                                                                                                                                                               | 10/13/2021 6:46 AM  |
| 15 | 38                                                                                                                                                                                                                                                                                                                                                   | 10/12/2021 10:40 PM |
| 16 | I believe even 10 stories is out of place along Sunset Blvd. 8500 Sunset Apartments are only 8 stories and it is still not fully leased. Originally it was slated to be a hotel and that did not work out. Other hotels have since opened on Sunset, thereby over saturating the area with hotel rooms, overcrowding the area, and too much traffic. | 10/12/2021 5:28 PM  |
| 17 | It's a shame they are destroying historic LA landmarks I approve of NO CHANGE.                                                                                                                                                                                                                                                                       | 10/12/2021 11:18 AM |
| 18 | And that is too much. This is already a congested area. Besides harmony and beauty should be taken into account. High rises were not meant for this area.                                                                                                                                                                                            | 10/11/2021 4:45 PM  |
| 19 | This area is already rife with congested driving etc and this will make it that much more of a nightmare.                                                                                                                                                                                                                                            | 10/11/2021 3:32 PM  |
| 20 | Ten is too high. Make it the same height as the London. Better yet, lesser than the London. Better yet, start over because this does not belong on that street or in WeHo.                                                                                                                                                                           | 10/11/2021 2:13 PM  |
| 21 | None                                                                                                                                                                                                                                                                                                                                                 | 10/10/2021 8:19 PM  |
| 22 | 20                                                                                                                                                                                                                                                                                                                                                   | 10/10/2021 2:35 PM  |
| 23 | Keep it like it is. 2 story max.                                                                                                                                                                                                                                                                                                                     | 10/9/2021 9:04 PM   |
| 24 | 6-8                                                                                                                                                                                                                                                                                                                                                  | 10/9/2021 2:37 PM   |
| 25 | Given that we are on an earthquake zone, why would we want to add a 10 story building anywhere?                                                                                                                                                                                                                                                      | 10/9/2021 2:13 PM   |
| 26 | This architecture is hideous and adding to the traffic that's already congested on that specific corner. Blocking out the view in the sky, which makes that strip particularly appealing with this hideous eyes sore is a bad decision.                                                                                                              | 10/9/2021 1:59 PM   |
| 27 | I think it should be lower—4 stories max                                                                                                                                                                                                                                                                                                             | 10/9/2021 1:08 PM   |
| 28 | Don't tear down the iconic Viper Room. Keep original buildings in Los Angeles                                                                                                                                                                                                                                                                        | 10/9/2021 9:17 AM   |
| 29 | I don't agree with this project at ALL.                                                                                                                                                                                                                                                                                                              | 10/8/2021 7:33 PM   |
| 30 | Love it as designed!                                                                                                                                                                                                                                                                                                                                 | 10/8/2021 12:28 PM  |
| 31 | 0. This is a monstrosity. Development for the sake of development.                                                                                                                                                                                                                                                                                   | 10/8/2021 11:15 AM  |
| 32 | I think 10 is enough                                                                                                                                                                                                                                                                                                                                 | 10/7/2021 11:10 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                        |                    |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 33 | I believe 10 is fine                                                                                                                                                                                                                                                                                                                   | 10/7/2021 10:50 PM |
| 34 | Leave it as is - the building and area is historic and developers have been ruining sunset strip farther down east - these places s are not only shockingly ugly but offensive and unnecessary                                                                                                                                         | 10/7/2021 10:06 PM |
| 35 | This stretch of Sunset is lined with small buildings of various architectural styles. I don't even agree with the ten-story allowance. The added height is even less desirable.                                                                                                                                                        | 10/7/2021 5:24 PM  |
| 36 | 8                                                                                                                                                                                                                                                                                                                                      | 10/7/2021 5:15 PM  |
| 37 | The height doesn't fit with the neighborhood.                                                                                                                                                                                                                                                                                          | 10/7/2021 9:49 AM  |
| 38 | maximum 3                                                                                                                                                                                                                                                                                                                              | 10/7/2021 9:27 AM  |
| 39 | 4                                                                                                                                                                                                                                                                                                                                      | 10/7/2021 7:54 AM  |
| 40 | It's overly imposing for the area.                                                                                                                                                                                                                                                                                                     | 10/7/2021 7:41 AM  |
| 41 | None it's awful                                                                                                                                                                                                                                                                                                                        | 10/6/2021 11:42 PM |
| 42 | Less than 10 stories - 5 max                                                                                                                                                                                                                                                                                                           | 10/6/2021 11:17 PM |
| 43 | If I had a choice, why would I want my view of the city obstructed?                                                                                                                                                                                                                                                                    | 10/6/2021 8:41 PM  |
| 44 | I just feel that that site should not have anything higher than 5 stories. Anything taller just doesn't seem right for that area. Also I feel that the SSP is outdated and needs to be revised to fit the needs of West Hollywood in the 21st century.                                                                                 | 10/6/2021 1:43 AM  |
| 45 | We live here, it's not Las Vegas                                                                                                                                                                                                                                                                                                       | 10/5/2021 10:22 PM |
| 46 | Minimum height as possible                                                                                                                                                                                                                                                                                                             | 10/5/2021 4:52 PM  |
| 47 | Ideally any new projects would be under 10 stories. Majority of life and use of this strip of Sunset take place at our around evening time and towering buildings cast shadows along the road making for less than ideal life along the strip.                                                                                         | 10/5/2021 2:34 PM  |
| 48 | There should be no limit. West Hollywood needs to adapt that we are a growing metropolitan city.                                                                                                                                                                                                                                       | 10/5/2021 2:18 PM  |
| 49 | It should not be built at all.                                                                                                                                                                                                                                                                                                         | 10/5/2021 11:07 AM |
| 50 | Same height as existing building                                                                                                                                                                                                                                                                                                       | 10/5/2021 10:54 AM |
| 51 | Anything over 4 stories is going to change views, wind patterns and create a canyon along sunset                                                                                                                                                                                                                                       | 10/5/2021 6:53 AM  |
| 52 | 15 is ok                                                                                                                                                                                                                                                                                                                               | 10/5/2021 4:10 AM  |
| 53 | Developers are trying to turn the strip in Macao. One of the beauties was that it felt open. it's losing all its character and history.                                                                                                                                                                                                | 10/4/2021 9:42 PM  |
| 54 | The building is dynamic and memorable in a manner unique to Los Angeles not just West Hollywood. It has the potential to be a magnet for tourist attention. And adds a visionary statement to the building style of the West Hollywood community. It can set a tempo for more development to emulate its powerful freshness of design. | 10/4/2021 5:37 PM  |
| 55 | As proposed                                                                                                                                                                                                                                                                                                                            | 10/4/2021 5:19 PM  |
| 56 | I love this designat any height                                                                                                                                                                                                                                                                                                        | 10/4/2021 3:05 PM  |
| 57 | This is a great addition to the area and will hopefully spur more development.                                                                                                                                                                                                                                                         | 10/4/2021 12:10 PM |
| 58 | Just because 10 stories is allowed it shouldn't be built that tall. The corridor effect which you're creating on Sunset is ruining the hills and the open feeling LA/Weho has along the strip. If people wanted to live in NYC in Times Square they wouldn't be living here.                                                           | 10/4/2021 11:20 AM |
| 59 | SSP is ten stories for a reason                                                                                                                                                                                                                                                                                                        | 10/4/2021 9:17 AM  |
| 60 | My main concern is the fact the high rises like the one proposed will destroy the Sunset Strip character and charm. It will become a Las Vegas Strip or a Hollywood Blvd Strip, commercial and impersonal. It will mean the end of the sunset strip as we know it as families will move out                                            | 10/4/2021 3:23 AM  |
| 61 | 5                                                                                                                                                                                                                                                                                                                                      | 10/3/2021 9:42 PM  |

# 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                    |

| 62 | 15                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/3/2021 8:10 PM  |
| 63 | This entire rendering shows us a nightmare building in a known earthquake zone. Are the developers INSANE??? The building itself, anywhere, is an eyesore. We are not Dubai or any of the Gulf countries that love this stuff. Nor Macau or China that thinks bigger and uglier is better and in the case of China, NO ONE gets a say anyway. Take a look at Paris and how the French have preserved a beautiful city. They put the 'new designs" out of the city itself. And then look at London - another architectural nightmare. . In California, buildings with potential to shake and collapse really have no place in an earthquake zone. Really. This proposed project is HIDEOUS. It violates the look of this small city and insults taste on so many levels it is egregious. Appalling and may also make West Hollywood a laughingstock architecturally worldwide. Why didn't they call Frank Gehry? | 10/3/2021 2:29 PM  |
| 64 | NO BUILDING THERE. The sunset strip is still as much of a cultural center today as it was in the 80s. We cannot afford to commercialize it.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 1:29 PM  |
| 65 | Way over build for the area!!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 1:09 PM  |
| 66 | Keep it as is. There is already too much density                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/3/2021 12:09 PM |
| 67 | Don't build this horrid building!!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/3/2021 11:59 AM |
| 68 | Anything that shrouds Sunset in shadows and sits on its south side is a proven bad idea. This part of Sunset is too crowded and dense for huge structures. It should retain its historic character.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/3/2021 11:32 AM |
| 69 | West Hollywood seems hell bent into becoming the ugliest and unlivable city in Southern California . Beholden ONLY to developers and whoever has the most cash. Disgusting,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 11:31 AM |
| 70 | Maximum allowable with no additional allocation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/3/2021 10:18 AM |
| 71 | 10 stories is enough                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/3/2021 9:53 AM  |
| 72 | I don't want ANY building of this height in my neighborhood                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 9:51 AM  |
| 73 | The only rationale is to accommodate hotel room guests across the street? That's absurd.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/3/2021 9:29 AM  |
| 74 | Seems like the project should be similar height to other buildings in the area (sunset and doheny office bldgs, sunset and la cienega AKA buildings...)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/3/2021 9:17 AM  |
| 75 | Build higher!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 9:14 AM  |
| 76 | I think Sunset Blvd is headed for more ugliness with these mega buildings. It used to be a joy to walk on Sunset. It had class, space, charm. The future has none of these things. The planning commission has sold Sunset down the river with no consideration to the populace and it's enjoyment of the environment on the street. That building pictured is just about the ugliest monstrosity imaginable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 9:14 AM  |
| 77 | THIS IS COMPLETELY OUT OF SCALE FOR THE AREA AND THE CITY. IT WILL OVERPOWER AND BLOCK EVERYONE FROM MILES AWAY. STUPID PROJECT WITH STUPID IDEAS!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/3/2021 9:12 AM  |
| 78 | Not sure, but it shouldn't seem so intimidating to a pedestrian. Should be more welcoming from street level. Not so concerned about height or whether hotel gets view.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/2/2021 2:51 PM  |
| 79 | 8                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/1/2021 12:54 PM |
| 80 | ...um...earthquakes! And just because you CAN build to those heights do you really have to??!?!?!?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/1/2021 10:26 AM |
| 81 | Interest along The Strip is derived from height VARIANCE -- just because 10 stories is "allowed," does not mean it should be built to the maximum                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/1/2021 10:20 AM |
| 82 | This new building should be no taller than the London Hotel to ensure the same look and feel of the strip. If taller, it will tower over the other buildings and block the view of the rest of the city as well as act as a massive billboard and take away from the character that West Hollywood has and has maintained for many years.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/30/2021 6:14 PM  |
| 83 | 15                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/30/2021 1:17 PM  |
| 84 | stay within the current zoning laws.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/29/2021 5:26 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                    |

| 85  | I would prefer that whater is developed is within the average height of 4-6 stories                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 9/29/2021 12:41 PM |
| 86  | rules are rules for a reason. no variances to private companies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/29/2021 11:51 AM |
| 87  | 5 stories. this proposal is monstrous                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 11:43 AM |
| 88  | I like the look of the building-no we compare ourselves to the future the way others around the world have, our love for old trashy looking buildings is disturbing. I played in a band for 20 years and playing The Central/ Viper whole in wall and the Starwood, our bands biggest money maker,Mt he Whisky which was a great place for punk ska rock ROXY WAS FUN AS WELL. I HOPE ALL INTERIORS HAVE BENN UPDATED. Personally the height doesn't bother me since everything must dig down deeper and go higher for a population growing. Personally-the old Gazarris/live oak? Can go. Played their as well as the other famous artists. Love the look and height. Besides I can see every new building on sunset as I walk my dog. Nice skyline Like Dubai, Shanghai, London, NEW YORK'S NEWER BUILDINGS—                                               | 9/29/2021 11:01 AM |
| 89  | Building is way too large for the area                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/29/2021 10:43 AM |
| 90  | Severely blocks the views of the Hollywood Hills; 10 stories is too much, max should be 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9/29/2021 9:20 AM  |
| 91  | 4 would be best, up to 6 perhaps.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/29/2021 8:15 AM  |

| 94  | Follow the SSP plan period.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/29/2021 3:52 AM  |
| 95  | The strip is unique to LA, and belongs to the character of the city, so why bulldoze it? Why install a building mainly planned to give rich tourists a view up a street?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 9/28/2021 10:33 PM |
| 96  | Ten on the San Vicente side. 5 on the Larrabee side and in the southern side                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 9/28/2021 8:48 PM  |
| 97  | 4-6 stories. Yes, the Sunset & San Vicente corner is listed as a Target Site - but is the Sunset & Larrabee corner also listed as such? I say this because the proposed 8850 Sunset project will dominate both those corners, even though only one is a "major intersection." In contrast, the recently built West Hollywood Edition only touches one corner - Sunset and Doheny - which is indeed a Target Site-defined major intersection. Should the 8850 Sunset project be greenlit as is, its outrageous 15 story height would literally *blot out the sun on Sunset Boulevard.* Its sight would dramatically alter life for anyone living in surrounding neighborhoods, especially Larrabee Street, San Vicente and Sunset Blvds. We love our view of the Hollywood Hills, too. And it would forever be blocked by this Las Vegas-sized hotel complex. | 9/28/2021 8:06 PM  |
| 98  | The proposed height is suitable for the area and work well into the look of Sunset Strip. 15 stories is still a mid-rise and any reduction in proposed height will diminish the impact of the design and is not the greatest use of land at any reduction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/28/2021 7:22 PM  |
| 99  | Given our needs and the ability for large scale mixed use projects to fulfill them sustainably, we should seriously make the case for 50+ story mega skyscrapers that rival the UAE, we are well into the 21st Century. At-least 10% of the residential unites should be allocated for affordable or Public Housing (like the UAE projects) because this investment in society really pays off                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/28/2021 6:22 PM  |

| 101 | 8                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 2:15 PM  |
| 102 | I love the design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 9/28/2021 1:38 PM  |
| 103 | Should at least 20 stories tall.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/28/2021 1:35 PM  |
| 104 | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 9/28/2021 12:31 PM |
| 105 | 10 stores is more than adequate                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/28/2021 12:13 PM |
| 106 | im ok with the project                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/28/2021 12:08 PM |
| 107 | I think 10 stories is too high but that is what the law allows. In my opinion, the building shouldn't be any taller than 7 or 8 stories as it will tower over the neighborhood and impact the aesthetics of the residential areas surrounding it.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 12:02 PM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    |

| 108 | 6 stories should be sufficient.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 9/28/2021 12:12 AM |
| 109 | I like that they are considering the impact to the north facing London suits                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/27/2021 1:18 PM  |
| 110 | The block is iconic. They should not create a building in section. The mix uses structure they are proposing to build would have views blocked by the London if keeping with the CC&R at 10 stories, which is the reason the builder is requesting a variance. The project would deter people from staying at the London and surrounding hotels, like the Sunset Tower, Best Western, Andaz, Mondrian, the Edition, etc., creating vacancies, in an already competitive hospitality market. If we make a dispensation, this will set precedent for all other building going forward. | 9/27/2021 12:30 PM |
| 111 | The view disruption of residences north of the project should be considered above the view of the visitors in the London hotel. The view blockage of the residences north of the hotel would have to be affected every day they stay in their homes where the guests of the hotel will be affected for a few days a year. Why are we putting the needs of a business (the London) as priority before the needs of residents.                                                                                                                                                         | 9/27/2021 9:17 AM  |
| 112 | This site has a large presence on Sunset and sits next to the London Hotel and important business in our community. 2 15 story buildings will overwhelm the area visually and will be too intrusive on the London and all the other neighboring businesses and residents.                                                                                                                                                                                                                                                                                                            | 9/27/2021 9:01 AM  |
| 113 | 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9/27/2021 7:44 AM  |
| 114 | Developers always play the same game: Ask for FAR MORE than allowed, go through the charade of community meetings, discussions with the city, etc. Showing fantastical renderings of something that will cost FAR MORE than they are willing to spend (or that banks will finance), and then settle for something less, with mediocre design and undesirable to the community. But we end up settling for what they really wanted in the first place. I've seen this happen over and over in WeHo.                                                                                   | 9/27/2021 6:34 AM  |

| 116 | Sunset Strip is already overbuilt and overcrowded. There is massive congestion during morning and evening rush hours, and the City of West Hollywood is incapable of moving the traffic along - both vehicular and pedestrian. Imagine what a hell it will be for commuters and we residents if you build even more unneeded, unwanted monstrosities.                                                                                                                                                                                                                                | 9/26/2021 9:35 PM  |
| 117 | 2-4.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 9/26/2021 9:25 PM  |
| 118 | Frankly, I think 10 stories is pushing it, but since it's allowed, I consider it acceptable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/26/2021 9:19 PM  |
| 119 | I love this new design, and the new businesses it will bring to the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/26/2021 8:51 PM  |

## Q7 What do you think about the design of the project?

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

neighborhood here with this - it belongs in Hollywood, next to Emerson College....PLUS it is shockingly massive and unusual, to the point that it could very likely be considered a landmark of bad taste, and attract tourists for its bad reputation....I strongly believe it will hurt the resale value of my home on St. Ives Drive....

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                     |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 2  | After staring at the pictures of the building, I finally understand the design. "Viper ~ A venomous snake with large hinged fangs, typically having a broad head and stout body, with dark patterns on a lighter background." That almost makes me like it a bit more...almost. There it is, the (vegan) viper with a green tongue, eating the more ordinary building on the east side. In reality, it will most likely also kill the hotel to the south, as well as the small businesses remaining in the vicinity, with its years of construction. At the top of the vipers tongue is a small nod to common outdoor space. Is that the green, community outdoor, space referred in the sales literature? As with many of Thom Maynes buildings, it seems to really lose it at street level. It feels like the weight of the hulking mass above, is squashing the street level down. The bottom level suffers. I also worry about the overall use and the interiors, whatever those will be, these days. (The viper rooms. ) Mayne has been criticized before, that his interiors are lacking and inferior to an extravagant exterior. Since, it's supposed to be a part of "walkable" West Hollywood, at the top of a steep hill, this is physically a rough spot. Except at night, there is little to walk to, or from, coming from the west (other than the mini mart at the gas station). Will people regularly walk to Sunset Plaza or up and down the hill to boys town? I doubt that more than a few would. Even though, Thom Mayne has designed a number of dramatic and interesting buildings, many are grey, dark and brooding like the cal trans building downtown. Some remind me of some suffering winged creature wishing to take flight. Some, I find attractive and iconic. To me, this one is sharp and lacking in charm. At least, the viper portion is white. The entire project is too massive, tall and lonely for that (entire) block and the City at this space in time. People certainly do have different taste. I (generally) love the architecture of Zaha Hadid, Frank Gehry and Renzo Piano. Mayne seems to be in the same category, fame wise. I realize that this will be built. I wish they would start over. If not, what I'd like to see is for Mayne to channel his inner snake charmer, to give this development some grace. | 10/31/2021 5:30 PM  |
| 3  | The design is impressive but the location is terrible.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/28/2021 2:54 AM  |
| 4  | I'm huge fan of modern architecture but I actually laughed when I saw this rendering. It's a cut & paste pastiche of already tired and dated architectural tropes. The proposed development is far too oversized for this block and the immediate neighborhood and needs to be downscaled, but there's no innovative aesthetic in this design that could or should merit a variance. If you're looking to create a building that will become a landmark, the developer needs to think again.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/27/2021 5:10 PM  |
| 5  | No one liked Gehry's design for Disney Hall when it was proposed, and now it's an iconic LA landmark.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/25/2021 7:00 AM  |
| 6  | It would be nice to have something that blends better and is a Much lower building height. I think the design is more about wanting to stand out and make a statement that be harmonious and integrate with the surroundings. I also question the need for more hotels etc.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/22/2021 3:03 PM  |
| 7  | It looks like the awful developments just east of LaCienega on Sunset. There is no charm or uniqueness to this monstrosity!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/22/2021 12:04 AM |
| 8  | This entire project is unacceptable to me. Not just the height. There is already a hotel (The London) that does not need to be obstructed by this monstrosity. And the block and surrounding area are already too congested.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/21/2021 6:57 PM  |
| 9  | All of the new buildings on Sunset have been awful.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/18/2021 9:15 PM  |
| 10 | Sunset Strip is already quite busy so why do we need to add to that noise! I'm all for something different and unique but why does every new building feel like it has to shout louder.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/18/2021 4:08 PM  |
| 11 | This doesn't go with the viper room at all!!! It's so sanitized! The viper room is not going to be cool anymore with this ill-fitting crown, I'm afraid.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/16/2021 4:29 PM  |
| 12 | This is too small of a block to house so many different design elements. To me, this looks like a group project gone wrong - I think there are some beautiful elements (curvilinear, glass incorporation), but I think it lacks focus. The bridge looks like it should be in Singapore, not WeHo.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/16/2021 4:02 PM  |
| 13 | Do we really need another hotel in the area? Why are the city and developers not focusing on affordable housing???                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/14/2021 12:41 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                     |

| 14 | WAY TOO BIG for the space. Too much traffic congestion already.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/13/2021 9:31 PM  |
| 15 | I think it will look dated very quickly. The form is too large and would stick out like a sore, slightly green thumb.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/13/2021 2:20 PM  |
| 16 | Seeing the picture of the lower portion of the proposed building, I think it is very exciting and open for Sunset Blvd. The undulating lower roofline is very striking & successful. This lower roofline looks great as it has a connection to the Lytton Savings building at 8150 Sunset Blvd from 1960, one of Los Angeles' Historic-Cultural Monuments until it was demolished in 2021. The upper portion of the building is not of scale, proportion or style to that corner of Sunset Blvd & San Vicente. The glass green western tower seems open and interesting. The other portion is just not working and comes w/ too many height variances for just a sky walk. Since this is a Target Site entitled to be developed to ten stories: 10 stories should be the absolute maximum for the project (per the Sunset Specific Plan {SSP}) & hopefully a design would come under 10 stories to honor Sunset Blvd's low-slung nature. Definitely, DO NOT grant any height or other variances. Lastly, the City of West Hollywood issued a study (PRE-Pandemic) that showed a major negative impact on the financial viability of the city's hospitality industry with construction of additional unapproved hotels in such a small town. POST-Pandemic, West Hollywood City Council should revisit that study while putting a moratorium on any hotel development that has not already been permitted. | 10/13/2021 1:16 PM  |
| 17 | It is completely out of place with the other designs in the area, especially Sunset Plaza that is no more than two stories. Los Angeles should not become New York City which is a vertical city.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/13/2021 11:31 AM |
| 18 | Trying too hard to stand out                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/12/2021 8:13 PM  |
| 19 | This is a bit of a monstrosity in any neighborhood. Meant for gawking, not for betterment. No go in my book.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/12/2021 1:32 PM  |
| 20 | At 15 stories, in my opinion, the design would be too imposing and, I fear, create a "race to the top" with more requests for taller projects on other Target Sites in the future (including the west side of the San Vicente/Sunset intersection). I believe keeping it at 10 stories would still help it make an impact; it would still be an obvious improvement to the existing drab buildings on the block; but it would limit how much it towers and imposes itself on the surrounding areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/11/2021 3:46 PM  |
| 21 | It is too different and out of place for this block and for WeHo. This is too much. Start over.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/11/2021 2:14 PM  |
| 22 | This is too different and out of place for this block and for WEHO. This is too much.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/11/2021 2:02 PM  |
| 23 | I do not find this architecture interesting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/10/2021 5:33 PM  |
| 24 | looks like a giant mouth biting something. it is hideous.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/10/2021 5:54 AM  |
| 25 | Consider the demographics. The design would intrigue residents, tourists, businesses to meet here as well as the arts, and music performances. A major destination.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/10/2021 12:52 AM |
| 26 | The two structures need to be tied together. They look like two building which are put together as an afterthought. More unified or completely apart. Now is a mish mash.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/9/2021 8:17 PM   |
| 27 | Why is West Hollywood not thinking about its inhabitants and instead thinking of the builders and developers that will make this already dense city, even more unbearable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/9/2021 2:15 PM   |
| 28 | Its a disgusting eye sore that blocks out the skyline and sunlight. It is a really bad idea.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/9/2021 2:00 PM   |
| 29 | I don't even think it belongs in Dubai. I find it messy and disturbing. Like the city was just hit with a large bomb. I do like modern but this is more post-apocopyse. Why don't we wait to have this architecture after the apocalypse and have something nice before the apocalypse?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/9/2021 1:11 PM   |
| 30 | This is entirely out of character for the neighborhood. It says. It says nothing about Southern California, Los Angeles, West Hollywood, sunset strip, etc. The planted roof garden is picturesque in rendering but will never be implemented as designed. The massing will drastically change the profile of the Hollywood hills and not for the better. I appreciate the innovation but what about this building says "Hollywood"                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/9/2021 9:20 AM   |
| 31 | Don't tear down the iconic Viper Room!!!!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/9/2021 9:18 AM   |
| 32 | The pedestrian/street level should be more unique to reflect the character and history of Sunset Blvd. It feels a little generic and cold. The Viper Room is simple but iconic. Maybe                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/9/2021 8:50 AM   |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

some sort of reference to that unique and gritty character would be make it feel less like an "off-the-shelf" downtown building.

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                    |

| 33 | It's an ugly and awful design. Looks ridiculous and has no place anywhere!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/9/2021 5:39 AM  |
| 34 | I don't agree with this project. Los Angeles IS NOT Vegas. The mystique of the Sunset Strip is being taken away by these horrible developments. People come to the Sunset Strip to see the history, route 66, etc. etc. People go to Vegas to see MONSTROUS hotels, not here on the Sunset Strip. West Hollywood better think long and hard before they loose all of the history and appeal of the Sunset Strip. Then you are going to have HUGE HOTELS and no one to fill them.                                                                                                                                                                                                                                                                                                                                                              | 10/8/2021 7:36 PM  |
| 35 | It looks really cool and would bring a modern element to Sunset. I love the green elements and the fact that you can see through it                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/8/2021 2:05 PM  |
| 36 | Garbage design. What award did he win? Was it a joke?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/8/2021 11:16 AM |
| 37 | Green roofs never look great particularly in LA's climate which limits what can be planted. There is a similar green roof on sunset at Holloway which looks terrible.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/8/2021 9:59 AM  |
| 38 | Really admire the greenery added to it. I can't recognize which structure part is more south, but I don't think the white part of the building should block the glass part, so that there's a nice sunset view.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/7/2021 11:01 PM |
| 39 | I cannot say how strongly offensive this proposed design is - it is out of place inappropriate and disgusting let alone an eyesore I can't even look at the sketches                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/7/2021 10:07 PM |
| 40 | I love creative architecture. I don't love it when it does not take into account the neighborhood and the needs of the community. This project is so above and beyond what Sunset Blvd. is.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/7/2021 5:27 PM  |
| 41 | This building has no relevance to the site or the surrounding architecture. Additionally, it feels trendy and is likely to become dated very quickly. I expect more from Thomas Mayne and Morphosis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/7/2021 1:12 PM  |
| 42 | I love the nature aspect being incorporated                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/7/2021 10:02 AM |
| 43 | Aweful                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/7/2021 9:28 AM  |
| 44 | Emerson College building is interesting but the idea of a gigantic open space in the middle has been used already. Emerson College was built on a less developed stretch of Sunset where new architecture is welcome and without the established business and residential density of this block. This block is the heart of the Sunset Strip which is a historical location of low, small, pedestrian friendly buildings harkening to LA's 20th century. It should be a protected zone. Large modern buildings like this are great for empty corner sites like Sunset /Crescent Heights and Sunset /Doheny, but jamming a high-rise here in the middle is wrong. In addition, this massing looks ridiculous on first glance -- gimmicky and a first draft. Architect needs to go back and create something more appropriate to this location. | 10/7/2021 8:45 AM  |
| 45 | Atrocious and ridiculous                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/6/2021 11:43 PM |
| 46 | Just ugly. Totally out of place. Would be OK on it's own, without any surrounding structures - not as part of an existing neighborhood. Certainly not this one. Maybe next to the Broad in downtown LA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/6/2021 11:21 PM |
| 47 | It's drastic and what about the rest of the block? I've lived across the street for 30 years and I simply don't want to live across the street from it or try and get home with quadruple traffic.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/6/2021 8:49 PM  |
| 48 | It looms over the street, is not part of a whole environment, belongs in Dubai, will bring even more traffic, cars, eye and ear pollution. The first response when I have shown it to neighbors in Laurel Canyon is, " Oh my God! Monstrosity!" Finally, does iconic Sunset Blvd need more billboards/ads/videos aimed at people driving? Check the accident rate in the areas that have video billboards and see if it is higher than streets with the same amount of traffic but no billboards. The "development" along Sunset seems to be heading toward an unlivable environment.                                                                                                                                                                                                                                                         | 10/6/2021 2:21 PM  |
| 49 | I love it! LA absolutely needs something like this. Why do people always complain about daring and unique architecture and demand it to be toned down or scrapped, and when some boring cereal glass box gets proposed the same people complains that its too bland or too out of character and shouldn't get built? I hope the WeHo city council recognizes this irony and                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/6/2021 10:42 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

hypocrisy. This is a chance for this project to be remarkable, not just any other non-place. Do we want to cement Sunset as the premier entertainment destination or not?

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                    |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 50 | It sounds very interesting but I wonder how well the design will hold up over time or if it will feel dated and tacky in 15 years.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/6/2021 6:29 AM  |
| 51 | I think it's beautiful, but I don't want it built where they're planning on building it                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/5/2021 9:40 PM  |
| 52 | I am very familiar with Thom Mayne's work especially with the Cooper Union building in New York's East Village. Nearly a decade after completion the building at 41 Cooper Sq. still does not fit in within the surrounding neighborhood. The double tower with open interior space connected by an overhead walkway on this project is an aging architect's desperate attempt to be the next Starchitect - but ultimately falls short, feels tired, outdated and lacking originality. This scheme is a scrapbook of Mayne's career - a career that has yet to complete an iconic building. One final attempt. | 10/5/2021 2:46 PM  |
| 53 | Just ugly and unnecessary, UGLY!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/5/2021 10:56 AM |
| 54 | Yuk                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/5/2021 10:55 AM |
| 55 | THIS IS A DESIGN DRIVEN BY AN INHERENTLY POOR SITE CONDITION.. IT IS NOT REALLY ARCHITECTURE IT IS URBAN DESIGN. WOULD WE CALL IT LONDON' LONDON'S CRULLER?                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/5/2021 10:02 AM |
| 56 | It takes courage to create out to the box concepts like this. But such buildings can revolutionize a city and its international standing. Think The Disney Hall - Toronto City Hall that put the city to the forefront of imaginative but useful design - the Guggenheim Museum in Bilbao. Etc. West Hollywood has one of the most creative populations in America but has quite vanilla buildings. This is a chance to change that.                                                                                                                                                                           | 10/4/2021 5:41 PM  |
| 57 | This would be a remarkable addition to our City.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/4/2021 5:19 PM  |
| 58 | Must of LA and certainly WeHo's buildings are standard square or rectangle boxes. For a city like LA and WeHo we need to show our creativity to the world.                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/4/2021 4:17 PM  |
| 59 | This appears to be a convenient project contained in his past portfolio. Some of the project resembles work of one of his practicing students and should to be claimed as his. The greenery sprouting building is tired and unremarkable. It takes an architect of vision to design something here taking into consideration climate related needs which should be addressed as a priority. Recirculating out of date plans is a disservice to West Hollywood and a reflection of the consciousness and integrity quotient of the architect.                                                                   | 10/4/2021 2:51 PM  |
| 60 | It's ugly                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/4/2021 1:06 PM  |
| 61 | Anything to bring style and attention to this area would be beneficial. ANYTHING to replace what is there is highly desirable. Hopefully, this will spur a nice development across Sunset where the HYDE space is as it is ugly and adds nothing to the area. West Hollywood (it's own City of course) is part of a World Class City of Los Angeles and we need to be recognized for our architecture and design. I can promise you that everything that is complaining about this development will be the first ones to show it off when completed. This is a 'must do' for the City of West Hollywood.       | 10/4/2021 12:16 PM |
| 62 | The focal point should be a Monarch Oak tree.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/4/2021 12:08 PM |
| 63 | Clubs come and GP and its even being housed in the development I believe...move with the times I say. Create something wonderful looking in the area. Most the other buildings are insignificant and rundown anyway.                                                                                                                                                                                                                                                                                                                                                                                           | 10/4/2021 9:49 AM  |
| 64 | I am a developer and this project feels out of touch with even the new development locally. It is not cohesive with the look and feel of its surroundings and feels unbalanced.                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/4/2021 8:46 AM  |
| 65 | I travel a lot and I see how other cities developed worldwide: London, Vienna, Barcelona... We in West Hollywood and Los Angeles are way behind and look ugly and outdated. We need more buildings in WeHo with unique designs like this one and the PDC/Pacific Design Center.                                                                                                                                                                                                                                                                                                                                | 10/4/2021 8:12 AM  |
| 66 | As I said before, this will turn sunset strip into Las Vegas strip. Horrible                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/4/2021 3:27 AM  |
| 67 | This design is hideous and does not define architectural sophistication. This neighborhood deserves something very classy and pleasing to the senses not an assault to them.                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 8:31 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                    |

| 68 | The block should not have building higher than 2 stories                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/3/2021 4:10 PM  |
| 69 | it looks amazing -- but i would worry about the engineering that could potentially fail with a structure like that.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/3/2021 2:56 PM  |
| 70 | Morphosis hasa morphosized into a theme park mentality. My father was designer and builder of houses. His concern when creating a pan and a rendering to consider the location, the other buildings and how. the his. building would complement the site. He was not a graduate of any architecture school. He did however, possess talent, common sense and esthetic sensibility. I don't think it matters how many awards an architect has won, when they create somethinglike the Sunset Project - they have made an epic fail. And they have not added anything to their list of awards. I find this design atrocious. Again - better call Frank.                                                                                                                             | 10/3/2021 2:35 PM  |
| 71 | LOVE LOVE LOVE LOVE IT!!!! Sick to death of square cereal boxes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/3/2021 2:29 PM  |
| 72 | Atrocious over development of a beloved city                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/3/2021 2:11 PM  |
| 73 | I hate it. A lot.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/3/2021 1:24 PM  |
| 74 | Tone it way down!!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/3/2021 1:11 PM  |
| 75 | Terrible                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/3/2021 12:00 PM |
| 76 | I don't mind this project, this design is just atrocious.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/3/2021 11:00 AM |
| 77 | The Dubai answer feels like it has racist/xenophobic undertones, in my opinion. Find a better way to express the sentiment of illustrating the exotic contrast between WeHo and Dubai.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/3/2021 9:38 AM  |
| 78 | Ugly. Trying too hard to stand out. Cringe.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/3/2021 9:22 AM  |
| 79 | Awful. Wrong for our community. TOO BIG! NO CHARM!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/3/2021 9:18 AM  |
| 80 | LET HIM BUILD THIS ON HIS OWN LOT! NO PLACE FOR IDIOTIC PROJECTS LIKE THIS. SELF SERVING ARCHITECT TO DUMP THIS TURD ON THE CITY!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/3/2021 9:13 AM  |
| 81 | Make more friendly, accessible, and welcoming to pedestrians - a large ramp pathway that meanders up to the garden terrace level with seating, viewing, and cafes. Then have glass elevators or gondolas that shoot to the top for additional viewing, public access, with availability of bars/cafes, etc. I'd approve additional height if the streetscape, breezeway, and rooftop were all integrated into a semi-public vertical park and overlook.                                                                                                                                                                                                                                                                                                                           | 10/2/2021 2:59 PM  |
| 82 | I'm less concerned about the aesthetic of the design than I am about how structures of this mass would occupy the site. The proposed design is too overwhelming for its footprint and will dominate its surroundings creating visual discordance, in addition to other undesirable consequences. For that reason, the design aesthetic will not translate in this location. I would like to see a design that fulfills the aims of the SSP in a manner that is consonant with the scale of site, current businesses, and the many of us who live here and will be impacted. People make West Hollywood the city it is and that consideration should be paramount.                                                                                                                 | 10/2/2021 2:01 PM  |
| 83 | why does he always want to be so different....Frank Lloyd Wright was different ...Thom Mayne is no Frank Lloyd Wright and will never be. Why not pick up something that adds and enhances the area: the Argyle Tower Hotel - with Deco the Chataeu Marmont - with Europeon Castle touches The Whole of Sunset Plaza by the Montgomery's - with its Hollywood Regency touches The Geffen corner on South side of Sunset just west of Doheny All walkable, attractive, illustrative of Hollywood Fantasy and Illusion.... This looks like the computer CAD crashed ...my Dog ate it..... Excrement...Sore Thumb How about two similiar to the east tower, but two different hieghts.... This craziness for the sence of craziness (and unpaid gardening maintance- figure it out!!) | 10/1/2021 1:06 PM  |
| 84 | Ridiculous!!!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/1/2021 11:51 AM |
| 85 | Please do not use the term, "World class" it is so pretentious!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/1/2021 10:27 AM |
| 86 | I just want to make sure the public benefit is well defined, codified and appropriate considering the number of extra floors the project is getting. I think the developers should have to guarantee free public access to a viewing deck and terrace space on the roof, and create a performing arts space that any grantees of the City can use for no charge.                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/30/2021 1:21 PM  |
| 87 | There are enough buildings by Thom Mayne in Los Angeles, and it is out of touch for our community to have a building designed by a white, hetero architect who has made his career                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/30/2021 5:42 AM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

by designing justice centers and courthouse that incarcerate people of color.

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                    |

| 88  | Over inflated, out of control and just plain ugly. Not trying to be rude, just honest.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 9/29/2021 9:06 PM  |
| 89  | It is not anything resembling that firms best work. The whole thing is ridiculously out of scale and amateurish with the one tower leaning like a drunk on the other. Cute as a metaphor for the neighborhood but I don't think the message they were meaning to send.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 9/29/2021 12:46 PM |
| 90  | leave our ground floor historic low-slung weho alone. we like simple short small businesses too.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 9/29/2021 11:52 AM |
| 91  | This is too large. Too tall. Out of place in WH. Hideous design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 9/29/2021 11:44 AM |
| 92  | Dubai and WeHo and LA And Austin and Ho CHI MINH, and London, NYC, ATLANTA—We are a musical, artistic, creative cultural center especially WEHO, I have met great musicians and writers and artists at my old age of 64 and I still feel young in this city. The older buildings get painted but still look horrid as I walk along commercial and residential buildings. Frankly why do we keep any part of the old buildings just we build them with look alike-hey it works with bands being tribute bands playing old songs by younger look a likes. I look around at buildings kept and remodel and I think of how many rats, deaths, murders, drug deals went down at each location. What lies under the old red booths of the old restaurants and bars—names if you want?- I usually find dirt and dirt and old newspaper articles I love the new trends of building construction—when I lived in Malibu, the neighbors were burnt out of red wood homes while mine was new and stood up to the fire. The new homes modern, safer, taller and fire protected. I obviously want new construction of buildings. I don't need the reminders of death and overdose and destruction. Height is gorgeous going to the heavens, reaching for new destinies. Oh and noise? Have you lived here-gardeners have free range for noise everywhere and every day, the pollution caused by blowers is horrible for one's health. Oh and the detours for tree trimmers—ficus destroying everything in the roots conquest for water—the ficus trees are too big and need replacing with trees that have roots going straight down, but NOPE—WE TRIM THE BIGGEST TREES —Which have destroyed my sewers and car when limbs fall and need constant cleaning. Give me the view through a building rather than the gigantic biggest tree on the street. The worst ficus ever—and I lived among orchards and 60 year old trees by whole life—plus underground wiring in Sherman oaks hills as well as Malibu or Malibu west. The grossest buildings, ficus trees, gardener blowers, and the telephone poles with overgrown greenery are more disturbing at this lower level height than the new architectural buildings of the future. Keep WeHo small —with all these weird problems no one takes care of means likes make it new, underground and proper vegetation planted that don't destroy. The integrity of the city are the denizens surviving the ancient trees, wires, and constant gardening by people that have no care in how things are done with no harm Let's look at problems at street level and not a height of new thoughts, desire and inspiration. Yes I have issues with the living conditions on Orlando, Harper, Sweetzer, Willoughby, Fountain and on and on. Look low and see the problems down and underground | 9/29/2021 11:33 AM |
| 93  | I don't hate the design but OH MY GOD it's WAY TOO LARGE!! I thought I was being Punk'd when I first saw the renderings                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9/29/2021 10:44 AM |
| 94  | Interesting is a nice way of saying ugly. This design is too "trendy" and will date it to a certain time. It will be torn down again in a few decades once it is deemed too "dated".                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/29/2021 9:23 AM  |
| 95  | Scary, and completely out of place and scale.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/29/2021 8:16 AM  |
| 96  | I feel this design doesn't match the aesthetic of the area AT ALL- it's an eye sore                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 8:11 AM  |
| 97  | I think it looks weird, not really my taste, I'd rather see a more traditional looking building taht maintains efficiency in the use of the space.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/29/2021 6:32 AM  |
| 98  | The real problem for me is the resulting increase in traffic and need for parking. This project will only result in gridlock on Sunset and surrounding streets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/29/2021 4:19 AM  |
| 99  | Perhaps interesting if half the size.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 9/29/2021 3:54 AM  |
| 100 | Doesn't feel like any part of LA that I know. Doesn't feel human in scale.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 9/28/2021 10:35 PM |
| 101 | Unsuitable for the location. Might be just fine in an open area That has a lot of surrounding free space. Also would find this building very interesting in the valley or on a vast plain. Not in this location. It feels suffocating                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 9/28/2021 8:51 PM  |
| 102 | This "view corridor" is more like a keyhole in a large, crazy door. Any "view" attempted to be                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/28/2021 8:20 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

salvaged by its construction is soured by the framing of the building itself, its distracting architectural style. Because this project would dwarf any construction south of Sunset as well as anything east or west of it, it dominates the conversation at any point in the viewer's optical periphery, rendering whatever small area might be seen through it as moot in value.

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                    |

| 103 | Nobody liked the Eiffel Tower when it was built. Los Angeles needs to increase density around transit hubs (Santa Monica/San Vicente). This is inevitable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 7:53 PM  |
| 104 | Out-standing development. This will be iconic and progressive for West Hollywood. The concept and planning are on the right trajectory to revitalize the Strip.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/28/2021 7:25 PM  |
| 105 | The design is an abomination. It doesn't belong ANYWHERE. It looks like a giant binder clip crushing a glass cube. This building will turn Weho into a laughingstock.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 9/28/2021 7:09 PM  |
| 106 | YES the unique mixed design belongs in the Great City of West Hollywood and I wish to call out the dog whistle racism with the Dubai analogy being used. Many large scale projects have brought affordable and even free public housing to the UAE and, it would benefit West Hollywood to do the same. The disconnect has to do with Morphosis Architects being largely limited to conservative western white males with no connection to West Hollywood in stark contrast to Zaha Hadid Architects <a href="https://www.zaha-hadid.com/">https://www.zaha-hadid.com/</a> or Hadid Design & Development Group (a completely different company from Zaha Hadid) that routinely hires Women & Minorities. West Hollywood has University educated designers who know very well how to use CAD programs for design and even Finite Element simulations that can test that design. There are also people with experience in integrating real time construction with the CAD designs to greatly reduce on the job errors and delays. The 8850 project is an innovative and striking design that can WIN if those running it can convince West Hollywood to claim it as their own and, this is easily done when you get the locals involved in the project. | 9/28/2021 6:51 PM  |
| 107 | It resembles something spewed from a malfunctioning shredder. The aesthetic is putrefy cosmetic and apart from the gap to accommodate views has no connection to function. If only Zaha Hadid were alive. Is Renzo Piano available. Do we really have to have this charlatan? Imagine how this will be perceived in 25 years time?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9/28/2021 6:03 PM  |
| 108 | Derivative. Ignores the location. All balconies are unacceptable as there use will lead to noise and privacy issues for current residents.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 4:51 PM  |
| 109 | It is just to High should not be higher than the London Hotel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/28/2021 1:45 PM  |
| 110 | the plants on it look like clutter. could those be removed? it would make for more clean lines                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/28/2021 1:40 PM  |
| 111 | It's a great improvement to the neighborhood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/28/2021 1:39 PM  |
| 112 | The induced renderings are not as bad as the originally reported look of the towers. Still, the white west building is one of the ugliest proposals I've seen. Love the east tower though. I think the project, as is, will bring publicity I'm just afraid it will be a "what were they thinking" buildings 10 years from now.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/28/2021 1:32 PM  |
| 113 | I could do without the greenery, given our drought situation. Otherwise, I love it.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/28/2021 12:29 PM |
| 114 | This is the ugliest design I've seen yet                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/28/2021 12:14 PM |
| 115 | The building is very out of character with the neighborhood aesthetics. I wouldn't be opposed to a building like this in Downtown LA or in an urban city, but not in West Hollywood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/28/2021 12:05 PM |
| 116 | UGLY. What more can I say.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 11:33 AM |
| 117 | The building incorporates roof and terrace landscaping. Very nice. Although other buildings have gained approval with those "green" aspects considered for approval. Within a couple years of occupancy, the landscaping is neglected and is looks awful. This is how developers get a bad name. The COA should require design elements (roof and terrace landscaping) are not neglected or removed. The IAC building at 8800 Sunset has maintained their greenscape wonderfully. I've been pleasantly surprised after this amount of time. Yours would be a nice complement if everyone continues to maintain their unique design elements. Thanks.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/28/2021 11:27 AM |
| 118 | A crap version of Zaha Hadid. Hire Zaha Hadid Architects                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/27/2021 1:13 PM  |
| 119 | There is nothing unique about West Hollywood or the the Strip apart from the Viper Room, Whisky-a-go-go, the Rainbow Room, etc. This is just another flash in the pan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/27/2021 12:34 PM |
| 120 | The height makes it look very ominous .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/27/2021 11:26 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                   |

| 121 | I think it's a beautiful design but it seems so massive. Not sure we need another hotel with The London next to it, The Edition recently added and the others on Sunset Blvd.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/27/2021 9:21 AM |
| 122 | Beautiful unique design. Just remove 5 stories from the top.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/27/2021 9:19 AM |
| 123 | Overall I am excited by the uniqueness, shapes and openness of the design; however I think the white (concrete?) materials may be too heavy and distract too much from the flowing open air design                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/27/2021 9:04 AM |
| 124 | We aren't going to get what's there. First, it's more derivative of Thomas Mayne's work. It's expensive to build. I don't think the developer can afford to build it as presented. The restaurants and park at the top of the complex is not for the general public. If it's built, it's going to be a private club (like everything else, these days) for the 0.01% who can afford it. Do we need more hotel rooms? Didn't the operator of The Edition just go bankrupt? Is "1" (Sunset/La Cienega) actually that busy? No. Will the finished building ever look like the renderings? No. I really like the Emerson College building - its fantastic and makes a unique statement in Hollywood - far better than the big apartment buildings across the street. In fact, I'd call it iconic. This design for WeHo is just a mess. The white "wrapping" on the west building has been done before - a recycled idea from the architect. The green that is so prominent in the renderings will never look like that and it will have a problem with irrigation, waterproofing and ongoing care of these planters. Nice idea, but unlikely to work. I also don't want this building to become just another structure to hold up a digital billboard - like every other new project on Sunset. The renderings show a relatively modest amount of digital advertising. Let's keep that to a minimum. A "wow" design for this location would be welcome. But I want it to stay within the SSP. | 9/27/2021 6:57 AM |
| 125 | Another huge project recently erected on Sunset Blvd "planned" to create a "pedestrian bridge" over LaCienega Blvd to unite the two massive sections of the development. The bridge never got built; it was quickly eliminated after the "plan" was "approved." The buildings are ugly, unnecessary, and have had a very difficult time finding tenants and achieving financial success. We don't need another gratuitous, overblown "improvement" whose only purpose is to line the pockets of developers and the management of West Hollywood City Hall.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/26/2021 9:43 PM |
| 126 | It is out of character for the West Hollywood and the Sunset Strip that I love. We're not Disneyland meets Las Vegas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 9/26/2021 9:37 PM |
| 127 | I think the design is interesting, but I think the proposal is too massive, particularly in height.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/26/2021 9:20 PM |
| 128 | It will begin as a "wow" project and wind up as an eyesore. This will be in Addition to the loss of views. Sunset is the Corniche of LA only to be ruined by projects like this                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 9/26/2021 9:05 PM |

Q8 Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project’s concept?

| 1  | It is the projects concept. I don't believe the London will survive this development. If it does, I could see that a partial view of the hills in places would be better than a block of a building...unless perhaps, it was an amazingly beautiful building. If the condos weren't separated from the hotel, it would certainly be uncomfortable for hotel guests and condo residents. | 10/31/2021 5:46 PM  |
| 2  | The entire design looks like a big mess                                                                                                                                                                                                                                                                                                                                                 | 10/22/2021 12:06 AM |
| 3  | I don't agree with the entire design, so this question is sort of rhetorical                                                                                                                                                                                                                                                                                                            | 10/21/2021 10:58 AM |
| 4  | That is absolutely HORRIFIC!! Looks like a bad Lego build that some kid did. Does this so called architect HATE WeHo and the Sunset Strip?                                                                                                                                                                                                                                              | 10/18/2021 8:42 AM  |
| 5  | I mean, it would be even worse if it was one piece!                                                                                                                                                                                                                                                                                                                                     | 10/16/2021 4:32 PM  |
| 6  | I don't think two towers are necessary. If for some reason they are then I would remove the bridge or make the towers feel more visually cohesive.                                                                                                                                                                                                                                      | 10/16/2021 4:05 PM  |
| 7  | Neither                                                                                                                                                                                                                                                                                                                                                                                 | 10/16/2021 1:35 PM  |
| 8  | I do not want this architecture in my neighborhood. It overpowers the community                                                                                                                                                                                                                                                                                                         | 10/11/2021 4:48 PM  |
| 9  | It is a defining feature of the building. It would preserve views and natural light to surrounding areas as well.                                                                                                                                                                                                                                                                       | 10/11/2021 3:48 PM  |
| 10 | Honestly the two towers concept seems like a mess                                                                                                                                                                                                                                                                                                                                       | 10/11/2021 3:46 PM  |
| 11 | This building should be lower than, or at worst, the same height as the London. At this height, even with a corridor, the view is destroyed for residents in the area.                                                                                                                                                                                                                  | 10/11/2021 2:40 PM  |
| 12 | Affordable housing is needed which this most definitely will not be.                                                                                                                                                                                                                                                                                                                    | 10/10/2021 8:03 PM  |
| 13 | no affordable housing please                                                                                                                                                                                                                                                                                                                                                            | 10/9/2021 8:19 PM   |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                              |                    |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 14 | There are people who live in apartments across the street and it will block out the entire view and skyline, reducing the value of their own homes and quality of life.                                                                                      | 10/9/2021 2:02 PM  |
| 15 | I don't understand these questions. The proposed building is way too large. Just the size alone would ruin the neighborhood.                                                                                                                                 | 10/9/2021 1:15 PM  |
| 16 | Again, you already have a hotel right there. Why do you NEED another hotel, it MAKES NO SENSE.                                                                                                                                                               | 10/8/2021 7:38 PM  |
| 17 | to the benefit of the overall design                                                                                                                                                                                                                         | 10/8/2021 4:38 PM  |
| 18 | The two just don't go together in any way that is enjoyable.                                                                                                                                                                                                 | 10/8/2021 4:14 PM  |
| 19 | It's unique!                                                                                                                                                                                                                                                 | 10/8/2021 12:31 PM |
| 20 | Weird questions - this is not my design it's the architects. They should explain their own concept. Is it ugly - yes. It is necessary that they connect at this height - no.                                                                                 | 10/8/2021 10:01 AM |
| 21 | Not sure                                                                                                                                                                                                                                                     | 10/7/2021 11:11 PM |
| 22 | I'm not sure what this means.                                                                                                                                                                                                                                | 10/7/2021 11:02 PM |
| 23 | there will be very little affordable housing                                                                                                                                                                                                                 | 10/7/2021 5:17 PM  |
| 24 | To maintain views and prevent the mass of the building to overwhelm the surrounding, smaller buildings.                                                                                                                                                      | 10/7/2021 1:13 PM  |
| 25 | Ugly                                                                                                                                                                                                                                                         | 10/7/2021 9:50 AM  |
| 26 | Is just a monstrosity of a building. None needs this construction, it doesn't improve Sunset or the neighborhood. Allowing this to be built means no other rules apply as the noise ordinance will be affected, crowds, empty storefronts, etc               | 10/7/2021 9:30 AM  |
| 27 | it should not be this high so it even blocks the hotel view.                                                                                                                                                                                                 | 10/7/2021 8:49 AM  |
| 28 | Just a very unattractive design. Modern is good, but this is plain ugly.                                                                                                                                                                                     | 10/6/2021 11:25 PM |
| 29 | visually more interesting                                                                                                                                                                                                                                    | 10/6/2021 10:20 PM |
| 30 | It's a striking combo.                                                                                                                                                                                                                                       | 10/6/2021 6:12 PM  |
| 31 | It's far too dense                                                                                                                                                                                                                                           | 10/6/2021 6:00 PM  |
| 32 | Contrast between tower designs is disruptive to the neighborhood as well as potential residents                                                                                                                                                              | 10/6/2021 12:18 PM |
| 33 | To avoid a large building floor plate and a massive curtain wall along Sunset. Developing the site as one tower would put too much mass on one block. Without the two-tower design the project should be kept within the 10-floor limit for the target site. | 10/6/2021 6:31 AM  |
| 34 | I don't quite understand the concept. It's just way too much.                                                                                                                                                                                                | 10/6/2021 1:47 AM  |
| 35 | The buildings are beautiful                                                                                                                                                                                                                                  | 10/5/2021 9:41 PM  |
| 36 | Unique architecture                                                                                                                                                                                                                                          | 10/5/2021 6:29 PM  |
| 37 | Keeps from looking like a solid block. Anything to make this more interesting than the monstrosity that's sitting at Sunset and La Cienega.                                                                                                                  | 10/5/2021 5:38 PM  |
| 38 | And the view of residents.                                                                                                                                                                                                                                   | 10/5/2021 4:57 PM  |
| 39 | Less mass                                                                                                                                                                                                                                                    | 10/5/2021 4:40 PM  |
| 40 | A lazy attempt at creating a "unique building"                                                                                                                                                                                                               | 10/5/2021 2:46 PM  |
| 41 | It makes the architecture very unique.                                                                                                                                                                                                                       | 10/5/2021 2:21 PM  |
| 42 | It also just looks cool! I like that you can keep the views in between.                                                                                                                                                                                      | 10/5/2021 2:20 PM  |
| 43 | Don't build it!                                                                                                                                                                                                                                              | 10/5/2021 11:09 AM |
| 44 | This vision does nothing for the locals. It's a vanity project                                                                                                                                                                                               | 10/5/2021 10:57 AM |
| 45 | To reduce the mass of the development as a whole.                                                                                                                                                                                                            | 10/5/2021 10:14 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                             |                    |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 46 | What about the residential views...it will certainly be predominant on my view if this monstrosity goes up                                                                                                                                                                                  | 10/5/2021 6:56 AM  |
| 47 | To create a unique and daring structure that will put a visionary stamp on our community.                                                                                                                                                                                                   | 10/4/2021 5:47 PM  |
| 48 | It gives the design more interesting character                                                                                                                                                                                                                                              | 10/4/2021 5:20 PM  |
| 49 | A view corridor is a ridiculous concept because one cannot erase the view of the offensive buildings.                                                                                                                                                                                       | 10/4/2021 2:54 PM  |
| 50 | It makes the architecture much more interesting.                                                                                                                                                                                                                                            | 10/4/2021 1:03 PM  |
| 51 | My answer to Question 7 was mistaken, as I referenced the Hyde space. That was incorrect. I meant the spaces across the street from the Viper Room. I could not go back and change the answer.                                                                                              | 10/4/2021 12:19 PM |
| 52 | No only does it save the view it is such an interesting design which is important in an area that wants to evolve and add something new to existing examples of concept designs in the area                                                                                                 | 10/4/2021 9:51 AM  |
| 53 | The London Hotel is just a hotel with daily guests who come & go. They are not impacted like permanent residents would be. I am guessing that London Hotel does not like a better-looking competitor next to their location, but that's fair life in business when things like that happen. | 10/4/2021 8:16 AM  |
| 54 | The two towers keep the project open with space that will break it up from being one large 10 story building. The architect can be more creative.                                                                                                                                           | 10/3/2021 8:33 PM  |
| 55 | To complete the architectural masterpiece                                                                                                                                                                                                                                                   | 10/3/2021 8:13 PM  |
| 56 | There should not be buildings higher than 2 stories on this block                                                                                                                                                                                                                           | 10/3/2021 4:12 PM  |
| 57 | affordable housing? are you serious.                                                                                                                                                                                                                                                        | 10/3/2021 2:57 PM  |
| 58 | To grab attention - and attention can be good or bad. This is out of place. Wrong. Hideous and an insult to our small city. The building looks like a ride that belongs in a theme park.                                                                                                    | 10/3/2021 2:38 PM  |
| 59 | Neither.                                                                                                                                                                                                                                                                                    | 10/3/2021 1:25 PM  |
| 60 | This building as proposed is not scaled to other building located in the neighborhood. It would stand out in a bad and obnoxious way and be way over built.                                                                                                                                 | 10/3/2021 1:14 PM  |
| 61 | Do not add any more hotels causing more congestion!                                                                                                                                                                                                                                         | 10/3/2021 12:01 PM |
| 62 | For the Overall look and design of the architecture                                                                                                                                                                                                                                         | 10/3/2021 11:35 AM |
| 63 | It shows little imagination and instead represents 21st century gluttony. Besides, this so called architect is a total copy cat to the Frank Gehry project on Crescent Hgts and Sunset.                                                                                                     | 10/3/2021 10:24 AM |
| 64 | To gain maximum retail and residential income GAIN. We LIVE here. We DO NOT WANT such a MONSTROSITY                                                                                                                                                                                         | 10/3/2021 9:55 AM  |
| 65 | It's IMPORTANT TO STOP IT!!!! It's ghastly. Horrible. Ugly. Not right for Sunset!!!                                                                                                                                                                                                         | 10/3/2021 9:18 AM  |
| 66 | THERE WILL BE NO AFFORDABLE HOUSING IN THIS PROJECT, THIS IS ONLY TO GET THIS THRU THE PLANNING STAGES, WHILE BUILDING IT WIL BE ALL BUT GONE. THERE IS NO PUBLIC INTEREST BUILD INTO THIS TYPE OF PROJECT. LET'S BE OWNEST!                                                                | 10/3/2021 9:15 AM  |
| 67 | If the architect has a vision, let (pronoun of choice) realize it.                                                                                                                                                                                                                          | 10/2/2021 7:26 PM  |
| 68 | It's a unique signature look. I'm not interested in saving the hotel's view. I'd rather have more affordable units, or a "vertical park" for the community.                                                                                                                                 | 10/2/2021 3:04 PM  |
| 69 | consistent cohesive design plan fo the corridor                                                                                                                                                                                                                                             | 10/1/2021 3:51 PM  |
| 70 | less tension in the sky...more sunlight, less shade.... truly, less is more.                                                                                                                                                                                                                | 10/1/2021 1:07 PM  |
| 71 | Ridiculous                                                                                                                                                                                                                                                                                  | 10/1/2021 11:52 AM |
| 72 | the biggest design problem for me is that those 2 designs have nothing to do with each other and are competing.                                                                                                                                                                             | 10/1/2021 10:29 AM |
| 73 | Two towers are two towers too much                                                                                                                                                                                                                                                          | 10/1/2021 10:23 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                     |                    |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 74  | It breaks up the massiveness of a single building and gives variety to the eye that it looks like two different buildings/projects.                                                                                                                                                                                                                 | 10/1/2021 6:16 AM  |
| 75  | I do not like the two tower with connection concept. It feels way too futuristic and does not maintain the charm and character that West Hollywood has.                                                                                                                                                                                             | 9/30/2021 6:17 PM  |
| 76  | Visually it's less mass                                                                                                                                                                                                                                                                                                                             | 9/30/2021 1:15 PM  |
| 77  | I like taller and thinner over shorter and fatter.                                                                                                                                                                                                                                                                                                  | 9/30/2021 12:02 PM |
| 78  | Its a design choice, and it breaks up the building mass.                                                                                                                                                                                                                                                                                            | 9/30/2021 11:53 AM |
| 79  | Two towers or one, as long as the height and scope of the building(s) is kept under reasonable there should e no problem with views of other buildings.                                                                                                                                                                                             | 9/29/2021 9:09 PM  |
| 80  | OUT OF SCALE!!                                                                                                                                                                                                                                                                                                                                      | 9/29/2021 12:48 PM |
| 81  | whole design is flawed                                                                                                                                                                                                                                                                                                                              | 9/29/2021 11:52 AM |
| 82  | I love this view—I hate the London hotel and whatever name it was before—it is a horrible site                                                                                                                                                                                                                                                      | 9/29/2021 11:37 AM |
| 83  | I'm not sure if the question but again way too large                                                                                                                                                                                                                                                                                                | 9/29/2021 10:46 AM |
| 84  | I think these new density rules are ridiculous. We are on fault lines here. The damage & loss if life potential has to outweigh any other factor.                                                                                                                                                                                                   | 9/29/2021 10:41 AM |
| 85  | Completely out of scale with the neighborhood.                                                                                                                                                                                                                                                                                                      | 9/29/2021 8:17 AM  |
| 86  | To create visual interest for the building by having different tower designs and creating tension between the airy glass tower and undulating white tower.                                                                                                                                                                                          | 9/29/2021 7:57 AM  |
| 87  | The builders are trying to jam too much into one site                                                                                                                                                                                                                                                                                               | 9/28/2021 8:52 PM  |
| 88  | Na                                                                                                                                                                                                                                                                                                                                                  | 9/28/2021 8:47 PM  |
| 89  | I think it was part of a loophole scheme to allow these hotel developers to build a structure far too tall for this spot. Creating a small hole in its center gives the developers a defense - a weak and perfunctory one, yet still an argument - against an inevitable and justifiable complaint from The London Hotel about the obstructed view. | 9/28/2021 8:33 PM  |
| 90  | I generally like the two part design. The overall design and density (not the just the height) of the project should be what is under review.                                                                                                                                                                                                       | 9/28/2021 7:56 PM  |
| 91  | TOT is vital to West Hollywood's revenue to grow the services and in all department. This directly benefits our residents and attracts more options to grow the tourism industry.                                                                                                                                                                   | 9/28/2021 7:28 PM  |
| 92  | While either tower could stand alone as a project, having them connected in this unique way will give the project a prominent place on Sunset Blvd as well as helping to redefine architecture in West Hollywood and Los Angeles area from the generally bland and unimaginative to something much more creative and landmark defining.             | 9/28/2021 7:15 PM  |
| 93  | YES, I think it's a great design but, be sure not to make the affordable housing any less than the quality of the hotel!                                                                                                                                                                                                                            | 9/28/2021 6:55 PM  |
| 94  | Make the corporate wealthy live with the rest of us.                                                                                                                                                                                                                                                                                                | 9/28/2021 6:05 PM  |
| 95  | Condo/hotel can be separate floors and entrances. Affordable housing should not have a pauper's entrance.                                                                                                                                                                                                                                           | 9/28/2021 4:53 PM  |
| 96  | It's out of place here in WeHo. I've lived here for 40 years and the towers are just too much of an addition. It's all too too too much. It is opposite of West Hollywood's charm. It will also bring outsiders to WeHo. We are a cozy little place. It stands out like a sore thumb. Today big and ugly.                                           | 9/28/2021 2:54 PM  |
| 97  | I think it also helps with airflow and makes it more unique.                                                                                                                                                                                                                                                                                        | 9/28/2021 1:40 PM  |
| 98  | The London is very dated. Needs to get demolished.                                                                                                                                                                                                                                                                                                  | 9/28/2021 1:36 PM  |
| 99  | I love the design and the difference in the look of the two towers                                                                                                                                                                                                                                                                                  | 9/28/2021 12:16 PM |
| 100 | To make it uglier.                                                                                                                                                                                                                                                                                                                                  | 9/28/2021 11:35 AM |
| 101 | Both above and to reduce "massing" of size in general. Having the two towers also gives more                                                                                                                                                                                                                                                        | 9/28/2021 11:33 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

open space when looking up to the hills from Santa Monica Blvd, down from Sunset, and along Sunset. I live in WeHo, and will see this from house. I prefer something as landmark making as this design than something boxy. Parisians were protesting the Eiffel Tower when it was built. Now its a statement.

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                    |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 102 | UGLY...RUINS SUNSET STRIP                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/27/2021 9:23 PM  |
| 103 | The 2 towers provide a few corridor for the London for sure. It would be great if other view corridors would be considered as well.                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/27/2021 1:52 PM  |
| 104 | The cannibalization of condo and hotel market.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/27/2021 12:36 PM |
| 105 | To create a view corridor and lessen the blockage. It gives the space to breathe and take in the view of the hills. Much more interesting than another giant square. Other cities of the world our building architecturally interesting structures. We need to start thinking in that direction to. Not everything needs to be a giant square.                                                                                                                                                                                                        | 9/27/2021 9:21 AM  |
| 106 | The 2 elements of the design break up what might have been a large clunky single building                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/27/2021 9:06 AM  |
| 107 | We don't need another hotel so close to The London. Two buildings is better than one gigantic building.                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/27/2021 8:48 AM  |
| 108 | More dynamic and interesting than the massing of other recent project on Sunset (the Pendry, the one at Doheny, etc)                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/27/2021 7:49 AM  |
| 109 | It saves the London's view but also gives a unique design and creates usable green areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/27/2021 7:22 AM  |
| 110 | The two tower concept is bait for the City to allow the taller project (50% more than allowed under the SSP). To be frank, The London doesn't have a right to a view. But to quell some of the protests, this says "we thought about you and this is what we came up with." It's still going to obstruct views. The two building concept is better for business. The hotel patrons would want to be separated from the office/residential uses - and vice versa. This serves the developer's desires, but it also makes sense given the various uses. | 9/27/2021 7:05 AM  |
| 111 | It's way too much for the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/27/2021 6:43 AM  |
| 112 | I think the building is all together too large for the neighborhood                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/26/2021 10:25 PM |
| 113 | Let the London be the London. It's set back and lets WeHo and the Sunset Strip be seen and enjoyed from a safe distance.                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/26/2021 9:41 PM  |
| 114 | I think breaking it into two towers will make it feel less out-of-scale with the other properties nearby.                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/26/2021 9:22 PM  |
| 115 | To save the overall integrity of Sunset                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/26/2021 9:06 PM  |
| 116 | To break up the visual density of such a large structure on this parcel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/26/2021 8:50 PM  |

## Q10 There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 1 | I like the two towers individually but NOT on this site and NOT together - its overwhelming. Way too tall and attention grabbing. And trying to be linked together -its too much of a stretch - literally. They don't belong together. It will add more darkness to the strip - this is a residential neighborhood of mid sized homes and apartment buildings. It simply doesn't belong here. | 11/1/2021 3:43 PM  |
| 2 | The one is a little pedestrian and the other rather unattractive.                                                                                                                                                                                                                                                                                                                             | 10/31/2021 5:46 PM |
| 3 | See earlier comments. The mass is too large and out of scale for the site so it's irrelevant whether there are two towers or one. I suppose having two towers maximizes the design's kitsch aesthetic but that's not a selling point.                                                                                                                                                         | 10/27/2021 5:13 PM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                     |

| 4  | The entire design has no style which WeHo is known for, just another ugly metal development                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/22/2021 12:06 AM |
| 5  | It is absolutely GHASTLY!!! I don't know where it belongs but it definitely does NOT belong on Sunset Strip.                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/18/2021 8:42 AM  |
| 6  | While I think asymmetry is very important, this looks like it would be better housed along the High Line in NYC as it would be surrounded by other buildings. Because this structure is proposed to be so much taller than everything surrounding it, it feels even more out of place. Maybe knock 5 stories of one of the towers and remove the bridge.                                                                                                                                                                              | 10/16/2021 4:05 PM  |
| 7  | The whole structure does not belong in WeHo or on that block.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/11/2021 2:40 PM  |
| 8  | Juxtaposition!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/10/2021 12:54 AM |
| 9  | I                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/9/2021 9:48 PM   |
| 10 | Looks terrible. Not cohesive.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/9/2021 8:19 PM   |
| 11 | I don't understand the question. Who is writing these Qs? My answer is: both of these proposed towers are hideous. If both towers looked the same it still would be hideous. I'm sorry, I'm not trying to be mean. If one was beautiful and one was ugly I'd say go with the beautiful one. But neither is remotely acceptable. And both are too large also. How about it we try not wrecking Sunset Blvd? Is that such a bad idea?                                                                                                   | 10/9/2021 1:15 PM   |
| 12 | Don't tear down the iconic Viper Room!! Your proposal is hideous                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/9/2021 9:19 AM   |
| 13 | I find the entire project repulsive.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/8/2021 7:38 PM   |
| 14 | Was this designed by a schizophrenic three-year-old?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/8/2021 11:16 AM  |
| 15 | In this instance they just don't compliment one another. The one on the left is ugly and I don't undersnd the design intent                                                                                                                                                                                                                                                                                                                                                                                                           | 10/8/2021 10:01 AM  |
| 16 | Good, weird and different is good.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/7/2021 11:02 PM  |
| 17 | The design is beside the point.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/7/2021 5:28 PM   |
| 18 | terrible design, it will even look terrible in dubai or shanghai                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/7/2021 9:30 AM   |
| 19 | not relevant -- entire design is amateurish and not well thought out. buildings with landscaping scattered throughout the exterior like this are disasters -- water necessary to maintain plantings cause leaks that ruins the structural elements and are impossible and expensive to maintain. anyone planning a building with this amount of exterior landscaping to try and obscure the too-large massing is fooling themselves and others that it will be possible to maintain and look good. a guaranteed eyesore for the city. | 10/7/2021 8:49 AM   |
| 20 | It's humongous & doesn't fit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/6/2021 8:50 PM   |
| 21 | Ugly and an EYESORE.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/5/2021 10:56 AM  |
| 22 | Art is about taking the viewer into a unique experience. Frequently one that they cannot anticipate or judge until it has taken form. Conservative thinking will hold back our community, condemn it to carbon copy (ancient) thinking. We need to help those who are upset by radical change. By encouraging them to see the positives in this development.                                                                                                                                                                          | 10/4/2021 5:47 PM   |
| 23 | They are proposing overly used and unattractive concepts. Something fresh and innovative respecting out climate needs should be the objective. Both of these buildings have exceeded their shelf life.                                                                                                                                                                                                                                                                                                                                | 10/4/2021 2:54 PM   |
| 24 | It's not just a box. It has style that would be appreciated internationally.                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/4/2021 12:19 PM  |
| 25 | Completely disparate styles, and the gap to save the view corridor feels misshapen and aesthetically unpleasing.                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/4/2021 8:47 AM   |
| 26 | This building looks like CGI special effect in a Marvel movie - its Cyclops, the building that morphs into a machine! Its needy and tone deaf to everyone around it, which granted is a very West LA concept.                                                                                                                                                                                                                                                                                                                         | 10/3/2021 4:50 PM   |
| 27 | Both are freaking monstrosities and inappropriate to the neighbourhood                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/3/2021 4:12 PM   |
| 28 | That"s exactly what they look like.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 2:38 PM   |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                          |                    |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 29 | I don't care the building should not be there.                                                                                                                                                                           | 10/3/2021 1:30 PM  |
| 30 | This design is out of place for the vernacular of the neighborhood.                                                                                                                                                      | 10/3/2021 10:24 AM |
| 31 | I don't like the design PERIOD                                                                                                                                                                                           | 10/3/2021 9:55 AM  |
| 32 | Other projects like AKA have developed multi tower projects that look cohesive                                                                                                                                           | 10/3/2021 9:29 AM  |
| 33 | Again, awful, ugly, wrong.                                                                                                                                                                                               | 10/3/2021 9:18 AM  |
| 34 | The distinctness of the two towers' design is less of an issue than that they are both out of scale to the size of the site.                                                                                             | 10/2/2021 2:03 PM  |
| 35 | disgusting                                                                                                                                                                                                               | 10/1/2021 1:07 PM  |
| 36 | Ridiculous                                                                                                                                                                                                               | 10/1/2021 11:52 AM |
| 37 | they just looks crazy/ridiculous next to each other                                                                                                                                                                      | 10/1/2021 10:29 AM |
| 38 | They are hideous looking and don't belong on The Strip                                                                                                                                                                   | 10/1/2021 10:23 AM |
| 39 | As I stated earlier, the design is over done and ugly. Does not belong in WEHO. KEEP IT CLASSY.                                                                                                                          | 9/29/2021 9:09 PM  |
| 40 | I do not fine anything redeemable about this design, much less appealing.                                                                                                                                                | 9/29/2021 12:48 PM |
| 41 | the question is poorly worded. i find 2 towers unnecessary. i would agree with the comment.                                                                                                                              | 9/29/2021 11:46 AM |
| 42 | Yang/yin female/male Vegetation/Minerals Dog/cat Electric/magnetic Very positive                                                                                                                                         | 9/29/2021 11:37 AM |
| 43 | That doesn't bother me. It's the size that bothers me. It's ridiculous                                                                                                                                                   | 9/29/2021 10:46 AM |
| 44 | My problem isn't with the design. It's with the design being built at this location                                                                                                                                      | 9/28/2021 8:52 PM  |
| 45 | The architect adeptly handled an aesthetic balance.                                                                                                                                                                      | 9/28/2021 7:56 PM  |
| 46 | Both are catastrophes.                                                                                                                                                                                                   | 9/28/2021 6:05 PM  |
| 47 | They both look poorly designed and inappropriate for the site.                                                                                                                                                           | 9/28/2021 4:53 PM  |
| 48 | They look like two different buildings that don't belong together.                                                                                                                                                       | 9/28/2021 1:46 PM  |
| 49 | I think that this building is ugly and will not get any better with age.                                                                                                                                                 | 9/28/2021 11:35 AM |
| 50 | It's a huge building; visually, it seems less huge by separating it into 2 volumes which themselves are aesthetically different.                                                                                         | 9/27/2021 1:52 PM  |
| 51 | Positive in that it is an art price and that is great. Negative in its size of proposed 15 stories. Keep it at 10.                                                                                                       | 9/27/2021 9:21 AM  |
| 52 | I think the architecture overall is designed to WOW the viewer and I appreciate that; however I think the scale of the 2 buildings is way too big for this site. Scale both buildings down and I would much prefer them. | 9/27/2021 9:06 AM  |
| 53 | The two design styles don't bother me and serves to distinguish the different uses of the buildings. Do these two work together? Not really. Could it be better? Absolutely.                                             | 9/27/2021 7:05 AM  |

## Q11 Any other comments about the height

|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 1  | too tall. 10 floors maximum, and not tied together - freakish                                                                                                                                                                                                                                                                   | 11/1/2021 3:45 PM   |
| 2  | Nope                                                                                                                                                                                                                                                                                                                            | 10/31/2021 5:57 PM  |
| 3  | I think the height is absurd. It would be the tallest building on that block and would protrude and be unpleasant to look at.                                                                                                                                                                                                   | 10/28/2021 8:46 AM  |
| 4  | It's ridiculous to have buildings that tall tower over everything to the south.                                                                                                                                                                                                                                                 | 10/28/2021 2:57 AM  |
| 5  | Shorter do not take away what West Hollywood was built on... no more clubs as we keep adding these stupid monsters... and the city council is the only one who get the perks from developers                                                                                                                                    | 10/27/2021 2:46 PM  |
| 6  | No                                                                                                                                                                                                                                                                                                                              | 10/25/2021 7:02 AM  |
| 7  | Love it all                                                                                                                                                                                                                                                                                                                     | 10/23/2021 9:18 AM  |
| 8  | It is FAR to tall !!!!                                                                                                                                                                                                                                                                                                          | 10/22/2021 3:09 PM  |
| 9  | This entire project is unacceptable to me. Not just the height. There is already a hotel (The London) that does not need to be obstructed by this monstrosity. And the block and surrounding area are already too congested.                                                                                                    | 10/21/2021 7:00 PM  |
| 10 | Out of proportion and destroys the joy and appeal - to tourists, who we are trying to draw in, not just locals, of driving down the "Sunset Strip"                                                                                                                                                                              | 10/21/2021 11:26 AM |
| 11 | TOO HIGH DOES NOT BELONG ON THE STRIP                                                                                                                                                                                                                                                                                           | 10/20/2021 10:19 PM |
| 12 | The building is TOO high and not in the best interest of the community                                                                                                                                                                                                                                                          | 10/18/2021 9:19 PM  |
| 13 | The Sunset Strip doesn't need those huge tall buildings, nor does it need anymore video billboards. If I want to live in Las Vegas, then I will move to a hotel on the Las Vegas Strip. This is absolutely destroying the charm of West Hollywood.                                                                              | 10/18/2021 8:54 AM  |
| 14 | Too tall                                                                                                                                                                                                                                                                                                                        | 10/17/2021 11:36 PM |
| 15 | N/a                                                                                                                                                                                                                                                                                                                             | 10/17/2021 9:45 PM  |
| 16 | I love it !                                                                                                                                                                                                                                                                                                                     | 10/17/2021 10:44 AM |
| 17 | I think by removing 5 stories from one of the towers will make this structure look much more appealing. Right now it lacks a peak as it's one big blocky structure with a hole in it.                                                                                                                                           | 10/16/2021 4:11 PM  |
| 18 | no                                                                                                                                                                                                                                                                                                                              | 10/16/2021 4:04 PM  |
| 19 | Way too high for the immediate residential area                                                                                                                                                                                                                                                                                 | 10/16/2021 1:38 PM  |
| 20 | Way way too big .                                                                                                                                                                                                                                                                                                               | 10/15/2021 5:41 AM  |
| 21 | This looks completely overwhelming and out of context with the neighborhood! The height certainly doesn't help! Architecture is not just about the design of the building itself but how it "integrates" itself within the community! There is clearly no thought given to that aspects of the project which is truly shameful. | 10/14/2021 2:44 PM  |
| 22 | SunsetBlvd. is rapidly becoming canyon-ized with structures that are out of scale with the neighborhood surroundings, such as this one.                                                                                                                                                                                         | 10/14/2021 2:11 PM  |
| 23 | Sunset Blvd. is losing it's character.                                                                                                                                                                                                                                                                                          | 10/14/2021 4:07 AM  |
| 24 | It is awful. It does not belong in that area.                                                                                                                                                                                                                                                                                   | 10/14/2021 12:44 AM |
| 25 | It's horrible                                                                                                                                                                                                                                                                                                                   | 10/13/2021 10:37 PM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                     |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 26 | JUST ENORMOUS. The height/scale is too big. And the huge billboards are a hazard.                                                                                                                                                                                                                                                                                                                                                                              | 10/13/2021 9:34 PM  |
| 27 | Far too high, a 50% variance in an already crowded area is untenable                                                                                                                                                                                                                                                                                                                                                                                           | 10/13/2021 2:23 PM  |
| 28 | Since this is a Target Site (Sunset / San Vicente), it is entitled to be developed up to ten stories: 10 should be the absolute maximum for the project (per the Sunset Specific Plan {SSP}) & hopefully a design would come under 10 stories to honor Sunset Blvd's low-slung nature. Definitely, DO NOT grant any height or other variances as it is unconforming.                                                                                           | 10/13/2021 1:22 PM  |
| 29 | The variance is unnecessary as this development does not need to be more than any other new development in the area. Since they are such renowned architects I am sure they can design something shorter and more suitable to the area.                                                                                                                                                                                                                        | 10/13/2021 11:36 AM |
| 30 | The height is less of a concern than the look of the building, which is not consistent with Southern California vernacular and is trying way too hard to be different.                                                                                                                                                                                                                                                                                         | 10/13/2021 5:54 AM  |
| 31 | This is horrible!!!!!!                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/12/2021 11:38 PM |
| 32 | The Pendry Residences & Hotel is only 11 stories. The Edition Residences and Hotel is 13 stories (also too high).                                                                                                                                                                                                                                                                                                                                              | 10/12/2021 5:38 PM  |
| 33 | This is not even close to being a good design                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/12/2021 1:35 PM  |
| 34 | Blocks views for others too like shoreham towers view of the west. It's an eye sore. It's ugly. And it's destroying local WeHo historic buildings                                                                                                                                                                                                                                                                                                              | 10/12/2021 11:21 AM |
| 35 | 10 stories still too high, makes Sunset Blvd. feel like Wilshire Corridor.                                                                                                                                                                                                                                                                                                                                                                                     | 10/12/2021 7:43 AM  |
| 36 | Very cool and fitting for the Strip                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/11/2021 8:46 PM  |
| 37 | Yes, it is too much. Too high.                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/11/2021 4:55 PM  |
| 38 | Way way way too tall... It will look terrible in the area if it is so much taller than all of the surrounding buildings. Furthermore the added height means added space which means added congestion on an already overly congested corner                                                                                                                                                                                                                     | 10/11/2021 4:17 PM  |
| 39 | 15 stories would make it look out of place on the street and, I worry, create a "race to the top", with other developers requesting ever higher variances.                                                                                                                                                                                                                                                                                                     | 10/11/2021 3:50 PM  |
| 40 | Should not be higher than the london hotel, will kill home values in the area                                                                                                                                                                                                                                                                                                                                                                                  | 10/11/2021 3:41 PM  |
| 41 | None at this time. Overall it looks as if it will overwhelm the street.                                                                                                                                                                                                                                                                                                                                                                                        | 10/11/2021 3:39 PM  |
| 42 | It's too high for the congested area/space and would feel out of proportion. With only small streets surrounding the property, the less floors the better.                                                                                                                                                                                                                                                                                                     | 10/11/2021 6:39 AM  |
| 43 | Too high, ugly design that is out of place.                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/10/2021 8:06 PM  |
| 44 | too high for the neighborhood.                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/10/2021 5:35 PM  |
| 45 | It is just too much. It is too ostentatious and will tower over the entire area. We do not need such a tall building at this location and there is no truly justifiable rationale for permitting the variances that would allow this huge mishmash of a structure to be built here.                                                                                                                                                                            | 10/10/2021 3:22 PM  |
| 46 | Justification for going over the allowed height for such a project is poorly justified in the draft EIR. 15 stories at this site cannot be sustained without negatively affecting the surrounding area. Such a tall project does not complement any nearby existing structures and will stick out like a poorly designed sore thumb. Having a helicopter landing area on top of the project will only add to the potential havoc created by this huge monster. | 10/10/2021 3:00 PM  |
| 47 | The height and design are likely to draw the eye of drivers as the approach and pass, leading to more accidents                                                                                                                                                                                                                                                                                                                                                | 10/10/2021 8:33 AM  |
| 48 | i can see falling over and down the hill in an earthquake. why do architects think the bigger the better?                                                                                                                                                                                                                                                                                                                                                      | 10/10/2021 5:55 AM  |
| 49 | Too high man!                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/9/2021 9:07 PM   |
| 50 | What about homes in the hills losing their view?                                                                                                                                                                                                                                                                                                                                                                                                               | 10/9/2021 8:22 PM   |
| 51 | STOP IT                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/9/2021 2:17 PM   |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                               |                    |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 52 | Stop this from being built immediately.                                                                                                                                                                                       | 10/9/2021 2:05 PM  |
| 53 | It should be much lower. Why can't it be 4 stories max? Why does it have to be 10+? Certainly not more than 10, but even 10, or 6 for that matter, is too high.                                                               | 10/9/2021 1:20 PM  |
| 54 | We need tall buildings to get higher density                                                                                                                                                                                  | 10/9/2021 10:28 AM |
| 55 | The height is totally over scaled for the profile against the hills. The design is out of place.                                                                                                                              | 10/9/2021 9:23 AM  |
| 56 | Stop tearing down all the old buildings in LA                                                                                                                                                                                 | 10/9/2021 9:22 AM  |
| 57 | Will that height disrupt the view of dwellers in hills?                                                                                                                                                                       | 10/9/2021 8:54 AM  |
| 58 | I don't really mind th height. Both are fine with me                                                                                                                                                                          | 10/9/2021 12:36 AM |
| 59 | Nix this project.                                                                                                                                                                                                             | 10/8/2021 7:41 PM  |
| 60 | Too big -- it changes the scale of the neighborhood.                                                                                                                                                                          | 10/8/2021 7:08 PM  |
| 61 | This ruins the historical vibe of the Sunset Strip.                                                                                                                                                                           | 10/8/2021 5:54 PM  |
| 62 | I think it should be about even with the other high rises on Sunset (Edition, Andaz, etc)                                                                                                                                     | 10/8/2021 2:08 PM  |
| 63 | It should not be any higher than 15 stories and roof deck noise mitigation should be given serious consideration.                                                                                                             | 10/8/2021 12:53 PM |
| 64 | Height is good!                                                                                                                                                                                                               | 10/8/2021 12:31 PM |
| 65 | Too tall. Safety/density issues. Earthquake fault line. Noise level to the residential community below. Overall too big and too dense                                                                                         | 10/8/2021 12:17 PM |
| 66 | Holy shit, that's some Tower of Babel ugliness.                                                                                                                                                                               | 10/8/2021 11:17 AM |
| 67 | Too high                                                                                                                                                                                                                      | 10/8/2021 10:03 AM |
| 68 | No                                                                                                                                                                                                                            | 10/7/2021 11:15 PM |
| 69 | It should be outlawed                                                                                                                                                                                                         | 10/7/2021 10:10 PM |
| 70 | I don't care about the hotel room views. I care more about the public's view being obstructed by a gigantic structure. So, I'd prefer it to be shorter.                                                                       | 10/7/2021 7:58 PM  |
| 71 | Too high, too extravagant, to out of touch with the historic nature of this part of Sunset Blvd.                                                                                                                              | 10/7/2021 5:40 PM  |
| 72 | it is too tall. will ruin a lot of p8 views from the hills and destroy property values. and add to the huge increade on light pollution o w Hollywood                                                                         | 10/7/2021 5:21 PM  |
| 73 | 15 stories is too tall and looming for the buildings on the south side of Sunset Blvd and will infringe upon the views and light of buildings and homes on the north side of Sunset Blvd.                                     | 10/7/2021 1:19 PM  |
| 74 | I think it fits in nicely!                                                                                                                                                                                                    | 10/7/2021 12:40 PM |
| 75 | Good                                                                                                                                                                                                                          | 10/7/2021 11:48 AM |
| 76 | Build it!!!!!!                                                                                                                                                                                                                | 10/7/2021 10:11 AM |
| 77 | Doesn't fit the neighborhood                                                                                                                                                                                                  | 10/7/2021 9:52 AM  |
| 78 | maximum 3 floors                                                                                                                                                                                                              | 10/7/2021 9:31 AM  |
| 79 | not appropriate for this block of sunset                                                                                                                                                                                      | 10/7/2021 8:51 AM  |
| 80 | This is the most ridiculous things I've seen and I'll do everything in my power to stop this                                                                                                                                  | 10/6/2021 11:44 PM |
| 81 | it is extremely out of proportion with its surroundings & looks entirely out of place                                                                                                                                         | 10/6/2021 11:35 PM |
| 82 | Too tall, but mostly very ugly. If this was just a standard tall building, it would be OK. But the width, the unattractive design accentuate how out of place it is. Even if it was shorter, it would still look really ugly. | 10/6/2021 11:32 PM |
| 83 | It takes away all the charm of Sunset Blvd. blocks light and is ominous                                                                                                                                                       | 10/6/2021 10:05 PM |
| 84 | My view will be gone forever. Can you pay me to relocate; that'd be the greatest.                                                                                                                                             | 10/6/2021 8:56 PM  |
| 85 | i have absolutely not problem with building up. height is a good thing.                                                                                                                                                       | 10/6/2021 7:04 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                |                    |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 86  | This project needs to be scrapped entirely. Too tall. Too much. Out of place. Horrible                                                                                                                                                                                                         | 10/6/2021 4:23 PM  |
| 87  | Too tall for the neighborhood.                                                                                                                                                                                                                                                                 | 10/6/2021 2:10 PM  |
| 88  | Way too high. Are you trying to Manhattanize WeHo?                                                                                                                                                                                                                                             | 10/6/2021 11:51 AM |
| 89  | The design doesn't feel organic and it doesn't consider the people or the heritage of the strip. It looks freakish.                                                                                                                                                                            | 10/6/2021 11:37 AM |
| 90  | Should be taller in my opinion to accommodate for even more housing. Important in a housing starved city.                                                                                                                                                                                      | 10/6/2021 10:47 AM |
| 91  | None                                                                                                                                                                                                                                                                                           | 10/6/2021 6:37 AM  |
| 92  | It's to tall.                                                                                                                                                                                                                                                                                  | 10/6/2021 1:51 AM  |
| 93  | Too high. These buildings are hideous and are killing the street. Then again, does one more ugly building matter anymore?                                                                                                                                                                      | 10/5/2021 10:28 PM |
| 94  | Too tall, too out of place. The Viper Room is a part of West Hollywood history. Let it alone.                                                                                                                                                                                                  | 10/5/2021 9:45 PM  |
| 95  | Height could be 5 stories maybe 6                                                                                                                                                                                                                                                              | 10/5/2021 5:42 PM  |
| 96  | nope                                                                                                                                                                                                                                                                                           | 10/5/2021 5:39 PM  |
| 97  | Just too tall and overwhelming for the location.                                                                                                                                                                                                                                               | 10/5/2021 5:10 PM  |
| 98  | too much!!                                                                                                                                                                                                                                                                                     | 10/5/2021 4:57 PM  |
| 99  | I take back my earlier answer. I think 15 is ok, now that I've seen more of the design renderings.                                                                                                                                                                                             | 10/5/2021 4:41 PM  |
| 100 | Stop it                                                                                                                                                                                                                                                                                        | 10/5/2021 3:34 PM  |
| 101 | Too tall                                                                                                                                                                                                                                                                                       | 10/5/2021 2:51 PM  |
| 102 | Any added height to the towers should only be granted if to include more affordable housing units in the project, and then only 2 stories at most.                                                                                                                                             | 10/5/2021 1:09 PM  |
| 103 | This is the opposite of open space. We already are densely populated enough                                                                                                                                                                                                                    | 10/5/2021 10:59 AM |
| 104 | Way too big for the block. Ridiculous.                                                                                                                                                                                                                                                         | 10/5/2021 10:58 AM |
| 105 | I keep hearing about developers being allowed to request variances to the SSP. I think it would be a better idea if the SSP were updated and current issues address rather than just working on a case by case basis so we might have some continuity along the Strip.                         | 10/5/2021 10:06 AM |
| 106 | Not right for this neighborhood. Go downtown                                                                                                                                                                                                                                                   | 10/5/2021 7:00 AM  |
| 107 | I honestly find it quite depressing and do we really need another dynamic billboard?                                                                                                                                                                                                           | 10/4/2021 9:45 PM  |
| 108 | I find my imagination very stimulated and my attitude to West Hollywood uplifted looking at this signature design. The path the the future.                                                                                                                                                    | 10/4/2021 5:50 PM  |
| 109 | If they provide more affordable housing, I support it going higher!                                                                                                                                                                                                                            | 10/4/2021 5:21 PM  |
| 110 | The building is gross. I love architect and design, I am a commercial interior designer. This building is hideous.                                                                                                                                                                             | 10/4/2021 4:22 PM  |
| 111 | I think the designs are brilliant and would bring a much needed spark to the area.                                                                                                                                                                                                             | 10/4/2021 4:20 PM  |
| 112 | West Hollywood has lots of new buildings, but few are advanced design. This one is and a great addition to West Hollywood.                                                                                                                                                                     | 10/4/2021 3:08 PM  |
| 113 | This proposed monstrosity is completely out of place on Sunset. It's way too high and bulky. Some rooms of London Hotel won't have a view if this ugly thing isn't super tall??? so what?! Destroying the neighborhood for catering to the whims of one business is absolutely unacceptable!!! | 10/4/2021 2:57 PM  |
| 114 | Too high and a disfiguring concept.                                                                                                                                                                                                                                                            | 10/4/2021 2:57 PM  |
| 115 | Please provide a rendering of the view being preserved from within the London Hotel. It would be helpful to see if that view is adequate and worthy of the additional stories.                                                                                                                 | 10/4/2021 2:31 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                  |                    |
|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 116 | Should not be any higher than 30 feet or the height of any tree they plant in the ground at maturity. Whichever is higher. remove a tower and plant trees instead. Too much!                                                                                                                                                     | 10/4/2021 12:25 PM |
| 117 | Build it!                                                                                                                                                                                                                                                                                                                        | 10/4/2021 12:23 PM |
| 118 | We all know the city council has sold their soul to the development devil. I've lived in this area since 1995 and was always attracted to the low profile and the quiet nature of this end of Sunset. This is a hideous building and I know it will happen because the city does not care about anything other than development. | 10/4/2021 11:46 AM |
| 119 | The height is too much. It'll destroy views from the neighbors in the hills and the excuse that The London will benefit from the design is bullshit.                                                                                                                                                                             | 10/4/2021 11:26 AM |
| 120 | The hight isnt a issue for me                                                                                                                                                                                                                                                                                                    | 10/4/2021 9:54 AM  |
| 121 | It could be 20 stories high and look even more impressive.                                                                                                                                                                                                                                                                       | 10/4/2021 8:20 AM  |
| 122 | I think it is incredibly crucial that any renderings that show the pedestrian, Corredor's, also be followed up with scale model. The other projects have grossly misinterpreted the public access in public spaces. In today's world of virtual rendering, developers tend to skew the visual of what the space. Look like.      | 10/4/2021 6:10 AM  |
| 123 | It is way too high. It will ruin the character of the area, block the views for hundred of single family homes. It is just a bad project                                                                                                                                                                                         | 10/4/2021 3:42 AM  |
| 124 | Weho has enough hotels now. Redesign sunset but keep community as the focus.                                                                                                                                                                                                                                                     | 10/3/2021 9:47 PM  |
| 125 | The building is too high and either they need to find a new architect or the architect needs to start from the beginning.                                                                                                                                                                                                        | 10/3/2021 8:35 PM  |
| 126 | 100%                                                                                                                                                                                                                                                                                                                             | 10/3/2021 8:15 PM  |
| 127 | None. I'm fine with it.                                                                                                                                                                                                                                                                                                          | 10/3/2021 7:26 PM  |
| 128 | None that are repeatable in mixed company.                                                                                                                                                                                                                                                                                       | 10/3/2021 4:54 PM  |
| 129 | It seems to big for the area, but then what do I know?                                                                                                                                                                                                                                                                           | 10/3/2021 4:20 PM  |
| 130 | They are ridiculous looking and inappropriate in an already crowded residential neighbourhood                                                                                                                                                                                                                                    | 10/3/2021 4:14 PM  |
| 131 | its fine there are many tall buildings around                                                                                                                                                                                                                                                                                    | 10/3/2021 2:58 PM  |
| 132 | Much too high and I can see it sliding down that hill and devastating West Hollywood.                                                                                                                                                                                                                                            | 10/3/2021 2:41 PM  |
| 133 | I think it is great!                                                                                                                                                                                                                                                                                                             | 10/3/2021 2:32 PM  |
| 134 | Hate it                                                                                                                                                                                                                                                                                                                          | 10/3/2021 2:13 PM  |
| 135 | Let's make the height 0, meaning don't build it at all.                                                                                                                                                                                                                                                                          | 10/3/2021 1:26 PM  |
| 136 | scaled down maybe?                                                                                                                                                                                                                                                                                                               | 10/3/2021 1:17 PM  |
| 137 | We don't need exceptions to height when there are already several other new and in-development hotels that are seriously affecting traffic along this stretch of Sunset Blvd.                                                                                                                                                    | 10/3/2021 1:10 PM  |
| 138 | Don't build it!                                                                                                                                                                                                                                                                                                                  | 10/3/2021 12:01 PM |
| 139 | Stop it Weho. It's ugly. Just stop it. Maybe figure out how to move traffic through your ugly mess of a city more efficiently instead.                                                                                                                                                                                           | 10/3/2021 11:34 AM |
| 140 | We need more housing so please build more by making the binding higher. Housing is a lack of supply and in demand issue...so please build more by making making it higher.                                                                                                                                                       | 10/3/2021 11:28 AM |
| 141 | The sustainability issue should be a key factor given the infrastructural requirements, including elevators, AC, etc.                                                                                                                                                                                                            | 10/3/2021 10:44 AM |
| 142 | Too tall and out of place for the neighborhood. Will the guests of the 15th floor get to watch the elementary school children at play all day at the school across the street? This is not appropriate.                                                                                                                          | 10/3/2021 10:28 AM |
| 143 | Give the city an inch they take 12 inches. This will set a precedent for all other buildings to be same height or taller. Nothing about this height or look of the building embraces the look or feel                                                                                                                            | 10/3/2021 10:04 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

of West Hollywood and it's residents. It's completely out of character for the city

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                    |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 144 | It doesn't fit the style, mood, nostalgic charm of the Sunset Strip; it serves to diminish all of that and/or obscure the views for neighboring buildings. The architect should bring this building to Las Vegas or Atlantic City where it fits amongst the pre-established steel and concrete erection contest.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/3/2021 9:59 AM  |
| 145 | It is out of place in the existing neighborhood. It will grossly detract from the neighborhood feeling                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 9:57 AM  |
| 146 | Not fit for WeHo!!!!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 9:41 AM  |
| 147 | This is a monstrosity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 9:41 AM  |
| 148 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 9:35 AM  |
| 149 | Should respect homeowners above sunset blvd who have lived there for years- they deserve to keep their views as well where possible                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/3/2021 9:32 AM  |
| 150 | If we're going to build higher, let it be for affordable housing, or something we need.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/3/2021 9:24 AM  |
| 151 | Your commission is bound to ruin Sunset if you keep kowtowing to the money people. You will have betrayed the community.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/3/2021 9:20 AM  |
| 152 | THIS NEEDS TO BUT DOWN BY 10 FLOORS!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 9:18 AM  |
| 153 | Would prefer 3 story max, but doesn't matter because already approved for 10 stories.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/3/2021 9:13 AM  |
| 154 | It should probably be about the same height as other new developments in the area, not much higher. But, if there's a great public benefit like a "vertical park" the community can enjoy, I'd like that very much and would approve of much higher levels for better vistas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/2/2021 3:22 PM  |
| 155 | Ugly. West Hollywood is losing all its character.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/2/2021 2:39 PM  |
| 156 | Too high. It would deprive residents of privacy and put us in shade. It would dominate the neighborhood far more than a denser 10 story structure. One building should not be able to have such a disproportionate and overwhelming impact on a neighborhood of our city.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/2/2021 2:17 PM  |
| 157 | this design is HIDEOUS - maybe if you must DTLA but dear gawd no - please                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/1/2021 3:52 PM  |
| 158 | terrible and stupid design                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/1/2021 1:13 PM  |
| 159 | Whole project is ridiculous. Who on the city council is getting payback for going along with this planned eyesore!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/1/2021 11:54 AM |
| 160 | A bloated mess.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/1/2021 11:33 AM |
| 161 | I say again, just because a builder CAN...must they! When is enough, ENOUGH!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/1/2021 10:32 AM |
| 162 | Again, just because you can doesn't mean you should. There is simply not enough infrastructure support to keep adding this type of density here. Take several steps back and consider public transport and traffic congestion before adding more and more density.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/1/2021 10:26 AM |
| 163 | Sunset Boulevard is a DEAD zone - no pedestrian traffic, and the legendary car traffic from the 60s/70s is never coming back. Higher, denser buildings will bring foot traffic back to the blighted Sunset Blvd pedestrian experience. There is no "there there" currently - it needs massive help.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/1/2021 6:23 AM  |
| 164 | Commits the city to a replacing a pedestrian-scaled block (immediately next to existing residential housing) not with something neighborhood-enhancing, like the Gruen-respectful, Caruso approach to the Palisades, but instead the old car/SUV/limo centric, build it higher, larger, and more dramatic aesthetic that in 2021 only looks great to investors, developers, and the local tax manager. Especially in a moment of impending climate disaster, WeHo city planning needs to rethink its short sighted "Sunset Blvd can be showplace" mindset of years-past and instead seek to revitalize city spaces for the people who actually live and work here by embracing pedestrian and cycling infrastructure that prioritizes projects that will bring the community into a safe, inviting, human-scaled commons | 9/30/2021 10:19 PM |
| 165 | Zoning and rules exist for a reason. We should not be making acceptions for unnecessary buildings. There is purely no need for this to be built, and definitely no need to it to be taller than allowed. It does not add value to the strip as it feels way too out of place. There have                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 9/30/2021 6:22 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

already been complaints about too many digital billboards. Please do not add to that and turn this into a Times Square. There are quality people who live here and have lived here for a while, we do not want massive skyscrapers with funky modern futuristic design elements and digital billboards.

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    |

| 166 | Way too high.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/30/2021 5:09 PM  |
| 167 | the height is fine just make sure that the public benefit is appropriate and codified.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/30/2021 1:23 PM  |
| 168 | I disliked how some of renderings skew the perspective. For it to be accurate would mean the London Hotel would be perhaps five times farther away than the renderings show. That the developer was dishonest in the renderings makes me question what else they might be dishonest about vis-a-vis this proposal.                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/30/2021 11:47 AM |
| 169 | No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/30/2021 5:44 AM  |
| 170 | the height should be the same as the zoning permits....once the design is modified to comply, fewer critics will remain.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/29/2021 9:55 PM  |
| 171 | Too tall. Reduce the number of floors, between 4 and 10 should be sufficient for any building on Sunset.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/29/2021 9:21 PM  |
| 172 | I am fine with the height as long as the architect is unique and well-designed, unlike most towers built in LA currently. The design needs more refinement, but otherwise the height is fine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 6:40 PM  |
| 173 | Why add 5 floors "just to save the view" for guests at The London? What about saving the residents from the looming and overwhelming building?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/29/2021 5:15 PM  |
| 174 | I think even taller than 15 stories would be good ...we need more density.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 9/29/2021 4:12 PM  |
| 175 | WAYYYY too tall                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 9/29/2021 12:49 PM |
| 176 | way too high, whole strip is way too high. we lose connection to the hillsides                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/29/2021 11:55 AM |
| 177 | too tall. unnecessary. and what is the vacancy rate now? we need this, really? no.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/29/2021 11:49 AM |
| 178 | It's just WAY TOO MUCH                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/29/2021 10:48 AM |
| 179 | Earthquakes, people! It is the height of folly to endanger lives in this way.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 10:44 AM |
| 180 | It will impede the views of the hills! Residents like to look up at the sparkling Hollywood Hills at night, not a hideous glass tower that will take the charm out of West Hollywood. Tall buildings belong DTLA, Century City, Wilshire corridor, is this what we want to become of Sunset? It is already DEAD and it will be just as dead as Wilshire Blvd in the mid-city area once they tear down and build these empty glass towers that will remain EMPTY.                                                                                                                                                                                                                                                                                                     | 9/29/2021 9:28 AM  |
| 181 | Way out of scale with the neighborhood. Hard pass on this project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/29/2021 8:17 AM  |
| 182 | it's too high. it disrupts the view of all the surrounding homes and existing buildings                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/29/2021 8:11 AM  |
| 183 | West Hollywood can do better.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 7:42 AM  |
| 184 | Fits in well with the rest of the buildings along Sunset.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/29/2021 7:31 AM  |
| 185 | Not too tall. Incredible ridiculously to tall and overall big.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/29/2021 3:55 AM  |
| 186 | Love that it's one development with 2 different looks                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 10:45 PM |
| 187 | In general LA is building too high. The Millennium Project in Hollywood at 30+ stories is even more egregious. If there's a plan to build to 10, then just build to 10. That's already enormous compared to what exists now, so take your stupid win and stop trying to help developers get even richer.                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/28/2021 10:45 PM |
| 188 | As I stated previously, Larrabee Street is not at all a major intersection, thus should not be defined as a Target Site allowing for a height variance. I live on Larrabee and my condo faces northward, with a view of the hills which this 8850 Sunset project would block. While the small hole in its center was designed to give its developers a talking point against complaints from The London Hotel, that same hole would be even more useless when viewing the proposed building from any other angle, as from my home on the east side of Larrabee. All I'd see are those proposed giants ruining my current northeast view - a lovely aspect of my condo which convinced me to buy in West Hollywood. We local property owners should have just as much | 9/28/2021 9:29 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

right to what we see outside our door as The London does. And it would be impossible to step outside my building's front door without having this proposed monstrosity looming over me like a descending spaceship.

|     |                                                                                                                                                                                                                                                                                          |                    |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 189 | Too towering This is the worst possible place on the Sunset strip for such a tall building. It will literally loom over the London Hotel and everything south of it. It will become the only visual focal point in this entire section of West Hollywood                                 | 9/28/2021 8:59 PM  |
| 190 | This shouldn't just be about height.                                                                                                                                                                                                                                                     | 9/28/2021 8:00 PM  |
| 191 | This process is working organically and fits into the City's strategic plans and vital to achieving the 21st century vision of The Sunset Strip.                                                                                                                                         | 9/28/2021 7:36 PM  |
| 192 | In the next 20 years it might be one of the shorter buildings!                                                                                                                                                                                                                           | 9/28/2021 7:04 PM  |
| 193 | Egregiously overscaled                                                                                                                                                                                                                                                                   | 9/28/2021 6:53 PM  |
| 194 | I think the height is appropriate for Sunset, Santa Monica, La Cienaga, etc                                                                                                                                                                                                              | 9/28/2021 6:12 PM  |
| 195 | Far, far too high. Nothing to do with the character of West Hollywood.                                                                                                                                                                                                                   | 9/28/2021 6:10 PM  |
| 196 | More floors = more traffic.                                                                                                                                                                                                                                                              | 9/28/2021 5:01 PM  |
| 197 | concerns about height more in relation to what the developer and building will do for the community in exchange for the community accepting a large hulking tower. I'm not against the tower height but must be something for the clear benefit of the community and not the developers. | 9/28/2021 2:40 PM  |
| 198 | Disgusting. How did this architect get selected?                                                                                                                                                                                                                                         | 9/28/2021 2:24 PM  |
| 199 | To big for immediate area.                                                                                                                                                                                                                                                               | 9/28/2021 1:51 PM  |
| 200 | Way to high and we do not need a helicopter pad much to dangerous.                                                                                                                                                                                                                       | 9/28/2021 1:48 PM  |
| 201 | Don't live in hills but what about hill resident views? Feel for them!                                                                                                                                                                                                                   | 9/28/2021 1:45 PM  |
| 202 | The height doesn't bother me. I have no problem with building up in the Sunset corridor. Post COVID the City will need to replace revenue. A larger hotel will hopefully bring more TOT.                                                                                                 | 9/28/2021 1:43 PM  |
| 203 | I'm excited about this project and others on the sunset strip. More needs to happen in Weho around the PDC. Move the bus depot project forward.                                                                                                                                          | 9/28/2021 1:42 PM  |
| 204 | Please go taller and bigger. That area is very dirty and needs to be developed.                                                                                                                                                                                                          | 9/28/2021 1:39 PM  |
| 205 | Future development should require more local community involvement                                                                                                                                                                                                                       | 9/28/2021 12:48 PM |
| 206 | I think it's a bold and beautiful design helping to cement sunset Blvd as as West Hollywood destination                                                                                                                                                                                  | 9/28/2021 12:40 PM |
| 207 | Go big or go home                                                                                                                                                                                                                                                                        | 9/28/2021 12:35 PM |
| 208 | A building of this height is entirely too tall for the neighborhood.                                                                                                                                                                                                                     | 9/28/2021 12:08 PM |
| 209 | Not really out of place with the rest of the recent development on the Sunset Strip.                                                                                                                                                                                                     | 9/28/2021 12:05 PM |
| 210 | It will be a WeHo landmark                                                                                                                                                                                                                                                               | 9/28/2021 11:38 AM |
| 211 | I am sad that the agency want to build large and ugly buildings here in West Hollywood. There is already too much congestion and this isn't going to help.                                                                                                                               | 9/28/2021 11:37 AM |
| 212 | Its height not only affects the London. It effect residents in all directions. Especially my family and friends who live north of Sunset Blvd.                                                                                                                                           | 9/28/2021 1:16 AM  |
| 213 | DOES NOT BELONG ON SUNSET STRIP                                                                                                                                                                                                                                                          | 9/27/2021 9:32 PM  |
| 214 | With the London effectively already being above 10 stories when you include the penthouse level, rooftop deck structures, and above-grade garage at the South of the site, I see no issue with the proposed height of this design.                                                       | 9/27/2021 3:34 PM  |
| 215 | too big for the area                                                                                                                                                                                                                                                                     | 9/27/2021 2:38 PM  |
| 216 | It's a disgrace for our neighborhood. West Hollywood is being destroyed hotel by hotel.                                                                                                                                                                                                  | 9/27/2021 1:18 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                               |                    |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 217 | It is superfluous. How is this serving the community?                                                                                                                                                                                                                                                                                                                                         | 9/27/2021 12:44 PM |
| 218 | I do not think the height should be taller than the London                                                                                                                                                                                                                                                                                                                                    | 9/27/2021 11:32 AM |
| 219 | Too tall                                                                                                                                                                                                                                                                                                                                                                                      | 9/27/2021 9:24 AM  |
| 220 | Totally out of place for the neighborhood. The shadowing will destroy quality of life in surrounding area. Not to mention insanely unsafe so close to Sunset Fault.                                                                                                                                                                                                                           | 9/27/2021 9:15 AM  |
| 221 | Both structures are just way too tall for this location and especially for its site on the Sunset Strip where there are not other building of this scale in either direction for quite a few blocks and where most of the buildings surrounding are only 1 and 2 stories high.                                                                                                                | 9/27/2021 9:10 AM  |
| 222 | Would prefer this to a version that was 10 stories but filled the block (which I suspect the developer will do if the variance isn't allowed)                                                                                                                                                                                                                                                 | 9/27/2021 7:54 AM  |
| 223 | Sunset Strip is a special area. If Planning Commission sees a point to providing a variance there, I see no reason to object.                                                                                                                                                                                                                                                                 | 9/27/2021 7:42 AM  |
| 224 | Keep thinking about existing residents and community use components like green space. Outdoor seating areas in park like settings. Have it be unique, functional and accessible for those residing in the neighborhood.                                                                                                                                                                       | 9/27/2021 7:25 AM  |
| 225 | No                                                                                                                                                                                                                                                                                                                                                                                            | 9/27/2021 7:12 AM  |
| 226 | They want to build 15 stories. They bought the property knowing the zoning allowed 10 stories. Obviously they thought they could buy their way to a 50% variance. The answer should be a resounding NO.                                                                                                                                                                                       | 9/27/2021 7:10 AM  |
| 227 | The overall design and height is out of place for the area.                                                                                                                                                                                                                                                                                                                                   | 9/27/2021 6:49 AM  |
| 228 | i love it. Makes this architectural gem stand out                                                                                                                                                                                                                                                                                                                                             | 9/27/2021 5:28 AM  |
| 229 | Concerned that the extra height means more people - means more traffic.                                                                                                                                                                                                                                                                                                                       | 9/27/2021 1:20 AM  |
| 230 | The design may preserve the view of the London Hotel but will ruin the view for everyone else.                                                                                                                                                                                                                                                                                                | 9/26/2021 11:05 PM |
| 231 | besides being an eyesore, it will destroy the view of people living both below and above Sunset.He destroys the neighborhood feeling of the area                                                                                                                                                                                                                                              | 9/26/2021 10:31 PM |
| 232 | Beyond absurd! Put it DTLA or in a no -residential area. The entire project will reek havoc on an already overly dense area.                                                                                                                                                                                                                                                                  | 9/26/2021 10:09 PM |
| 233 | I think that the height ruins the charm of the neighborhood feel that we currently possess.                                                                                                                                                                                                                                                                                                   | 9/26/2021 10:05 PM |
| 234 | The towers will be directly in the way of the homeowners in the hills across the street, on the north side of Sunset Blvd. This will destroy their city views! This huge project should be built in the flats, on Melrose Avenue or Santa Monica Blvd. Get it off Sunset Boulevard.                                                                                                           | 9/26/2021 10:00 PM |
| 235 | It a collapse in search of the right earthquake. The geological fault already exists. The height & design are unsafe, dangerous, irresponsible. Remember what happened during the Northridge (aka: Santa Monica) earthquake.                                                                                                                                                                  | 9/26/2021 9:55 PM  |
| 236 | As we continue to set a precedent with these height variances, only to be used for high-end luxury development, it will only continue to grow and the request for variances greater.                                                                                                                                                                                                          | 9/26/2021 9:51 PM  |
| 237 | Area already bursting at the seams, needs public transpo or another concept away from individual car traffic to sustain these types of additions.                                                                                                                                                                                                                                             | 9/26/2021 9:33 PM  |
| 238 | We will soon have a canyon of buildings running down Sunset Blvd that will destroy any semblance of a "neighborhood". It may be inevitable but don't encourage it at this time. Before this happens we need rapid mass transit to move people in and out. If you want Times Square West there is much work to be done to preserve a livable environment for those still residing in the area. | 9/26/2021 9:21 PM  |
| 239 | Stop this nonsense already. All of the history of West Hollywood is ruined by the developers who will be In and out. The tow. Is owned by residents, not developers.                                                                                                                                                                                                                          | 9/26/2021 9:08 PM  |
| 240 | Too tall                                                                                                                                                                                                                                                                                                                                                                                      | 9/26/2021 8:53 PM  |
| 241 | It's too tall. It makes the project look grotesque in relation to everything around it.                                                                                                                                                                                                                                                                                                       | 9/26/2021 8:53 PM  |

242

It looks that the height is disproportionate to the lot. Also more floors mean more parking. How are they going to accommodate this?

| 1  | Not any I can think of at the moment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/31/2021 5:57 PM  |
| 2  | I think it's an interesting design but has no place in West Hollywood. Please don't build this.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/28/2021 8:46 AM  |
| 3  | Ugly for West Hollywood                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/27/2021 2:46 PM  |
| 4  | No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/25/2021 7:02 AM  |
| 5  | Great job to these incredible architects. We need more innovation and development to replace these crumbling strip malls that do not project the image of the world class city Los Angeles truly is/ should be.                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/23/2021 9:18 AM  |
| 6  | Not something I would Ever want to have to view from any direction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/22/2021 3:09 PM  |
| 7  | Destroys the joy and intent - for the tourists we say we are trying to cater to, not just the locals - of driving down the Sunset Strip - has no place here.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/21/2021 11:26 AM |
| 8  | TOO MODERN. DOES NOT FIT                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/20/2021 10:19 PM |
| 9  | I like this modern update for that corner.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/20/2021 3:39 PM  |
| 10 | The design is typical of an architect trying to make a name for himself but not thinking about the impact on the community.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/18/2021 9:19 PM  |
| 11 | Start again. WeHo doesn't need another abomination put up on Sunset Blvd with a video billboard.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/18/2021 8:54 AM  |
| 12 | Ugly                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/17/2021 11:36 PM |
| 13 | No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/17/2021 9:45 PM  |
| 14 | I don't like the little see through bits between the white on the Petersen museum either. Sorry I can't describe it any better than that!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/16/2021 4:35 PM  |
| 15 | I hope to see another pass at this. This is such a focal block as you drive Sunset Blvd, it would be a shame to not get it right.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/16/2021 4:11 PM  |
| 16 | no                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/16/2021 4:04 PM  |

| 22 | It's an eyesore. Sorry.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/13/2021 9:43 PM  |
| 23 | If it were 10 stories I would like it.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/13/2021 9:34 PM  |
| 24 | I am an architecture fan, but this is pretty unappealing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/13/2021 2:23 PM  |
| 25 | Seeing the picture of the lower portion of the proposed building, I think it is very exciting and open for Sunset Blvd. The undulating lower roofline is very striking & successful. This lower roofline looks great as it has a connection to the Lytton Savings building at 8150 Sunset Blvd from 1960, one of Los Angeles' Historic-Cultural Monuments until it was demolished in 2021. The upper portion of the building is not of scale, proportion or style to that corner of Sunset Blvd & San Vicente. The glass green western tower seems open and interesting. The other portion is just not working and comes w/ too many height variances for just a sky walk. | 10/13/2021 1:22 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                        |                     |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 26 | The design is way too crazy for West Hollywood. The height is not the problem, it's the design.                                                                                                                                                                                                                                                                                                                                        | 10/13/2021 6:50 AM  |
| 27 | Simplify it. Add more glass and accent with natural materials.                                                                                                                                                                                                                                                                                                                                                                         | 10/13/2021 5:54 AM  |
| 28 | Tacky                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/12/2021 11:38 PM |
| 29 | this is not even close to being a good design                                                                                                                                                                                                                                                                                                                                                                                          | 10/12/2021 1:35 PM  |
| 30 | Ugly. Tacky. Horrible. The worst I've ever seen.                                                                                                                                                                                                                                                                                                                                                                                       | 10/12/2021 11:21 AM |
| 31 | Strange design, over produced. Not suitable for a residential area.                                                                                                                                                                                                                                                                                                                                                                    | 10/12/2021 7:43 AM  |
| 32 | It's the kind of architecture a world class city should have.                                                                                                                                                                                                                                                                                                                                                                          | 10/11/2021 8:46 PM  |
| 33 | I do not want this kind of design. Why can't we think of the origins of this land? Native American, Spanish, Mexican. Also connected to the film industry.                                                                                                                                                                                                                                                                             | 10/11/2021 4:55 PM  |
| 34 | They need to start over And design something that fits with the neighborhood. At the end of the day this is still a neighborhood.                                                                                                                                                                                                                                                                                                      | 10/11/2021 4:17 PM  |
| 35 | Awful                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/11/2021 4:01 PM  |
| 36 | Nice                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/11/2021 3:41 PM  |
| 37 | None                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/11/2021 3:39 PM  |
| 38 | The wrapped building feels like a mummy. I think the open building with the greenery is beautiful.                                                                                                                                                                                                                                                                                                                                     | 10/11/2021 6:39 AM  |
| 39 | Ugly                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/10/2021 8:06 PM  |
| 40 | not impressed by the design.                                                                                                                                                                                                                                                                                                                                                                                                           | 10/10/2021 5:35 PM  |
| 41 | It looks like two different architects who didn't get along designed this building. It is too over the top and it is hard to believe such a design is being taken seriously. And we are going to be stuck looking at it if it is approved. Please start over.                                                                                                                                                                          | 10/10/2021 3:22 PM  |
| 42 | As I have publicly stated before, the design looks like Dr. Seuss meets Jurassic Park. It is not something suitable for this densely populated and congested area of West Hollywood.                                                                                                                                                                                                                                                   | 10/10/2021 3:00 PM  |
| 43 | See previous                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/10/2021 8:33 AM  |
| 44 | Not my favorite.                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/10/2021 6:53 AM  |
| 45 | it is hideous it does not fit with anything in the area and certainly not in west hollywood.                                                                                                                                                                                                                                                                                                                                           | 10/10/2021 5:55 AM  |
| 46 | It's terrible!                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/9/2021 9:07 PM   |
| 47 | ugleeeeeee                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/9/2021 8:22 PM   |
| 48 | ITS HIDEOUS                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/9/2021 2:17 PM   |
| 49 | Blocks out the view to all and sundry who live around it in their own apartments.                                                                                                                                                                                                                                                                                                                                                      | 10/9/2021 2:05 PM   |
| 50 | Please start over. Please! And go with something that is pleasant to look at, rather than trying to win some award. The people who give out these awards don't have to look at the building every day. But the residents and workers of this area do! Please ignore the award givers, whose opinion is completely irrelevant, and pay close attention to what people in the community say. Thank you for making this survey available. | 10/9/2021 1:20 PM   |
| 51 | We need to push into the future with innovative designs like this so we are not left behind in the rest of the world. Older building and neighborhoods can be made better with different new designs. Paris for instance folds in new Architecture all the time making it an evolving living and attractive environment.                                                                                                               | 10/9/2021 10:28 AM  |
| 52 | It rips any culture this city has left and looks like Disneyworld. Don't tear down the viper room                                                                                                                                                                                                                                                                                                                                      | 10/9/2021 9:22 AM   |
| 53 | Nope.                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/9/2021 12:36 AM  |
| 54 | Nix this project.                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/8/2021 7:41 PM   |
| 55 | It works as a metaphor for developers (the claw building) eating West Hollywood (the foliated glass box).                                                                                                                                                                                                                                                                                                                              | 10/8/2021 7:08 PM   |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                        |                    |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 56 | very exciting, as it will be a building in motion                                                                                                                                                                                                                                                                                                                                      | 10/8/2021 4:39 PM  |
| 57 | Please make sure there are public spaces!                                                                                                                                                                                                                                                                                                                                              | 10/8/2021 2:08 PM  |
| 58 | It would be interesting to see an alternative design proposal                                                                                                                                                                                                                                                                                                                          | 10/8/2021 12:53 PM |
| 59 | Love it. Stop delaying.                                                                                                                                                                                                                                                                                                                                                                | 10/8/2021 12:31 PM |
| 60 | There needs to be additional features to reduce noise which carries down to the residential area. Overall it is too tall/dense                                                                                                                                                                                                                                                         | 10/8/2021 12:17 PM |
| 61 | Horrific .                                                                                                                                                                                                                                                                                                                                                                             | 10/8/2021 11:17 AM |
| 62 | Looks like two separate designs.                                                                                                                                                                                                                                                                                                                                                       | 10/8/2021 10:03 AM |
| 63 | I wish it would be more diagonal, that way the glass gets more sunset views                                                                                                                                                                                                                                                                                                            | 10/7/2021 11:15 PM |
| 64 | I will do everything as a citizen to stop this developer and his horrific style from further ruining Sunset                                                                                                                                                                                                                                                                            | 10/7/2021 10:10 PM |
| 65 | I would appreciate lots of greenery, also make sure the glass isn't so reflective that it gives off a massive glare and makes it hard to drive.                                                                                                                                                                                                                                        | 10/7/2021 7:58 PM  |
| 66 | I am sure that toning down this design, staying at the allowed ten story height limit and trying to add to the beauty of the street rather than dwarf everything around it are ideas that will be ignored.                                                                                                                                                                             | 10/7/2021 5:40 PM  |
| 67 | great design wrong location                                                                                                                                                                                                                                                                                                                                                            | 10/7/2021 5:21 PM  |
| 68 | This doesn't seem particularly modern or forward thinking and does little to address climate concerns in a region of the country that might be facing massive drought for years to come. The hubris is alarming and disappointing.                                                                                                                                                     | 10/7/2021 1:19 PM  |
| 69 | I think it's visually busy but in a good way. Feel like there's energy to the entire space.                                                                                                                                                                                                                                                                                            | 10/7/2021 12:40 PM |
| 70 | Build it                                                                                                                                                                                                                                                                                                                                                                               | 10/7/2021 10:11 AM |
| 71 | Star over. It's hideous.                                                                                                                                                                                                                                                                                                                                                               | 10/7/2021 9:52 AM  |
| 72 | start over, something related more to hollywood or LA                                                                                                                                                                                                                                                                                                                                  | 10/7/2021 9:31 AM  |
| 73 | a very rough amateurish first draft. architect is good but anything here should be designed to integrate with the environment not assault it.                                                                                                                                                                                                                                          | 10/7/2021 8:51 AM  |
| 74 | No                                                                                                                                                                                                                                                                                                                                                                                     | 10/6/2021 11:44 PM |
| 75 | it's messy, disjointed, incoherent, loud...it's conspicuous to be conspicuous...it's unjustifiable. It's just bad.                                                                                                                                                                                                                                                                     | 10/6/2021 11:35 PM |
| 76 | Back to the drawing board. A nice, sleek building without the outrageous shape would be best in this eclectic neighborhood. This design would not beautify the neighborhood - it would make it much less attractive and totally uninviting.                                                                                                                                            | 10/6/2021 11:32 PM |
| 77 | imperative ground level floor has extra height to allow for welcoming and usable retail.                                                                                                                                                                                                                                                                                               | 10/6/2021 10:23 PM |
| 78 | Weird                                                                                                                                                                                                                                                                                                                                                                                  | 10/6/2021 10:05 PM |
| 79 | I live in a crummy little apartment building across the street ... I can't even imagine or fathom the amount of traffic on SUNSET as it's already slammed during rush hour. Where do you imagine all of these people are going to drive to and from or get in and out? It doesn't make any sense. It's already a mess getting home as it is. The street's not going to get any bigger. | 10/6/2021 8:56 PM  |
| 80 | fantastic.. like many others i have great memories of the viper room, but let's move on and get modern.                                                                                                                                                                                                                                                                                | 10/6/2021 7:04 PM  |
| 81 | Awful                                                                                                                                                                                                                                                                                                                                                                                  | 10/6/2021 4:23 PM  |
| 82 | Separated, the towers would be nicer. One or the other, not both. Prefer the apartments.                                                                                                                                                                                                                                                                                               | 10/6/2021 2:32 PM  |
| 83 | Keep the design, and have it taller, with no increase to parking.                                                                                                                                                                                                                                                                                                                      | 10/6/2021 10:47 AM |
| 84 | It's bizarre, not a cool bizarre. It's trying too hard to look edgy and it's not working.                                                                                                                                                                                                                                                                                              | 10/6/2021 1:51 AM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                    |

| 85  | No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/5/2021 9:45 PM  |
| 86  | The design does not fit into the area, neighborhood or the Sunset Strip. It looks like a hotel and development in Dubai.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/5/2021 5:42 PM  |
| 87  | nope                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 10/5/2021 5:39 PM  |
| 88  | Too novel and outrageous to fit the neighborhood and stand the test of time.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/5/2021 5:10 PM  |
| 89  | Not a fit for West Hollywood                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/5/2021 4:57 PM  |
| 90  | It's cool                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/5/2021 4:41 PM  |

| 93  | This design stands out in a good way. There have been too many "blocky" designs that have gotten built on Sunset Strip (not sure how the WeHo Planning Commission approved those hideous monstrosities.) This at least looks good and is unique to add to the architecture appeal of WeHo.                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/5/2021 2:28 PM  |
| 94  | We are losing all charm on Sunset Blvd. I try to keep an open mind about architecture but this complex is ugly and does not fit in with West Hollywood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/5/2021 11:11 AM |
| 95  | Has no appeal to me                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/5/2021 10:59 AM |
| 96  | Ugly, bad design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/5/2021 10:58 AM |
| 97  | I think it is much better than is currently being proposed and built along the Sunset Strip.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/5/2021 10:16 AM |
| 98  | I really hate everything about the design. Sorry.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/5/2021 10:06 AM |
| 99  | Ugly and all about the money                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/5/2021 7:00 AM  |
| 100 | Visionary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/4/2021 5:50 PM  |
| 101 | We need more thoughtful design like this, and fewer block buildings with no character.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/4/2021 5:21 PM  |
| 102 | I love it                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/4/2021 3:08 PM  |
| 103 | Expired.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/4/2021 2:57 PM  |
| 104 | I looks a bit like a Frank Gehry building had a baby with the Peterson Automotive Museum. I like the creativity of the use of negative space in the center, but I agree that the two parts of the building seem a bit disconnected, aesthetically. That being said, I am fully supportive of developing the Sunset Strip into an architectural showplace. It is unfortunate that some of the hotels and residential buildings built lately were rather soulless. This is quite interesting, which I fully support. I was also a vocal supporter of the Gehry project at 8150 Sunset - I believe these two projects could serve as opposing gateways to the strip - finally doing justice to an iconic stretch of road. | 10/4/2021 2:31 PM  |
| 105 | It's really fascinating.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/4/2021 1:08 PM  |
| 106 | Too much glass and steel and not enough trees in the ground like Oak. Looks like a heat island to me.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/4/2021 12:25 PM |
| 107 | Please make it happen as designed. We don't need another box on the street. Also, NO lighted marquee signs! We have enough light pollution. What you have allowed at the Pendry is a travesty. That light is blinding for drivers and now every person that stays at the Hyatt will forever have to have have windows covered.                                                                                                                                                                                                                                                                                                                                                                                         | 10/4/2021 12:23 PM |
| 108 | It's hideous                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/4/2021 11:46 AM |
| 109 | I like the design its refreshing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/4/2021 9:54 AM  |
| 110 | Let's hope that something that beautiful will be built.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10/4/2021 8:20 AM  |
| 111 | Unusual design. Distinctive to West Hollywood                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 10/4/2021 5:18 AM  |
| 112 | The design is not the worst part about the project. The design is ugly but there are a lot of ugly buildings (I.e.: A.K.A building on the sunset strip) The height is way to height. I would not allow more than 5 stories                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/4/2021 3:42 AM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                         |                    |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 113 | Beautiful but better suited on the East side of sunset                                                                                                                                                  | 10/3/2021 9:47 PM  |
| 114 | The design is an eye sore and hideous.                                                                                                                                                                  | 10/3/2021 8:35 PM  |
| 115 | I love it. It is a modern Beauty.                                                                                                                                                                       | 10/3/2021 8:15 PM  |
| 116 | Really like it.                                                                                                                                                                                         | 10/3/2021 7:26 PM  |
| 117 | Its extremely revealing about the character of all involved. Its narcissistic, loud, self-centered and aggressive. It's creepy and very Ovitz.                                                          | 10/3/2021 4:54 PM  |
| 118 | I like it a lot. Does it need to be so big?                                                                                                                                                             | 10/3/2021 4:20 PM  |
| 119 | Horrific. Put it in Hollywood which has already been ruined                                                                                                                                             | 10/3/2021 4:14 PM  |
| 120 | its cool but how do we know it will stay up like that over time?                                                                                                                                        | 10/3/2021 2:58 PM  |
| 121 | Simply atrocious                                                                                                                                                                                        | 10/3/2021 2:41 PM  |
| 122 | Spectacular!                                                                                                                                                                                            | 10/3/2021 2:32 PM  |
| 123 | Ugly                                                                                                                                                                                                    | 10/3/2021 2:13 PM  |
| 124 | Just one... Why?                                                                                                                                                                                        | 10/3/2021 1:26 PM  |
| 125 | Please do not destroy the area and the character of the Sunset strip                                                                                                                                    | 10/3/2021 1:17 PM  |
| 126 | Ugly. Horrific.                                                                                                                                                                                         | 10/3/2021 1:10 PM  |
| 127 | Horrible                                                                                                                                                                                                | 10/3/2021 12:01 PM |
| 128 | Don't do it. It sucks.                                                                                                                                                                                  | 10/3/2021 11:34 AM |
| 129 | I love it.                                                                                                                                                                                              | 10/3/2021 11:28 AM |
| 130 | It's totally absurd. It's not appealing and ugly. This West Hollywood anc Beverly Hills and we need to reflect on what California and local architecture should look like                               | 10/3/2021 11:01 AM |
| 131 | I do not support this design, the additional height request is not appropriate given the school across the street and Sunset does not need to become Wilshire corridor.                                 | 10/3/2021 10:28 AM |
| 132 | Perhaps this belongs in DTLA. It absolutely belongs in Dubai. It's absolutely does not belong on the strip and it looks ridiculous                                                                      | 10/3/2021 10:04 AM |
| 133 | This is a neighborhood, not an architectural design museum                                                                                                                                              | 10/3/2021 9:57 AM  |
| 134 | Great for digital imaging and CGI for a dystopian future in a Sci-Fi film, but not so much for the neighborhood I live in.                                                                              | 10/3/2021 9:41 AM  |
| 135 | No                                                                                                                                                                                                      | 10/3/2021 9:35 AM  |
| 136 | The design of the edition hotel seems to be not too distracting while still being striking - personally I love the natural looking elements of this proposed design- less excited about the other tower | 10/3/2021 9:32 AM  |
| 137 | Don't you have eyes??? These buildings are hideous.                                                                                                                                                     | 10/3/2021 9:20 AM  |
| 138 | THERE IS NOTHING APPEALING OR INTERESTING IN THE CONCEPT OF THIS TYPE OF STRUCTURE.                                                                                                                     | 10/3/2021 9:18 AM  |
| 139 | Hideous, Ugly, Eye-sore, inappropriate, trying-to-hard. Should I go on...?                                                                                                                              | 10/3/2021 9:13 AM  |
| 140 | I love modern and forward thinking but the look of this design is just a fail on all fronts. This looks terrible.                                                                                       | 10/2/2021 8:57 PM  |
| 141 | I think it could be a landmark in West Hollywood and is a very nice design, which helps to modernize the city.                                                                                          | 10/2/2021 8:51 PM  |
| 142 | The building evokes an 80's hair band.                                                                                                                                                                  | 10/2/2021 7:31 PM  |
| 143 | Design should really start with pedestrians in mind, and welcome and invite walkers to move into and upwards to the vertical park. Not make it look like it's off limits. I also think it would be      | 10/2/2021 3:22 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

cool to have some type of natural dazzling "chandelier in the breezeway - maybe the glass elevators or gondolas can contribute to this.

|     |                                                                                                                                                                                                                                                                                                                                                                                                      |                    |

| 144 | Leave this block the way it is. Of incorporate the businesses like The Viper Room and Turner's                                                                                                                                                                                                                                                                                                       | 10/2/2021 2:39 PM  |
| 145 | HIDEOUS - give us a break!                                                                                                                                                                                                                                                                                                                                                                           | 10/1/2021 3:52 PM  |
| 146 | almost (or is it) a joke - should have been thrown out withing 10 seconds of seeing it...I work as a director of design for a retail shopping center developer, who reviews plans all day long..I would have banned the architect from this City forever... Waste of time and good put the nail in the coffin                                                                                        | 10/1/2021 1:13 PM  |
| 147 | Ridiculous.                                                                                                                                                                                                                                                                                                                                                                                          | 10/1/2021 11:54 AM |
| 148 | Screams "look at me I'm different and unlivable."                                                                                                                                                                                                                                                                                                                                                    | 10/1/2021 11:33 AM |
| 149 | Although I do appreciate wanting to be different and trendy but again to me this design looks like there were several architects/designers and not one was willing to compromise                                                                                                                                                                                                                     | 10/1/2021 10:32 AM |
| 150 | The design is creative, fun and unexpected - and I disagree with those that say it will be "dated" in 20 years. Come on, that's a lame argument for this particular design.                                                                                                                                                                                                                          | 10/1/2021 6:23 AM  |
| 151 | It's not charming. It's way too futuristic and modern for WeHo.                                                                                                                                                                                                                                                                                                                                      | 9/30/2021 6:22 PM  |
| 152 | It looks alive, not just the plants on the building but that actual structure looks like an alien creature.                                                                                                                                                                                                                                                                                          | 9/30/2021 5:09 PM  |
| 153 | the design isn't wonderful. The Emerson College building in Hollywood lacks sidewalk appeal and does not feel inviting to the public, and I fear this project has some of the same problems.                                                                                                                                                                                                         | 9/30/2021 1:23 PM  |
| 154 | It would be more interesting if there were more such buildings on Sunset. It doesn't speak to anything else and as such, there is the danger it would become a white elephant. I suppose the same could be said about the proposed Frank Gehry project at Sunset/Crescent Heights, but I admire that design. It's different enough to be interesting but not so different as to be a white elephant. | 9/30/2021 11:47 AM |
| 155 | See previous comments, no more white cismale hetero architects                                                                                                                                                                                                                                                                                                                                       | 9/30/2021 5:44 AM  |
| 156 | Avoid any moving advertisement or large billboards                                                                                                                                                                                                                                                                                                                                                   | 9/29/2021 9:55 PM  |
| 157 | Stop with the over designed, ultra modern, designs. The Pendry residences should be a warning to all designers and developers in WEHO. The glass and chrome finishes are a nuisance to the surrounding neighborhood causing sharp, bright reflections into the other residences in the neighborhood.                                                                                                 | 9/29/2021 9:21 PM  |
| 158 | The west tower seems to echo Zaha Hadid but not to the same level of execution and design harmony with the east tower. I don't mind that the two towers have different designs as long as the communication between the two is interesting. The design needs more refinement for this to be achieved.                                                                                                | 9/29/2021 6:40 PM  |
| 159 | Does not offer any harmony with the rest of the architecture in the area.                                                                                                                                                                                                                                                                                                                            | 9/29/2021 5:32 PM  |
| 160 | I'd like to see more public space on the ground floor - places for people to sit, maybe a parklet or water feature - an amenity that improves the quality of life for the neighborhood as well as future hotel guests or office workers.                                                                                                                                                             | 9/29/2021 5:15 PM  |
| 161 | Start over                                                                                                                                                                                                                                                                                                                                                                                           | 9/29/2021 12:49 PM |
| 162 | I think it is painfully ugly.                                                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 12:40 PM |
| 163 | half-assed freshman skills                                                                                                                                                                                                                                                                                                                                                                           | 9/29/2021 11:55 AM |
| 164 | I think it is ugly, very ugly.                                                                                                                                                                                                                                                                                                                                                                       | 9/29/2021 11:33 AM |
| 165 | I don't dislike the design. I like creative designs                                                                                                                                                                                                                                                                                                                                                  | 9/29/2021 10:48 AM |
| 166 | It's ugly. Butt ugly.                                                                                                                                                                                                                                                                                                                                                                                | 9/29/2021 10:44 AM |
| 167 | Too tall; not opposed to design if it weren't so overwhelming.                                                                                                                                                                                                                                                                                                                                       | 9/29/2021 9:28 AM  |
| 168 | It's not an appealing design. I'd hate to have to see that every day.                                                                                                                                                                                                                                                                                                                                | 9/29/2021 8:30 AM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                    |

| 169 | it is not pleasing to the eye. it's ugly                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/29/2021 8:11 AM  |
| 170 | Stunning                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/29/2021 7:31 AM  |
| 171 | Why? What is gained through this unusual design? if we only gain attention to the architect, then it's not worth it. If there's benefit to the City and our residents for the building's design to gain so much attention, let me know what that is.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/29/2021 6:39 AM  |
| 172 | Honestly it's not the worst in terms of architecture on a drawing board. But it doesn't feel like part of a neighborhood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/28/2021 10:45 PM |
| 173 | Its weird design just doesn't match any current aesthetic in this area, it looks more at home on the Vegas strip (or yes Dubai) than on the Sunset Strip in this part of WeHo. In contrast, The West Hollywood Edition built a few blocks east is elegant yet not at all so blunt or intrusive in its style. This 8850 Sunset design seems to ignore that people actually live here, and that we do not want the skyscraper congestion of downtown urban areas. We need to be able to see things like hillsides and downhill vistas. This building's design would obstruct those for everyone who lives and works within a five block radius. This design invites claustrophobia into what is currently a charming neighborhood. | 9/28/2021 9:29 PM  |
| 174 | I fear a white elephant. But once it's there it's not coming down. It's the type of building The tourists like to take selfie's at. When they are there for five minutes period. It's the type of tourist attraction design that will play havoc with traffic                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9/28/2021 8:59 PM  |
| 175 | I generally like the design a lot and live in close proximity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/28/2021 8:00 PM  |
| 176 | Get started already!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/28/2021 7:36 PM  |
| 177 | The contrasting 2 tower design could go a long way to becoming an iconic West Hollywood land mark.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/28/2021 7:04 PM  |
| 178 | Hideous. Dangerous.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/28/2021 6:53 PM  |
| 179 | I think the design is unique and not like the boxes were seeing in proliferation around town. Sunset, Santa Monica and other major thoroughfares is where large developments belong. I've lived in The Norma Triangle for close to 20 years and love to see these new projects.                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/28/2021 6:12 PM  |
| 180 | The aesthetic sensibility of a mollusc.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 9/28/2021 6:10 PM  |
| 181 | West Hollywood should have its own architectural style, and not be seeking derivative and twenty-year old designs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/28/2021 5:01 PM  |
| 182 | I do not like the design                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/28/2021 3:55 PM  |
| 183 | really wild, expensive to upkeep. Need real sustainability and long term thinking and not just plants.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 9/28/2021 2:40 PM  |
| 184 | Worst design I've ever seen. It looks like junk and is laughable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 2:24 PM  |
| 185 | Awful design that looks TOO out of the place with the immediate area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 1:51 PM  |
| 186 | Once you see Pac Man can't unsee!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 1:45 PM  |
| 187 | I find it too sharp and angular. I do not think it will age well.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 1:43 PM  |
| 188 | No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/28/2021 1:42 PM  |
| 189 | The design is amazing. Thank you!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 1:39 PM  |
| 190 | Very cool design                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 9/28/2021 12:35 PM |
| 191 | Great design fitting to the strip. I am glad it doesn't look like just a box, like some of the newer built hotels                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 12:17 PM |
| 192 | Needs to be completely scrapped and start ove.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/28/2021 12:17 PM |
| 193 | Scale the design back so the building looks like it belongs in the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/28/2021 12:08 PM |

Would have saved for here, but got them in already.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 9/28/2021 11:39 AM |
| 195 | Beautiful!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/28/2021 11:38 AM |
| 196 | A drunk toddler could have come up with a better design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/28/2021 11:37 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                        |                    |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 197 | Not pleasing to the eye. Lacks any real beauty.                                                                                                                                                                                                        | 9/28/2021 1:16 AM  |
| 198 | I don't like either tower's look                                                                                                                                                                                                                       | 9/27/2021 9:34 PM  |
| 199 | HORRIBLE                                                                                                                                                                                                                                               | 9/27/2021 9:32 PM  |
| 200 | I appreciate that the massing is split between two towers. It is a design that does not appear "heavy", which helps to reduce the impact of the height. I live right below this project in Norma Triangle and have no issues with the design or scale. | 9/27/2021 3:34 PM  |
| 201 | horrid                                                                                                                                                                                                                                                 | 9/27/2021 2:38 PM  |
| 202 | I am supportive of architectural creativity                                                                                                                                                                                                            | 9/27/2021 1:22 PM  |
| 203 | Hire Zaha Hadid Architects if you want this style.                                                                                                                                                                                                     | 9/27/2021 1:18 PM  |
| 204 | How is are these 2 buildings and their design creating community? Form doesn't follow nor meet function.                                                                                                                                               | 9/27/2021 12:44 PM |
| 205 | Parking Parking Parking and traffic jam getting into corner of Sunset and San Vicente... nightmare congestion                                                                                                                                          | 9/27/2021 11:32 AM |
| 206 | Utterly hideous. A reject from The Jetsons files at Hanna Barberra. The idea of not building one more brown white and orange box laudable. This design though is laughable.                                                                            | 9/27/2021 9:15 AM  |
| 207 | We don't need another hotel so close to The London.                                                                                                                                                                                                    | 9/27/2021 8:49 AM  |
| 208 | I like every large scale project Mayne has done in LA. I think a high profile project that will get widely published will help draw more foot traffic to the area during the day - something that stretch of Sunset needs                              | 9/27/2021 7:54 AM  |
| 209 | None                                                                                                                                                                                                                                                   | 9/27/2021 7:42 AM  |
| 210 | No                                                                                                                                                                                                                                                     | 9/27/2021 7:12 AM  |
| 211 | It doesn't have the "wow" factor I was expecting. It just look like a wish list and the final act for the "starchitect"                                                                                                                                | 9/27/2021 7:10 AM  |
| 212 | The design is reminiscent of "The Jetsons" cartoons and has been nicknamed accordingly. Although interesting, not appropriate for WEHO. The city council will most likely approved regardless of neighborhood impute which is disappointing.           | 9/27/2021 6:49 AM  |
| 213 | no                                                                                                                                                                                                                                                     | 9/27/2021 5:28 AM  |
| 214 | The two buildings look like a stack of staples sandwiched between a gigantic staple remover!                                                                                                                                                           | 9/26/2021 10:31 PM |
| 215 | Disneyworld meets Burj Khalifa                                                                                                                                                                                                                         | 9/26/2021 10:09 PM |
| 216 | Too big, too gargantuan for the parcel of land you propose.                                                                                                                                                                                            | 9/26/2021 10:00 PM |
| 217 | During an on-going pandemic, WeHo (of all places) should not be designing the Covid Hotel & Gardens. Check out the state of the art air conditioning system of the most famous building in the world: The Empire State Building.                       | 9/26/2021 9:55 PM  |
| 218 | looks good to me but but too area is oversaturated                                                                                                                                                                                                     | 9/26/2021 9:33 PM  |
| 219 | Ridiculous                                                                                                                                                                                                                                             | 9/26/2021 9:08 PM  |
| 220 | Disproportionate for the site                                                                                                                                                                                                                          | 9/26/2021 8:53 PM  |
| 221 | I think that the overall visual design intent is cool, especially if they keep the sort of "hill" between the two buildings.                                                                                                                           | 9/26/2021 8:53 PM  |

## Q13 What other areas of concern on this project would you like future surveys to cover?

| 1  | Your list seems to cover the concerns.                                                                                                                                                                                                                                     | 10/31/2021 5:57 PM  |
| 2  | The lack of parking that is already a problem on the strip. Creating a hotel would attract far more people to this area which has a proposed limited parking. In turn this could cause a significant increase in traffic.                                                  | 10/28/2021 8:46 AM  |
| 3  | Traffic congestion                                                                                                                                                                                                                                                         | 10/28/2021 2:57 AM  |
| 4  | Increase in traffic in the area, the extra noise and maybe if any other blocks around the project could be redesigned.                                                                                                                                                     | 10/27/2021 8:41 PM  |

| 58 | Impact on the community. Traffic mitigation. Changes in traffic flow to facilitate life for the thousands of people who actually live here. Environmental concerns of added construction, increased population on the community. Will this even be available for public use at the street level or is it another block of WeHo that will separate the "haves" from the "have-nots?" Will | 10/7/2021 5:40 PM   |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

there be public spaces open to everyone it will this entire block be off limits like the Mondrian, the other huge hotel (forgot the name-used to be Hyatt) and the other huge projects on the corner of La Cienega.

|    |                                                                                                                                                                                                                                                                         |                    |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 59 | water usage, traffic during and after construction. Sunset is already packed with cars                                                                                                                                                                                  | 10/7/2021 5:21 PM  |
| 60 | Community and residential impact. This is not just a business corridor, but a neighborhood as well.                                                                                                                                                                     | 10/7/2021 1:19 PM  |
| 61 | I'd like to see this (and all new buildings really) take a proactive approach to the environment. Don't build things that just won't do harm-try to build things that are either neutral or provide an environmental "service" or benefit to the community.             | 10/7/2021 12:40 PM |

| 108 | Traffic. Congestion. Lack of community involvement. Scale. Political oversight                                                                                                                                                                                                                                    | 10/3/2021 9:47 PM  |
| 109 | How will the city benefit from beautification initiatives? Will surrounding businesses/homes be affected and then compensated for the interruptions                                                                                                                                                               | 10/3/2021 8:15 PM  |
| 110 | Traffic impact                                                                                                                                                                                                                                                                                                    | 10/3/2021 7:26 PM  |
| 111 | TRAFFIC!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!                                                                                                                                                                                                                                                               | 10/3/2021 4:20 PM  |
| 112 | ZONIN LIMITS/quality of life                                                                                                                                                                                                                                                                                      | 10/3/2021 4:14 PM  |
| 113 | construction issues clogging up sunset blvd - traffic is already insane and the lane closures from building that hotel down the street was a nightmare for years.                                                                                                                                                 | 10/3/2021 2:58 PM  |
| 114 | Location, earthquake danger, appropriateness of site to surrounding buildings.                                                                                                                                                                                                                                    | 10/3/2021 2:41 PM  |
| 115 | How can we genuinely prevent this disgrace from happening?                                                                                                                                                                                                                                                        | 10/3/2021 1:26 PM  |
| 116 | How did it get this far????                                                                                                                                                                                                                                                                                       | 10/3/2021 1:10 PM  |
| 117 | Traffic                                                                                                                                                                                                                                                                                                           | 10/3/2021 12:01 PM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                       |                    |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 118 | Just don't.                                                                                                                                                                                                                                                                                           | 10/3/2021 11:34 AM |
| 119 | Necessity                                                                                                                                                                                                                                                                                             | 10/3/2021 11:01 AM |
| 120 | Comparative economics with respect to (a) workers and (b) the City (among other things).                                                                                                                                                                                                              | 10/3/2021 10:44 AM |
| 121 | All of the above                                                                                                                                                                                                                                                                                      | 10/3/2021 10:28 AM |
| 122 | I'm disgusted the city is allowing what's left of it's history to be "reimagined ". All that will be left of West Hollywood's rich history will be a plaque commemorating the past. They paved paradise and put up a parking lot indeed. Where is the preservation committee?!                        | 10/3/2021 10:04 AM |
| 123 | Traffic, necessity, benefit to the community, overall impact                                                                                                                                                                                                                                          | 10/3/2021 9:35 AM  |
| 124 | Length of time traffic will be disrupted. Parking.                                                                                                                                                                                                                                                    | 10/3/2021 9:32 AM  |
| 125 | Entry and exit to parking- it's a very congested stretch of sunset already                                                                                                                                                                                                                            | 10/3/2021 9:32 AM  |
| 126 | STOP THIS PROJECT                                                                                                                                                                                                                                                                                     | 10/3/2021 9:20 AM  |
| 127 | INTENSITY OF TRAFFIC IN SURROUNDING AREA, ACCESS AND PARKING, UPGRADES TO THE SEWER, WATER AND ELECTRICAL LINES FOR THE AREA SINCE THOSE ARE DATED BEYOND 100 YEARS. TOO INTENSIVE USES FOR THE BLOCK AND AREA.                                                                                       | 10/3/2021 9:18 AM  |
| 128 | The potential congestion and inconvenience of construction, how long would that be going on for? Live very close to this project, I love the idea of it and I think it needs to happen, I just hope construction can be as minimal of inconvenience as possible for those of us who very close to it. | 10/2/2021 8:51 PM  |
| 129 | West Hollywood                                                                                                                                                                                                                                                                                        | 10/2/2021 2:39 PM  |
| 130 | How the proposed development (in this form) would detract from or benefit the city and its stakeholders. That is, why would it deserve a variance?                                                                                                                                                    | 10/2/2021 2:17 PM  |
| 131 | must be respectful of existing surroundings and neighbors - to live across the street or in the hills and see this every morning would make me vomit                                                                                                                                                  | 10/1/2021 1:13 PM  |
| 132 | Use of solar energy/climate change etc. I am also sick and tired of the BS surrounding the digital bill board craze. They are so distracting when driving.                                                                                                                                            | 10/1/2021 10:32 AM |
| 133 | Impact on adjacent neighborhoods--spillover effects: Congestion, light, scarce resources                                                                                                                                                                                                              | 10/1/2021 10:26 AM |
| 134 | Increase the pedestrian experience and build up a better night life.                                                                                                                                                                                                                                  | 10/1/2021 6:23 AM  |
| 135 | Are more hotels really what Weho needs?                                                                                                                                                                                                                                                               | 10/1/2021 6:12 AM  |
| 136 | Transit access, bicycle and e-vehicle accommodations.                                                                                                                                                                                                                                                 | 9/30/2021 10:19 PM |
| 137 | Noise, light from digital billboards, increased traffic on the strip, view of the city from all units that currently do not have a view that is being obstructed and reserve the right to maintain that sight line given the existing zoning.                                                         | 9/30/2021 6:22 PM  |

| 156 | Planning will do their job on necessary adjustment that may arise.                                                                                                                                                                                                                                                                                                                            | 9/28/2021 7:36 PM  |
| 157 | Does the city of West Hollywood even care about the impact all this development has on the price of rental stock in the city?                                                                                                                                                                                                                                                                 | 9/28/2021 7:13 PM  |
| 158 | Let's see some West Hollywood Designers involved in the design and development of the project                                                                                                                                                                                                                                                                                                 | 9/28/2021 7:04 PM  |
| 159 | Community impact. Sustainability: Utility usage, water usage, traffic. Visual blight.                                                                                                                                                                                                                                                                                                         | 9/28/2021 6:53 PM  |
| 160 | Does its help Homelessness? More affordable housing. Who stands to profit. What alternative concepts are there? If none, why?.                                                                                                                                                                                                                                                                | 9/28/2021 6:10 PM  |
| 161 | Construction issues. Licensing issues. Noise issues and policing once constructed. What will the site bring to local people - local people won't stay there, buy there, or frequent the tired concept that is The Viper Room. Locals use the restaurants currently there, along with Turners. Sunset Strip is a food desert when it comes to markets. All we have are Turners and Sunset Oil. | 9/28/2021 5:01 PM  |
| 162 | Water, where will the water come from for this project? There is already a water shortage.                                                                                                                                                                                                                                                                                                    | 9/28/2021 3:55 PM  |
| 163 | community benefit, sustainability, long term view of the city.                                                                                                                                                                                                                                                                                                                                | 9/28/2021 2:40 PM  |
| 164 | How an architect is selected. This is a joke. The committee who selected him should be fired. Start over w a design that is tasteful. Get a different architect.                                                                                                                                                                                                                              | 9/28/2021 2:24 PM  |
| 165 | Traffic, Way too much congestion, Too many hotels in immediate area already, etc.                                                                                                                                                                                                                                                                                                             | 9/28/2021 1:51 PM  |
| 166 | Traffic and parking                                                                                                                                                                                                                                                                                                                                                                           | 9/28/2021 1:45 PM  |
| 167 | You seem to have covered it, perhaps demographics of expected customers, i.e. approximate room and condo prices. Who is their market? Who will be operating?                                                                                                                                                                                                                                  | 9/28/2021 1:43 PM  |
| 168 | Traffic and parking                                                                                                                                                                                                                                                                                                                                                                           | 9/28/2021 1:42 PM  |
| 169 | Nothing. Please start construction soon.                                                                                                                                                                                                                                                                                                                                                      | 9/28/2021 1:39 PM  |
| 170 | Increased traffic, increased crime                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 12:17 PM |
| 171 | The traffic impact the project will have on the residents of Larrabee and the surrounding residential streets, both during construction and after the project is completed.                                                                                                                                                                                                                   | 9/28/2021 12:08 PM |
| 172 | Landscaping will not deteriorate, or be neglected and removed in the future.                                                                                                                                                                                                                                                                                                                  | 9/28/2021 11:39 AM |
| 173 | music venue in it                                                                                                                                                                                                                                                                                                                                                                             | 9/28/2021 11:38 AM |
| 174 | How to keep it from happening...                                                                                                                                                                                                                                                                                                                                                              | 9/28/2021 11:37 AM |
| 175 | Pollution. Noise from the project. We hear the London events music and weddings sometimes. This complex is much closer. Noise, music sounds could be 10 x as loud. Possible helicopter usage? Helipad.... is that really being considered?                                                                                                                                                    | 9/28/2021 1:16 AM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                       |                    |

| 1  | I've already covered my general comments. I'm afraid that it's too late in the process and too much money has been spent for there to be any real and significant change to the project from listening (or not) to public input. The lobbyists will do their jobs well and project will be a go.                                                                                   | 10/31/2021 5:57 PM  |
| 2  | Please do not build this.                                                                                                                                                                                                                                                                                                                                                          | 10/28/2021 8:46 AM  |
| 3  | It is a beautiful building and while every project comes with its downsides, I feel that this is a well needed addition to West Hollywood and the Sunset Strip.                                                                                                                                                                                                                    | 10/27/2021 8:41 PM  |
| 4  | Do not build                                                                                                                                                                                                                                                                                                                                                                       | 10/27/2021 2:46 PM  |
| 5  | Breathing new life into a dilapidated portion of the Strip. Good.                                                                                                                                                                                                                                                                                                                  | 10/25/2021 7:02 AM  |
| 6  | Cut the red tape and put it up!                                                                                                                                                                                                                                                                                                                                                    | 10/23/2021 9:18 AM  |
| 7  | Too tall and Not harmonious with the 2 buildings or the neighborhood                                                                                                                                                                                                                                                                                                               | 10/22/2021 3:09 PM  |
| 8  | WeHo has always been known for its eclectic neighborhood and this is ugly and over developed                                                                                                                                                                                                                                                                                       | 10/22/2021 12:08 AM |
| 9  | This entire project is unacceptable to me. Not just the height. There is already a hotel (The London) that does not need to be obstructed by this monstrosity. And the block and surrounding area are already too congested.                                                                                                                                                       | 10/21/2021 7:00 PM  |
| 10 | UGLY                                                                                                                                                                                                                                                                                                                                                                               | 10/21/2021 2:06 PM  |
| 11 | I like the glass tower. The wrap-around tower is too wannabe CGI for my arch taste.                                                                                                                                                                                                                                                                                                | 10/21/2021 10:18 AM |
| 12 | THIS CONCEPT JUST DOES NOT FIT IN WITH THE SURROUNDINGS.                                                                                                                                                                                                                                                                                                                           | 10/20/2021 10:19 PM |
| 13 | It think it's great to renew and redevelop but each development has to respect the space upon which it's built, the community around it and the workers whilst providing purpose and convenience to the patrons it seeks to serve. This needs more careful thinking about how people will use the facility; including how they will get there and where they can comfortably park. | 10/18/2021 4:10 PM  |
| 14 | What about homeless and rising crime happening up on Sunset Strip? Can we address this 1st, then worry about more hotels & video billboards? I live in this area & have seen such a change over the past 5 years. These spaces are already occupied by tenants paying the City of West Hollywood rent. Utilize what is here already.                                               | 10/18/2021 8:54 AM  |
| 15 | It's an ugly building that will destroy invaluable WeHo history.                                                                                                                                                                                                                                                                                                                   | 10/17/2021 11:36 PM |
| 16 | No                                                                                                                                                                                                                                                                                                                                                                                 | 10/17/2021 9:45 PM  |
| 17 | Very modern and signature piece that will bring move visitors, investors and tourists to our city.                                                                                                                                                                                                                                                                                 | 10/17/2021 10:44 AM |
| 18 | I think this portion of Sunset does need some revitalization so I'm excited about this project! I just hope some revisions are made and that clean energy is being heavily considered.                                                                                                                                                                                             | 10/16/2021 4:11 PM  |
| 19 | out of place                                                                                                                                                                                                                                                                                                                                                                       | 10/16/2021 1:38 PM  |
| 20 | Noise , traffic, and height concerns and please no more tacky flashing light video screens                                                                                                                                                                                                                                                                                         | 10/15/2021 5:41 AM  |
| 21 | These highrise monsters are ruining the Strip.                                                                                                                                                                                                                                                                                                                                     | 10/14/2021 5:44 PM  |
| 22 | Completely out of place with the area and frankly the height doesn't help by a long shot.                                                                                                                                                                                                                                                                                          | 10/14/2021 2:44 PM  |
| 23 | I am skeptical about the need for more hotel space in the area.                                                                                                                                                                                                                                                                                                                    | 10/14/2021 2:11 PM  |
| 24 | it does nothing to help with badly needed affordable housing.                                                                                                                                                                                                                                                                                                                      | 10/14/2021 10:54 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                  |                     |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 25 | TOOOOOOOOOOOOOOOO BIG                                                                                                                                                                                                                                                                                                                                                                            | 10/13/2021 9:34 PM  |
| 26 | The City of West Hollywood issued a study (PRE-Pandemic) that showed a major negative impact on the financial viability of the city's hospitality industry with construction of additional unapproved hotels in such a small town. POST-Pandemic, West Hollywood City Council should revisit that study while putting a moratorium on any hotel development that has not already been permitted. | 10/13/2021 1:22 PM  |
| 27 | It is very important to keep the Viper Room and Turner's Liquor! They should be made into historic sites. Even Ta-Ke's Sushi has been there since the 60's. I'd like to see a design that incorporates and highlights them.                                                                                                                                                                      | 10/13/2021 6:50 AM  |
| 28 | Please hire a better architecture firm.                                                                                                                                                                                                                                                                                                                                                          | 10/13/2021 5:54 AM  |
| 29 | So upsetting                                                                                                                                                                                                                                                                                                                                                                                     | 10/12/2021 11:38 PM |
| 30 | not good in the least, looks like a evil spaceship from Star Trek or Star Wars. No go.                                                                                                                                                                                                                                                                                                           | 10/12/2021 1:35 PM  |
| 31 | Ugly. You should be ashamed. Life is t just about money. This is so selfish and for profit not for WeHo culture.                                                                                                                                                                                                                                                                                 | 10/12/2021 11:21 AM |
| 32 | We don't need another tall hotel in the neighbourhood.                                                                                                                                                                                                                                                                                                                                           | 10/12/2021 7:43 AM  |
| 33 | It does not belong in West Hollywood!!!!!! The people concerned with this project have no knowledge of charm or tradition.                                                                                                                                                                                                                                                                       | 10/11/2021 4:55 PM  |
| 34 | This project is the wrong style for the neighborhood and is the wrong scale for the neighborhood                                                                                                                                                                                                                                                                                                 | 10/11/2021 4:17 PM  |
| 35 | It needs to be scaled down overall and look more elegant. I love modern and edgy but this looks like a ride at Disney vs a classy, upscale building.                                                                                                                                                                                                                                             | 10/11/2021 3:39 PM  |
| 36 | Eyesore and unnecessary. All the history and uniqueness of WeHo is being destroyed.                                                                                                                                                                                                                                                                                                              | 10/10/2021 8:06 PM  |
| 37 | Not a good idea in any way shape or form.                                                                                                                                                                                                                                                                                                                                                        | 10/10/2021 3:22 PM  |
| 38 | I like it! Modernize the strip!!                                                                                                                                                                                                                                                                                                                                                                 | 10/10/2021 2:39 PM  |
| 39 | Hideous                                                                                                                                                                                                                                                                                                                                                                                          | 10/10/2021 8:33 AM  |
| 40 | Do we need more unsold condos that end up as apartment buildings.                                                                                                                                                                                                                                                                                                                                | 10/10/2021 6:53 AM  |
| 41 | Do something useful for a change instead of this ridiculous project.                                                                                                                                                                                                                                                                                                                             | 10/10/2021 5:55 AM  |
| 42 | None                                                                                                                                                                                                                                                                                                                                                                                             | 10/9/2021 8:22 PM   |
| 43 | STOP IT                                                                                                                                                                                                                                                                                                                                                                                          | 10/9/2021 2:17 PM   |
| 44 | Its too large and too high. It doesn't belong there. Its a horrible place to put such a high tower, strategically. This is not another Century City Blvd with high rises. Its a famously open spaced strip to allow sunlight onto the streets.                                                                                                                                                   | 10/9/2021 2:05 PM   |
| 45 | Disaster.                                                                                                                                                                                                                                                                                                                                                                                        | 10/9/2021 1:20 PM   |
| 46 | Fully support                                                                                                                                                                                                                                                                                                                                                                                    | 10/9/2021 10:28 AM  |
| 47 | Lean into local architecture traditions and character. This build int could be built in any major city. Nothing about it says Los Angeles.                                                                                                                                                                                                                                                       | 10/9/2021 9:23 AM   |
| 48 | The Vioer Room should get historic status from Weho                                                                                                                                                                                                                                                                                                                                              | 10/9/2021 9:22 AM   |
| 49 | None                                                                                                                                                                                                                                                                                                                                                                                             | 10/9/2021 12:36 AM  |
| 50 | Nix the project.                                                                                                                                                                                                                                                                                                                                                                                 | 10/8/2021 7:41 PM   |
| 51 | Great project, please preserve the music venue and create public spaces.                                                                                                                                                                                                                                                                                                                         | 10/8/2021 2:08 PM   |
| 52 | That strip of the land needed upgrade for a long time                                                                                                                                                                                                                                                                                                                                            | 10/8/2021 12:53 PM  |
| 53 | Overall can be a great additions to the strip. Too large, Too dense. Needs to consider the surrounding residential neighbors below and the traffic at that intersection/noise and what is being built across from it... overdevelopment. Needs to be reigned in slightly. But overall concept is great and modern and will benefit the community                                                 | 10/8/2021 12:17 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                    |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 54 | Don't do it.                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/8/2021 11:17 AM |
| 55 | .                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10/8/2021 10:03 AM |
| 56 | As a design student, who can I contact to shadow and learn more about this project?                                                                                                                                                                                                                                                                                                                                                             | 10/7/2021 11:15 PM |
| 57 | That proposal should never even be considered it's literally insane to look at                                                                                                                                                                                                                                                                                                                                                                  | 10/7/2021 10:10 PM |
| 58 | I don't support it for all the reasons I have stated. Typical WeHo pro development project that does not create a vibrant walking street. What is the vision for this street? Video billboards? No interesting stores (banks, businesses that sell real estate, hotels) Las Vegas II? Too sad that the quirky architecture of the Sunset Strip - which creates a street-level ambience that supports foot traffic —will be a thing of the past. | 10/7/2021 5:40 PM  |
| 59 | wrong location                                                                                                                                                                                                                                                                                                                                                                                                                                  | 10/7/2021 5:21 PM  |
| 60 | Not a fan of the current plan and confident Morphosis can do better with appropriate feedback and guidance.                                                                                                                                                                                                                                                                                                                                     | 10/7/2021 1:19 PM  |
| 61 | It's really quite beautiful!                                                                                                                                                                                                                                                                                                                                                                                                                    | 10/7/2021 12:40 PM |
| 62 | Loved it!                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/7/2021 11:48 AM |
| 63 | It's horrible. Build something with Hollywood character, not Dubai.                                                                                                                                                                                                                                                                                                                                                                             | 10/7/2021 9:52 AM  |
| 64 | Please cancel it and start over                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/7/2021 9:31 AM  |
| 65 | The Viper Room is so important to our community and history. I frequent the venue, of which there are so few left, and am saddened by this.                                                                                                                                                                                                                                                                                                     | 10/7/2021 7:45 AM  |
| 66 | the traffic is already at a standstill on sunset most of the time. with the three other tower/hotel/condo developments underway the area will be entirely over stressed. It cannot support another development of this size.                                                                                                                                                                                                                    | 10/6/2021 11:35 PM |
| 67 | Find a new design.                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/6/2021 11:32 PM |
| 68 | Can you offer renters such as myself, who live across the street, a new apartment in you new complex for the price I'm paying for mine right now?                                                                                                                                                                                                                                                                                               | 10/6/2021 8:56 PM  |
| 69 | i love thom mayne's work. don't let this opportunity pass.                                                                                                                                                                                                                                                                                                                                                                                      | 10/6/2021 7:04 PM  |
| 70 | Awful                                                                                                                                                                                                                                                                                                                                                                                                                                           | 10/6/2021 4:23 PM  |
| 71 | Along with the hotels already built along Sunset Plaza, the changes in Sunset do not improve the lives of people who live here, just the tourists who visit. I guess that's the point?                                                                                                                                                                                                                                                          | 10/6/2021 2:32 PM  |
| 72 | Too tall.                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10/6/2021 2:10 PM  |
| 73 | Too tall, Too giant.                                                                                                                                                                                                                                                                                                                                                                                                                            | 10/6/2021 11:51 AM |
| 74 | I love it so much that I would be EXTREMELY unhappy if this were in any way scaled down or scrapped because of bad faith NIMBYs. If any, as I have repeatedly mentioned throughout this survey, is to scale UP                                                                                                                                                                                                                                  | 10/6/2021 10:47 AM |
| 75 | Good development can benefit everyone. Intensification of land use promotes sustainability. I don't philosophically have an issue with building height so long as any negative impacts (e.g. wind, shadowing) are adequately mitigated. I'm not however totally sold on the top-level bridge connecting the towers from a design perspective.                                                                                                   | 10/6/2021 6:37 AM  |
| 76 | It's wrong for the neighborhoods around it.                                                                                                                                                                                                                                                                                                                                                                                                     | 10/6/2021 1:51 AM  |
| 77 | Will the young people with disposable income not go to a cool building. If you're going to go all out, can't it be beautiful like a Frank Gehry building that flows?                                                                                                                                                                                                                                                                            | 10/5/2021 10:28 PM |
| 78 | No                                                                                                                                                                                                                                                                                                                                                                                                                                              | 10/5/2021 9:45 PM  |
| 79 | I think it's a bad idea to push out 8 mom and pop businesses to add more over priced hotel room, over priced apartments, overprice condos and overpriced office and retail space                                                                                                                                                                                                                                                                | 10/5/2021 5:42 PM  |
| 80 | Traffic nightmare!!                                                                                                                                                                                                                                                                                                                                                                                                                             | 10/5/2021 4:57 PM  |
| 81 | Stop it                                                                                                                                                                                                                                                                                                                                                                                                                                         | 10/5/2021 3:34 PM  |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                           |                    |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 82  | Hire a young architect who knows the area and needs of the community. Surely there is a young or LGBT+ or POC or non-millionaire architect out there                                                                                                                                                                                                                                                                      | 10/5/2021 2:51 PM  |
| 83  | I should have checked "Belongs in Dubai", this really is a non-starter for me.                                                                                                                                                                                                                                                                                                                                            | 10/5/2021 10:58 AM |
| 84  | What government officials got bribed for this one                                                                                                                                                                                                                                                                                                                                                                         | 10/5/2021 7:00 AM  |
| 85  | Wow.                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/4/2021 5:50 PM  |
| 86  | It's a worthwhile project, that although it might need some work on the edges (like MORE AFFORDABLE HOUSING), it is overall a well thought out proposal.                                                                                                                                                                                                                                                                  | 10/4/2021 5:21 PM  |
| 87  | 100% in favor                                                                                                                                                                                                                                                                                                                                                                                                             | 10/4/2021 4:20 PM  |
| 88  | I love it                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/4/2021 3:08 PM  |
| 89  | Please, consider the needs of residents -- we're living there, both to the north and south of Sunset Bl., and we don't need the increased traffic congestion/ lack of parking/ inability to ever get to our homes... This project will destroy multiple WeHo neighborhoods, imposing an undue burdens on residents. Please, don't cave in to developer's greed!                                                           | 10/4/2021 2:57 PM  |
| 90  | The Viper Room does not deserved to be embellished in a new project.                                                                                                                                                                                                                                                                                                                                                      | 10/4/2021 2:57 PM  |
| 91  | If West Hollywood wants to develop the strip, which I support, they need to greatly improve the parking. I would strongly support building several parking garages that would offer 2 hours of free parking at the various garages, as we enjoy in Beverly Hills. In addition to alleviating the parking shortage in the area, I think it could attract patrons for dining and shopping, which would benefit the economy. | 10/4/2021 2:31 PM  |
| 92  | I think it is an interesting and needed addition to the Strip that not brings something classy to the area but replaces an under-used run down block with something for the community. I love the green space in the middle.                                                                                                                                                                                              | 10/4/2021 1:08 PM  |
| 93  | Half of the area should remain unexcavated, not hollowed out or dug up leaving the native soil in place and a natural place for people and fauna to gather outside. Install a butterfly pavilion for Pete's sake. An aviary. A real garden.                                                                                                                                                                               | 10/4/2021 12:25 PM |
| 94  | Too big and overwhelming and frankly quite ugly.                                                                                                                                                                                                                                                                                                                                                                          | 10/4/2021 11:26 AM |
| 95  | Sorry to see it disappear                                                                                                                                                                                                                                                                                                                                                                                                 | 10/4/2021 6:10 AM  |
| 96  | Should be max 5 stories. Should be a design that maintain the sunset strip charm without turning it into the impersonal, messy and unsafe area that the hollywood Blvd has become                                                                                                                                                                                                                                         | 10/4/2021 3:42 AM  |
| 97  | Architecture is totally out of place.                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 10:37 PM |
| 98  | None                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/3/2021 9:47 PM  |
| 99  | Na                                                                                                                                                                                                                                                                                                                                                                                                                        | 10/3/2021 8:15 PM  |
| 100 | I really like the design and concept.                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 7:26 PM  |
| 101 | Progress comes whether we like it or not. Let's please be smart about it. PLEASE for the love of God, do something about traffic before we get more of these huge new developments.                                                                                                                                                                                                                                       | 10/3/2021 4:20 PM  |
| 102 | Should be cancelled immediately.                                                                                                                                                                                                                                                                                                                                                                                          | 10/3/2021 4:14 PM  |
| 103 | I liked the Viper Room better.                                                                                                                                                                                                                                                                                                                                                                                            | 10/3/2021 2:41 PM  |
| 104 | We need MORE projects like this!!! BUILD IT!                                                                                                                                                                                                                                                                                                                                                                              | 10/3/2021 2:32 PM  |
| 105 | Stop.                                                                                                                                                                                                                                                                                                                                                                                                                     | 10/3/2021 1:26 PM  |
| 106 | Bigger is not better. Preserving the unique quality of the Sunset Strip does not have to equal over the top design.                                                                                                                                                                                                                                                                                                       | 10/3/2021 1:10 PM  |
| 107 | The worst                                                                                                                                                                                                                                                                                                                                                                                                                 | 10/3/2021 12:01 PM |
| 108 | Barf worthy. This isn't Dubai or Reno.                                                                                                                                                                                                                                                                                                                                                                                    | 10/3/2021 11:34 AM |
| 109 | Disturbingly out of place.                                                                                                                                                                                                                                                                                                                                                                                                | 10/3/2021 11:01 AM |
| 110 | If the City were to have an ownership interest or ongoing royalty, I'd find such public-private                                                                                                                                                                                                                                                                                                                           | 10/3/2021 10:44 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

partnership a big plus.

|     |                                                                                                                                                                                                                                                                                                                                                                                                            |                    |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 111 | Start over. Think Art Deco rather than Dubai.                                                                                                                                                                                                                                                                                                                                                              | 10/3/2021 10:28 AM |
| 112 | See above                                                                                                                                                                                                                                                                                                                                                                                                  | 10/3/2021 10:04 AM |
| 113 | ABORT ENTIRELY                                                                                                                                                                                                                                                                                                                                                                                             | 10/3/2021 9:57 AM  |
| 114 | Designate landmark status...keep as-is!                                                                                                                                                                                                                                                                                                                                                                    | 10/3/2021 9:41 AM  |
| 115 | Hate it.                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 9:41 AM  |
| 116 | It's too big and out of place.                                                                                                                                                                                                                                                                                                                                                                             | 10/3/2021 9:35 AM  |
| 117 | Sad to lose historic viper room but excited to beautify this area!                                                                                                                                                                                                                                                                                                                                         | 10/3/2021 9:32 AM  |
| 118 | KILL IT.                                                                                                                                                                                                                                                                                                                                                                                                   | 10/3/2021 9:18 AM  |
| 119 | For affordable units, maybe have a section for BIPOC and LGBTQIA+ artists to foster the arts and diversity. Some condos should be sold at BMR for income-qualified families like they do in Boston. The lower horizontal section of the development could be income-restricted microunits 300 sqft like in NYC. Parking for all units and charging stations for e-vehicles.                                | 10/2/2021 3:22 PM  |
| 120 | Leave it alone.                                                                                                                                                                                                                                                                                                                                                                                            | 10/2/2021 2:39 PM  |
| 121 | I have no objection, in principal, to the site's redevelopment but it should enhance and contribute to the city and its residents more than it removes. This current design provides no benefit to residents while extracting a hefty price. This is all loss, no gain for us.                                                                                                                             | 10/2/2021 2:17 PM  |
| 122 | I hate it. The Viper Room is one of the oldest bldgs on the strip. I'm not saying it has to stay but why replace it with this mess?                                                                                                                                                                                                                                                                        | 10/1/2021 11:33 AM |
| 123 | I've lived in WeHo down the street from this block of Sunset for 27 years - it would be invigorating to have a special building and the shops and amenities it would bring.                                                                                                                                                                                                                                | 10/1/2021 6:23 AM  |
| 124 | Not a fan. Will be bad for existing residents.                                                                                                                                                                                                                                                                                                                                                             | 9/30/2021 6:22 PM  |
| 125 | Please no, just build something simple and Hollywood style. Not sci-fi                                                                                                                                                                                                                                                                                                                                     | 9/30/2021 5:09 PM  |
| 126 | None                                                                                                                                                                                                                                                                                                                                                                                                       | 9/30/2021 5:44 AM  |
| 127 | There is nothing historic about the area. modify the design, lower the height and you will get approved                                                                                                                                                                                                                                                                                                    | 9/29/2021 9:55 PM  |
| 128 | The area can be modernized without going full-on "5th Element" modern. Maybe try to keep a Viper Room entertainment facility, similar to the proposed development taking over the "Barney's Beanery" location (although Viper Room is much more worthy of saving than Barney's).                                                                                                                           | 9/29/2021 9:21 PM  |
| 129 | I am excited for this to finally get built. I hope it activates the street and adds visual interest during the day as well as night. I like the overall design but wish for more design refinement (a la Zaha Hadid). Jarring for shock value does not equate to good design. The buildings are well-situated on the lot. More greenery at street level in addition to on the building is always welcomed. | 9/29/2021 6:40 PM  |
| 130 | It's either the ugliest piece of architecture i have ever seen or it's outstanding in some perverse architectural universe. It does not take into considering the buildings around the area, the hills and the natural beauty of Sunset Blvd. The best part of this is that I'll probably be dead before the completion of this building.                                                                  | 9/29/2021 6:28 PM  |
| 131 | I'm hopeful it can be built & soon.                                                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 4:12 PM  |
| 132 | what was a charming neighborhood serving street in the heart of the city is going to be contraption that makes us all feel like we are lost in a time warp.                                                                                                                                                                                                                                                | 9/29/2021 4:00 PM  |
| 133 | Start over                                                                                                                                                                                                                                                                                                                                                                                                 | 9/29/2021 12:49 PM |
| 134 | leave viper room alone. this as ugly as ramada replacing tropicana.                                                                                                                                                                                                                                                                                                                                        | 9/29/2021 11:55 AM |
| 135 | kill it. build something that makes sense. and no to affordable housing. ridiculous notion.                                                                                                                                                                                                                                                                                                                | 9/29/2021 11:49 AM |
| 136 | Start over.                                                                                                                                                                                                                                                                                                                                                                                                | 9/29/2021 11:33 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                    |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 137 | Increase in law enforcement & emergency services to cover this increased density.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/29/2021 10:44 AM |
| 138 | please keep the Viper Room and just update it from the original bones                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/29/2021 8:11 AM  |
| 139 | I believe the developer should have a lot of leeway in what they design, but I would ask, even if given that leeway, why would you design something so many already have expressed their dislike of?                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/29/2021 6:39 AM  |
| 140 | Tell the nimbys to shut up and go home. The viper room is a dump. The whole block is a dump. Preserving a dump keeps it a dump.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9/28/2021 10:47 PM |
| 141 | I've lived here on Larrabee Street for 20 years and I've never seen any new change summon a fraction of the protest from locals that this project has. We realize the property has been sold and that its new owners have every right to demolish what's there and build anew, but we just want the new structures to be reasonable for this neighborhood - one which includes the Sunset Strip as well as several blocks of low-standing residential buildings. I hope our City Council proves that it heeds the concerns of its constituents over wealthy developers. We really need our government to come through for us here. | 9/28/2021 9:29 PM  |
| 142 | During conversations at previous meetings with local residents, The developers have behaved arrogantly. They repeatedly mentioned how lucky we were to be getting 10 apartments. They are treating us like unsophisticated Hicks and it's really offensive                                                                                                                                                                                                                                                                                                                                                                         | 9/28/2021 8:59 PM  |
| 143 | Would like to read architect's comments on design process leading to this solution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 8:00 PM  |
| 144 | The acclamation and recognition for this project is all positive. This will serve to draw commerce to West Hollywood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/28/2021 7:36 PM  |
| 145 | Let's make this serve the Public Interest                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 9/28/2021 7:04 PM  |
| 146 | We cannot allow this project to go forward.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/28/2021 6:53 PM  |
| 147 | I've always thought so many stretches of our major boulevards are underutilized. We live in the 2nd largest metropolitan area in the country - change is constant in urban environments.....some buildings need to be protected for posterity....but this is an unremarkable stretch of Sunset.                                                                                                                                                                                                                                                                                                                                    | 9/28/2021 6:12 PM  |
| 148 | No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 6:10 PM  |
| 149 | It's currently so ridiculously bad it, it must be an opening hand in the developer's negotiation. When the next design comes through, no matter how poor or inappropriate it is, there will be pressure on others to concede to the developer's wishes because they've offered concessions.                                                                                                                                                                                                                                                                                                                                        | 9/28/2021 5:01 PM  |
| 150 | Keep the Viper Room It has history!!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/28/2021 3:55 PM  |
| 151 | pro building and modernization, need housing for community good and not just for ultra rich or visitors.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 9/28/2021 2:40 PM  |
| 152 | Needs to be classy and an asset to the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/28/2021 2:24 PM  |
| 153 | See above - as well as save Turners and the Viper Room - it's park of the area's culture, history and charm!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 9/28/2021 1:51 PM  |
| 154 | Like some of architect's work like Emerson College. Not this one!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/28/2021 1:45 PM  |
| 155 | This block needs to be developed. I'm not sure this is the right look.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/28/2021 1:43 PM  |
| 156 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/28/2021 1:42 PM  |
| 157 | Nothing. The area is dirty and needs this bad.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 9/28/2021 1:39 PM  |
| 158 | While I support a project to replace the existing structures, the proposal is completely ridiculous and an eyesore.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/28/2021 12:17 PM |
| 159 | I am very much opposed to this project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 9/28/2021 12:08 PM |
| 160 | Thank you for trying to add a landmark to the Sunset Strip.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/28/2021 11:39 AM |
| 161 | Can't wait!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/28/2021 11:38 AM |
| 162 | Ugly and out of place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/28/2021 11:37 AM |

## 8850 Sunset / Viper Room Project - Survey # 1 Project Height and Design

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                    |

| 163 | The project is Way over the top. It will push residents away. However, I feel middle and lower income families are not the target clients of this project or for the future WEHO that is envisioned by leaders of this city. The money will prevail. This project will be greenlighted with maybe tiny insignificant changes. The citizens do not have sway here. It's the wild west. Money talks. Also using the name Viper room and giving people the impression that any bit of its legacy as a rock club is being preserved is laughable if believed. This is just another way to make the project palatable to anyone who liked or was concerned about the Vipers demise. Viper Room will just be used for it's name for a while but it will not exist as a rock club for it could not possibly bring in enough revenue in a project of this size. Using Viper as part of the name of 8850 will quiet many dissenters. It was a clever idea. | 9/28/2021 1:16 AM  |
| 164 | TOO LARGE TOO HIGH...TOO UGLY FOLLOW THE "MONTGOMERY ETHIC" of one story which gives CLASS to the Sunset Strip                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9/27/2021 9:32 PM  |
| 165 | A great project with proposed variances that I believe could be warranted, especially given that there are plenty of precedents for a building of this height on the strip (9000, The Edition, 9200, Sierra Towers, etc.).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 9/27/2021 3:34 PM  |
| 166 | so so sad that our history is being destroyed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 9/27/2021 2:38 PM  |
| 167 | I support furthuring the development and refinement of Sunset Blvd                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9/27/2021 1:22 PM  |
| 168 | It should be carefully evaluated to determine if people will move out of the City of Weho because of these continued mammoth proposals/projects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/27/2021 12:44 PM |
| 169 | I hate that soon "Sunset" Blvd will see no sunset and also no SUN period as the buildings will block out the sun                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 9/27/2021 11:32 AM |
| 170 | A behemoth which should not be given a height variance under any circumstances.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/27/2021 9:15 AM  |
| 171 | We don't need hotel in this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 9/27/2021 8:49 AM  |
| 172 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/27/2021 7:42 AM  |
| 173 | Let's all just admit that The Viper Room is dead. It's never coming back. What made it work was the grunginess, falling apart, underground look. That's gone. Rock & Roll is gone from the strip. It's just a matter of time before we lose the Whiskey and Roxy. We all know it, we just don't want to say it out loud.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 9/27/2021 7:10 AM  |
| 174 | Will be a project that is too large in scale for the area. Rumors abound city council will approve as labor contracts have been negotiated. Developers are funding campaigns and the payback is approval.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/27/2021 6:49 AM  |
| 175 | Needs to be stopped!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/27/2021 5:35 AM  |
| 176 | none                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 9/27/2021 5:28 AM  |
| 177 | I think that's the main concern of the developers and possibly of the city is the money that it will generate rather than the lifestyle of the citizenry that lives in the surrounding area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 9/26/2021 10:31 PM |
| 178 | Move it to DTLA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/26/2021 10:09 PM |
| 179 | I am very unhappy about this too large and disruptive project                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 9/26/2021 10:05 PM |
| 180 | No more hotels. And this is not the Viper Room! Stop misleading the community. The Viper room will be gone forever! These development are causing everything in West Hollywood to be no longer affordable. Rents, leases everything goes up, up up!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/26/2021 10:03 PM |
| 181 | The City of West Hollywood's overbuilding craze, coupled with the blight of huge digital billboards, is destroying the beauty, serenity and quality of life for all residents who live near Sunset Boulevard. Adding another hotel is greed and avarice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 9/26/2021 10:00 PM |
| 182 | It's a joke that the Viper Room will be preserved and incorporated into the 8850 project. Like going to Moscow to see Lenin's tomb.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 9/26/2021 9:55 PM  |
| 183 | development yes, but not oversized until traffic issue has been addressed comprehensively                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 9/26/2021 9:33 PM  |
| 184 | Don't build it.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 9/26/2021 8:53 PM  |

## #1

**COMPLETE**

**Collector:** WeHo Heights #1 (Web Link)  
**Started:** Sunday, September 26, 2021 8:30:47 PM  
**Last Modified:** Sunday, September 26, 2021 8:34:07 PM  
**Time Spent:** 00:03:20  
**IP Address:** 72.134.35.128

---

Page 2: Page 1

**Q1** **Live**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2** **Yes**

Are you familiar with block that currently houses The Viper Room, Terner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3** **A few times a year**

Did you frequent any of these places?

---

**Q4** **Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **10**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7** **It is too different and out of place for WeHo; while I like a modern look, this is too much.**

What do you think about the design of the project?

---

## Page 5: Towers

**Q8****No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9****Respondent skipped this question**

If so, why? Check all that apply

**Q10****Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

## Page 6: Other Comments About the Height &amp; Design

**Q11****Respondent skipped this question**

Any other comments about the height

**Q12****Respondent skipped this question**

Any other comments about the design

**Q13****Respondent skipped this question**

What other areas of concern on this project would you like future surveys to cover?

**Q14****Respondent skipped this question**

**Q7** **Some of his other work which is not quite so wild and more toned down would be better.**

What do you think about the design of the project?

---

## Page 5: Towers

**Q8****Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,****To separate the condo/affordable housing from the hotel rooms****Q10****Neutral**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

## Page 6: Other Comments About the Height &amp; Design

**Q11**

Any other comments about the height

It looks that the height is disproportionate to the lot. Also more floors mean more parking. How are they going to accommodate this?

**Q12****Respondent skipped this question**

Any other comments about the design

**Q13****Respondent skipped this question**

What other areas of concern on this project would you like future surveys to cover?

**Q1** **Live,**  
**Drive**  
Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2** **Yes**  
Are you familiar with block that currently houses The Viper Room, Terner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3** **Never**  
Did you frequent any of these places?

---

**Q4** **Yes**  
Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**  
Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **10**  
If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7** **It is unusual, perhaps not to my taste, but I could live with it**  
What do you think about the design of the project?

---

## Page 5: Towers

**Q8****Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,****To separate the condo/affordable housing from the hotel rooms****Q10****Neutral**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

We will soon have a canyon of buildings running down Sunset Blvd that will destroy any semblance of a "neighborhood". It may be inevitable but don't encourage it at this time. Before this happens we need rapid mass transit to move people in and out. If you want Times Square West there is much work to be done to preserve a livable environment for those still residing in the area.

---

**Q12**

**Respondent skipped this question**

Any other comments about the design

## Page 5: Towers

**Q8****Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9****To save the London Hotel's view**

If so, why? Check all that apply

---

**Q10****Neutral**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

## Page 6: Other Comments About the Height &amp; Design

**Q11**

Any other comments about the height

As we continue to set a precedent with these height variances, only to be used for high-end luxury development, it will only continue to grow and the request for variances greater.

---

**Q12****Respondent skipped this question**

Any other comments about the design

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Traffic and congestion impact.

---

**Q14****Respondent skipped this question**

General Comments about 8850 Sunset / Viper Room project:

Page 2: Page 1

**Q1****Live**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2****Yes**

Are you familiar with block that currently houses The Viper Room, Terner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3****More than once a month**

Did you frequent any of these places?

---

**Q4****Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5****No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6**

Other (please specify):  
2-4.

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

Other (please specify):

It is out of character for the West Hollywood and the Sunset Strip that I love. We're not Disneyland meets Las Vegas.

---

Page 5: Towers

**Q8**

**No**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

---

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

Other (please specify):

Let the London be the London. It's set back and lets WeHo and the Sunset Strip be seen and enjoyed from a safe distance.

---

**Q10**

**Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

It a collapse in search of the right earthquake. The geological fault already exists. The height & design are unsafe, dangerous, irresponsible. Remember what happened during the Northridge (aka: Santa Monica) earthquake.

---

**Q12**

Any other comments about the design

During an on-going pandemic, WeHo (of all places) should not be designing the Covid Hotel & Gardens. Check out the state of the art air conditioning system of the most famous building in the world: The Empire State Building.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Building dangerous structures (internal & architectural) during a worldwide pandemic.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

It's a joke that the Viper Room will be preserved and incorporated into the 8850 project. Like going to Moscow to see Lenin's tomb.

Page 2: Page 1

**Q1**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

**Live,  
Drive**

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Yes****Q3**

Did you frequent any of these places?

**A few times a year****Q4**

Are you aware that this block is slated for development?

**Yes**

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**  
 Other (please specify):  
 Sunset Strip is already overbuilt and overcrowded. There is massive congestion during morning and evening rush hours, and the City of West Hollywood is incapable of moving the traffic along - both vehicular and pedestrian. Imagine what a hell it will be for commuters and we residents if you build even more unneeded, unwanted monstrosities.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

Another huge project recently erected on Sunset Blvd

"planned" to create a "pedestrian bridge" over LaCienega

Blvd to unite the two massive sections of the development.

The bridge never got built; it was quickly eliminated after the

"plan" was "approved." The buildings are ugly, unnecessary,

and have had a very difficult time finding tenants and

achieving financial success. We don't need another

gratuitous, overblown "improvement" whose only purpose is

to line the pockets of developers and the management of

West Hollywood City Hall.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

**Respondent skipped this question**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Neutral**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

The towers will be directly in the way of the homeowners in the hills across the street, on the north side of Sunset Blvd. This will destroy their city views! This huge project should be built in the flats, on Melrose Avenue or Santa Monica Blvd. Get it off Sunset Boulevard.

**Q12**

Any other comments about the design

Too big, too gargantuan for the parcel of land you propose.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

TRAFFIC, TRAFFIC, TRAFFIC!

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

The City of West Hollywood's overbuilding craze, coupled with the blight of huge digital billboards, is destroying the beauty, serenity and quality of life for all residents who live near Sunset Boulevard. Adding another hotel is greed and avarice.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

It is too different and out of place for WeHo; while I like a modern look, this is too much.

---

Page 5: Towers

**Q8**

No

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9**

If so, why? Check all that apply

Other (please specify):

It's way too much for the area.

**Q10**

Very negative

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

The overall design and height is out of place for the area.

**Q12**

Any other comments about the design

The design is reminiscent of "The Jetsons" cartoons and has been nicknamed accordingly. Although interesting, not appropriate for WEHO. The city council will most likely approved regardless of neighborhood impute which is disappointing.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Environmental impact.

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Will be a project that is too large in scale for the area. Rumors abound city council will approve as labor contracts have been negotiated. Developers are funding campaigns and the payback is approval.

**Q15**

---

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**10,**

Other (please specify):

Developers always play the same game: Ask for FAR MORE than allowed, go through the charade of community meetings, discussions with the city, etc. Showing fantastical renderings of something that will cost FAR MORE than they are willing to spend (or that banks will finance), and then settle for something less, with mediocre design and undesirable to the community. But we end up settling for what they really wanted in the first place. I've seen this happen over and over in WeHo.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**None of the above,**

Other (please specify):

We aren't going to get what's there. First, it's more derivative of Thomas Mayne's work. It's expensive to build. I don't think the developer can afford to build it as presented. The restaurants and park at the top of the complex is not for the general public. If it's built, it's going to be a private club (like everything else, these days) for the 0.01% who can afford it. Do we need more hotel rooms? Didn't the operator of The Edition just go bankrupt? Is "1" (Sunset/La Cienega) actually that busy? No. Will the finished building ever look like the renderings? No. I really like the Emerson College building - its fantastic and makes a unique statement in Hollywood - far better than the big apartment buildings across the street. In fact, I'd call it iconic. This design for WeHo is just a mess. The white "wrapping" on the west building has been done before - a recycled idea from the architect. The green that is so prominent in the renderings will never look like that and it will have a problem with irrigation, waterproofing and ongoing care of these planters. Nice idea, but unlikely to work. I also don't want this building to become just another structure to hold up a digital billboard - like every other new project on Sunset. The renderings show a relatively modest amount of digital advertising. Let's keep that to a minimum. A "wow" design for this location would be welcome. But I want it to stay within the SSP.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

To save the London Hotel's view,

To separate the condo/affordable housing from the hotel rooms

,

Other (please specify):

The two tower concept is bait for the City to allow the taller project (50% more than allowed under the SSP). To be frank, The London doesn't have a right to a view. But to quell some of the protests, this says "we thought about you and this is what we came up with." It's still going to obstruct views. The two building concept is better for business. The hotel patrons would want to be separated from the office/residential uses - and vice versa. This serves the developer's desires, but it also makes sense given the various uses.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

The two design styles don't bother me and serves to distinguish the different uses of the buildings. Do these two work together? Not really. Could it be better? Absolutely.

---

## Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

They want to build 15 stories. They bought the property knowing the zoning allowed 10 stories. Obviously they thought they could buy their way to a 50% variance. The answer should be a resounding NO.

**Q12**

Any other comments about the design

It doesn't have the "wow" factor I was expecting. It just look like a wish list and the final act for the "starchitect"

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Respondent skipped this question

## Q14

General Comments about 8850 Sunset / Viper Room project:

Let's all just admit that The Viper Room is dead. It's never coming back. What made it work was the grunginess, falling apart, underground look. That's gone. Rock & Roll is gone from the strip. It's just a matter of time before we lose the Whiskey and Roxy. We all know it, we just don't want to say it out loud.

**Q1** **Live,**  
Do you live, work or regularly drive along Sunset Blvd **Work,**  
between Doheny and La Cienega? **Drive**

---

**Q2** **Yes**  
Are you familiar with block that currently houses The Viper  
Room, Turner Liquor, Sunset Liquor, Amarone Ristorante,  
Take-Sushi, and the former Aah's?

---

**Q3** **A few times a year**  
Did you frequent any of these places?

---

**Q4** **Yes**  
Are you aware that this block is slated for development?

---

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**  
Given the rationale for the 15-stories, do you support the  
additional height for this project?

---

**Q6** **None of the above**  
If not, what is the maximum height that would be  
acceptable to you? Bear in mind that the site is already  
allowed to be 10 stories under the SSP.

---

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

It is too different and out of place for WeHo; while I like a modern look, this is too much.

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

No

**Q9**

If so, why? Check all that apply

Respondent skipped this question

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Negative

## Q1

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

Other (please specify):

Have previously worked in the Sunset (Sunset @ Alta Loma) and have been a member at the Equinox on Sunset for 8 years

## Q2

Yes

Are you familiar with block that currently houses The Viper Room, Terner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

## Q3

Never

Did you frequent any of these places?

## Q4

Yes

Are you aware that this block is slated for development?

Page 3: Sunset Specific Plan (SSP)

## Q5

Yes

Given the rationale for the 15-stories, do you support the additional height for this project?

## Q6

Respondent skipped this question

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

Other (please specify):

More dynamic and interesting than the massing of other recent project on Sunset (the Pendry, the one at Doheny, etc)

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Positive**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Would prefer this to a version that was 10 stories but filled the block (which I suspect the developer will do if the variance isn't allowed)

**Q12**

Any other comments about the design

I like every large scale project Mayne has done in LA. I think a high profile project that will get widely published will help draw more foot traffic to the area during the day - something that stretch of Sunset needs

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Page 2: Page 1

**Q1**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

**Live,****Work,****Drive,**

Other (please specify):

My office is on Sunset and I live on Westbourne Drive so I regularly travel on Sunset Blvd. in front of the project site.

---

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Yes****Q3**

Did you frequent any of these places?

**Less than once a year****Q4**

Are you aware that this block is slated for development?

---

**Yes**

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**No**

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**10,**

Other (please specify):

This site has a large presence on Sunset and sits next to the London Hotel and important business in our community. 2 15 story buildings will overwhelm the area visually and will be too intrusive on the London and all the other neighboring businesses and residents.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

Overall I am excited by the uniqueness, shapes and openness of the design; however I think the white (concrete?) materials may be too heavy and distract too much from the flowing open air design

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

Other (please specify):

The 2 elements of the design break up what might have been a large clunky single building

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

I think the architecture overall is designed to WOW the viewer and I appreciate that; however I think the scale of the 2 buildings is way too big for this site. Scale both buildings down and I would much prefer them.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Both structures are just way too tall for this location and especially for its site on the Sunset Strip where there are not other building of this scale in either direction for quite a few blocks and where most of the buildings surrounding are only 1 and 2 stories high.

**Q12**

Respondent skipped this question

Any other comments about the design

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Earthquake, water and soils concerns and how the project will accommodate the traffic in and out of the building and onto the neighboring streets. How to keep the neighboring residential streets from being terribly impacted by new vehicles. How to funnel traffic into and out of the project given the existing traffic logjams on Sunset Blvd.

**Q7** **Belongs in Dubai, not WeHo. Nothing to save here, let's start over**  
 What do you think about the design of the project?

Page 5: Towers

**Q8**

**No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

**Respondent skipped this question**

If so, why? Check all that apply

---

**Q10**

**Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Totally out of place for the neighborhood. The shadowing will destroy quality of life in surrounding area. Not to mention insanely unsafe so close to Sunset Fault.

---

**Q12**

Any other comments about the design

Utterly hideous. A reject from The Jetsons files at Hanna Barberra. The idea of not building one more brown white and orange box laudable. This design though is laughable.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Traffic effects, especially on Larrabee. Traffic density in general. No need for more overpriced units in area.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

A behemoth which should not be given a height variance under any circumstances.

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

Live,  
Work,  
Drive

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

Yes

**Q3**

Did you frequent any of these places?

A few times a year

**Q4**

Are you aware that this block is slated for development?

Yes

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

No

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

10,  
Other (please specify):  
The view disruption of residences north of the project should be considered above the view of the visitors in the London hotel. The view blockage of the residences north of the hotel would have to be affected every day they stay in their homes where the guests of the hotel will be affected for a few days a year. Why are we putting the needs of a business (the London) as priority before the needs of residents.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

Beautiful unique design. Just remove 5 stories from the top.

---

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

---

**Q9**

If so, why? Check all that apply

Other (please specify):

To create a view corridor and lessen the blockage. It gives the space to breathe and take in the view of the hills. Much more interesting than another giant square. Other cities of the world our building architecturally interesting structures. We need to start thinking in that direction to. Not everything needs to be a giant square.

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Other (please specify):

Positive in that it is an art price and that is great. Negative in its size of proposed 15 stories. Keep it at 10.

**Q1** **Live,**  
Do you live, work or regularly drive along Sunset Blvd **Work,**  
between Doheny and La Cienega? **Drive**

---

**Q2** **Yes**  
Are you familiar with block that currently houses The Viper  
Room, Turner Liquor, Sunset Liquor, Amarone Ristorante,  
Take-Sushi, and the former Aah's?

---

**Q3** **More than once a month**  
Did you frequent any of these places?

---

**Q4** **Yes**  
Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**  
Given the rationale for the 15-stories, do you support the  
additional height for this project?

---

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**

Other (please specify):

The block is iconic. They should not create a building in section. The mix uses structure they are proposing to build would have views blocked by the London if keeping with the CC&R at 10 stories, which is the reason the builder is requesting a variance. The project would deter people from staying at the London and surrounding hotels, like the Sunset Tower, Best Western, Andaz, Mondrian, the Edition, etc., creating vacancies, in an already competitive hospitality market. If we make a dispensation, this will set precedent for all other building going forward.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

There is nothing unique about West Hollywood or the the Strip apart from the Viper Room, Whisky-a-go-go, the Rainbow Room, etc. This is just another flash in the pan.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

**To separate the condo/affordable housing from the hotel rooms**

,

Other (please specify):

The cannibalization of condo and hotel market.

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

It is superfluous. How is this serving the community?

---

**Q12**

Any other comments about the design

How is are these 2 buildings and their design creating community? Form doesn't follow nor meet function.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

I think it should include some form of creating community and cohesiveness within the community. How inclusive is this building to the people of West Hollywood? Who would go to it?

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

It should be carefully evaluated to determine if people will move out of the City of Weho because of these continued mammoth proposals/projects.

 acceptable to you? Bear in mind that the site is already  
 allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

It is unusual, perhaps not to my taste, but I could live with it

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

Yes

**Q9**

If so, why? Check all that apply

Other (please specify):

The 2 towers provide a few corridor for the London for sure. It would be great if other view corridors would be considered as well.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

It's a huge building; visually, it seems less huge by separating it into 2 volumes which themselves are aesthetically different.

To separate the condo/affordable housing from the hotel rooms**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very positive**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

With the London effectively already being above 10 stories when you include the penthouse level, rooftop deck structures, and above-grade garage at the South of the site, I see no issue with the proposed height of this design.

**Q12**

Any other comments about the design

I appreciate that the massing is split between two towers. It is a design that does not appear "heavy", which helps to reduce the impact of the height. I live right below this project in Norma Triangle and have no issues with the design or scale.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Parking requirements

**Q14**

General Comments about 8850 Sunset / Viper Room project:

A great project with proposed variances that I believe could be warranted, especially given that there are plenty of precedents for a building of this height on the strip (9000, The Edition, 9200, Sierra Towers, etc.).

**Q10**

**Negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Its height not only affects the London. It effect residents in all directions. Especially my family and friends who live north of Sunset Blvd.

---

**Q12**

Any other comments about the design

Not pleasing to the eye. Lacks any real beauty.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Pollution. Noise from the project.

We hear the London events music and weddings sometimes. This complex is much closer. Noise, music sounds could be 10 x as loud. Possible helicopter usage? Helipad.... is that really being considered?

---

#### Q14

General Comments about 8850 Sunset / Viper Room project:

The project is Way over the top. It will push residents away. However, I feel middle and lower income families are not the target clients of this project or for the future WEHO that is envisioned by leaders of this city.

The money will prevail. This project will be greenlighted with maybe tiny insignificant changes. The citizens do not have sway here. It's the wild west. Money talks. Also using the name Viper room and giving people the impression that any bit of its legacy as a rock club is being preserved is laughable if believed. This is just another way to make the project palatable to anyone who liked or was concerned about the Vipers demise.

Viper Room will just be used for it's name for a while but it will not exist as a rock club for it could not possibly bring in enough revenue in a project of this size. Using Viper as part of the name of 8850 will quiet many dissenters. It was a clever idea.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

The building incorporates roof and terrace landscaping. Very nice. Although other buildings have gained approval with those "green" aspects considered for approval. Within a couple years of occupancy, the landscaping is neglected and is looks awful. This is how developers get a bad name. The COA should require design elements (roof and terrace landscaping) are not neglected or removed. The IAC building at 8800 Sunset has maintained their greenscape wonderfully. I've been pleasantly surprised after this amount of time. Yours would be a nice complement if everyone continues to maintain their unique design elements. Thanks.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

**To separate the condo/affordable housing from the hotel rooms**

,

Other (please specify):

Both above and to reduce "massing" of size in general. Having the two towers also gives more open space when looking up to the hills from Santa Monica Blvd, down from Sunset, and along Sunset. I live in WeHo, and will see this from house. I prefer something as landmark making as this design than something boxy. Parisians were protesting the Eiffel Tower when it was built. Now its a statement.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very positive**

---

Page 6: Other Comments About the Height & Design

**Q8****No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9****To save the London Hotel's view**

If so, why? Check all that apply

**Q10****Positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

## Page 6: Other Comments About the Height &amp; Design

**Q11**

Any other comments about the height

Not really out of place with the rest of the recent development on the Sunset Strip.

**Q12****Respondent skipped this question**

Any other comments about the design

**Q13****Respondent skipped this question**

What other areas of concern on this project would you like future surveys to cover?

Page 2: Page 1

**Q1**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

**Live,****Drive,**

Other (please specify):

I reside on Larrabee Street

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Yes****Q3**

Did you frequent any of these places?

**A few times a year****Q4**

Are you aware that this block is slated for development?

**Yes**

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**10,**

Other (please specify):

I think 10 stories is too high but that is what the law allows. In my opinion, the building shouldn't be any taller than 7 or 8 stories as it will tower over the neighborhood and impact the aesthetics of the residential areas surrounding it.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

The building is very out of character with the neighborhood aesthetics. I wouldn't be opposed to a building like this in Downtown LA or in an urban city, but not in West Hollywood.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

A building of this height is entirely too tall for the neighborhood.

**Q12**

Any other comments about the design

Scale the design back so the building looks like it belongs in the area.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

The traffic impact the project will have on the residents of Larrabee and the surrounding residential streets, both during construction and after the project is completed.

**Q14**

General Comments about 8850 Sunset / Viper Room project:

I am very much opposed to this project.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is too different and out of place for WeHo; while I like a modern look, this is too much.**

,

Other (please specify):

The induced renderings are not as bad as the originally reported look of the towers. Still, the white west building is one of the ugliest proposals I've seen. Love the east tower though. I think the project, as is, will bring publicity I'm just afraid it will be a "what were they thinking" buildings 10 years from now.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

**To separate the condo/affordable housing from the hotel rooms**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

The height doesn't bother me. I have no problem with building up in the Sunset corridor. Post COVID the City will need to replace revenue. A larger hotel will hopefully bring more TOT.

**Q12**

Any other comments about the design

I find it too sharp and angular. I do not think it will age well.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

You seem to have covered it, perhaps demographics of expected customers, i.e. approximate room and condo prices. Who is their market? Who will be operating?

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

This block needs to be developed. I'm not sure this is the right look.

Do you live, work or regularly drive along Sunset Blvd  
between Doheny and La Cienega? no

---

**Q2** Yes  
Are you familiar with block that currently houses The Viper  
Room, Turner Liquor, Sunset Liquor, Amarone Ristorante,  
Take-Sushi, and the former Aah's?

---

**Q3** Less than once a year  
Did you frequent any of these places?

---

**Q4** No  
Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** No  
Given the rationale for the 15-stories, do you support the  
additional height for this project?

---

**Q6** None of the above,  
Other (please specify):  
8  
If not, what is the maximum height that would be  
acceptable to you? Bear in mind that the site is already  
allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7** It is too different and out of place for WeHo; while I like  
a modern look, this is too much.  
What do you think about the design of the project?

---

Page 5: Towers

**Q8**

**No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

**To save the London Hotel's view**

If so, why? Check all that apply

---

**Q10**

**Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Disgusting. How did this architect get selected?

---

**Q12**

Any other comments about the design

Worst design I've ever seen. It looks like junk and is laughable.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

How an architect is selected.

This is a joke. The committee who selected him should be fired.

Start over w a design that is tasteful. Get a different architect.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Needs to be classy and an asset to the area.

---

---

**Q10**

**Neutral**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

concerns about height more in relation to what the developer and building will do for the community in exchange for the community accepting a large hulking tower. I'm not against the tower height but must be something for the clear benefit of the community and not the developers.

---

**Q12**

Any other comments about the design

really wild, expensive to upkeep. Need real sustainability and long term thinking and not just plants.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

community benefit, sustainability, long term view of the city.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

pro building and modernization, need housing for community good and not just for ultra rich or visitors.

---

**Other (please specify):**

It's out of place here in WeHo. I've lived here for 40 years and the towers are just too much of an addition. It's all too too too much. It is opposite of West Hollywood's charm. It will also bring outsiders to WeHo. We are a cozy little place. It stands out like a sore thumb. Today big and ugly.

**Q10****Very negative**

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

Derivative. Ignores the location. All balconies are unacceptable as there use will lead to noise and privacy issues for current residents.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

Condo/hotel can be separate floors and entrances.

Affordable housing should not have a pauper's entrance.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

They both look poorly designed and inappropriate for the site.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

More floors = more traffic.

**Q12**

Any other comments about the design

West Hollywood should have its own architectural style, and not be seeking derivative and twenty-year old designs.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Construction issues. Licensing issues. Noise issues and policing once constructed. What will the site bring to local people - local people won't stay there, buy there, or frequent the tired concept that is The Viper Room. Locals use the restaurants currently there, along with Turners. Sunset Strip is a food desert when it comes to markets. All we have are Turners and Sunset Oil.

#### Q14

General Comments about 8850 Sunset / Viper Room project:

It's currently so ridiculously bad it, it must be an opening hand in the developer's negotiation. When the next design comes through, no matter how poor or inappropriate it is, there will be pressure on others to concede to the developer's wishes because they've offered concessions.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**None of the above,**

Other (please specify):

It resembles something spewed from a malfunctioning shredder. The aesthetic is putrefy cosmetic and apart from the gap to accommodate views has no connection to function. If only Zaha Hadid were alive. Is Renzo Piano available. Do we really have to have this charlatan? Imagine how this will be perceived in 25 years time?

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

Other (please specify):

Make the corporate wealthy live with the rest of us.

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

Both are catastrophes.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Far, far too high. Nothing to do with the character of West Hollywood.

---

**Q12**

Any other comments about the design

The aesthetic sensibility of a mollusc.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Does its help Homelessness?

More affordable housing.

Who stands to profit.

What alternative concepts are there? If none, why?.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

No.

| General Comments about 8850 Sunset / Viper Room project:                                                                                                                                                                                                                                        |                                         |
| I've always thought so many stretches of our major boulevards are underutilized. We live in the 2nd largest metropolitan area in the country - change is constant in urban environments.....some buildings need to be protected for posterity....but this is an unremarkable stretch of Sunset. |                                         |

**Q3** **A few times a year**

Did you frequent any of these places?

**Q4** **Yes**

Are you aware that this block is slated for development?

Page 3: Sunset Specific Plan (SSP)

**Q5** **Yes**

Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6** **None of the above,**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Other (please specify):

Given our needs and the ability for large scale mixed use projects to fulfill them sustainably, we should seriously make the case for 50+ story mega skyscrapers that rival the UAE, we are well into the 21st Century. At-least 10% of the residential unites should be allocated for affordable or Public Housing (like the UAE projects) because this investment in society really pays off

## Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**None of the above,**

Other (please specify):

YES the unique mixed design belongs in the Great City of West Hollywood and I wish to call out the dog whistle racism with the Dubai analogy being used. Many large scale projects have brought affordable and even free public housing to the UAE and, it would benefit West Hollywood to do the same. The disconnect has to do with Morphosis Architects being largely limited to conservative western white males with no connection to West Hollywood in stark contrast to Zaha Hadid Architects <https://www.zaha-hadid.com/> or Hadid Design & Development Group (a completely different company from Zaha Hadid) that routinely hires Women & Minorities. West Hollywood has University educated designers who know very well how to use CAD programs for design and even Finite Element simulations that can test that design. There are also people with experience in integrating real time construction with the CAD designs to greatly reduce on the job errors and delays. The 8850 project is an innovative and striking design that can WIN if those running it can convince West Hollywood to claim it as their own and, this is easily done when you get the locals involved in the project.

## Page 5: Towers

**Q8**Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?**Yes****Q9**

If so, why? Check all that apply

Other (please specify):

YES, I think it's a great design but, be sure not to make the affordable housing any less than the quality of the hotel!

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very positive**

## Page 6: Other Comments About the Height &amp; Design

**Q11**

Any other comments about the height

In the next 20 years it might be one of the shorter buildings!

---

**Q12**

Any other comments about the design

The contrasting 2 tower design could go a long way to becoming an iconic West Hollywood land mark.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Let's see some West Hollywood Designers involved in the design and development of the project

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Let's make this serve the Public Interest

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

Yes

**Q9**

If so, why? Check all that apply

To separate the condo/affordable housing from the hotel rooms

,

Other (please specify):

While either tower could stand alone as a project, having them connected in this unique way will give the project a prominent place on Sunset Blvd as well as helping to redefine architecture in West Hollywood and Los Angeles area from the generally bland and unimaginative to something much more creative and landmark defining.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Positive

Are you aware that this block is slated for development?

**Yes**

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**Yes****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**

Other (please specify):

The proposed height is suitable for the area and work well into the look of Sunset Strip. 15 stories is still a mid-rise and any reduction in proposed height will diminish the impact of the design and is not the greatest use of land at any reduction.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

Out-standing development. This will be iconic and progressive for West Hollywood. The concept and planning are on the right trajectory to revitalize the Strip.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

**To separate the condo/affordable housing from the hotel rooms**

,

Other (please specify):

TOT is vital to West Hollywood's revenue to grow the services and in all department. This directly benefits our residents and attracts more options to grow the tourism industry.

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very positive**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

This process is working organically and fits into the City's strategic plans and vital to achieving the 21st century vision of The Sunset Strip.

---

**Q12**

Any other comments about the design

Get started already!

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Planning will do their job on necessary adjustment that may arise.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

The acclamation and recognition for this project is all positive. This will serve to draw commerce to West Hollywood.

---

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,  
Other (please specify):  
Nobody liked the Eiffel Tower when it was built. Los Angeles needs to increase density around transit hubs (Santa Monica/San Vicente). This is inevitable.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

Other (please specify):  
I generally like the two part design. The overall design and density (not the just the height) of the project should be what is under review.

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):  
The architect adeptly handled an aesthetic balance.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

This shouldn't just be about height.

---

**Q12**

Any other comments about the design

I generally like the design a lot and live in close proximity.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

None.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Would like to read architect's comments on design process leading to this solution.

**Q1** **Work**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2** **Yes**

Are you familiar with block that currently houses The Viper Room, Terner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3** **Less than once a year**

Did you frequent any of these places?

---

**Q4** **Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **Yes**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **14**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7** **Some of his other work which is not quite so wild and more toned down would be better.**

What do you think about the design of the project?

---

## Page 5: Towers

**Q8****Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9**

Other (please specify):

If so, why? Check all that apply

Na

**Q10****Neutral**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Live

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

Q2

Yes

Are you familiar with block that currently houses The Viper Room, Terner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

Q3

Less than once a year

Did you frequent any of these places?

---

Q4

Yes

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

Q5

No

Given the rationale for the 15-stories, do you support the additional height for this project?

---

Q6

**None of the above,**  
Other (please specify):  
Ten on the San Vicente side. 5 on the Larrabee side and in the southern side

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

Unsuitable for the location. Might be just fine in an open area That has a lot of surrounding free space. Also would find this building very interesting in the valley or on a vast plain. Not in this location. It feels suffocating

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

The builders are trying to jam too much into one site

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

My problem isn't with the design. It's with the design being built at this location

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Too towering This is the worst possible place on the Sunset strip for such a tall building. It will literally loom over the London Hotel and everything south of it. It will become the only visual focal point in this entire section of West Hollywood

**Q12**

Any other comments about the design

I fear a white elephant. But once it's there it's not coming down. It's the type of building The tourists like to take selfie's at. When they are there for five minutes period. It's the type of tourist attraction design that will play havoc with traffic

**Q13**

What other areas of concern on this project would you like future surveys to cover?

All of the above. Also the nearby earthquake line. The underwater streams in this part of town. How this building could better service and be compatible with the community. Versus only with tourists and very rich people

**Q14**

General Comments about 8850 Sunset / Viper Room project:

During conversations at previous meetings with local residents, The developers have behaved arrogantly. They repeatedly mentioned how lucky we were to be getting 10 apartments. They are treating us like unsophisticated Hicks and it's really offensive

---

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**

Other (please specify):

4-6 stories. Yes, the Sunset & San Vicente corner is listed as a Target Site - but is the Sunset & Larrabee corner also listed as such? I say this because the proposed 8850 Sunset project will dominate both those corners, even though only one is a "major intersection." In contrast, the recently built West Hollywood Edition only touches one corner - Sunset and Doheny - which is indeed a Target Site-defined major intersection. Should the 8850 Sunset project be greenlit as is, its outrageous 15 story height would literally \*blot out the sun on Sunset Boulevard.\* Its sight would dramatically alter life for anyone living in surrounding neighborhoods, especially Larrabee Street, San Vicente and Sunset Blvds. We love our view of the Hollywood Hills, too. And it would forever be blocked by this Las Vegas-sized hotel complex.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

This "view corridor" is more like a keyhole in a large, crazy door. Any "view" attempted to be salvaged by its construction is soured by the framing of the building itself, its distracting architectural style. Because this project would dwarf any construction south of Sunset as well as anything east or west of it, it dominates the conversation at any point in the viewer's optical periphery, rendering whatever small area might be seen through it as moot in value.

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

Other (please specify):

I think it was part of a loophole scheme to allow these hotel developers to build a structure far too tall for this spot. Creating a small hole in its center gives the developers a defense - a weak and perfunctory one, yet still an argument - against an inevitable and justifiable complaint from The London Hotel about the obstructed view.

**Q10****Negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

## Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

As I stated previously, Larrabee Street is not at all a major intersection, thus should not be defined as a Target Site allowing for a height variance. I live on Larrabee and my condo faces northward, with a view of the hills which this 8850 Sunset project would block. While the small hole in its center was designed to give its developers a talking point against complaints from The London Hotel, that same hole would be even more useless when viewing the proposed building from any other angle, as from my home on the east side of Larrabee. All I'd see are those proposed giants ruining my current northeast view - a lovely aspect of my condo which convinced me to buy in West Hollywood. We local property owners should have just as much right to what we see outside our door as The London does. And it would be impossible to step outside my building's front door without having this proposed monstrosity looming over me like a descending spaceship.

---

**Q12**

Any other comments about the design

Its weird design just doesn't match any current aesthetic in this area, it looks more at home on the Vegas strip (or yes Dubai) than on the Sunset Strip in this part of WeHo. In contrast, The West Hollywood Edition built a few blocks east is elegant yet not at all so blunt or intrusive in its style. This 8850 Sunset design seems to ignore that people actually live here, and that we do not want the skyscraper congestion of downtown urban areas. We need to be able to see things like hillsides and downhill vistas. This building's design would obstruct those for everyone who lives and works within a five block radius. This design invites claustrophobia into what is currently a charming neighborhood.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Noise pollution - not just from its construction, but mainly from its daytime/nighttime use once it opens for business.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

I've lived here on Larrabee Street for 20 years and I've never seen any new change summon a fraction of the protest from locals that this project has. We realize the property has been sold and that its new owners have every right to demolish what's there and build anew, but we just want the new structures to be reasonable for this neighborhood - one which includes the Sunset Strip as well as several blocks of low-standing residential buildings. I hope our City Council proves that it heeds the concerns of its constituents over wealthy developers. We really need our government to come through for us here.

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

The strip is unique to LA, and belongs to the character of the city, so why bulldoze it? Why install a building mainly planned to give rich tourists a view up a street?

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

Doesn't feel like any part of LA that I know. Doesn't feel human in scale.

---

**Positive**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

In general LA is building too high. The Millennium Project in Hollywood at 30+ stories is even more egregious. If there's a plan to build to 10, then just build to 10. That's already enormous compared to what exists now, so take your stupid win and stop trying to help developers get even richer.

**Q12**

Any other comments about the design

Honestly it's not the worst in terms of architecture on a drawing board. But it doesn't feel like part of a neighborhood.

**Q1** **Work, Drive**  
 Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

**Q2** **Yes**  
 Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Q3** **A few times a year**  
 Did you frequent any of these places?

**Q4** **Yes**  
 Are you aware that this block is slated for development?

Page 3: Sunset Specific Plan (SSP)

**Q5** **Yes**  
 Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6** **None of the above**  
 If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Page 4: Architectural Style

**Q7** **It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**  
 What do you think about the design of the project?

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

**To separate the condo/affordable housing from the hotel rooms**

If so, why? Check all that apply

---

**Q10**

**Positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Love that it's one development with 2 different looks

---

**Q12**

**Respondent skipped this question**

Any other comments about the design

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Parking, street level business that provide more than just expensive restaurants.

Other (please specify):

To create visual interest for the building by having different tower designs and creating tension between the airy glass tower and undulating white tower.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Positive

**Q1**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

**Live,****Drive,**

Other (please specify):

I live on Larrabee and this would greatly effect my livelihood- the amount of traffic, noise and pollution would be unbearable

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Yes****Q3**

Did you frequent any of these places?

**More than once a month****Q4**

Are you aware that this block is slated for development?

**Yes**

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**10**

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,  
Other (please specify):

I feel this design doesn't match the aesthetic of the area AT  
ALL- it's an eye sore

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think  
two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

**Respondent skipped this question**

**Q10**

There have been many comments that the two towers  
don't look like they belong to the same building. Do you  
find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

it's too high. it disrupts the view of all the surrounding homes and existing buildings

**Q12**

Any other comments about the design

it is not pleasing to the eye. it's ugly

**Q13**

What other areas of concern on this project would you like future surveys to cover?

pollution, construction noise, traffic

**Q14**

General Comments about 8850 Sunset / Viper Room project:

please keep the Viper Room and just update it from the original bones

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

It will impede the views of the hills! Residents like to look up at the sparkling Hollywood Hills at night, not a hideous glass tower that will take the charm out of West Hollywood. Tall buildings belong DTLA, Century City, Wilshire corridor, is this what we want to become of Sunset? It is already DEAD and it will be just as dead as Wilshire Blvd in the mid-city area once they tear down and build these empty glass towers that will remain EMPTY.

**Q12**

Any other comments about the design

Too tall; not opposed to design if it weren't so overwhelming.

**Q13** **Respondent skipped this question**

What other areas of concern on this project would you like future surveys to cover?

**Q1** **Drive**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2** **Yes**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3** **A few times a year**

Did you frequent any of these places?

---

**Q4** **Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **None of the above**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7** **Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

What do you think about the design of the project?

---

Page 5: Towers

**Q8**

**No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

If so, why? Check all that apply

Other (please specify):

I think these new density rules are ridiculous. We are on fault lines here. The damage & loss if life potential has to outweigh any other factor.

---

**Q10**

**Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Earthquakes, people! It is the height of folly to endanger lives in this way.

---

**Q12**

Any other comments about the design

It's ugly. Butt ugly.

---

**Q13**

**Respondent skipped this question**

What other areas of concern on this project would you like future surveys to cover?

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Increase in law enforcement & emergency services to cover this increased density.

---

**Yes**

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Other (please specify):

I like the look of the building-no we compare ourselves to the future the way others around the world have, our love for old trashy looking buildings is disturbing. I played in a band for 20 years and playing The Central/ Viper whole in wall and the Starwood, our bands biggest money maker,Mt he Whisky which was a great place for punk ska rock ROXY WAS FUN AS WELL. I HOPE ALL INTERIORS HAVE BENN UPDATED. Personally the height doesn't bother me since everything must dig down deeper and go higher for a population growing. Personally-the old Gazarris/live oak? Can go. Played their as well as the other famous artists. Love the look and height. Besides I can see every new building on sunset as I walk my dog. Nice skyline Like Dubai, Shanghai, London, NEW YORK'S NEWER BUILDINGS—

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

Dubai and WeHo and LA And Austin and Ho CHI MINH, and London, NYC, ATLANTA——We are a musical, artistic, creative cultural center especially WEHO, I have met great musicians and writers and artists at my old age of 64 and I still feel young in this city. The older buildings get painted but still look horrid as I walk along commercial and residential buildings. Frankly why do we keep any part of the old buildings just we build them with look alike-hey it works with bands being tribute bands playing old songs by younger look a likes. I look around at buildings kept and remodel and I think of how many rats, deaths, murders, drug deals went down at each location. What lies under the old red booths of the old restaurants and bars—names if you want?- I usually find dirt and dirt and old newspaper articles I love the new trends of building construction—when I lived in Malibu, the neighbors were burnt out of red wood homes while mine was new and stood up to the fire. The new homes modern, safer, taller and fire protected. I obviously want new construction of buildings. I don't need the reminders of death and overdose and destruction. Height is gorgeous going to the heavens, reaching for new destinies. Oh and noise? Have you lived here-gardeners have free range for noise everywhere and every day, the pollution caused by blowers is horrible for one's health. Oh and the detours for tree trimmers—ficus destroying everything in the roots conquest for water—the ficus trees are too big and need replacing with trees that have roots going straight down, but NOPE—WE TRIM THE BIGGEST TREES —Which have destroyed my sewers and car when limbs fall and need constant cleaning. Give me the view through a building rather than the gigantic biggest tree on the street. The worst ficus ever—and I lived among orchards and 60 year old trees by whole life—plus underground wiring in Sherman oaks hills as well as Malibu or Malibu west. The grossest buildings, ficus trees, gardener blowers, and the telephone poles with overgrown greenery are more disturbing at this lower level height than the new architectural buildings of the future. Keep WeHo small —with all these weird problems no one takes care of means likes make it new, underground and proper vegetation planted that don't destroy. The integrity of the city are the denizens surviving the ancient trees, wires, and constant gardening by people that have no care in how things are done with no harm Let's look at problems at street level and not a height of new thoughts, desire and inspiration. Yes I have issues with the living conditions on Orlando, Harper, Sweetzer, Willoughby, Fountain and on and

on. Look low and see the problems down and underground

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View Corridor Do you think two towers is an important part of the project's concept?

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**10,**

Other (please specify):  
rules are rules for a reason. no variances to private companies.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

leave our ground floor historic low-slung weho alone. we like simple short small businesses too.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

whole design is flawed

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

way too high, whole strip is way too high. we lose connection to the hillsides

**Q12**

Any other comments about the design

half-assed freshman skills

**Q13**

What other areas of concern on this project would you like future surveys to cover?

water pipe replacements. lowering height.

**Q14**

General Comments about 8850 Sunset / Viper Room project:

leave viper room alone. this as ugly as ramada replacing tropicana.

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **None of the above,**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**Other (please specify):**

I would prefer that whatever is developed is within the average height of 4-6 stories

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**None of the above,**

Other (please specify):

It is not anything resembling that firms best work. The whole thing is ridiculously out of scale and amateurish with the one tower leaning like a drunk on the other. Cute as a metaphor for the neighborhood but I don't think the message they were meaning to send.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

OUT OF SCALE!!

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

I do not find anything redeemable about this design, much less appealing.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

WAYYYY too tall

**Q12**

Any other comments about the design

Start over

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Appropriately sized development for the neighborhood. This isn't Vegas

**Q14**

**Q1** **Live, Drive**  
 Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

**Q2** **Yes**  
 Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Q3** **A few times a year**  
 Did you frequent any of these places?

**Q4** **Yes**  
 Are you aware that this block is slated for development?

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**  
 Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6** **Other (please specify): stay within the current zoning laws.**  
 If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

traffic abatement.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

It's either the ugliest piece of architecture i have ever seen or it's outstanding in some perverse architectural universe. It does not take into considering the buildings around the area, the hills and the natural beauty of Sunset Blvd. The best part of this is that I'll probably be dead before the completion of this building.

**Positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

I am fine with the height as long as the architect is unique and well-designed, unlike most towers built in LA currently. The design needs more refinement, but otherwise the height is fine.

**Q12**

Any other comments about the design

The west tower seems to echo Zaha Hadid but not to the same level of execution and design harmony with the east tower. I don't mind that the two towers have different designs as long as the communication between the two is interesting. The design needs more refinement for this to be achieved.

**Q13**

**Respondent skipped this question**

What other areas of concern on this project would you like future surveys to cover?

## Q14

General Comments about 8850 Sunset / Viper Room project:

I am excited for this to finally get built. I hope it activates the street and adds visual interest during the day as well as night. I like the overall design but wish for more design refinement (a la Zaha Hadid). Jarring for shock value does not equate to good design. The buildings are well-situated on the lot. More greenery at street level in addition to on the building is always welcomed.

**Q6** **10**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

Over inflated, out of control and just plain ugly. Not trying to be rude, just honest.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

Two towers or one, as long as the height and scope of the building(s) is kept under reasonable there should e no problem with views of other buildings.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

As I stated earlier, the design is over done and ugly. Does not belong in WEHO. KEEP IT CLASSY.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Too tall. Reduce the number of floors, between 4 and 10 should be sufficient for any building on Sunset.

**Q12**

Any other comments about the design

Stop with the over designed, ultra modern, designs. The Pendry residences should be a warning to all designers and developers in WEHO. The glass and chrome finishes are a nuisance to the surrounding neighborhood causing sharp, bright reflections into the other residences in the neighborhood.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

We have seen no reports on how traffic will be addressed at these intersections due to the increased population of the residences and businesses this development will bring.

#### Q14

General Comments about 8850 Sunset / Viper Room project:

The area can be modernized without going full-on "5th Element" modern. Maybe try to keep a Viper Room entertainment facility, similar to the proposed development taking over the "Barney's Beanery" location (although Viper Room is much more worthy of saving than Barney's).

---

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

the height should be the same as the zoning permits....once the design is modified to comply, fewer critics will remain.

---

**Q12**

Any other comments about the design

Avoid any moving advertisement or large billboards

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

operation logistics of loading docks, trash removal. The illegal AKA hotel which the city caved on, does not have a loading dock for all of furniture movements and are often unloading on Sunset Blvd.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

There is nothing historic about the area. modify the design, lower the height and you will get approved

**Q5** **No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **10**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**None of the above,**

Other (please specify):

There are enough buildings by Thom Mayne in Los Angeles, and it is out of touch for our community to have a building designed by a white, hetero architect who has made his career by designing justice centers and courthouse that incarcerate people of color.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

**To separate the condo/affordable housing from the hotel rooms**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

No

**Q12**

Any other comments about the design

See previous comments, no more white cismale hetero architects

**Q13**

What other areas of concern on this project would you like future surveys to cover?

None

**Q14**

General Comments about 8850 Sunset / Viper Room project:

None

**Q7**

What do you think about the design of the project?

It is too different and out of place for WeHo; while I like a modern look, this is too much.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

No

**Q9**

If so, why? Check all that apply

Respondent skipped this question

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Negative

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

I disliked how some of renderings skew the perspective. For it to be accurate would mean the London Hotel would be perhaps five times farther away than the renderings show. That the developer was dishonest in the renderings makes me question what else they might be dishonest about vis-a-vis this proposal.

**Q12**

Any other comments about the design

It would be more interesting if there were more such buildings on Sunset. It doesn't speak to anything else and as such, there is the danger it would become a white elephant. I suppose the same could be said about the proposed Frank Gehry project at Sunset/Crescent Heights, but I admire that design. It's different enough to be interesting but not so different as to be a white elephant.

**Q13**

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is unusual, perhaps not to my taste, but I could live with it**

,

Other (please specify):

I just want to make sure the public benefit is well defined, codified and appropriate considering the number of extra floors the project is getting. I think the developers should have to guarantee free public access to a viewing deck and terrace space on the roof, and create a performing arts space that any grantees of the City can use for no charge.

**Q1** **Live,**  
Do you live, work or regularly drive along Sunset Blvd **Work,**  
between Doheny and La Cienega? **Drive**

---

**Q2** **Yes**  
Are you familiar with block that currently houses The Viper  
Room, Turner Liquor, Sunset Liquor, Amarone Ristorante,  
Take-Sushi, and the former Aah's?

---

**Q3** **A few times a year**  
Did you frequent any of these places?

---

**Q4** **Yes**  
Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **Yes**  
Given the rationale for the 15-stories, do you support the  
additional height for this project?

---

**Q6** **None of the above**  
If not, what is the maximum height that would be  
acceptable to you? Bear in mind that the site is already  
allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

It is very unique, makes a statement, and would be a  
World-Class addition to the Sunset Strip

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think  
two towers is an important part of the project's concept?

No

**Q9**

If so, why? Check all that apply

Respondent skipped this question

**Q10**

There have been many comments that the two towers  
don't look like they belong to the same building. Do you  
find that a positive or negative appeal to the design?

Neutral

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

Live,  
Work,  
Drive

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

Yes

**Q3**

Did you frequent any of these places?

More than once a month

**Q4**

Are you aware that this block is slated for development?

No

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

No

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**  
 Other (please specify):  
 This new building should be no taller than the London Hotel to ensure the same look and feel of the strip. If taller, it will tower over the other buildings and block the view of the rest of the city as well as act as a massive billboard and take away from the character that West Hollywood has and has maintained for many years.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is too different and out of place for WeHo; while I like a modern look, this is too much.**

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

I do not like the two tower with connection concept. It feels way too futuristic and does not maintain the charm and character that West Hollywood has.

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Zoning and rules exist for a reason. We should not be making exceptions for unnecessary buildings. There is purely no need for this to be built, and definitely no need to it to be taller than allowed. It does not add value to the strip as it feels way too out of place. There have already been complaints about too many digital billboards. Please do not add to that and turn this into a Times Square. There are quality people who live here and have lived here for a while, we do not want massive skyscrapers with funky modern futuristic design elements and digital billboards.

---

**Q12**

Any other comments about the design

It's not charming. It's way too futuristic and modern for WeHo.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Noise, light from digital billboards, increased traffic on the strip, view of the city from all units that currently do not have a view that is being obstructed and reserve the right to maintain that sight line given the existing zoning.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Not a fan. Will be bad for existing residents.

---

Any other comments about the height

Commits the city to a replacing a pedestrian-scaled block (immediately next to existing residential housing) not with something neighborhood-enhancing, like the Gruen-respectful, Caruso approach to the Palisades, but instead the old car/SUV/limo centric, build it higher, larger, and more dramatic aesthetic that in 2021 only looks great to investors, developers, and the local tax manager. Especially in a moment of impending climate disaster, WeHo city planning needs to rethink its short sighted "Sunset Blvd can be showplace" mindset of years-past and instead seek to revitalize city spaces for the people who actually live and work here by embracing pedestrian and cycling infrastructure that prioritizes projects that will bring the community into a safe, inviting, human-scaled commons

,

Other (please specify):

It breaks up the massiveness of a single building and gives variety to the eye that it looks like two different buildings/projects.

**Q10**

**Very positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Sunset Boulevard is a DEAD zone - no pedestrian traffic, and the legendary car traffic from the 60s/70s is never coming back. Higher, denser buildings will bring foot traffic back to the blighted Sunset Blvd pedestrian experience. There is no "there there" currently - it needs massive help.

**Q12**

Any other comments about the design

The design is creative, fun and unexpected - and I disagree with those that say it will be "dated" in 20 years. Come on, that's a lame argument for this particular design.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Increase the pedestrian experience and build up a better night life.

**Q14**

General Comments about 8850 Sunset / Viper Room project:

I've lived in WeHo down the street from this block of Sunset for 27 years - it would be invigorating to have a special building and the shops and amenities it would bring.

---

Page 2: Page 1

**Q1****Live**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2****Yes**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3****Less than once a year**

Did you frequent any of these places?

---

**Q4****Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5****No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6****None of the above,**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Other (please specify):

Interest along The Strip is derived from height VARIANCE -- just because 10 stories is "allowed," does not mean it should be built to the maximum

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

Two towers are two towers too much

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

They are hideous looking and don't belong on The Strip

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Again, just because you can doesn't mean you should. There is simply not enough infrastructure support to keep adding this type of density here. Take several steps back and consider public transport and traffic congestion before adding more and more density.

**Q12**

Any other comments about the design

**Respondent skipped this question**

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Impact on adjacent neighborhoods--spillover effects: Congestion, light, scarce resources

**Q14**

General Comments about 8850 Sunset / Viper Room project:

**Respondent skipped this question**

**Q5** **No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **None of the above,**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Other (please specify):

...um...earthquakes! And just because you CAN build to those heights do you really have to?!?!?!?

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is unusual, perhaps not to my taste, but I could live with it**

,

Other (please specify):

Please do not use the term, "World class" it is so pretentious!

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

the biggest design problem for me is that those 2 designs have nothing to do with each other and are competing.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

they just looks crazy/ridiculous next to each other

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

I say again, just because a builder CAN...must they! When is enough, ENOUGH!

**Q12**

Any other comments about the design

Although I do appreciate wanting to be different and trendy but again to me this design looks like there were several architects/designers and not one was willing to compromise

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Use of solar energy/climate change etc. I am also sick and tired of the BS surrounding the digital bill board craze. They are so distracting when driving.

**Q7**

What do you think about the design of the project?

**It is too different and out of place for WeHo; while I like a modern look, this is too much.**

,

Other (please specify):

why does he always want to be so different....Frank Lloyd Wright was different ...Thom Mayne is no Frank Lloyd Wright and will never be. Why not pick up something that adds and enhances the area: the Argyle Tower Hotel - with Deco the Chataeu Marmont - with European Castle touches The Whole of Sunset Plaza by the Montgomery's - with its Hollywood Regency touches The Geffen corner on South side of Sunset just west of Doheny All walkable, attractive, illustrative of Hollywood Fantasy and Illusion.... This looks like the computer CAD crashed ...my Dog ate it..... Excrement...Sore Thumb How about two similiar to the east tower, but two different hieghts.... This craziness for the sence of craziness (and unpaid gardening maintance- figure it out!!)

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**None of the above,**

Other (please specify):

I'm less concerned about the aesthetic of the design than I am about how structures of this mass would occupy the site. The proposed design is too overwhelming for its footprint and will dominate its surroundings creating visual discordance, in addition to other undesirable consequences. For that reason, the design aesthetic will not translate in this location. I would like to see a design that fulfills the aims of the SSP in a manner that is consonant with the scale of site, current businesses, and the many of us who live here and will be impacted. People make West Hollywood the city it is and that consideration should be paramount.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

**Respondent skipped this question**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

The distinctness of the two towers' design is less of an issue than that they are both out of scale to the size of the site.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Too high. It would deprive residents of privacy and put us in shade. It would dominate the neighborhood far more than a denser 10 story structure. One building should not be able to have such a disproportionate and overwhelming impact on a neighborhood of our city.

**Q12**

Any other comments about the design

**Respondent skipped this question**

**Q13**

What other areas of concern on this project would you like future surveys to cover?

How the proposed development (in this form) would detract from or benefit the city and its stakeholders. That is, why would it deserve a variance?

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

I have no objection, in principal, to the site's redevelopment but it should enhance and contribute to the city and its residents more than it removes. This current design provides no benefit to residents while extracting a hefty price. This is all loss, no gain for us.

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**  
 Other (please specify):  
 Not sure, but it shouldn't seem so intimidating to a pedestrian. Should be more welcoming from street level.  
 Not so concerned about height or whether hotel gets view.

Page 4: Architectural Style

**Q7** **Interesting, very interesting,**

What do you think about the design of the project?

Other (please specify):

Make more friendly, accessible, and welcoming to pedestrians - a large ramp pathway that meanders up to the garden terrace level with seating, viewing, and cafes. Then have glass elevators or gondolas that shoot to the top for additional viewing, public access, with availability of bars/cafes, etc. I'd approve additional height if the streetscape, breezeway, and rooftop were all integrated into a semi-public vertical park and overlook.

---

## Page 5: Towers

**Q8** **Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9** Other (please specify):

If so, why? Check all that apply

It's a unique signature look. I'm not interested in saving the hotel's view. I'd rather have more affordable units, or a "vertical park" for the community.

**Q10** **Very positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

## Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

It should probably be about the same height as other new developments in the area, not much higher. But, if there's a great public benefit like a "vertical park" the community can enjoy, I'd like that very much and would approve of much higher levels for better vistas.

**Q12**

Any other comments about the design

Design should really start with pedestrians in mind, and welcome and invite walkers to move into and upwards to the vertical park. Not make it look like it's off limits. I also think it would be cool to have some type of natural dazzling "chandelier in the breezeway - maybe the glass elevators or gondolas can contribute to this.

**Q13**

Respondent skipped this question

What other areas of concern on this project would you like future surveys to cover?

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

For affordable units, maybe have a section for BIPOC and LGBTQIA+ artists to foster the arts and diversity. Some condos should be sold at BMR for income-qualified families like they do in Boston. The lower horizontal section of the development could be income-restricted microunits 300 sqft like in NYC. Parking for all units and charging stations for e-vehicles.

**Q5****No**

Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6****10**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Page 4: Architectural Style

**Q7**

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

What do you think about the design of the project?

## Page 5: Towers

**Q8****No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9****To save the London Hotel's view**

If so, why? Check all that apply

---

**Q10****Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

## Page 6: Other Comments About the Height &amp; Design

**Q11****Respondent skipped this question**

Any other comments about the height

---

**Q12**

Any other comments about the design

I love modern and forward thinking but the look of this design is just a fail on all fronts. This looks terrible.

---

Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**

Other (please specify):

I think Sunset Blvd is headed for more ugliness with these mega buildings. It used to be a joy to walk on Sunset. It had class, space, charm. The future has none of these things. The planning commission has sold Sunset down the river with no consideration to the populace and it's enjoyment of the environment on the street. That building pictured is just about the ugliest monstrosity imaginable.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

Awful. Wrong for our community. TOO BIG! NO CHARM!

---

Page 5: Towers

**Q8**

**No**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

---

**Q9**

If so, why? Check all that apply

Other (please specify):

It's IMPORTANT TO STOP IT!!!! It's ghastly. Horrible. Ugly.  
Not right for Sunset!!!

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

Again, awful, ugly, wrong.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Your commission is bound to ruin Sunset if you keep kowtowing to the money people. You will have betrayed the community.

---

**Q12**

Any other comments about the design

Don't you have eyes??? These buildings are hideous.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

STOP THIS PROJECT

**Q5****No**

Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Other (please specify):

Seems like the project should be similar height to other buildings in the area (sunset and doheny office bldgs, sunset and la cienega AKA buildings...)

Page 4: Architectural Style

**Q7**

**Some of his other work which is not quite so wild and more toned down would be better.**

What do you think about the design of the project?

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

**To save the London Hotel's view**

If so, why? Check all that apply

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

Other projects like AKA have developed multi tower projects that look cohesive

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Should respect homeowners above sunset blvd who have lived there for years- they deserve to keep their views as well where possible

---

**Q12**

Any other comments about the design

The design of the edition hotel seems to be not too distracting while still being striking - personally I love the natural looking elements of this proposed design- less excited about the other tower

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Entry and exit to parking- it's a very congested stretch of sunset already

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Sad to lose historic viper room but excited to beautify this area!

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

---

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**Q9**

**To save the London Hotel's view**

If so, why? Check all that apply

**Q10**

**Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

None

**Q12**

Any other comments about the design

No

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Traffic, necessity, benefit to the community, overall impact

**Q14**

General Comments about 8850 Sunset / Viper Room project:

It's too big and out of place.

## Page 6: Other Comments About the Height &amp; Design

**Q11**

Any other comments about the height

It doesn't fit the style, mood, nostalgic charm of the Sunset Strip; it serves to diminish all of that and/or obscure the views for neighboring buildings. The architect should bring this building to Las Vegas or Atlantic City where it fits amongst the pre-established steel and concrete erection contest.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Give the city an inch they take 12 inches. This will set a precedent for all other buildings to be same height or taller. Nothing about this height or look of the building embraces the look or feel of West Hollywood and it's residents. It's completely out of character for the city

---

**Q12**

Any other comments about the design

Perhaps this belongs in DTLA. It absolutely belongs in Dubai. It's absolutely does not belong on the strip and it looks ridiculous

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

I'm disgusted the city is allowing what's left of it's history to be "reimagined ". All that will be left of West Hollywood's rich history will be a plaque commemorating the past. They paved paradise and put up a parking lot indeed. Where is the preservation committee?!

---

**Q5** **No**

Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6** **10,**  
 Other (please specify):  
 Maximum allowable with no additional allocation

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Page 4: Architectural Style

**Q7** **Belongs in Dubai, not WeHo. Nothing to save here, let's start over**  
 What do you think about the design of the project?

Page 5: Towers

**Q8**

**No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

If so, why? Check all that apply

Other (please specify):

It shows little imagination and instead represents 21st century gluttony. Besides, this so called architect is a total copy cat to the Frank Gehry project on Crescent Hgts and Sunset.

---

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

This design is out of place for the vernacular of the neighborhood.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Too tall and out of place for the neighborhood. Will the guests of the 15th floor get to watch the elementary school children at play all day at the school across the street? This is not appropriate.

---

**Q12**

Any other comments about the design

I do not support this design, the additional height request is not appropriate given the school across the street and Sunset does not need to become Wilshire corridor.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

All of the above

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Start over. Think Art Deco rather than Dubai.

---

**Q1** **Drive**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

**Q2** **Yes**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Q3** **A few times a year**

Did you frequent any of these places?

**Q4** **Yes**

Are you aware that this block is slated for development?

Page 3: Sunset Specific Plan (SSP)

**Q5** **No**

Given the rationale for the 15-stories, do you support the additional height for this project?

**Q6** **None of the above,**  
 Other (please specify):  
 Keep it as is. There is already too much density

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Page 4: Architectural Style

**Q7** **Belongs in Dubai, not WeHo. Nothing to save here, let's start over**  
 What do you think about the design of the project?

## Page 5: Towers

**Q8****No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9****Respondent skipped this question**

If so, why? Check all that apply

**Q10****Positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Q7**

What do you think about the design of the project?

**Some of his other work which is not quite so wild and more toned down would be better.**

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

**Respondent skipped this question**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

We don't need exceptions to height when there are already several other new and in-development hotels that are seriously affecting traffic along this stretch of Sunset Blvd.

**Q12**

Any other comments about the design

Ugly. Horrific.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

How did it get this far????

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Bigger is not better. Preserving the unique quality of the Sunset Strip does not have to equal over the top design.

Given the rationale for the 15-stories, do you support the additional height for this project?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**10,**

Other (please specify):

Way over build for the area!!

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is too different and out of place for WeHo; while I like a modern look, this is too much.**

,  
Other (please specify):  
Tone it way down!!

---

Page 5: Towers

**Q8**

**No**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

Other (please specify):  
This building as proposed is not scaled to other building located in the neighborhood. It would stand out in a bad and obnoxious way and be way over built.

**Q10**

**Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

scaled down maybe?

**Q12**

Any other comments about the design

Please do not destroy the area and the character of the Sunset strip

If so, why? Check all that apply

**Respondent skipped this question**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

This building looks like CGI special effect in a Marvel movie - its Cyclops, the building that morphs into a machine! Its needy and tone deaf to everyone around it, which granted is a very West LA concept.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

None that are repeatable in mixed company.

**Q12**

Any other comments about the design

Its extremely revealing about the character of all involved. Its narcissistic, loud, self-centered and aggressive. It's creepy and very Ovitz.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

---

Page 2: Page 1

**Q1****Live**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2****Yes**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3****More than once a month**

Did you frequent any of these places?

---

**Q4****Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5****No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6****10**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**None of the above,**

Other (please specify):

This design is hideous and does not define architectural sophistication. This neighborhood deserves something very classy and pleasing to the senses not an assault to them.

---

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

Other (please specify):

The two towers keep the project open with space that will break it up from being one large 10 story building. The architect can be more creative.

---

**Q10**

**Very negative**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

The building is too high and either they need to find a new architect or the architect needs to start from the beginning.

---

**Q12**

Any other comments about the design

The design is an eye sore and hideous.

---

**Q13**

**Respondent skipped this question**

What other areas of concern on this project would you like future surveys to cover?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**  
 Other (please specify):  
 My main concern is the fact the high rises like the one proposed will destroy the Sunset Strip character and charm. It will become a Las Vegas Strip or a Hollywood Blvd Strip, commercial and impersonal. It will mean the end of the sunset strip as we know it as families will move out

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

As I said before, this will turn sunset strip into Las Vegas strip. Horrible

**Positive**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

It is way too high. It will ruin the character of the area, block the views for hundred of single family homes. It is just a bad project

**Q12**

Any other comments about the design

The design is not the worst part about the project. The design is ugly but there are a lot of ugly buildings (I.e.: A.K.A building on the sunset strip)

The height is way to height. I would not allow more than 5 stories

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Traffic, Neighbour safety

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Should be max 5 stories. Should be a design that maintain the sunset strip charm without turning it into the impersonal, messy and unsafe area that the hollywood Blvd has become

**Q11**

Any other comments about the height

I think it is incredibly crucial that any renderings that show the pedestrian, Corredor's, also be followed up with scale model. The other projects have grossly misinterpreted the public access in public spaces. In today's world of virtual rendering, developers tend to skew the visual of what the space. Look like.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

I travel a lot and I see how other cities developed worldwide:

London, Vienna, Barcelona... We in West Hollywood and

Los Angeles are way behind and look ugly and outdated.

We need more buildings in WeHo with unique designs like

this one and the PDC/Pacific Design Center.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

**To save the London Hotel's view,**

**To separate the condo/affordable housing from the hotel rooms**

,

Other (please specify):

The London Hotel is just a hotel with daily guests who come

& go. They are not impacted like permanent residents would

be. I am guessing that London Hotel does not like a better-

looking competitor next to their location, but that's fair life in

business when things like that happen.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very positive**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

It could be 20 stories high and look even more impressive.

**Q12**

Any other comments about the design

Let's hope that something that beautiful will be built.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Low income housing  
Parking / Traffic  
Usage

**Q1****Live**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2****Yes**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3****More than once a month**

Did you frequent any of these places?

---

**Q4****Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5****No**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6****10**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

I am a developer and this project feels out of touch with even the new development locally. It is not cohesive with the look and feel of its surroundings and feels unbalanced.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

**Respondent skipped this question**

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

Completely disparate styles, and the gap to save the view corridor feels misshapen and aesthetically unpleasing.

---

**Q6** **None of the above,**  
 If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**Other (please specify):**  
 Just because 10 stories is allowed it shouldn't be built that tall. The corridor effect which you're creating on Sunset is ruining the hills and the open feeling LA/Weho has along the strip. If people wanted to live in NYC in Times Square they wouldn't be living here.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

The height is too much. It'll destroy views from the neighbors in the hills and the excuse that The London will benefit from the design is bullshit.

**Q12**

Any other comments about the design

**Respondent skipped this question**

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Traffic, traffic, traffic and noise, noise, noise. I live above Sunset and La Cienega and while the bullshit EIRs that are done by Weho said there's no impact, the decibel levels have increased so much I have to keep my windows because of the noise that reverberates off the buildings at Sunset/LaCienega.

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Too big and overwhelming and frankly quite ugly.

**Q15**

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

We all know the city council has sold their soul to the development devil. I've lived in this area since 1995 and was always attracted to the low profile and the quiet nature of this end of Sunset. This is a hideous building and I know it will happen because the city does not care about anything other than development.

---

**Q12**

Any other comments about the design

It's hideous

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Traffic, noise, congestion, crime that will all rise with this type of development.

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **None of the above,**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Other (please specify):

This is a great addition to the area and will hopefully spur more development.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

Anything to bring style and attention to this area would be beneficial. ANYTHING to replace what is there is highly desirable. Hopefully, this will spur a nice development across Sunset where the HYDE space is as it is ugly and adds nothing to the area. West Hollywood (it's own City of course) is part of a World Class City of Los Angeles and we need to be recognized for our architecture and design. I can promise you that everything that is complaining about this development will be the first ones to show it off when completed. This is a 'must do' for the City of West Hollywood.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

**To separate the condo/affordable housing from the hotel rooms**

,

Other (please specify):

My answer to Question 7 was mistaken, as I referenced the Hyde space. That was incorrect. I meant the spaces across the street from the Viper Room. I could not go back and change the answer.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

It's not just a box. It has style that would be appreciated internationally.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Build it!

**Q12**

Any other comments about the design

Please make it happen as designed. We don't need another box on the street. Also, NO lighted marquee signs! We have enough light pollution. What you have allowed at the Pendry is a travesty. That light is blinding for drivers and now every person that stays at the Hyatt will forever have to have windows covered.

Do you think two towers is an important part of the project's concept?

**Q9**

**Respondent skipped this question**

If so, why? Check all that apply

**Q10**

**Neutral**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Should not be any higher than 30 feet or the height of any tree they plant in the ground at maturity. Whichever is higher. remove a tower and plant trees instead. Too much!

**Q12**

Any other comments about the design

Too much glass and steel and not enough trees in the ground like Oak. Looks like a heat island to me.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Net Zero construction and function. Danger to avian population, ie, flying into its windows. Habitat for biodiverse population. Heat island effect. It's footprint and total square footage should be cut in half at least. It's an eyesore.

#### Q14

General Comments about 8850 Sunset / Viper Room project:

Half of the area should remain unexcavated, not hollowed out or dug up leaving the native soil in place and a natural place for people and fauna to gather outside. Install a butterfly pavilion for Pete's sake. An aviary. A real garden.

---

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**None of the above,**

Other (please specify):

This entire rendering shows us a nightmare building in a known earthquake zone. Are the developers INSANE??? The building itself, anywhere, is an eyesore. We are not Dubai or any of the Gulf countries that love this stuff. Nor Macau or China that thinks bigger and uglier is better and in the case of China, NO ONE gets a say anyway. Take a look at Paris and how the French have preserved a beautiful city. They put the 'new designs" out of the city itself. And then look at London - another architectural nightmare. . In California, buildings with potential to shake and collapse really have no place in an earthquake zone. Really. This proposed project is HIDEOUS. It violates the look of this small city and insults taste on so many levels it is egregious. Appalling and may also make West Hollywood a laughingstock architecturally worldwide. Why didn't they call Frank Gehry?

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

Morphosis hasa morphosized into a theme park mentality. My father was designer and builder of houses. His concern when creating a plan and a rendering to consider the location, the other buildings and how the his. building would complement the site. He was not a graduate of any architecture school. He did however, possess talent, common sense and esthetic sensibility. I don't think it matters how many awards an architect has won, when they create somethinglike the Sunset Project - they have made an epic fail. And they have not added anything to their list of awards. I find this design atrocious. Again - better call Frank.

## Page 6: Other Comments About the Height &amp; Design

**Q11**

Any other comments about the height

Please provide a rendering of the view being preserved from within the London Hotel. It would be helpful to see if that view is adequate and worthy of the additional stories.

---

**Q12**

Any other comments about the design

I looks a bit like a Frank Gehry building had a baby with the Peterson Automotive Museum. I like the creativity of the use of negative space in the center, but I agree that the two parts of the building seem a bit disconnected, aesthetically. That being said, I am fully supportive of developing the Sunset Strip into an architectural showplace. It is unfortunate that some of the hotels and residential buildings built lately were rather soulless. This is quite interesting, which I fully support. I was also a vocal supporter of the Gehry project at 8150 Sunset - I believe these two projects could serve as opposing gateways to the strip - finally doing justice to an iconic stretch of road.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

I would like to hear about the impact to traffic as this area is already congested. I would also like to hear about any "blackout" areas that will be fully shaded by this tall building.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

If West Hollywood wants to develop the strip, which I support, they need to greatly improve the parking. I would strongly support building several parking garages that would offer 2 hours of free parking at the various garages, as we enjoy in Beverly Hills. In addition to alleviating the parking shortage in the area, I think it could attract patrons for dining and shopping, which would benefit the economy.

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

This proposed monstrosity is completely out of place on Sunset. It's way too high and bulky.

Some rooms of London Hotel won't have a view if this ugly thing isn't super tall??? so what?! Destroying the neighborhood for catering to the whims of one business is absolutely unacceptable!!!

---

**Q12**

**Respondent skipped this question**

Any other comments about the design

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Traffic and inevitable congestion. Sunset Blvd. is at standstill most times of the day every day already. Addition of this disastrous project would magnify these problems exponentially. For us, living to the north of Sunset it means that an ambulance can't reach us...

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Please, consider the needs of residents -- we're living there, both to the north and south of Sunset Bl., and we don't need the increased traffic congestion/ lack of parking/ inability to ever get to our homes... This project will destroy multiple WeHo neighborhoods, imposing an undue burdens on residents. Please, don't cave in to developer's greed!

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Some of his other work which is not quite so wild and more toned down would be better.**

,

Other (please specify):

This appears to be a convenient project contained in his past portfolio. Some of the project resembles work of one of his practicing students and should to be claimed as his. The greenery sprouting building is tired and unremarkable. It takes an architect of vision to design something here taking into consideration climate related needs which should be addressed as a priority. Recirculating out of date plans is a disservice to West Hollywood and a reflection of the consciousness and integrity quotient of the architect.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

A view corridor is a ridiculous concept because one cannot erase the view of the offensive buildings.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

They are proposing overly used and unattractive concepts. Something fresh and innovative respecting out climate needs should be the objective. Both of these buildings have exceeded their shelf life.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Too high and a disfiguring concept.

**Q12**

Page 2: Page 1

Q1

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

Live,

Other (please specify):

I live off Dohney at Keith. Sunset is a regular transportation route.

Q2

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

Yes

Q3

Did you frequent any of these places?

Never

Q4

Are you aware that this block is slated for development?

Yes

Page 3: Sunset Specific Plan (SSP)

Q5

Given the rationale for the 15-stories, do you support the additional height for this project?

Yes

Q6

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Respondent skipped this question

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

Must of LA and certainly WeHo's buildings are standard square or rectangle boxes. For a city like LA and WeHo we need to show our creativity to the world.

---

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9**

**To separate the condo/affordable housing from the hotel rooms**

If so, why? Check all that apply

**Q10**

**Very positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

I think the designs are brilliant and would bring a much needed spark to the area.

**Q12**

**Respondent skipped this question**

Any other comments about the design

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Like everyone, traffic, parking, egress

**Q14**

General Comments about 8850 Sunset / Viper Room project:

100% in favor

**Q15**

---

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,  
Other (please specify):

This would be a remarkable addition to our City.

---

Page 5: Towers

**Q8**

**Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

---

**Q9**

Other (please specify):

If so, why? Check all that apply

It gives the design more interesting character

---

**Q10**

**Very positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

If they provide more affordable housing, I support it going higher!

---

**Q12**

Any other comments about the design

We need more thoughtful design like this, and fewer block buildings with no character.

---

**Q13**

What other areas of concern on this project would you like future surveys to cover?

How neighbors are too "NIMBY"

---

#### Q14

General Comments about 8850 Sunset / Viper Room project:

It's a worthwhile project, that although it might need some work on the edges (like MORE AFFORDABLE HOUSING), it is overall a well thought out proposal.

---

Page 2: Page 1

**Q1**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

Other (please specify):

Live on Sweetzer near Sunset. Frequently walk for exercise and drive Sunset.

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

**Yes****Q3**

Did you frequent any of these places?

**Less than once a year****Q4**

Are you aware that this block is slated for development?

**Yes**

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**Yes****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

Other (please specify):

The building is dynamic and memorable in a manner unique to Los Angeles not just West Hollywood. It has the potential to be a magnet for tourist attention. And adds a visionary statement to the building style of the West Hollywood community. It can set a tempo for more development to emulate its powerful freshness of design.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**It is very unique, makes a statement, and would be a World-Class addition to the Sunset Strip**

,

Other (please specify):

It takes courage to create out to the box concepts like this. But such buildings can revolutionize a city and its international standing. Think The Disney Hall - Toronto City Hall that put the city to the forefront of imaginative but useful design - the Guggenheim Museum in Bilbao. Etc. West Hollywood has one of the most creative populations in America but has quite vanilla buildings. This is a chance to change that.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View Corridor  
Do you think two towers is an important part of the project's concept?

**Yes**

**Q9**

If so, why? Check all that apply

Other (please specify):

To create a unique and daring structure that will put a visionary stamp on our community.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

Other (please specify):

Art is about taking the viewer into a unique experience. Frequently one that they cannot anticipate or judge until it has taken form. Conservative thinking will hold back our community, condemn it to carbon copy (ancient) thinking. We need to help those who are upset by radical change. By encouraging them to see the positives in this development.

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

I find my imagination very stimulated and my attitude to West Hollywood uplifted looking at this signature design. The path the the future.

**Q12**

Any other comments about the design

Visionary

**Q13**

What other areas of concern on this project would you like future surveys to cover?

How to help more conservative stakeholders come to grips with creative change.

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Wow.

**Q1** **Drive**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

---

**Q2** **Yes**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

---

**Q3** **Less than once a year**

Did you frequent any of these places?

---

**Q4** **Yes**

Are you aware that this block is slated for development?

---

Page 3: Sunset Specific Plan (SSP)

**Q5** **Yes**

Given the rationale for the 15-stories, do you support the additional height for this project?

---

**Q6** **Other (please specify):**  
**15 is ok**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

---

Page 4: Architectural Style

**Q7** **Some of his other work which is not quite so wild and more toned down would be better.**  
What do you think about the design of the project?

## Page 5: Towers

**Q8****Yes**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**Q9****To separate the condo/affordable housing from the hotel rooms**

If so, why? Check all that apply

**Q10****Very positive**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Q1**

Do you live, work or regularly drive along Sunset Blvd between Doheny and La Cienega?

Live,  
Work,  
Drive

**Q2**

Are you familiar with block that currently houses The Viper Room, Turner Liquor, Sunset Liquor, Amarone Ristorante, Take-Sushi, and the former Aah's?

Yes

**Q3**

Did you frequent any of these places?

More than once a month

**Q4**

Are you aware that this block is slated for development?

Yes

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

No

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

None of the above,  
Other (please specify):  
Anything over 4 stories is going to change views, wind patterns and create a canyon along sunset

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

What about the residential views...it will certainly be predominant on my view if this monstrosity goes up

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Not right for this neighborhood. Go downtown

**Q12**

Any other comments about the design

Ugly and all about the money

**Q13**

What other areas of concern on this project would you like future surveys to cover?

The development alone will severely affect the neighborhood, and our neighborhood stores and vendors

**Q14**

General Comments about 8850 Sunset / Viper Room project:

What government officials got bribed for this one

Very negative

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

I keep hearing about developers being allowed to request variances to the SSP. I think it would be a better idea if the SSP were updated and current issues address rather than just working on a case by case basis so we might have some continuity along the Strip.

**Q12**

Any other comments about the design

I really hate everything about the design. Sorry.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Respondent skipped this question

Are you aware that this block is slated for development?

Yes

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

Respondent skipped this question

**Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

,

Other (please specify):

It also just looks cool! I like that you can keep the views in between.

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Positive**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

**Respondent skipped this question**

**Q12**

Any other comments about the design

This design stands out in a good way. There have been too many "blocky" designs that have gotten built on Sunset Strip (not sure how the WeHo Planning Commission approved those hideous monstrosities.)

This at least looks good and is unique to add to the architecture appeal of WeHo.

**Q13**

What other areas of concern on this project would you like future surveys to cover?

**SAFETY!**

How to keep drugged-up mentally-crazed vagrants from wandering the Blvd and within the public spaces. These structures need to find a way to prevent people from sleeping on their spaces because otherwise it encourages more vandalism and crimes against the neighbors and visitors. Right now the WeHo City Council is encouraging and promoting more vagrants to stay and live in our city. Unfortunately, now it's up to the residents and business owners to keep this at bay.

**Yes**

Page 3: Sunset Specific Plan (SSP)

**Q5**

Given the rationale for the 15-stories, do you support the additional height for this project?

**No****Q6**

If not, what is the maximum height that would be acceptable to you? Bear in mind that the site is already allowed to be 10 stories under the SSP.

**10,**  
Other (please specify):  
Ideally any new projects would be under 10 stories. Majority of life and use of this strip of Sunset take place at our around evening time and towering buildings cast shadows along the road making for less than ideal life along the strip.

Page 4: Architectural Style

**Q7**

What do you think about the design of the project?

**Belongs in Dubai, not WeHo. Nothing to save here, let's start over**

,

Other (please specify):

I am very familiar with Thom Mayne's work especially with the Cooper Union building in New York's East Village. Nearly a decade after completion the building at 41 Cooper Sq. still does not fit in within the surrounding neighborhood. The double tower with open interior space connected by an overhead walkway on this project is an aging architect's desperate attempt to be the next Starchitect - but ultimately falls short, feels tired, outdated and lacking originality. This scheme is a scrapbook of Mayne's career - a career that has yet to complete an iconic building. One final attempt.

---

Page 5: Towers

**Q8**

Two Towers with London Hotel View CorridorDo you think two towers is an important part of the project's concept?

**No**

**Q9**

If so, why? Check all that apply

Other (please specify):

A lazy attempt at creating a "unique building"

**Q10**

There have been many comments that the two towers don't look like they belong to the same building. Do you find that a positive or negative appeal to the design?

**Very negative**

---

Page 6: Other Comments About the Height & Design

**Q11**

Any other comments about the height

Too tall

**Q12**

Any other comments about the design

Try-hard design

**Q13**

What other areas of concern on this project would you like future surveys to cover?

Affordable housing, affordable entertainment (no more 'luxury', quality of life (ie light blocking and traffic), area need for more retail (ie is there a need for more retail when nearly half of existing retail spaces are currently empty)

---

**Q14**

General Comments about 8850 Sunset / Viper Room project:

Hire a young architect who knows the area and needs of the community. Surely there is a young or LGBT+ or POC or non-millionaire architect out there

---
