*SUBJECT: The Rent Stabilization Commission will receive a presentation regarding the City's Equitable Building Performance Standards (EBPS) project aiming to improve energy performance in existing buildings as part of the carbon neutrality goal in the City's Climate Action and Adaptation Plan. Since the City has a significant number of older*

*buildings, many of which were constructed before modern energy efficiency standards, reducing emissions from existing buildings is a critical step toward achieving carbon neutrality by 2035 and improving the health of the City's buildings. Building Performance Standards are applied to existing buildings, typically of a particular size, addressing their performance throughout the entire lifecycle and progressively raising targets to achieve enhanced performance over time. Done correctly, an EBPS can serve as a powerful cornerstone policy to meet many community priorities at once: decarbonization, electrification, appliance replacement, preservation of housing quality and proper maintenance of aging housing stock, resilience, energy affordability, public health, inclusiveness and equity, workforce development, and market transformation.*

**RECOMMENDATION:** Receive and file.
